

83rd Knowledge Seekers Workshop Oct 15 2015

Tomorrow is crucial Ambassadors Meeting huge change on the way, with every new change comes resistance. NATO and EU boycotting, but many religious leaders want to help their people. Should we disclose the place of meeting or open it and confront 3 or 4 terrorists? He receive collaboration from the Vatican, the Belgians planning assassination. (:07). Italian police are fully armed to protect ambassadors, will give only 30 PU tomorrow. Agreement now is October 26 1000 PU released. (:22). The new versions of PU will change weekly. When the PU goes above 3 kw it shuts down, cools down for 30 minutes, developing Plasma DC Heaters. It will take some days to Nano coat and then draw goes down. (:30). It will takes 6 weeks to Nano Coat the Grid, after more and more units come on, the power stations will be shut down, because you just need the oscillation signal to trigger the P to release its energy. (:43). Making the development as easy as possible. If you can't get it to work return it for refund. It's like when humanity went from candles to electric light. They'll become the food line, it will release energy as you need. (:48). Most of you have tested with CO2 but still need to eat because you need to release from the full spectrum, meat, fish, bread, every AA, then you don't need to eat. Won't need to cut trees, in wood you have COHN and other constituents, but you can convert their P M G fields, create wood for building. Some new changes with Mobile phone batteries. Yesterday, they did an experiment to energize the water with food. They didn't feel hungry last night. (:58). Food goes in stomach becomes a Gans, releases PMG fields in intestine, the energized water by-pass digestive tract. The world of energy absorption for space travel. When you receive what you need, no need for aggression. The Supermarkets destroy food instead of feeding the homeless, for price control. This system changes the whole structure. (1:08). The PU can interact with MG fields to travel, planet earth as one entity. (1:21). Will these new blue PU become the new God? (1:25). You can't teach the new P technology without the ethics. (1:28). All life on this planet have a common denominator, COHN, will the animals and plants also change the world and become peaceful. The lion will stop killing the deer, they will feel satisfied no need to kill. They key is not the blue box but the knowledge, 3 to 5 years to change world. (1:38). When Keshe sold with the East Block they used a barter system, it was a beautiful system and people helped each other, this new technology will do like this. This system also feeds your conscience and emotion, if you abuse it you will suffer it. (1:44). Keshe warns if anything happens to us, something very strange will happen to you, he and his wife have been threatened. You need to connect it to Grid so change is gradual. The man who losses his job will get a free unit. There can not be division this time for change to work. (1:50). NASA wants to make 22 months to Mars, but this system is easier. The schematics will not be released until ready, give governments time. He made it this way for reason, but doesn't even need the blue box. The water was a mix of many different foods and made a Gans of it and took the energy. He gave the energy of pork to a Muslim. Plants are protein based living organisms. (2:00). He calls for prays for the governments and meeting tomorrow. To build a house you need different filters for different energy spectrums, build it without bricks, but same way make a SS. (2:16). The KF pays one standard rate across the world, the movement would be towards 3rd World, start work at 10 AM. The bankers now want to invest in KF. (2:25). Israel refused but Palestine will attend, Iraq. The Vatican will come, we want to put borders aside. (2:28). Presentation of a kind of Infinity loop, keshe says its only 2 dimensional nothing

will happen, make it 3 dimensional, twisted wire creates problem, coils are better, it would feed the emotional, Nano coat base part with heat, and top section with caustic. Making of coils a problem for lot of people, need to develop better way. (2:37). Ask not to destroy PU to find out blueprint. Do you need even so big. As many stars in the sky, as many ways to make a Pain Pen. We don't know if Ambassadors will sign Peace Treaty. (2:44). Some nuclear agencies will attend. The last thousands of years financing to take from the people. (2:49). Tourism started in the 1960's because they had money, different groups rise as wealth changes, the new generation will be tourist in space, no one will come back. It will be a lack of population, control who goes. (2:56). How to set up the PU, connect to Grid after fuse box, or male plug into outlet and appliance into the female plug, if over load wait until cool down, even a day, the Nano will recoat the wire again, or if need can put some caustic on the wire and it will recoat. Once the house wire becomes coated then there is no need for PU. We are not creating power, we're creating Plasmatic MG field forces and don't depend on wire, to trigger the P to release.
