

78th knowledge seekers workshop 09-10-2015

Conflict with organization about a pedophilia case turned over to the FBI, KF was attacked about the logo and they will change it. Rick got very upset about photos. (:26). Keshe discusses the Power supplies, they are not a generator and don't require plug or voltage conversion. (:30). Discusses how the Power Units work, SUMMARY of the Plasma has full spectrum of MG fields. (:37). Rep from Ghana. In the Gans you have millions of little suns releasing MG fields come as a whole package. (From a Plasma the process is reversed to Matter, in the space you always have plasma and not matter to work with), this is what's happening in the Power Unit, So you have available the building blocks of life. (:41). When you connect to PU you create a field connection that it gives you O, conversion of a plasma into a desired entity. (:53). Convert energy of plasma to create what you want. Puzzle complete, we went from matter to Nano to Gans, Plasma, and now back to Matter is shape we control. Ali was using a capacitor in his SS. Every Gans has the total Spectrum to make anything. (1:00). Goes over how the pen works with double coils (M & G) and central wire to direct the flow, Since all of the skin flows steady there is no draw of fields, only where the fields are changing, and that means pain, and automatically brings a balance. Same as with Power Unit, transfer of power without wires, Tesla's car the power unit in Moscow and drove car in NY. (1:06). How to create motion with PU in car, do we need wheels? Car will get Nano coated and become the same as SS. (1:10). You started at the flow of electrons to created motion, some relation to plasma? Go back to putting banana over water surrounded by Gans, the water was the medium of conversion, you need a medium for the conversion. The Matter on earth is made of the GM fields of Earth, Solar System, and Universe. Water when it leaves the MG fields of earth may not necessarily remain liquid. Learn how to make Plasmatic Filters used to convert the Plasma to Energy, Matter, and Motion. (1:16). Someone created a SUMMARY or INDEX of teachings, so you can go right to minutes on a particular video. What the Mexican man (in detail how to create matter out of plasma) was discussing, passing water through Nano material it becomes a Gans state and converts to the plants, when it comes to the plant it converts itself to higher growth etc., they say there is enough Fe in a man to make a nail, the conversion of matter to Gans creates expansion, it's similar to what happens in High Blood Pressure the energy causes expansion in the blood cell. Matter and Plasma convert into the other, in Matter your confined to the Temperature and Pressure, in Plasma you're confined to the MG field flow within the environment of Universal, in Matter you're tightly packed but in Gans you're open to U structure. (1:24). When Gans goes to matter it goes to either field strength or tangibility. When you eat food it releases the energy of a Gans state not matter, in space you create the field strength of food rather than tangibility. Mike had part of answer but didn't follow through, the 8 loop N wires create water, but if you connect ends to PU, now you decide what each loop can create by placing a filter between it, go back to H reactors in lab, or the bead rings Marco made 6 and 12. You can change the M or G, isotopes and different "elements", two winding coils were added to change the MG fields, this is to control the MG fields for your body, can't receive guests in space unless change MG fields of their body, connecting fields around the rings determine matter by filtering, like in the pen and finger, the stronger fields absorb the weaker. (1:33). As with Renan within 10 sec pain gone, within 10 sec anywhere in U, the destination planet will be a much stronger field strength. *** Try to find out how to

absorb energies in a given environment and you don't need a Gans, moving towards non-tangible reactors, the spring coil cores is a intermediary half way to non-confined plasmas, reach in the next 12 months. To do this you have to think totally in Plasmatic Condition. (1:42). West Coast USA last week, there was a lot of panic since last week, be content with what have, the dollar has no meaning in Space. In Africa they can bypass all the infrastructure and go straight to the plasma in one stroke. (1:50). Now to present you have to sign a waiver releasing all the technology to freedom and you're not violating any copyrights, and use KF logo. Renan, Pen are in production, Emergency Plasma Kits. Indicators from nature, list of what's needed in case of emergency. How to make Emergency Patch with the CO2 Gans energized water (not the Gans), even a drop of Energized water in a barrel water, can burn a stick and use as pain reliever, Open Wound Treatment, can wrap patches around water bottles, breath in air in Health Cup, How to Decontaminate Water with Wood Ash, Nano wires or CO2 Gans, ashes put in the water and settled out for 2 to 3 times. (2:04). Pain pen use 7 cm long, wrapped C-Clockwise, see photo for direction and cover with tape, you can point either direction it relieves pain, rain coats inserted with energized Gans pads, gloves, socks (feet are vulnerable). (2:10). Keshe says use Gans water of CuO2, for infected wounds, it disinfectant but only for a few minutes, can mix Gans in patch 1 CO2 in middle CuO2 slightly different angles, in burns it replicates the 3 layers of skin and healing fast, it mirror the layers of the missing skin, Cu is part of the physicality and don't use long, pain is at emotional level CO2 is good. (2:17). Gans breathing mask put Gans around the filter and not block them, mosquito repellent by adding Citronella Oil and Lemon Grass to CO2 Gans, can apply it directly to bite and instant pain relief. (2:30). Keshe shows a Chinese Doctor's invention, a center core of Gans of choice, fills in tubes with the blood of patient, the changes happen remotely, CH3, CO2, CuO2 to reach emotional level of man, if you make a Gans of the 12 salts you could reach every structure in body of man, 12 salts came from cremated body in homeopathy. (2:44). In the coming months everyone will be able to create a UFO, are we going to be subjected to national borders or create new rules, or Universal Rules free at the point of need, man wastes lot on resources, every country has large amounts in reserve for in case of emergency, this new technology eliminates the need for reserves. (2:54). New logo, 5 people have achieved lift, if you got a hunger pain put pad on stomach pain goes, did it give energy or relieve pain? what if you use CH3? The 12 salts of body contained in CuO2. Let's go back and expand knowledge. The 2 rings of 6 and 12 Beads, looks like the Chinese Doctors reactor, single core were original spacecraft. Mike preparing for coming disaster to West Coast. How to dictate the NWO or go to Universal Order, you get whatever you need? (3:03). (3:11). Renan discusses how he feels with the cores. (3:15). Kalee talk about his medical device for different kinds of diseases. Ali speaks about feeling the energy from four Nano coils connected. Hard to understand, shows some drawings. (3:27). David from Mexico, agriculture, pictures of corn, can't understand very well, tests on pest control apply Gans water of CuO2. (3:44). Keshe, burn the fertilizer and create a nano and then Gans, and use as fertilizer. Looking to produce nano pipes for watering plants. (3:53). He says he doesn't need pesticides plants growing fast up which creates problems, he says the taste sweeter. (4:02). (4:10). Keshe is talking about the reactor, the height of the Free plasma dictates the size of craft.
