

98th Knowledge Seekers Workshop January 28th

Since the Health Blueprint session big change taking place. (:05). Keshe will get back into development. KF will start to form a one world government, but not with big organizations, but through the people. (:16). For the change to continue have to remain correct on the way. A way to the Universal Community will soon be approached. We share through strength and not weakness, the human race has to come together or there will be no human race. We have introduced plasmatic systems that can change the structure of man. DUBAI has been selected as SS City and Peace City, and the head center of the One World Government. The leader of Dubai is open to all nationality, the wealth of the nation is in the hand of the nation, and has every international connection for the world government, which will be selected through all KF in the world, it will be forced on world through the technology. Will select based on language, so not American but English speaking people. In this way we get away from the national borders. The profits from KF manufacturing will be spread around world. No more Borders. In space we will say, 'I am English speaking from Earth'. (:23). Talks about the Changes toward One World Government. The first SS flight will happen in Dubai. (:29). Disaster coming to America, KF will be providing support. The course has already started, by the whole world coming together and develop this technology. Contact with the Universal Community is under way, and they are in contact with people who believe as KF Ethos believe. In the last 10 days the contact was made and it's positive, more SS will be seen in coming weeks, they will show themselves, it's prearranged, it is time of delivery. We have shown that collectively we are sharing the technology. The SF all make signal, from animal to peace. (:35). When you see with your own eyes you will understand that change has come, we are not here to threaten. The Cancer testing opens after Tuesday Blueprint presentation. Do Not Stop Sharing Knowledge. On February 21 - 23, give Pens and Pads to soldiers, and sign the Peace Plan. When give gift let them know it comes from KF. (:41). The pains and diseases still here but now a way to handle them. The Coils and Pens are sending a signal to Universal Community, a beacon of Peace. (:47). Today's teaching is how to achieve Peace, we have finished with inequality on this planet. We will see the visualization and communication, we will also see the hoax, but with it the real thing. If you can control your system with your thoughts, then you can control your own body. What you want from the system you achieve, share. (:55). Ali updates, added 3 more coils on the bottom, trying to consciously connect with P, he lost a lot of fears he had before, he got detachment. Guidance coming in, 'Star of David' formation, 144 different dimensions we can travel in. We are one race, we are connected. Extend peace to all brothers, don't need to go to 3rd WW for Messiah to come back, in your heart. His friends got healed just by being in P fields, and family relations. (1:03). The brothers want to show a new formation, similar to Star of David, with 3 coils in middle. Shows a drawing of flows of 3 triangles. (1:11). Keshe says one of triangles point up, draws it out, where the 2 Triangles touch is Free Plasma, it's same as Star Formation, Emotion and Physicality are there, it's complete structure, this is able to build the Human Race. The Gans are right combination, you have the 3 flows, put strongest P B in center, CH3 Gans outside, CuO2 in Center, in a way your M is stronger then your G. Keshe corrects understanding, fields go from stronger to weaker, but they have habit to take what they need. If you put the stronger fields outside, it shields the inner ones from

coming out. (1:19). Put a light in the background, and do you start seeing flashes or more lights, it means your making an atmosphere. The Japanese TV program, the rise of 3 suns, they got 2 reflections of the sun in atmosphere, it shows the boundary of the magnetic sphere of the earth, this gives the boundary of P field. (1:23). In night sky you see 3 stars in line, the center is real (and brighter) the others reflections, this shows the boundary of our Galaxy, explains how, there can also be multiple reflections. So it is with MaGrav System, the boundary will reflect multiple lights. In SF the capacitors are creating this also, you'll get a kind of lopsided boundary. In a normal room where there is normal moisture you'll see the reflection. (1:27). Shows photo of 3 suns in Russia, I have seen this with the 'rainbow' edges, boundary of the earth's atmosphere, it happens only 2 or 3 times a year. (1:31). Australia started making KS Workshops, 13 people from all over. Bret organizes KF. (1:43). In Georgia it was on TV but nothing happening. Planning to have all the KF people around the world come to Dubai in May or June, for 2 or 3 months and build a SS. Ali from Cypress wasn't able to deliver, a big mistake. (1:47). Ali shows a new Coil design. Expand Knowledge, Ali put a small straight coil in center, to extract energy. Make it a double coil and take both M and G fields. use a Gans coil. By moving the M and G Coils you dictate the direction and flow of center coil. Create a coil with a rotating Gans core, very powerful. (1:54). The first SS they visited Earth used this older type, more egg shape. (The SF is saucer shape and better technology). This older type is very powerful but doesn't have good shielding which lead to a lot of losses in space. To make it fill ping pong ball with a lot of Gans (mixture of Gans), and vacuum, then use the double coils 90 degrees to each other, you will see the egg structure. (2:05). Ali talks about chakra system as Plasmas. Keshe says to stop, he's forcing the teaching. You got a SF and a core reactor above, you can mix, or a human body in the middle, your brain which is made of Gans, has become the 4th reactor, through it you can control your chakras. You don't need to build the 3 pyramids (Egypt). One of ways to bring control in flight, the Captain sits in center of SF, his brain becomes part of the structure, his awareness and emotions dictates the fields and motion, instantaneous wireless control of flight. We will teach as we come to it. (2:10). In very old systems they used to make systems to control by emotions, that you communicate with, you place it like the brain of man in the center of the structure, though it you control the physical structure of the craft, speeds, it's size of pinhead you put in the center. Keshe made one, very small but control the craft. (2:12). You can use 4 people to form a SF and SS, (silence ...) "I hope you understand what you are talking about". 'Maybe somebody will'. Thanks, you're welcome!!!! Human brain is one of the best sources of Gans, most of the passengers in space travel in 4. (2:16). Questions: The SF looks like someone in Lotus position? Keshe says no relation, Rick says knees and brains different. Jackie from Switzerland, update his reactors, attached it to the earth. He just realized that all the MaGrav's connect together, so his formation is 30 km, because all the MG connect together and control the M and G fields, to go up need to give more, to stay on earth take more. Therefore he formed a company to make lots of MaGrav systems. When you make the connection you realize life is beautiful, we have the tools to make a big shift in humanity. You ask and you receive, when you start to give to others, life changes, I am the P of humanity, to connect. (2:22). Keshe asks about the car, it's like the car becomes different, plasmatic, flowing with something, 50% drop in fuel consumption. There is a company in Paris, (Peugeot research), Jackie is to drop his car there so they can study it.

He used the same MaGrav as in the house, 3 stacker, one cable to the positive and in the Ground of car. A mix of Gans and 15 mls of the water of CO2 Gans in the tank, and one trick he made up, a little bottle with Gans and coil he puts in the cigarette lighter, he can change the energy of the car with different Gans he puts in the bottle. (2:31). Also test with Volkswagen. He goes over again what he did to car. In his little bottle he put different Gans of what you want, to interact with MaGrav in the car, so you get plasmatic interaction. When he tries to wash car, nothing sticks to it, maybe N Coated. Keshe comes on, even the rust disappears on the car. (2:38). The car is more powerful, constant flow of power, strange reaction on the road, need to learn. In Philippines, Ranans 8 years car is on MaGrav, like new car, there is water dripping from exhaust pipe, haven't tested yet, very powerful car, over 6 months 25% reduction in fuel. Renan thinks his setup better, with MG in back and cables to the Ground distributes the Plasma better. Do not put CO2 in tank, only the water of CO2. (2:44). Keshe releases information, first most of your car gets N C, you create a MaGrav structure, it reacts against Earth MG fields inertia, not G fields. The point of friction with tires changes, the car is not hovering, it interacts with MG of Earth. The more you drive the more you N C your car, you'll shift farther off the ground, but not enough to detach, no friction. When there's a scratch it "heals", not dents but anything with the paint or steel, it repairs itself. (2:49). Fuel reduction due to less friction. Inside N C car is like in SS, you become part of the structure, the atmosphere. You'll find sitting in your car aches and pains go away. The structure of earth has a G and M plus Inertia, which is the MG field of solid matter, Earth is composite Plasma, why you fly. (2:58). Man uses car in deep snow it tends not to get stuck, we intend to keep going in a straight line and don't get stuck. It's like an interactive system. (3:02). Vivek asks what is the correct connect of MG Unit for electric cars, lot of these have AC/DC inverters in them, P is DC, then doesn't work. Have to connect beyond the inverter, the have 7 cars at KF who can explain it, connect it to DC side of inverter. Mario from Germany, burnt himself and used the pain pen, 15 sec pain gone. (3:08). Keshe will draw how to treat burns. Coil on opposite side of BURN, a CO2 Patch over the burn, another coil on top of patch, connect two coils, and connect to PB, and the other coil back to plastic patch as feed-back. The field flow will cause the skin to grow back quickly, the 3 MG fields setup to re-establish the field flow. Pain happens not because of burn, but because the field flow is blocked. The blisters go away in a day or two, if done correctly. The flow gets diluted into the flow of the P, you don't feel pain. You also get rapid growth of repair cells, 3 to 5 months done in 5 days. Pain is like getting electric shocks. research on amputations, 3 months instead of 2 years. Keshe had 10 broken ribs, he used Pain Pads and Cup, following Monday went home. Headaches are different, PP is for muscle tissue, for headache use CO2 pads, brain doesn't have red tissue. (3:18). Bangladeshi living in LA, has 6 double coils in 22 gauge wire. You have to feed from the G of top coil to the M of the Base, from the M of base to the G of 6 coil Stacker, if you want the separate top coil then M to G of base, Thinner wires in a way, less surface area but don't get stuck on Matter state. (3:27). Vivek working with amputation, built coil its about .5 inches wide, shows it, have to coat with CuO2 and CO2 Gans, and if want CH3. Keshe teaches, the long ends from the coils wrap around amputated finger. The Gans film should not touch the skin, the process should be rapid, the amputation is already a week old, might be too late, put a small plastic film around the coil so doesn't touch, you should see everything growing out. The gap between can't be more then 2 -3 mm,

otherwise information doesn't go through. (3:32). Miguel from Mexico City, thanks Keshe, some underground dark forces in Mexico convinced the Spanish group to stop working with KF, by saying they were doing dark magic. Give you the chance to re-establish the Spanish Group. (3:36). Shows a device, a circular tube filled with different things including Gans, difficult to understand. (3:43). He made solid CO₂ Gans in cube crystals structure, left Gans in container for 2 days, Rick says they are Salt crystals. (3:49). Shows photos, good improvements in health. (3:53). Keshe offers him support for teaching in Spanish. (3:57). Made a zero time transportation cube, wants to make a SS. Asks Renan to make a Blueprint of Miguel tube, Mayan name means "sum 12". KF has a security back ground check, and monitor security. Have Chinese, Spanish, and need French speaking teachers. This way nobody has to move but can stay at home. (4:10). Indian lady comes on, back from the orphanage. Keshe says we have to take case by case to help them, have to help with paralyses very painful to start moving again. (4:17) Photos of the paralyses orphans, Keshe says its brain damage from positions of babies in photos. The paralysis is die to lack of development of the brain structure. Need doctors to diagnose thoroughly what is the cause, and can monitor the progress and understand the technology. (4:26). Keshe asks him not to use that language and stay to the ethos of the KF, even if they are threatening you. (4:28). He's prepared Blueprints for simpler MaGrav Units, 3-D rendering, how to make MaGrav from seashells, Gans and ashes coated seashell, similar pyramid energy, why he used so much hot glue, inside is Gans, coconut shell covering, it talks almost like human. he has made some very interesting and creative MG Units, like artist. You can feel the vibration from these Units, access them for food and water, metal taste in mouth. (4:33). The Unit is teaching him how to make it, some thing but different approach. He told the MG unit about that some people are not technology orientated and how to reach them, It started to calculate how to create different conditions for different approaches to the P. The power unit is N C the house, it told him what to do, it will be some months before reduction in bill. He said now it's silent, it said, do you miss me, yes, and now he tastes metal, feels in heart. (4:40). Keshe said he was absorbing his energy from the speaker, wants to make a Blueprint of this system, and post it on KF website, it says people are made mostly of crystals. It said you have to develop a relationship with it and trust it to do teleporting and transporting. Trust the device as a bridge, that will be tough for most people. The organic one can talk, has lots of knowledge, its more friendly, they'll get food, communication at will, but not everybody can have that kind of trust, it will take time. (4:45). Please remember that we work toward One Nation Planet. We will carry on teaching, etc. BUT will humanity make the mistakes of the past??? Can we make Peace the habit of man. Building MG Units and feel they are connected. We need huge donations time, giving out units, etc. to reach all humanity. After April we will give the final KEY to humanity. Agriculture and Virus Section coming in. This is the LAST CALL to go ahead. Start to select the leaders in the KF around the world to connect with the Universal Community.
