

## 57th Knowledge Seekers Workshop April 9 2015

Nicolas Chuaww from Tanzania, Dung beetle rolls the dung into a ball on the earth. The fields are being released. It collects more particle and accumulates more fields until it becomes almost a perfect sphere. As it rolls around nano layers. (:25). Talking about the absorption of energy and mass of the center to the plasma. The expansion is due to the weakness in the magnetic which allows the gravity to expand. The case of the earth is different, due to different MG fields, the gain of layers on this planet is due to the interaction of the layers. We are continuously showered by cosmic dust whose MG fields are absorbed. In Scandinavia the earth gets showered with rays of Cu, but it's different in different parts depending on the fields. Conversion according to the MG field. the internal MG field coming from center of earth determines what the Gans will become as matter, depending on the environment. (:41). Same situation happened with Mike, great teaching but the assumptions not correct, he then disappeared without correcting his knowledge. So the center mass changes, but if it increase to a point where it would change to different element. Fusion doesn't exist the way current man believes. Coulomb's barrier is the strength of the atmosphere in relation to the plasma of the solar system. What they call fusion is like trying to put to eggs together and crushing their fields. Squeezing the magnetic fields and then colliding them, impossible. For example, Plutonium as a plasma traveling through space is only a plasma, when it enters earth's fields it becomes Plutonium. Here is center error, "there is no He in the center of stars getting created". The heat generated in the center of the stars is due to the frictions of the plasmas. They become plasmas of different strengths. Supernovas, gets layered, they don't fused, they are dynamic plasmas. So scientists are all wrong, Keshe refused diploma, so Queen Mary College sent his diploma wrapped in Toilet paper roll, he values diploma that is not based on knowledge as toilet paper. The man who makes ASSUMPTIONS is the one without knowledge. (:52). Part 3. When 2 plasmas interact, for example a man and a fish, when you throw the fish line in the water you have create a line of interaction, even if fish doesn't come, through your intention to catch fish, and fish's will to survive. Same with the asteroid and the earth, come in on the gravitation of the sun. When we see Matter we think it's finished, but we see the Matter only when the MG fields reduce to level we can see, but it's not fixed. The neutron, proton and electron are still plasmas, and there interactions with environment cause friction and loses of mass, and when gets too weak gets rejected from the total mass. We think that the same electron is always there. Not true it is dynamic and changes through interaction. They continuously change orbit. Where does the electron go? This is fallacy of Stephen Hawking's, that black holes are big eating machine, wrong. Black holes are source of life through conversion and interactions with environments. The Mass is the difference between the gravitation and magnetic fields. (1:03). This one dimensional thinking has to become two and three dimensional. (if you loose more to your environment then your mass changes.) These teachings have to keep to the correct way from the beginning. Keshe's e-books will be put on like "wikipedia" webpage, which the knowledge can be added to it. It will be dynamic. (1:22). (1:35). The graphics of fields, reflect stars, the stars create "mirror" images that are only reflections. Reflection of galaxies are also out there, which don't exist but is only CuO, for example. A number of UFO's in the night sky are masked as flections of stars, and can be here in seconds. In fact they are mother ships. Getting ready to teach the Reality. Can show the plasma of a cancer. Can

participate around the world with Health program. How phantom pain is created. Have to see how the Plasma of the cancer effects the emotions of man. In Fukoshima the tests proved that they can remove all radiation (and Calcium problem), but America government put pressure on Japanese not to release Keshe involvement. They don't want that information public. (1:55). They will not allow any information to be released. Will set up Keshe Foundation in USA. (2:09). Knowledge is not spread by words but by the essence of the soul.
