

81st Knowledge Seekers Workshop Oct 1 2015

Working toward the October 16, Ambassador meeting, "free energy for world peace". Home and car units are ready for delivery. (:05). At the same time 2000 units will be released around the world. The Philippine PU are using a structure of matter so limited to 3.3 kw, the target for Italy is 1 million by December. (:15). Some people have got lost, went too fast from Gans to Plasma, we are use to tangibility and atmospheric conditions (temperature and pressure), the Plasma is Universal conditions. Plasma in Gans state has a physical appearance in line with earth, Plasma is free. Blood in the vessel is in a vacuum and is not red, only when it comes into atmospheric conditions it turns red. (:22). As discussed yesterday in teachings, the U has a central line, everything spreads out from there, so if you're a cell on earth you started from the center line and spread out, from there you have connections with everything, as it divides and becomes weaker it becomes different matters in U, closer to the center line of U both M and G fields increase. Earth is a plasma and has connections to U, but most of our M fields connect to our Mother, Sun, because we were created out of the fields of the mother. Gans is created out of conditions of Na on this planet, but further in free state is Plasma, now you have the freedom to reverse it and get the 3 lower states. (:34). People with identity with matter stay there, in Nano you work with fields, and Gans is confined to conditions of planet and its life is short. You can't bring Gans into space, once you do the openness makes it Plasma. The "Kebab" man has been making Gans without knowing, burn meat on stick and wash it off with caustic, but didn't collect it. (:43). The father feels the pain of the son, because he has a plasmatic link to him. The Chinese made CO2 reactor, the brain made of CO2, he raise his hand and reactor responds. Questions came that keshe could stop the reactor #2, then he could stop the life of those who oppose the Foundation, this is not his job. Gans is level of levitating, so you can use Plasma at the point of energy without making it tangible. (:52). The George Washington University report they made Gans and then wire from it. We are reaching the time of maturity of the Man, transmutation. If agreement comes with Iranian government Jan 21, 2016 we show Spacecraft, if not show it in Beijing, if you all produce enough spaceships we'll force the governments. China already start to teach the child about Gans, for the generation coming teach from the beginning, start writing for children. (1:00). Teach the Children NOW so they don't have to be untaught latter. (1:08). They raised oil to \$140 but it stopped the industry so dropped it back to \$40, because they couldn't sell oil then they can't make millions in the refining. He predicts oil drop to \$10 to 15 per barrel. They fooled you. (1:25). In Africa the wires are there but no electric, so one generator in a village to create the signal, you don't need the energy, but the impulse for Plasma to release its energy. In Italy they just need to keep frequency at 50 Hz. (1:31). Plasma DC Heating plates. (1:37). Ring magnets, the main force is in the center, like in U, in U you have more room to play, the ring magnet has field of hand, but U has field of the whole U. In Solar Systems there is room for the fields to reduce and form planets, and our SS is on the fringes of U, this allows for reduction in fields and formation of planets. And on earth there is another reduction that leads to formation of man. We are a freak accident of the U, nothing planned, many human planets on the fringes. We all came from the same center. (1:50). What is tough is the state of mind. The seed started in Africa and spread out, we are all the same family. There is an end, a conversion point. We start only to speak about Plasma. (1:57). There is no change from North fields to South fields, its all

same field it exits with a higher strength and loses it on the way to the entry point again. You all can develop flight systems using the same PU. If you go further and increase the plasma it will split off into another SF and from that you can build house, etc. The blood and bones are not matter but plasmatic fields. (2:07). Questions: What is best method and time to Nano coat? Once the Nano coat starts in the Caustic, the first layers start and it's ongoing until the whole copper is solid nano. Just using the vapors, Arman leaves it in for 3 months. 10 to 15% salt in water solution to make Gans. (2:18). If you use thicker plates (normal is 1 mm), use a LED light for thicker, also if concentration of salt is too high or low it won't work proper. The flooring of SS would be only fields, is it under the control of the pilot or does the individual, it's very hard to hijack a SS. (2:23). If you use the Plasma in the totality you can fly in your own cocoon of fields. In old times man was taught this and could go from one continent to another. But the knowledge was kept to a few, now open to all. Do we need to be at a certain spiritual development to build a SS? When you come to build one, you are already in that state, that's the beauty of it. As part of achieving this you have to come in balance with your environment also. When you go you realize you may not come back, so you need to assure the people around you that you are safe, the connections with people matter. "Thou shall not steal", when you are attached to souls around you, if you go you take something from them so you have to have agreement. This is a criterion of collective society of Earth. It's not about staying connected but respecting what they think is theirs, "love of the mother." It's a collective movement. Is an orphan better? "I don't think so". (2:30). Like when you go to Mecca, you should go in purity without any debts, etc. Renan shares experience with nano coating wires and coils, he uses an electric steamer to apply 3 to 4 layers, very effective good thick coats, let dry in air for 3 to 4 days, suggests adding a little potassium hydroxide. (2:35). How to create a FP without container? Learn how to "Cut" plasma, the P comes like a flowing water hose, you have to decide how to collect it and what rate, do you want a matter container or collect as a P, you can turn it inside out to become a container of another P, different layers of a Star, by different directions of P. Keshe won't show yet what's inside PU, the greed of the man is blinding him. (2:43). Don't yet have a way to tell the directional flow, it's always DC so no fluctuation. One way is to measure the field flow in two different points, BUT remember P flows from strength point of view, not direction, and not like water which can't go upward. Position is irrelevant in respect to totality of environment. You need a comparison point in respect to the flow of the P, the Grid provides that, the Beads are a different flow. If you don't collect the fields outward it goes up the Grid. How do you create flow in P? gradient. (2:48). Talks about the gradient flow in the body between the blood and lymph. The change in the color of the skin is due to the MG fields in one of 3 layers. Does the PU have all the parts? Later comes the water. You will experience different dimensions with these PU, they have no rotating parts and only feeds out what the man needs. Some of the health cups are made of coils (Mike's method), but different from Keshe's health cup, some don't work because expectation doesn't match with intention. Consciousness is the Energy itself. (2:58). Why are you making a Gans when the biggest Gans is your brain, he draws reactor and brain, you already have a rotating P, all you need to do is concentrate it to release its energy, then what you are focusing on (creation), needs to detach itself from you, it works at highest level fields strength, you have already mastered it, it's how you function. Bring the 2 forces together in your body, then give containment. (3:05). Keshe says the brains

MG field is stronger because it's the brain that dictates the emotion of the Heart. At the center of every cell is the Source of Life, but hasn't yet access, the Soul of the P, it has contact to all P in U, its always equal and balanced, you can cross U, it is level beyond the P. (3:13). Chinese reactors arrived, 3 sets of 3 stacked, will fill with Gans of CO<sub>2</sub> (emotional) and CH<sub>3</sub> (physical), and fill 12 bottles with water, by changing fields see if can create different materials in the bottles, changing colors, if drink water change emotions. (3:22). You get a mixture of fields of both M and G, need multiple measurement, any of the points you can create material. (3:25). Alex modifies his Pain Pen by dipping the tip in a Gans, CO<sub>2</sub> to emphasize emotions, What if you coated the coils with Gans of aspirin, vitamin c or whatever, to emphasize that part. The only limits on this technology is your own understanding. (3:31). A second Ambassador Meeting in Manila, Philippines. The East Block collapse the first thing let go was the Army, and then EU cut their military.
