

80th Knowledge Seekers Workshop Sept 24 2015

We use only the little vibration of electrons for power, in plasma we access huge amount of energy in the entire plasma. (:05). The common denominator AA COHN. We need to inform man as a totality to the totality, we call for all the governments come together and release this technology to all humanity. At meeting in Rome, October 16, we will give the PU to all the ambassadors of the World, but they have to sign World Peace Treaty to get the free unit. (:14). One PU will be given to President Obama, etc. A thousand units will be delivered in Philippines, in Italy, etc.. In due course power generator will be released in Europe. You can receive energy from the PU in same way as with sun, without going through digestive track. The course of Mankind has changed and we have no say in it. We teach as many countries as possible to produce these units as fast as possible. (:22).

Doesn't need certification because we fall under international law. If they try to stop the technology it is already distributed across the world. In 2012 the Italian people put so much pressure on government to break rank and attend the Peace Conference. (:30).

Governments will be in crisis, by losing energy revenues, but it needs to go worldwide in one go, asked the Saudi Government to stop loading tankers. The smog in large cities will end, and change the climate instantaneously. In 1972 Iran raised the price of oil from \$2.5 to 3.5 and created a crisis in Europe, now its \$50 a barrel we don't say a thing. All the governments will together be in same crisis. Africa will have no debts, and Western countries will be under debt for Nuclear power, which they created falsely, this will lead to equality among nation. India is big concern, the technology has to be rapidly developed there. (:36). The solution is we work one earth one nation, the major oil companies have lost their power, teach 3rd world nations quickly. (:45). It is out of Keshe's hands, if anything happens to him the blueprints will be released worldwide. It's you, Humanity who have to share it. (1:00). Questions: The PU has been turned over to the Chinese government to distribute the unit. It's been made public so no one can patent it, you have total freedom to deliver it, this time no shutting down. Armies will become obsolete. The next step is to explore the U in peace. The Space program needs whole planet participation. You give tangibility to the fields, there will only be a platform for the reactors and the rest will be created by the plasma. You can't open it or shouldn't. A working unit will be shown tomorrow to Italian government. In Plasma there is no minimum load or maximum, it works immediately but then begins to Nano coat house wiring to find its balance. The coming units will be generators but not thin ones. Heaters won't work on the present system because it's an interface of matter and not fields, the plasma overlooks it because it's too low, in future will slow plasma down. The plasma works on the basis of need. In nature it takes thousands of years for the plasma to reduce to matter, we will develop a way to do it quickly, it reduces power to 60% on heaters. (1:14). The governments will lose 80% revenues, the people will work in the community with their free time, no one will be slave or master, this Plasma Revolution, you won't need to kill any more animals. This is the "satellite" he promised to bring down some months ago to show the technology. It's better for the governments to keep Keshe alive. (1:21). Once you start the system don't remove it from the Grid, because it works backward. You can use incandescent lights but not full. The Philippine group works on the ethos, are dedicated to peace, and loyal. (1:25). These PU can deliver kwh or megawatts, it has to do with demands. (1:30). Can put a PU in center of village to create food. Alex will teach about food conversions. The Lungs are releasing energy for

the emotional part of brain, and intestine for the physical part, we can deliver energy to the emotional part though lungs so you don't feel hunger, the system continuously sends the full spectrum. (1:38). Alex sprayed alcohol plant on the spring reactor and put a glass of water next to it and he got the taste of alcohol and got drunk without drinking any alcohol. He used cooked food and felt full all day. If the Grid goes down does the PU continue to power house? Have to see? The PU doesn't produce any heat. Bill Gates days are over. The computers will be too slow in this technology, you can control the system by thoughts. (1:56). The next generation of PU will be size of a CD. You can do what ever you like, you can use Alex' beads if you want, the next will be Plasma Heaters, they'll radiate heat by thought straight to your body, cooling the body will be the same way. (2:00). Someone has hooked it up but it doesn't work, only draining the battery, Keshe says, you haven't understood, you have to want it, a need. People will take from this technology according to their intelligence. (2:08). When two plasma connects it's like falling in love, it has to do with MG fields connecting. The new students will not be taught about nano materials etc, but go straight to Plasma technology. (2:14). Had to take over screen share, need first declaration that no violation of copyright. (2:23). To extract poison out of the body, you need to create the opposite field, understand the strength of it. (2:26). If the soul is a Free Plasma then why do we need another, interaction is needed to keep it from being static, you have some strengths and need others, work to achieve balance, one day he'll explain the work of the soul.
