

74th Knowledge Seekers Workshop August 13 2015

(:07). Keshe has an everlasting battery, and shown the correctness of technology. Why are producing all these things? Darkness in soul of man, want to light up man's physicality. If no physicality then soul works on different level. We go back to our tribal roots to share everything. The weakest child is still needed in family. (:14). The Health Pads relieve pain. (:20). Presentation. (:28). Presentation of Nano coated wires to relieve pain, and how to make it, 2 inch wire, and plastic cover for wire, make pointed end and bend back the other end, bead is to cover the sharp pointed end, test it on your palm and feel energy field. Set the mind of patient so he wants to be healed, and use the Acupuncture points to treat. Hold wire until patient feels, 30 seconds. In males left hand receives and right emits, and opposite for woman, start with the receiving fields. (:35). The Right Hand Rule; take right hand curl fingers and the direction of the thumb is the direction of the MG Fields. "This make a counter clockwise flow of fields Positive. **When you coil wire counter clockwise the fields go up.** The opposite is Negative. You can also coil a single and double secondary wire around the main Nano wire. He placed them in pens. (:39). Tested with 20 patients, result within 5 minutes. (:42). Keshe comes on, his pet uses the pad for help. These wires will change health of man. He explains the wires, the double coils are very powerful, they take the bodies own fields and puts them back. Connect the double loops and treat the soul of man, have to remember the emotion of the man, when two souls are connected by "twinity" , both MG fields, the center wire directs the flows. (:49). In the first wire the twist on the end is exactly like Alex feed back fields. Treats the soul. How much do you want to change, because psychologically you want to get attention through the pain. The double coil wire is the love you want to get attention from. Physical pain from physical damage, can use the normal wire without coils. (:56). Can connect 2 coils 1 Clockwise and 1 CC, Magnetic and Gravity, then put on the side of a cup, adjust the fields, M takes out what you don't need and G puts in. These are "universal" magnets, by putting also at the bottom you cause the fields to cycle back into the water. Note: if you put Nano wires inside the cup of water, you go for structural repairs to body. The tightness and number of the windings count. There is a technique to create cups that are only M or G, one inside the other and you get conditions for physicality. You can put a straw in empty cup and breath from cup. (1:02). In cases of Fibromyalgia and CVS, when people report it doesn't work, it means they haven't received confirmation from the emotional source of disease. They waited 3 months for physicality to repair, then use emotional cup, powerful. Drink half a cup in one go, when you breath in cup, hold close to you with hands. To create a society without pain. (1:10). Instead of a single wire can use a lamp wire which is like a mesh many small wires, creates a composite field. It's different when its multiple of fields. For skin problems, make a patch of coiled wires and put it wrap it in tape and put on skin. When you put more than one wire you create a plasmatic field, and the body interacts with the MG fields. They're making a shoe insert, it covers every point in body and takes what it needs. Making also a glove for hand points. (1:18). Taxi driver said he learns so much from Keshe. Israeli government ordered second round of assassination of Iranian Nuclear Physicists. What was the true reason for the pain, then you can heal yourself. (1:22). For PROSTATE put the pain pad behind it between the legs. The pen or wires, and cover your back with pain pad or whatever you have, then the plasmatic

fields go across. Prostate is an emotional disease, Keshe has prostate cancer for a long time, Because the pen sits in the middle whatever damage that was done to Hip and bone structure gets repaired also. The prostate takes the Ca from the hip. That is why you get bone cancer with prostate. For women it's the ovaries and uterus. When cancer spreads has an emotional reason, you want to finish your life. (1:29). Goes over stomach cancer, a punch in stomach or tumor non-malignant, have to understand why you have disease. It rains the decision on the total physicality and because the emotion is stronger it over rules the physicality. When the emotional aura gets smaller it wants to show I am not happy and reduction of the system. It can reduce to heart and lungs and the rest in paralysis. When you take pharmaceuticals remember that someone without money died or suffered to bring you this medicine. How come you accept someone else's sacrifice and not give yourself. We are the clinical trials, we collectively work to bring our own survival. (1:37). The new rings, this is the first time man has the tools of measurements of the plasma, you can control the MG field strength. It can be for flight, medicine, communication, etc. Put a pin in middle and change the field strengths. Keshe doesn't like to work on 13th, it means the end of a cycle, and new has to begin. This structure will be the keystone of Plasma. To stop in space you just balance the fields. Keshe refused treatment for cancer, treatment only when there is a need. What are we receiving or giving to bring about balance. (1:43). Whenever you make a cup don't think of it as a cup, but a point of reference of how you are adding MG fields to whatever is needed at the point of delivery in the body. You can't use the same cup for everyone, because you have to understand what is the emotional and physical need. Do we give it to the person or the partner with the emotion of the person, so the partner feels the pain they have caused. If you add the blood of the person to the cup, the other will feel the pain. You can carry the emotion and physicality in the cup and reproduce it in the space. Every day we only take from the spectrum of the Plasma what we need. (1:48). Man developed a way you can tell when Nano layer coated by color. Use torch to heat wire and in cold water. Cut wire first then Nano coat. Coat the Nano wire with a Gans and let it dry and it becomes a continuous power supply. You can also put Nano wire in container with Gans with wire sticking out to direct it, this way it doesn't depend on the environment. (1:55). Warning to those who want to abuse technology to control man, we are controlling you. Tonight interview with Mike Harris. In China it's gotten hidden to benefit of the few. The gift is for benefit of humanity. Lot of people coming to KF but have clandestine activities. Soon Marco and Arman will take keshe's seat (break up signal). Eliya put her own mother on line to test needles. Meaning of MG, G is take what you need and M is push away what you don't need. (2:08). In Iran they have specific stomach cancer related to Walnut that gets fungus. Around the world there are diseases we need to catalogue and heal. There are diseases due to different MG fields. Obesity is USA, the cups can help loss weight. To make cups, certain materials feed emotions or physicality. What is obesity? Do we get attention by being fat. Short people compensate by achievements. Feed the emotion through the physicality. (2:15). In USA use huge amounts Na. Salt enhances the sweet taste. Salt can't stay in Na content as a plasma, goes to O-Na-O-H, plasma water, you have to store it, this brings N-C-O-H (AA), the body creates sacks of Nano material to store the Na. When you go on diets you get rid of the water in the sack, and have not got rid of the Na. The minute you go back to normal, the water simply refills the sacks and fat again. The brain keeps the Na for emergencies. Na is most

important for conversion of Gans in solid state from plasma water (O-Na-O-H). To get rid of Na, make a Gans to get rid of Na, or first rub finger on tongue, then in salt water and again rub tongue, taste salt for 20 secs in mouth, then repeat, then rinse out all salt taste so nothing go down, you have told body huge amounts of salt are coming and it empties the Na in the sacks. Will loose 3 -5 kg every month in natural process, 1 time in morning and 1 at night. Then have to satisfy the emotion side, its happens when Carbon is available and Ca, That's how alcohol feeds the emotion tells its okay, also in chocolate the energy released through C and H in sugar. At lunch time you do the same thing but with Sugar, sugar is released in the blood to satisfy emotion, (salt released in Lymph). If you do it too much you get drunk cause the body releases the internal sugar. Do the sugar treatment every 2 days but salt everyday twice. Then your body finds its own weight to satisfy its emotion. (2:30). With Plasma there are no Guinea Pig. Understand the reason for the disease. (2:37). Mike Nasser nominated to teach, knows about making Gans of water. Cold caustic coated wires, etc. Keshe explains about Gans of water and loops the wire 8 times and can create clean water. he has created the MG field for water in the wires, fantastic. (2:45). Keshe trying hard to keep the ethos. Now Soheli in China doesn't want to show the Keshe battery. When we see misconduct we inform the governments. The Health pens are worth billions but give it away free. Talks about manufacturing of different products. (3:00). Presentation by Emanuel of Malta on the Pain Pad. (3:13). Can be used for emotional balance, in a helmet. Working to overcome side effects of Chemotherapy. (3:25). Plays tape about "thoughts program". (3:32). Treaty with Iran to create 10 million jobs. Invite the cabinet of Israel to nuclear centers in Iran. (3:40). Mike's presentation, uses the Gans of water to create water. Mike not there ... chatter until. (3:50). Chakra Energy, Keshe says he doesn't understand it and needs an expert. (3:54). Mike comes on, human chakras have 8 centers, and Infinity Loop, working on new Table of Elements. plasma is like drops of food coloring into bowl of water, until you give it direction. (3:59). pictures of how the plasma light would flow if you could see it, the colliding of light releases energy. How to twist wires to make Infinity Loop. When you twist to right, Counter-clockwise, the effect is the opposite,(CC rotation from plasma?), very important, 7 twists and completion is the 8th, replication of human body, frequency of 8, water becomes visible. Keshe asks him to make a video, he doesn't want to, collaborate with Malta. (4:05). He can replace all spinning reactors with these Infinity Loops, don't need Gans, but this is preferred. Hardwood ash and boil it becomes caustic. If you want water need the opposite, the opposite of anything is the "Nano" version. You need the Gans of water, create by spinning the container, wasn't Nano coated, it turned blue (this is the part doesn't work), then add that to the caustic. (4:09). How come you didn't see light? his drawings are of light traveling in Loop after Nano coated. He doesn't want people to know how much he knows. Keshe nominated as teacher. Put Gans of water in caustic it turns Nano, then spray that on Infinity Loops, it will attract the opposite of water to it, you should see condensation on the loop and start dripping. This is the gift of light, become light workers. (4:12). Keshe, "Light is the conversion of the Universal Plasma and the Matter plasma". You see a light it's the point when the Plasma MG break down to become the matter state of the MG fields. Light is the point of conversion, it will give insight into how you create matter, the same as the sound barrier, or when you boil something it changes from solid to liquid. Light is that point in the environment, when the fields reduce to become Matter. That is why we add to the Mass

of this planet, because the light continuously shines, and converts to Matter. Renon comes on says his sister has eye problems, but when he touches tip of Nano wire to his finger, she sees a white light connect to the skin and disperses, it's a friction of MG fields. (4:17). When you burn wood, it is a Nano layer, he feels the fields from the Nano wood. In S. America they used ash to absorb energy. If you are ill you can lie in the ashes, it's a fully Nano coated material, the process of balancing the fields. Ashes have huge healing property, but don't cover body with it. (4:20).

Wrapping wire around plastic bottle, nano coat the plastic with the wire on it. If you put marijuana in caustic and spray it on bottle, cure cancer, cure all. Repeat. 7 turns and connect to end to get 8. Mike Nashif, peaceinyoursoul chat, photos. The number of twist sets frequency, we see at 8 hertz. Put the herbs in caustic, let cool, spray bottle and let Nano grow, you have all the energy of plant at 100% light. (4:34). It becomes a permanent composite Nano layer, this is similar to painting the Gans on the Nano coated wires. (4:40). Asked to make a video of the water infinity loop (IL). Keshe, when you make IL you radiate M as much as you absorb G, it brings a balance, 8 loop connecting is like a double loop, means total stability, different sizes of loops you get different fields, the loops should be the same size, when you close the loop you stop the leakage out. (4:46). A new mobile teaching unit to record teachers around the world who contribute to the teachings. (4:51). Grapheme Gans from graphite and a laser. Can grow nano in sunlight, different nano coatings have different colors. Drinking urine closes the loop. (4:57). Keshe, chakras, if you have problem in 4th chakra, cut into 5 and 3. Why you create water, in the fields in the body, the water has to come into position in the fields of man, why kidneys and bladder in position, you can make loops to absorb high concentrations of Ca, it's how plants absorb minerals. Mike talks about replacing the loops for the rotating reactors. (5:07). Can take the springs and form a pyramid of sizes, creates MG fields to connect them, creates a mass free Plasma in the structure, huge applications, getting to the point beyond the physical reactors, the cores unit to make a free plasma on their own. Add to knowledge, draw infinity loop, when you make smaller you go to the higher strength, it mirrors to lower half, Alex's Beads has turned the IL in on itself and why so powerful, in same way as 7 loops with the 8th connecting back to itself, it puts the G field inside the M field. This is how U systems hold their power. When you turn it in on itself the outer ring has to create a gap. It's not 8 but 10 which is most stable, like inert gases. (5:18). Helium has actually 3 IL, H has 2IL. Australian graphic artists can visualize these ideas. Mike says he can take the same caustic and get different strengths. The Table of Elements is actually infinite, just add 1 to it, whatever number you can add 1 to it. (5:23). The center of the U is like a bullet in water, it's elongated still moving. The way all the Galaxy's fields are positioned is they look to the center of the U, we see Supernovas because at center there is always a G increase and not M, every SN creates a more concentrated core, the same with production of materials, you can make anything you like from 1 atom, with this loop you should be able to build any material from H. The mass is different from the Energy of mass, the E of M is same as U that's how they connect to each other. Mass as the strength of G field, understanding this you can travel from one U to another without much work. (5:28). Mike, can travel on light, gives a lecture, have to take care of your own soul, deal with your daughter, etc.
