

75th Knowledge Seekers Workshop August 20 2015

(:06). Change in a peaceful manner. Is humanity ready to join U community? Yes, as we see the technology spreading around world. Tomorrow first day of the arms down. (:11). Asking Putin to bring the World Peace Treaty on floor of United Nations. Keshe to remain scientist and leave the politicians to do their work. The rapid delivery of technology will pressure for change. Principle is not to be cheapest (China), but to share with humanity. Will allow any person to commercialize technology in their own country. (:24). Will give credit to inventors, but not to support individuals, Soheli in China has split off from KF. Recharging Talk about internet contact, to keep it. (:36). Get a lot of request for cancer treatment with the healing wires from last week. The wires are more focused and the wide spirals are more like a patch, you have G in center from Nano coat and M going out, what the body is sending out gets attracted to G field and reduces pain, and the replacement goes through the M, the spiral condition carries the emotions as well. The neural system is transmitted in the muscle through Cu, it's effective for pain relief, because made of Cu and the Gans of Cu works with the muscle, you create an Infinity loop with location of pain, same field strength as Cu nano in muscles. (:47). This is what happens in the Mineral Baths for healing, the Gans of the minerals interact with the Gans of muscles, becomes an Infinity Loop. In Cancer if we can measure its MG field the we can create a Gans to interact with it and change it. (:50). Get a blood test of cancer patient of all minerals in body, look for highest concentrations, for example, with Cu look for the highest concentration in body, it acts like a seed and the MG field is attracting materials and energy to itself, this we call cancer, the body supports it because it has succeeded in forming itself into a unit. If we change the environment of the cancer, it can change immediately. Develop systems to transmit information from the Gans to the Cancer cells, can be used on any disease. You don't die of cancer, but lack of energy, because all the energy is going to support life, meaning the cancer has individualized itself, and is taking all the energy. The treating Gans doesn't need to touch the cancer but be in position to interact with its fields. It's being developed in India and China. (:55). You have to reach the emotional element in treating cancer. For example, breast cancer, the cancer is already spread throughout the body up to the neck (physicality), there is also an emotional cancer in the brain, but it's not seen, you need a system to communicate with both. If you use CuO Gans, but only a short few minutes, this is for physicality, use CO<sub>2</sub> for the emotional cause. Treat with ice pack but put Gans inside, have to treat the emotions also for success. Have to pinpoint the seed of the cancer, in breast cancer it usually is Ca, but has to be done by physicians, may need composite Gans. CuO drains energy because it connects to neural system, if left on too long drains the body. Gans and nano have full spectrum of Plasma. (1:02). There are no muscles in the brain so you can't use CuO there, or you drain the system and may increase the disease. All the diseases of man come from the transference of energy in the plasmatic form, you can use the plasma condition to even grow arms and legs, by creating a spectrum of energy that fits the tissue of the limb, it copies the tissue of the bone, and muscle. Keshe grew a toe by using a hidden Nano material in the structure, allows a spectrum of fields, what comes in the blood and lymph only becomes matter when the right information Energy arrives by the neural system. For example, if 1 micro amp it becomes the nail, if 2 Micro Amp it becomes the bone. (1:06). This is knowledge of creation for deep space travel. When you use black Nano material you get all the spectrums, if you use a CuO Gans you limit it to

that Field, Crucial to understand it has different applications, different energy transfer. FDA is opposing Nano materials but they have authority only in USA. Doctors of high intelligence are developing this technology. (1:14). A doctor showing his work, CO<sub>2</sub> in the 3 cores, the head of man, then balls around, puts the blood of patient in tubes, with his own fingerprint very direct. (1:31). Rick brings up amputation, in child if the tip gets cut off it will grow back if they don't cover it. Doctor can try putting a Nano plate 2 cm in front of amputation to test. Alzheimer's is psychosomatic disease, the physical part is the brain, MS is in the brain affecting physicality, have to change the emotion at the barrier, why he doesn't want to use the memory, the test is to ask the patient to sing a song or hum, if he can then psychosomatic, if physical damage, the memory can be transfer from one part to another, when the pain is too much they close the gates to brain memory. (1:45). Talks again Chemo and how it works, the lymph passes through the bone structure and gathers strength when it hit the marrow and blood stream, Chemo adds energy to lymph causing it to swell and not pass through. (1:51). keshe built a system which measure the structure of the bone and extract energy from the lymph to shrink it. Nothing wrong with Chemo but have to eliminate the side effect, he has 30 blood tests and MRI to confirm this theory. If you over do it then the Lymph becomes a lethal weapon against the body, CO<sub>2</sub> works, takes 6 months. Don't need to do Bone Marrow transplants anymore. (2:03). Can wrap the pain pad around the femur , the change takes time, months. (2:11). there is no way you can destroy or reduce a cell, we lack knowledge of cells. Apply technology to suit our level of understanding. He continues without any statements. (2:25). Brendon gives presentation, link to testimonials, especially wires and pens. Going to make plastic sealed tubes with the nano coated wires and coils inside and Gans tubes. Simple tubes, smaller in size with directional wires, can put them on the cups and experiment. The pain came back when patient had doubt, so intention important. Made a Gans tube bracelet and with coils inside, wear for some time to balance fields. He made a belt with nano wires in. To go deeper in body need longer coils. (2:36). List of times for different pains, 1 year pain gone in 1 minute. (2:43). He just points the pen at the pain, but severe may rotate. After time his finger works like the nano pen. (2:49). It needs a "twinity" field, not as a effective on ones self. (2:58). CO<sub>2</sub> Gans helps with Alzheimer. (3:03). (AA) C-O-H-N, C-12 and O-16, from Plasma point of view, N-14, balance nature, N for this planet. Adding Fe in the hemoglobin creates aggression in man and animals, The COHN comes from the Atmosphere, the Fe is in the matter part, when COHN meets up with Fe in the Matter manifestation you get aggression, CO<sub>2</sub> is the balancing of the two. It's the interface of the two that creates the problem. Other parts of U where you don't have the interface, no aggression. Plasmatic Fe is 56 and COHN is only 49, this energy difference has to be released. CO<sub>2</sub> (12 + 2 = 44) brings balance between two. In the Energy Beings in the upper atmosphere observed by NASA we don't see aggression. Man has never understood why we have become so aggression, the interface of the two releases huge amounts of energy, we can create correction by understanding to make man peaceful. (3:14). How to become more peaceful. (3:23). Can we embed the CO<sub>2</sub> in the body of the man to make him peaceful, or say the lion, would they be able to attract energy in a different way, don't need to kill. Now we know the problem and seek an answer. In space, should we change the atmosphere in craft to be peaceful beings. Do we make a new plant version to balance the fields. We can test CO<sub>2</sub> helmets to make man peaceful. When we eat meat we block the

CO2. Why do we see environments such as Hawaii, where man is more peaceful. (3:33) Call to doctor about reversal of cancer with technology. (3:43). Back to CO2, can we make CO2 part of the breathing or diet. (3:48). Pictures of the structure of Airplane and Body, airplane is according to matter available, Man's Body is a Gans state in accordance with plasma nature. Is human ready to create a Craft without a structure, a Universal Craft (UFO). Keshe invites anyone to come to Italy to develop this Spaceship without any screws, etc., on the basis of the U structure. We have extend knowledge of plasma. KF symbol and picture of ship with red reactors and a dome on top, a Plasma Craft. (4:00). Why you have trouble with lift, in matter thought, this is different, this is with plasma. If he let you fly with car or other reactors, you would have been annihilated. This ship is a light structure, if you move the reactor you move the wall. It's set to AA of the man. (4:18). Plasma will not accept aggression, those who come in contact with this, won't be able to breath, this is for man of peace who wants to explore the U. Study the structure of the human skull from conception and the brain, all the entities share the same strength. The spring reactors with the rings is enough to fly. Study the body of the man as a space craft. Come to Italy as one race and we'll make the craft. It always works at the MG fields of U. Chinese can be the first to build, the fat boy shows they have the mentality and understanding. (4:30). You came from Nothing in the interaction of field forces to give tangibility, 2 Plasmatic M fields came together as sperm and ovum. How far can you bring the knowledge to further peace. You disarm the whole world with plasma. Keshe says his job is complete. (4:39). How you create interactions of field strengths, in space you do not feel temperature because your body is made of Gans, you feel temperature in matter state. In Africa, the WHO confiscated all the technology because they worked. Have to have the right intention. The core team has the job to bring balance in the human race, the table of 12 is complete, guide the soul of the man. (4:44). Questions: the first group accepted 9/15 to build spaceship. Bret asks about controlling ships with mind, don't ask about problems, come with good intention for humanity. In war zones if you adjust the CO2 soldier will loose aggression. (4:50). You decide how many stories you want by the MG fields. There are ships that are waiting to celebrate. I explained it in the way Bone Marrow makes the lymph. (4:56). Presentation of his work, making reactors with syringes. Add to knowledge, create dynamic interaction without motors. The structure will be dictated by the field forces, when you start working, the floor will be solid, and something happens and it disappears, need lot of understanding of how to control the fields, everything has been show now needs to practice it. You can build your homes with it, now, can have total freedom. Man has possibility the create the physicality as he wills. (5:06). Made a breathing tube coiled with wires. (5:10). He made a cup with wire wrapped 7 times around and connected equals 8. Why are you sticking to 8? it depends on the soul and physicality. WARNING, on the cups don't put anything between the wrapping on the cup, it can create diseases. The Chakras are reversed, the head sits at the bottom, can treat the different areas with different herbs, but Keshe says the body isn't working that way, too overloaded. It's understanding how the body receives fields. (5:15). Marco on vacation. It's for humanity to make the Spaceship.
