

92nd Knowledge Seekers Workshop December 16 2015

He carries on through the Holidays, return January 18. The teachings will change to total Plasma and Spaceship. (:07). Goes over history of teachings and progress, Started with (Matter) Nano to Gas to Gans to Coils to Plasma, back to Matter. Plasma Crystals were introduced last week, they can go both to P and to Matter. Using the clarity of the Crystal you can boost the M or G, you increase the Matter towards the P or Matter. We are bringing the knowledge so all of you can achieve lift. (:13). The Crystals with CO₂. Some have started to test exerting you will on the P, in Philippines he wished no typhoon and it came through. (:17). Crystals and their powers, man has never been taught so much knowledge in so compressed way, we have to or else it will be lost, like in past. We have now reached enough people on the planet to start the change. The process has been on the table for past 10 years. The development of Spaceship. (:23). Alex has converted P into Matter by producing oil, in large quantity. Lot complained about the harsh words he used last week, it was to stop things going on in background and not to insult. The Core reactor in the middle is the Crystal, the secret of life. (:28). remember 3 layers stackers, structure of skin, you achieve hexagonal structure which is Crystal. What you have been looking for, the crystal, you already had in condition of the core. Place your Coil, the true plasmatic crystal, in the center of the Star Formation, (one step missing). This sets up a base which to survive in space. A 4th core above, and a second stacker, then you create a field that allows to create SS. Tip, do not put your coils on rotation, that would separate the P, fill in cores with combination of CH₃, CuO₂ and CO₂, you create gradient that allows rotation inside the coils, you don't need motors, you'll create a hexagonal field around all reactors, that creates the walls of your crystal, try to choose same material in cores slightly different weight, you need a gradient change to allow rotation of fields. (:45). You all used same Gans, but you should setup a gradient of flow, can create Coils of different materials, the stronger at the bottom then like a bullet. Coating all 3 stackers with CO₂ Gans if peace is your wish. When the fields are strong enough you create a craft around coils without matter state. Alex by his intention, collected the oil of Orange off the coils, not created, converted from a orange on top. Transmutation of matter to another place. (:58). You enter the room and smell the orange. Lisa in the Chinese group brought a unit to the Leaders and demonstrated that everyone entering room felt happy, she accepted it. USA is not the world leaders, Chinese are bringing the technology further. People who come in contact with N and Gans, don't feel hungry. The PU you received gives you everything. Put 3 PU in basement of United Nations and one on roof, we'll see if their intention it peace. (1:08). Keshe introduces a second motion at the equator of P, the interaction of the two creates the motion of the P, this is why the sun, moon, earth, have rotation through the rapid interchange of fields, and why everything is spherical. It's why you have flat bottom and spherical dome. Come together and work collectively, instead of individually, this has to do with emotion and sharing with each other, One Nation one planet. You have everything on the table. (1:14). What if you use Stackers in SF, get the FP to open up. If you could produce a large number of them they will all link up and make earth a Peaceful place, The animals will stop eating each other, no lack of energy, the promise of Christ comes true. (1:18). I Am The Messiah and I delivered my message, it's for you to do it, to find the path. (1:21). You can also use chicken wire to make coils, don't need only Cu, that means Fe

then you are dependent on the physical entity of this planet. Dependent on the blood structure of this planet, Fe to AA through hemoglobin. If one of your cores has some Fe, you'll create meat. Why produce single cell plankton, but still life. Why animals on live off green plants and others only red cells. Is the mass production of sexuality part of problem of humanity, do we need to be individually orientated or collectively. (1:25). In this SS you are not dependent on electricity. For 70 years we have tried developing the technology but have failed to sustain life independently anywhere in U. He summarized the stage we are at, Nano coat, build the coils collectively around the planet, they will interact because of slight differences, no two reactors can be exactly same, like snowflake, this gradient will move the P changing the fields. In the SF 3 Gans on the base, and H above will cause strong movement upwards, have flight. (1:31). Every where you find tangibility, skin, bone, etc., you find 3 layers that interact, same with this SS. You have the field flow upward and the radial flow, people achieve levitation, but no one was working with radial flow. Non-tangible control of the P, through emotion and thought but control on the physical level. (1:34). Questions, the PU are made that you need to connect, but the Magravs you build yourself you don't need electric power. Goes over connection to PU, Grid to the last outlet in house where PU is plugged in, then connect to appliances, people have been putting meter before the PU and don't see anything. Keshe says all the appliances before the PU are being powered by the P but you don't see it. You have to read the Grid meter. There should be 33% reduction in Grid meter. Most Grids are on 3 phase, (A,B,C), each phase is taking 33%, the Power Company is actually getting 66% (B,C). The system is actually taking 100% reduction. (1:43). Talking about a control system for the P, you use 1 kw and give back 3 kw to Grid. For example, you use 20 watts, then you produce oil, use 30 watts and bread, etc. You use your back load to control what you produce. (the neutral system does this in the body to create different cells). Marco made a control system, is a variable load device, as you increase load different materials are produced. You can build it, a single tray with inner G coil, and outer M coil, and a dial that adjusts the fields. (1:49). He showed it last week, a 3 stacker and a single stack connected to it, that single stack becomes the controller. You can be the "controller". (1:54). The most powerful part of ring magnet is the empty hole in center, the state of free air, if you can create vacuum, it's most powerful, because it has no friction. You have created the same thing in your Coils. (1:57). Ali video, spread out the 3 coils more and expand out the outer coil, it's still on 1 dimensional, need a elevated coil to make 3 dimensional. Why are asking, sit with it use your intellect, connect with P. You can experiment with lighter wires. (2:05). How to connect the Stacker units with capacitor and a load. What's happening is the M field is going out and not circulating, he shows how to connect capacitor to conserve the fields by recirculation, this would lead to 30 to 50 times more power. Use Split Capacitors that feed back to itself. (2:22). P batteries have to be fed back to themselves with split capacitors or the go empty, that creates a potential difference that releases more Gans. They need a feed back to their center. Collect the Quartz Crystal dust when you cut them and add to your Gans, become more powerful. Gives you more powerful unified fields. You can hold both wires that are perfectly N Coated, but they must be perfect or you get electrocuted. (2:28). The Crystal with 3 rings around, is so powerful create destruction. In P technology we use Nano Nano Nano watts. (2:32). Talks about Health application, P battery to one Coil in left hand and one coil in right hand, plus a feed back connect

between the two coils, to bring balance. This is only way to eradicate disease in space, by changing the MG field environment of the cancer, this is for stronger fields because body can handle weaker fields. You don't die of the cancer but the loss of energy. So much knowledge has been given this morning, it would take man 100 years to understand. In time you will do it through your emotion, now use Cu wire. Learn how to control your emotion, if you need it in matter you can convert it to matter. (2:38). Questions, don't need to rotate the Gans. How do you measure P? They are working on a tool for measuring P. With your Crystal inside 3 stacker, fill center hole with 3 different Gans, hold the wires of 2 coils and check your emotions, see if Gans move inside crystal. Measure strength of anger if it allows taking too much. Check the rotation of the Gans, these are the tools you have to develop to measure P. Do we have to add AA which connects to the structure of man. Testing will take centuries. If you meet a being in space, test if he is a lower or higher order of being. (2:48). 2016 was in the Torah Bible as the opening of space to man, the Hebrews want to stop it, but they know that their term of power is over. You have everything to build a SS by Christmas. It is easy for him to teach enlightened people like Arman and Alex, it's the essence of the creation of the fields that makes the difference. From now on real space technology. (2:57). Alex comes on and explains how he got Orange oil by placing orange on top of PU, just Cu wires coiled 24 and 12 times. (3:05). Confirmation of existence of man is through his sexuality, male or female. Experimenting with cup that has Gans on CO₂ and CH₃, that is emotion and energy, when you drink the water you get sexually aroused. Some have gone further and added a Zn plate on top, Zn excites sexuality and the water supports it with energy, "love potion", please be careful. For Alzheimer's you take the Zn and add more CO₂. You can start developing technologies with different Gans around the cup. (3:15). You drink the water, but there are also MG fields you connect through your emotion, no matter where you go keep connection, like mother to child. Extend the idea to your Stacker unit, like with pain pen don't share with other, the balanced fields are your own. A number of PU will be dropped in Palestine, they're not for people, they have the intention of Peace. The war in this part of planet will come to balance according to the Plasma. They will also link up with your reactors. Mike Nasser is working for Peace. Build a system with the emotion of Peace and give to soldiers. (3:23). Questions, is there danger when lightning strikes the Grid, no, lightning is not in P state, it doesn't have much energy in comparison to P. The lightning comes from the earth not the sky. (3:29). Nano coating will hardly be visible, but steel fuses will Nano coat. Plasma coating of different strengths, the P will flow here. The P is too strong to be contained by the matter state. Super conductivity of N unknown to man. Travel according speed of P. (3:36). Instant communication. The size of the Soul from the Vedas, not far off, the emotional part of man, in crystal in center of brain. That tiny point is it, remember stacker units has same structure of man. That tiny crystal is created by the field forces of the brain. The 3 sections of the brain interact like the 3 stackers and create physicality, that's where you find your emotion. Learn how to interact with it. N C O deviation leads to motion. Doesn't need to be big because it absorbs lot of energy from the heart.
