

72nd Knowledge Seekers Workshop July 30 2015

"The Greatest Moment in History". Moved to a new location. We have over 10 million listeners. Translator has to go as fast as he, not slow down.

Nano coated Cu plates, nano means single atomic structure. We have changed the molecular structure to atomic, creation of Gans, miniature suns. We have created CO₂ in solid state at room temperature, this is the new plasma energy. (:10). Two parts, 1 is to do with Energy and 2 with cleanup of environment, Fukushima. Collaboration with TEPCO and Keshe, the cleanup successful but denied by TEPCO, now KF published a paper on the cleanup. (:26). break in tape and repeated until here. The man who did the background work with TEPCO, is here, he helped save Japan and fired him, very honest. TEPCO violated IEA rules working with Iranian nuclear physicist, boycotts. We gave the technology freely to Japan and so that it can be used in other accidents, it has to be recognized by internationally as a breakthrough in technology, this is the point. (:31). Don't show face for international reasons, gives his testimony, and has joined KF. He confirms the tests of new technology. Fukushima is now safe and KF technology used, therefore not give details, but it was all due to KF. This is the third time betrayal by governments in nuclear cleanup. The key was overcoming the high Ca levels in Japanese waters. (:37). The nuclear materials lock into the Ca Co₃, you still have the nuclear material only trap and neutralize, so there is a nuclear residue. Japanese Prime Minister should resign. It can be given to farmers to cleanup fields. (:41). You take contaminated soil and few drop of "Solution" (Gans), Keshe demonstrates with Fukushima soil sent by TEPCO. He shows Fukushima water given by TEPCO, which is against law. Measured by TEPCO at 6000. Italians came in and tested it and said it can stay, so it's not illegal. Japanese have not used IEA ways of sending radioactive materials. Challenge to authorities to come and test and check with Fukushima. All communications kept. (:56). Creating jobs in Italy. A Coke bottle size reactor that can power the car, and house. (1:08). The Beads (are 1 to 5 ratio) are already obsolete. (1:12). The NEW unit is revealed. It's thousand times more strong then the beads, by coiling the Nano wires you make a nuclear reactor without radiation. It blows a fuse it's so strong. In the new beads every bead is being regenerated by careful wrapping of Nano wires, power in thousands of KW. It can't be fed yet to Grid. (1:16). Prototype for car power supply that you put in side the electric key. Please develop as fast as you can. The power is so immense by careful. New communication is developed, by-pass Vodafone. Another new system unveiled, tunneling one plasma to another. (1:22). When radiation leaves the sun it doesn't decide if it will be a potato or apple, it's the conditions at the point of arrival that determines what it will be. It's the same when you eat, it's the conditions in the body that determine what kind of cell it will become. We created batteries that you don't need to recharge for 20 years, and it will deliver what the need is. We have learned to tap into the essence of creation. (1:25). The unveiling of the New beads, composite Gans, each bead has the power of the sun. It burns itself out, so much power, SF underneath. The inner ring creates G, the outer ring creates M. Adjust the plate and becomes a flight system, it also has control system for direction. Inner core 6 beads and outer 12, by adjust fields control flight. You can also place plasma lines on different positions to create different materials. We have gone partly into production of materials on demand. (1:36). Something that reverses the cancer in minutes, you change the environment and it can't grow, patients come in and within hours healed. Now with Plasma you can make magnets

for any material. Don't need to mine anymore, just produce the MG field. This is why the title was chosen. You can tap into the Creative principle anywhere in the Universe. Now totally independent of Earth. KF setup around the world to fully develop technology. (1:46). Questions: Are all the teachings in your books? The essence is there especially book 3. The Cancer treatments are happening now by experts. (1:51). Someone asking for step-by-step blueprint to make the E Beads. Alex explained in details, but with the plasma, when you put the springs you collect energy. In Matter creation, a cup of water with Gans in small bottles on either side and hotdog on top, the water tastes like hotdog. Now remove the water and instead put a coiled Nano wire in and hotdog on top ... see if it creates a hotdog **. Remember everything can be changed, when and how you want based on creating the conditions. (2:08). The units cause the interior wires in the house to Nano coat, but they still carry normal electricity. The new coiled 3 rings can flow in any way. You can start with the first beads more safe. These new systems are very hard to understand, and they are too powerful and get burnt up. The Beads give you instant high power, to move craft quick. (2:19). Create two Plasma lines together to weld. Shows a Gans battery. (2:27). Keshe gave out nano wires, put one on your left and right battery terminals and you don't need anymore fuel. Keshe had hard time to use fire to make Nano coat. With the 3 ring new coils, the inner coil holds onto what don't need. Something about cancer with this coil along with Gans set to specific MG fields. Mike is warning not to connect to Grid. They have new "Universal CO2 Kits", made in Italy. Sweden has KF. Letter from Putin. (2:39). (2:42). Explain how transfer of banana to water via different Gans. The 3 rings coils, inner 6 middle 12 and outer 24. The way you wind the coils is very important, clockwise and then change, and the direction determines if Magnetic or gravitation, this is flow of plasma. Question in Italian about the direction of flow. The springs create a tunnel of flows and this dictates the direction. (3:02). Goes over the new coils and the field flows. "Plasma pipes" means these new coils. (3:09). Peace is most important part.
