

Today we go beyond what Tesla understood but could not show, he understood M but not the G, Keshe considers him one of the only scientist who understand up to P, now we go beyond. (:03). A lot of people say their systems don't work, but he says they have started. Discuss Alex beads were set up with 2 meters, you all missed it. G is always stronger than M, if you don't take enough you have nothing to give. So you have put energy back in the Grid, but you are watching meter, and that is feeding back to Grid without harvesting anything. You have to condition system first or it will blow up. You're not measuring what is going back, depends on Phase. Compare your bill with last year, will be 30% lower. Put your load in middle between Unit and meter. Instead you put Meter to Unit to Load of 500 watts, so you can't see anything. (:14). So you put another load of 2000 watts between Unit and meter, the meter reads only 1500 watts, a 30% decrease. You can push it to 100% depending on if you have a 3 Phase Grid. If you cascade then up to 5 kw. (:19). KF is not here to give you these technologies but to take man into deep space. Stealing of the books is thieving, this is the habit, you can't understand, the money that was to come was to serve the humanity, this was a test, when you steal you lose the understanding, you create heavy and become more distant, you stay on Earth. (:24). Takes 3 to 6 months to peak. This system works good for Africa where consumption is about 1600 watts, but in West the consumption is higher, put the load on the end. The German he matched Tesla, but in G. (:31). He shows a stacker unit on the table, this system saves 30% reduction. You need to add a coil to get full 2 kw reduction. There is an overload switch in the PU, to keep from melting wires. (:39). In Africa it's a service to humanity, Alex got malaria and used the system to heal in 3 days. (:43). He connected live wire to stacker with Gans, but it excited the P and the wires went to the appliances, not a direct live wire to appliances, not excited electrons. It comes from the P wirelessly. The wiring of the house is like your neural system. Keshe picks up the same coil used for power and is now feeding himself, he decides what he wants to take from it. He holds the stacker, the middle core gives to emotion, but you decide what you give and take, the top core adds to your soul. Do you need to buy food, by coating the Gans on the N layer you decide what you want. (:51). He holds a 3 stacker, the bottom feeds physicality, middle emotion, and top the Soul of U community, which is no hunger, war, etc. How to promote man to elevate the soul, stop all the wars. He brought the technology forward because the Paris attacks were set up to start a WW III, dead bodies brought in from Syria. (:56). Now you have the 3 N C coils, but have to connect the soul, put a Crystal in the center. Crystal is transparent and equal, it will balance the whole lot, the point on the top allow you to share, fill the center with CO₂, it will elevate the Soul of Man, if you are not afraid to loose your life, all the channel of Peace will link up and cover the whole of humanity. They create the tools of war, we create the conditions for Peace, the purpose of KF. (1:01). A man came to assassinate Keshe today, live on the screen, but intelligence found it out, he had no birth certificate, but American passport, you all met hem and thought he was a very good man. This Power Unit is the carrot to get man moving. This is the only way to satisfy the greed of man. When you are ready to serve humanity, if you can touch the M and G you will not die. If you take too much you'll blow up, or give too much dwindle. This is the tester of your behavior, only take a man of Peace into space. (1:15). Assassin in clothes of a sheep. A message to Mosad don't try to

assassinate, Peace. How to fill the Crystal, cut the bottom, drill hole, glue only the outer edge so it doesn't block the field flows. You cut diamond with copper disc. CO2 is the main connection of the man carries emotion. Any clean Crystal, but it is the intention. (1:22). The CO2 has to be from the inside. In elevating your own soul, you'll meet the Soul of the Christ. This is the first time man is given this opportunity. Test by holding the crystal if it shatters then you want to give unconditional, when Keshe holds crystal they shatter. (1:26). When 2 M fields with intention to give come near the force causes them to separate to allow all the fields to flow through. The P fields cover the whole planet so even the animals become peaceful. (1:30). Ali wants to show his work with crystal, Keshe says he is instigator of the release of the Knowledge, he is using another crystal instead of quartz, (salinite ?), to bring the higher consciousness down, inside the coils, quartz has a double helix which works with DNA, Ali showed a UFO in his work, he had a vision, contact with beings inside the earth, they have Plasma bodies and P bodies. (1:36). Someone touched the N Coil wires, first time touched took the full energy and then got less and less. Place one coil on the front of Cancer and another on the back, the inner C satisfies the emotion and the outer the physicality, and if you have a death wish you will die, otherwise the emotion gets elevated and within seconds the cancer gone. (1:40). There will not be any diseases in deep space because disease comes from the amalgamation of energy in one point. Make a P battery and connect it to your N C and not electricity, use the P energy, it still does the same. Alex's beads are little batteries. You can hold the P Battery in one hand and touch the patient on the other and heal, like a health pen. Renan you're out of a job, he replies, "I make a new one sir," beautiful devotion. The Crystal has to be filled with Gans from within, not out side. You use dry Gans, or paste even better, but you've restricted the movement of the Gans. Any questions or have I managed to silence the greed of man. The enemies of the KF opened the PU and put on the Internet, now you've all seen it, take out the Gans in the center and put a crystal in the center and contribute to World Peace. (1:50). Caroline Keshe asks, if you make the N C big enough and put yourself in the center, can you be the Gans, 'that is the ultimate point of elevation', but you have to be strong to be able to handle not knowing what's going to happen to you, or you become clear enough to be transparent like a crystal, that it doesn't matter what happens, I elevate the soul of the others, that is the ultimate sacrifice, can there be flaws, the intention, 'would your Kidney stand on the center or the Liver', 'you have a blessed soul in this room'. The size of hole in crystal doesn't matter that much. (1:55). The flow of a Gans is continuous because it's always adjusting itself to the fields of its neighbors. (1:58). Cirrhosis of the Liver, the rings create the balance in respect to the environment. The cancer or any disease is always considered in respect to its environment. You are not targeting the Cancer, but bringing balance in respect to the structure, every cell has to find its balance. (2:02). Mrs. Keshe asks, can you place your intent in middle of the Coils without physically being in it? How do you do that, this was what The Christ did, but His intention stayed and gets carried out. The stronger you release the more comes out. 'That was my start, I've been working on it', Keshe, 'my God you've been working on it for 20 odd years'. If you understand you don't even need the coils or crystals, but at least its half way. If you become One, you are one with the Creator. Another question, but keshe says, someone connected a wire to nail, and foot in salt water and holding plate for 2 hours and created a lot of Gans CO2, what was the intention. (2:05). Alex tells about soaking feet in Epson slat and getting

CO₂ Gans, after a week it solidified in container, and using different herbs for malaria, using the juice and the ashes of it, like a Gans. They have the knowledge of herbs but enforcing the Western Medicine on them. Alex made a Gans of Malaria medicine, there is no dosage, your body takes what it needs. But if you lock it in then you need more. In this medicine you have to satisfy the emotion to get it to work. (2:21). Crystal video of an old lady N Coated wires in nature and found a crystal and put them together very powerful fields, Keshe says the Crystal is in the center of your brain, it's very minute and controls everything in your life, not matter. (2:28). Guy from Singapore, they see rotating shapes and hexagonal in the Gans, Keshe says, it means 3 different Gans. The hexagonal shape comes from interaction of Gans fields, 3 field layers of skin of man, the interaction leads to physicality. (2:32). It took a lot of work to get Alex back, they threatened to kill his daughter. Don't get intimidated, collectively we can overcome. Hexagonal at North pole of Saturn. Sun flares occur when the Hexagonal collapses and energy released. (2:37). Need lot of help to Archive the knowledge of Workshops. This N C coil gives you everything you need, you can even put a glass of water near the coils that's enough, in center is better it elevates the soul and physicality. Alex made a copy of the Cup of Life, adding Gans to the N C, it only has CO₂ so it only touches the emotions, the Cu rings connect the physicality, it's dangerous as it is unbalanced, the biggest flaw is the Cu interacts with the "red Tissues" and neural system. You can't use Cu for Red Tissue to bone. Need to put the Cu down at bottom. Emotional cups should not have any Cu. For emotional and sexual problem add Zn, as in oysters, stimulates sex, need to keep water in cup for 12 hours, and for 6 months. (2:53). When can't get pregnant it's not physicality, but insecurity prevents soul from developing, soul has to accept the conditions. The double walled cups filled with CO₂ cups, don't use anyone else's cups, this is the answer to Parkinson, it's cause is emotional, and sexual dependence, related to partner, 'I don't love' or 'I am not loved enough', the behavior defeats itself. (2:58). Draws the Gans filled cup on board, flips upside down, two coils on top, this is the head, the body is conversion, storage, cleanup. Kidneys left or right, balance fields, one side exit one side entry, if K stones you need to reduce field, to take from the kidney, its all in the CONDITIONS, you change the environment change the illness. (3:06). Should ask the Uncle what does he want, does he want to live longer, breathe through the cup for lungs for the emotions, drink for the physicality. Use a straw to drink from bottom up, fields from bottom up. Blood carries emotion, Lymph the physicality. If the disease is based on the physical tissues Liver, Stomach, whatever, use CuO₂. Why is Lymph clear, highly potential energy is clear. Any Cancers use K and Ca, without failure, Ca is bone, K has greater MG and changes the fields of cancer. The lymph carries the full spectrum of every element of the man, (3:13). If I am unhappy with my son, I don't want to create any more children, son, where do I create children from testicles, unconscious stopping flow to prostate. To solve the prostate, you go to the emotion that whatever is created is perfect even though it doesn't match my idea. Then there is no problem. Likewise, in women, don't like your daughter, the Ca and womb. Understand the source don't need operations. In Space you come across a 3rd arm coming out, because in that environment you need 3 arms. Study the totality. (3:18). Ceramics are part of this earth, if understood could eliminate disease on earth, how you fire it, etc. Ceramic around the coils. EXPLAINS why CO₂ is emotional part, 2 rings, outer is atmosphere of earth where COHN are formed, the physical earth has no C or O, but Fe, Cu etc., CO₂ is

connected to the AA and the emotional part, it touches man, plant, animal, without the physical part. When COHN connects with Fe get Hemoglobin, Mg get Chlorophyll, in ocean get fish, etc. CO₂ interacts with them all. Alex interacts with the energy transfer of CO₂. NASA and Google announced creation of quantum computer and artificial intelligence, Darpa has a 200 billion budget of NASA black money, Google owned by Illuminati. Marco is building AI downstairs, you have to connect to it to get what you want. (3:24). Question, if the mind is the determining factor with communication with Plasma, I should spend half my time developing a clear mind? "you decide". The technologies are limited to my own mind. "I have been saying for a long time, every man takes from his own intelligence, it doesn't come from how much I understand, but how much I am prepared to share unconditionally". We have seen this with Alex how he progresses. When you are selfish then you get tired and exhausted and can't receive much. Start using the PU as we discussed today, connecting on the other side, what you give back in generosity, you'll start seeing "results". The coils and P were decoys to get you to understand the P and how U works. And how you can use these rings to create water and power. You can hold them and absorb energy, in normal physics you should get electrocuted. Beware of the enemies of humanity, they have been paid to disrupt the KF, one person disappeared in Austria, Alex was brave enough to come out, Keshe removed from Wikipedia. Stay strong and use the Technology for understanding Peace. Or it will be forced on you from the strength of your emotion.
