

70th Knowledge Seekers Workshop July 16 2015

(:07). The Americans came to get USB stick in 2012, but refused hand shake. Iran signed the 5 +1 Peace treaty, first time treaty without bullet, for science. Obama said that Iranian nuclear plasma technology has been the main negotiation. The Energy beads are putting 5 times more than put in, non-nuclear it belongs to people. He goes over why he was against treaty. Now with the new technology in the last 2 weeks, these military contracts are obsolete, and lead to more wars. The 30th July new announcement. In the next week Keshe will raise the power to Grid to 30K kwh (later per day). (:23). There will be no need for reactors. First prototype by Saturday. They have managed to send 40 volts wirelessly as power supply. This will change a lot of thing. (:28). The power to the Grid is DC and is Nano coating automatically the transfer wires, they become super conductors. We are not feeding AD/DC into Grid but Plasma Energy. Keshe Foundation will not speak with a pedophile, he is using technology to attract victims. Explains what happens when Plasma Energy flows into a Nuclear Reactor, many times worse than Fukushima. So the Nuclear Power stations have to be removed from the Grid as more people use Plasma technology. This is making Nuclear technology obsolete. WARNING!! USA, French, and Germans who have lots of Nuclear Power station to disconnect from Grid or a huge accident will happen. Nuclear is plasma and will absorb it. It will mean billion to decommission them. If there are only 500 units in US the problems will start. The starter in car, will be working on a plasma state and converting to mechanical energy. It changes itself into fields to create motion. (:39). Explains again how Solar System works and how elements are formed. Each continent will show one flight. We are going towards a Plasma like sun without a form. Don't need a battery to store energy. (:53). Food cups by putting food on top of container with water inside and Gans in the double wall, the water tastes like that food. Now you can fill container with Gans, and place hand on top, the Gans absorbs the emotion and physicality of man, and if you put an 18 years old in it, you get the cup of youth, emotionally feel young all the time. A man should drink from cup of man and not woman or complications. You won't become homosexual, its a different structure. If you put drug in there you only need one shot, drug industry finished. Use in an opposite way you can reverse addictions. The new technology brings new applications. (1:00). People are ordering units but not making donations, Keshe refunds their money. The Foundation pays good wages, Alex is giving his share of profits to Nigeria. The early collaborators with Foundation, got a 10 million promise when technology goes commercial. Arman was in China when he came there with a patent to undermine Keshe. Dr Eliya is in Singapore with Mr. Hua trying to set up their own patents. Defluorescence was the only one who knew about Keshe's flight to Mexico. Now he is saying that nobody should use the power units because of health hazard. He had a stroke and Keshe made him whole again, and he turned against him, Judas. When Keshe was poisoned with Arsenic, Eliya was told he saw it in chart that it was Arsenic. Twice Keshe car rolled over and shot at in Antwerp where Defluorescence lives. (1:17). Calls Olivia about 10 million contract, confirmed live. The minute Keshe dies, these people take over. The blueprints for the Power Unit will be sent to all Foundations around the world. Bret called and said he also was approached by Defluorescence. How the King of Belgium found out he was writing book. (1:28). The units can produce food, taste comes from the fields and matter field strengths. You can't take more than you need. Keshe worked at supermarket in college, they throw away good

food. British government sold war rations 40 years later, corn beef still edible. (1:34). In coming months when go into space the biggest problem is that Humans are conditioned into the Clock. Keshe doesn't use energy from here to work 14 hours per day. Nowhere is U are they using time. Tomorrow they start loading cars with units. Change is not a fairytale. World leaders, your time is up, come in and help transition go smooth. The more people have the more they are helping each other. No choice or it will be forced on you. (1:47). Letter that Eliya is in Singapore getting the needles patented and other things, she is out of control. Then Mr. Hua attacked Keshe. The Chinese government is publishing Keshe's books. When people are wrong, you leave them long enough they break their own leg. (1:55). If you made your own system, use Cola bottle loaded with 3 reactor keep it sealed, fill it with water. This is not just power unit, but cup of life, it can even make shelter. (2:09). Earthquake in LA. What microbes to allow, repair bones, mental disorders. It's a revolution in the soul of the man to understand the man. (2:26). Different voltages around world are irrelevant, plasma delivers what is demanded. How you connect it determines AC or DC. Changing of weight in Reactor depends on fields forces. Directional flow depends on where you place the Beads. Have knowledge to save the race, love as one planet (2:44). The Unit will be programmable with CDs put in and get food or flight, can change the color of your house, create a house. Changing the Beads changes conditions. They are creating the "hollow plasma". How are you going the change the conditions? You need correct conduct and don't become a thief. (2:54). Questions: the cup of life will absorb negativity also. People will find out. Once the Gans is dried it stays dry or wet as case may be. The magnetic fields have managed to hold onto the moisture. When it dries it takes the motion of the Gans. (3:02). Will Power Unit supply 3 different meters. You disconnect from the Grid and use a battery. We will show it as we go along. You can weld with the Unit. Can you store the cup of life in a container? No, drink directly from the cup. Don't even mix with things. The taste changes depending on what person needs. (3:09). Each matter has its own soul. The mobile charger is continuous without recharging. (3:22) First plasma battery is out.
