

## 58th Knowledge Seekers Workshop April 16 2015

(:09). Three questions from person: 1) Disclose full effects of technology: "if I tell you full effects most of world would commit suicide. It will take hundreds of years even to understand what has been given. Like when man tried for hundreds of years to fly like bird. 3) Completing the mission of the prophets like Christ. People tried to take over the Foundation because they could make billion, but Keshe stopped them, they don't understand we want to get away from the billions. All the prophets fell short, the soul of the physicality got detached from the physicality. This is why Keshe keeps Foundation transparent and he lives comfortably and gives 20 hours a day to the work. (:25). He's aware of two souls, one is physicality and other is connection with soul of physicality and soul as a creator. Doing best not to make a mistake between the two. He sees his anger when things do not go the way they should, and seen falling in love very easily through the heart of the man, but remaining with the purpose. At all time being in control to not make the mistakes of past prophets. The knowledge of the prophet has to be like the sun, continuous and forever. The mistakes of past prophets, they got incorporated into the physicality of the planet. That is the difference. The Belgians, Canadians, and Americans blocked the use of radioactive Gans and instead he showed without it. Plasma technology releases man from the state of the matter. We use the science to preach the correct way, bringing the soul and science together, we teach the ethos of the Universe so not to hurt yourself. (:31). Can you suggest ways to understand easier? It depends on the state of the individual. The creation is one, it depends on what part of it you want to accept. Can you recommend some kind of meditation? No ... you have to recognize the totality in everything you do. If you have been privileged to love another being then you can understand the totality. There is no need for physical dimension. No easy path, every man will take it according to his own intelligence. Why don't you do miracles? We have touched the soul of every being on this planet, so we don't need the school of thought.

(:41). Somebody asks the big Alien question, Reptilians , Draconian, manipulating humanity and evil groups. Steven Greer's work. Answer: In space we do not have bad and evil, unless they change and show their allegiance to Peace, whatever you are telling about evil ET's is a fairytale. If not you would see wars everywhere around the earth and Universe. Man is not allowed in because of the animal behavior of the man. We contain we do not interfere, contain a virus, man's behavior is a virus. Evil ET's don't exist. Space is a Peaceful place. Evil is part of our own behavior, to justify ourselves. Robots have been developed to kill people. What's going to happen. Man has become dependent on the microchip. Keshe has technology to neutralize them and put man back to cave. All chips are of plastic (C - H bond). Just need to create MG field for C - H, and all knowledge last hundred years gone. Man has no choice but to turn toward Peace. The brain has a C - H bond. If the call of Peace is not answered, keshe can demonstrate power. World leaders meet on regular basis on islands. Rick this is not a joke, we give the last warning to world leaders. If your mental condition allows you to change. Next Tuesday offer package to whole human race. Introduce a new structure into the working of the man. (1:04). United Nations have no say, it's corrupted. Replace work with one soul of Man. The president must answer for Iraq and Libya etc. to the one nation council. In future take his name off. There are no earlier visitors, we are here all along, even though not away of presence. We come to Earth to see how bad it can be. Right now

there are millions among, "animals in fur coats waiting to devour each other". Rick says, "we ask a tech question and get a spiritual answer and visa versa", Keshe sets him straight, but he doesn't understand. When you understand the structure of a body you call it Gans. The soul needs to know how the body works, you make the division. Example, you man the shoe wrong, damage leg, in pain, burden on society, etc., so you need to understand how things work.

Can you convert O to H at room temperature and pressure, Yes. But go through Gans and Plasma state. You change position of plasma and what arises. (1:22). Is it true Time doesn't exist, only 1 moment in Time? If you want H from Plutonium move it back 8 cm. The time it takes for H to move, is it? Time is the essence of the being. Time in space as humans look at it, doesn't exist. Always at 0 time according to where you are.

Electrolysis, what does it mean? When will Authorities okay cleanup of Fukushima?

Americans wont allow direct involvement with Keshe, even put a 4 year old girl in detention. How many dimensions does Space have? Depends on what you call dimension. Space is strength dependent, you can dictate. Space has a dimension according to the position of the observer. In the first classes Keshe taught last year, he thought man was intelligent enough for the full teachings, but it was a huge mistake. It put the "fear of life" in them. All the teachings will be live, whatever you need will be taught. The purpose of the classes is not to teach, but to Enlighten, big difference.

Knowledge Seekers. Keshe is trying to pull out of the public arena, start to transfer now instead of waiting for him to pass away. (1:45). Division of Gans, the same as Supernova, the MG fields become unbalanced and divide. But you can control the conditions for this division. Not as in Fusion or bombarding the neutron, but by controlling the conditions of environment. It's done in body through B12, it converts the behavior of a Gans of Phosphorous into a Calcium, or visa versa. If you put a beam of X-ray or a beam of neutrons into nucleus it explodes, this is physicality. In a plasma you have to take both Plasmatic Gravitational and magnetic fields and create a division. When body needs Nitrogen it looks for the nearness Gans of element which can divide. So N is (15/16) and Cu (63), so it divides Cu into 4 N. To create the conditions, dilute the strengths. The body converts according to environment and what's available. This is done by Parotid and other glands in the brain. (1:52). Millions of people eat dirty food don't get sick, but you as outsider eat it and get sick, because you are not use to conversion method. In the Star Formation reactors, additional reactors added to create material according to conditions you create. Also for diseases, you replicate MG fields of disease and heal it within minutes. Create conditions through emotional part. The knowledge is freely available outside this planet. Through the CO2 Gans can create the emotional experience of a Banana, you see and taste banana. In space you don't have to build a reactor for each substance, but instead give the emotional experience of eating a banana, much easier than creating an actual banana. For this you need to understand the work of the Star Formation and free plasma, then you'll understand the emotion, and the essence of the emotion within the free plasma. Then the SF can be anything you like. The behavior of the plasma according to environment. This is why so much problems with injections, because you introduce a matter into the Gans of the blood. It creates changes, side-effects. Medicines can be custom built to the blood. Arman in China at factory without any confidentiality contract, completely open. (2:14). Low speed rotation (50 to 100 rpm) can create more power, and it absorbs more of the plasma. In the Health

section people are experimenting with Gans, they need to do blood tests to monitor. The plasma moves at the speed is natural to it. As the Gans loses its energy it gives Matter. Yes, there are huge amounts of turbulence in Plasma, just like on the sun. (2:35). When Keshe worked at Queen Mary College reactor the field peaks were way outside the reactor, workers getting poisoned. In spaceship provide area where people of different field strengths can survive. Like fish can't survive in air. You can fall in love with Alien but can't have children, so need to experience soul love. (2:46). Keshe can control plasma with emotions, but he has different understanding. Keshe talks about his development, he gets impatient with injustices here on earth. You can elevate emotional connection. It's not meditation, which he says is only for the physical aspects of man. Rick and Vince, got some donations for flights to opening.
