

95th Knowledge Seekers Workshop January 7th

(:04). There is a 9 stacker unit. An artist is running her studio on MaGrav power. (:12). Independent report on how Governments are funding people to discredit scientists. (:16). The Golden Age of Gans, on Facebook. (:19). "Proof of Government Paid Trolls and F E Debunkers" video. (:24). How to make CO2 Gans. The tests showing Zn in it. (:28). Keshe draws CO2 Kit, on one side the N C Cu plate and Zn plate connected via LED light for current flow. You have created a P field between N and Zn plates, on the Zn plate you'll release Zn O₂, whereas in the water of the P field you'll release CO₂ Gans, you'll get a combination of both ZnO₂ and CO₂ Gans. If you just connect wires you'll get 95% ZnO₂ Gans, with a load of LED (green or red color) or fan 85% CO₂ Gans. (:36). Using Sea water, you have all elements of planet, when you add caustic you change the structure, it has mostly CONH, you produce Gans of water and H, it will have lots of Gans's which will be white, you can use this for P Batteries, P food because everything in Sea is in it. Zn (60) behaves as a stronger C(12). Gans of water is transparent, Lymph is Gans of water, but different. (:43). The water inside body is a depository of energy spectrums, like the Sea water, you take what you need by way of Paratorid and other glands. Continue last weeks discussion on Health and double Coils, by changing the inclination of the inner Coil (G), with a similar coil on other side of body, you change the environment in the body of the man. You can also change the outer (M) coil orientation, that changes the MG field. (:52). 9 stacker can make another 9 stacker and put the body in between, treat cancer. Don't connect all the stackers together, leave it open so you can connect different ones if you want. (:57). Arman shows new work, a way to slide N wires into coils as a connector. (1:02). Doesn't matter what the coils are made of Cu, Al, Fe. What matters is the P created in the center coil. The new P Batteries N C wire (that is Gans coated also) in center, coiled, and wrapped in N C Al, connected to double coil, it totally P based, feeding P to P does not go through Matter state. You are directly dictating with P B what will come out of P. The P in Coil reacts with P in body of man. By using a second coil that is weaker, on the other side, the gradient causes it to flow through body and balance out fields. **THE HIGHER PLASMA FEEDS THE LOWER!!!** (1:08). Arman shows his setup with 2 coils on each side. (1:18). Man showing his work, he's off the Grid, he's made P Batteries to power his Coils. He has made a flight setup, he sees the SS, he's the 5th person to achieve SS. Showing Ali system with the new coils. He sees lots of shimmers in room, certain times more. Passing through the wall, creates a vortex, very power, the crystals connect with the mind. He used Sea water for Gans. When he walks in room, he sees a mist, sees lights between stackers, his friends see the same thing. Some parts of body disappears. Ali is now part of the KF SSI unit. Back to the Swiss man, connect all the base G together, turn the center core 90 degrees, raise unit another 10 cm higher. Keshe offers to bring him in KF team. (1:37). His unit has created a shield that interferes with the microphone. He put Orange on top of cup with Gans, water tastes like orange and full energy. Connected Alex Beads to central reactor. Keshe is bringing all the people at this level to a SS City to work together on SS. (1:44). The head and parts of body disappeared because of MG fields. (1:47). Back to Swiss, he says he can control the energy, up or down, feels a barrier when he comes close to unit. Keshe says he should move one of the Coils at base and see if part of SS becomes a physical structure. He feels totally different inside, a new

world of light, peace beauty. When he goes outside, sees a huge ship. (1:51). Last Monday, Ali and friends made study of the boundary of the unit. As soon as he turned the inner coil 90 degrees, the whole house started glowing and misty, he brought more people in and filmed it, outside the house there was a glowing blue light. It can cover the whole Northern Hemisphere. When he used the crystal on top of reactor could see the P 3 km away, ethereally he was traveling above the Earth. (2:04). Man shows work, he wants to use the end wire of coil and run back through the center of coil and make it as a battery, rather than hanging the batteries down in another place, go ahead and let us know. (2:12). That wire that is fed back through the coil, it strengthens the field forces, very important. You need 2 coils on top of each other to create P. (2:16). Keshe says to make a split battery by one half in inner and one half in second coil. Use the wire that goes through the coil to wrap a battery Gans around it, it could add lot of power to it. (2:21). Nice picture of the Coils, but he's got a small coil inside each coil. (2:28). Photos of outside his building and you can see his orb above his apartment. Video of his hand disappearing. (2:38). That glow above the house, these can link up around the world and start the peace process. Cascade the planet with a few system around the world, with right intention, peace. You made the coils for energy, now turn the inner coil 90 degrees for reversal of illness. You don't need more power, you can tap into energy wirelessly. (2:45). Alex house is completely N C after 6 months, now everything works without Grid. Free Plasma energy. (3:00). Talk after video. (3:04). Draws the connection of MG units to house. After 6 months, connect a load between the MG unit and Grid, then connect to a battery (or an AC converter) this will convert to AC for whole house. It becomes self-sufficient. A wire to ground has to be connected before the battery, See diagram he's writing. In time you can disconnect from the Grid, just needs time. (3:09). Man says he disconnected from Power line but after 30 minutes it went off. Keshe says he needs to put some P Batteries or inverters, in the system. Convert the P into AC by attaching to Ground. (3:13). A man made some innovations to coils. Keshe says not recommended, you need to have some separation. (3:18). Coming is a P B without N C. Will show how to tap into the center P without N, and even P without Cu coils. Next development is transport matter over P. Take your double coil and place next to cup of water, adjusting fields try to create Cu or Al in water, then try to transport it somewhere else. You'll see your cup emptying and that one filling. You have done this with the orange in water, now solidify it. (3:25). cPVC pipes (chlorine) when in caustic produce a toxic substance, dangerous. PVC is okay, put in for 5 to 10 minutes, or rub it on pipe. Gans.org will concentrate on Gans. So many new people from across the world.
