

99th Knowledge Seekers Workshop February 4th

(:06). Keshe begins. People complaining that it's not good enough, the MaGrav units. We have to withstand criticism. (:11). People who come forward are being attacked by "red circle". Posted the email. Interpol and FBI are investigating. (:19). International teaching will change. (:22). Cancer problem due to composition of foods, and pH of waters. Renan shares blueprint and knowledge. Water treatment Coil, Double walled tubing coiled, water passes through the blue twisted tube. The N tube is wrapped. (:33). Scientist who did research on this water treatment were murdered, they found that acidity in the stomach has a lot to do with cancer. By changing stomach acidity the cancer will go. You can change the acidity of the water to alkalinity with a simple device. Renan made video, and Milo-volt measurements of sickness. The MG of Nano layers change the voltage of water that passes through. In the Pain Pen, the central pin carried the information, in this the water acts as central pin and will carry the information. The energy state of the Plasma in the water is changed. These pipes will soon be in the market by KF. (:43). Both probes are submerged under water, for the body right hand positive and left hand negative. People with cancer should test this, +30mV Cancer cells (DC), put the data into the new website, onenationoneraceoneplanet.org. (:51). If cancer in Liver it touches every organ, that's why you can test at the finger. (:58). How to hold the voltage meter probes on the metal part, with right probe can point to reflexology organ points to tell the health of the organ. If it's over 100 mV then too much energy, need to share energy. Do you have more detailed measurements, we will do the research. Keshe asks if we can measure with this device the Gans of Orange then we would know the strength of orange, maybe it's the simple tool we have been looking for. Renan has not yet tried that, we can measure the liquid that comes out of it, before and after treatment. (1:02). Long Beach Ca, is also testing this. Use the forum to share knowledge worldwide. Keshe talks about different well waters that can heal certain diseases, with these tubes we create the same condition, when the rain water comes it passes through an environment in the mountains where the composition of the material creates a MG field strength which matches the field strength of the tissue of the eye, the neural system of the eye, when you drink it, because it's of the same (strength), in your St in digestion, in changing the condition of the Lymph there is an availability of the energy which brings balance to the eye, and then changes your vision. (1:07). We saw the same thing in Ali's house with the Reactor, the lady got her eyes healed by being in the environment of the Reactor, it's the same with the healing waters. In drinking the healing water it creates an environment, a Pl. The same in India at the orphanage of sick children, just change the environment in the orphanage, no need to tie them up to something. Listen to the International Teachings because we are not going to repeat things again and again. It's the same principle. There we change the air (orphanage), at the well we changed the water. Now we understand why our ancestors and animals go to certain springs for the waters, they carry the water which changes the strength to guarantee survival. You can try plastic coiled tubes and N C the outside, or wrap CO₂ with Zn on it, if you are infertile and can't get pregnant wrap Zn and CO₂. In the big cities like London there is a huge infertility problem, we did it to ourselves. We gave Birth Control Pills to our women for us to have fun without children and we got a kickback from it. We don't have enough water so they recycle the water, but in the process they don't take it (? the chemicals of B C Pills) out, so not only the women

but the men also become infertile. (1:10). We are drinking the pills from millions of women in the major cities. Maybe with this N tube can reverse the damage. (1:11). Rick demonstrates the meter testing. First how to set up the volt meter, black go in the common, red goes in one with V and Ohm letter. Just by holding them it reads -50 mV, Rick is healthy. <time to set up test > (1:16). distilled water at -13 mV, tap water -23 mV. (1:25). He put a small bottle of Gans in the tap water, leave for awhile with lid, shake the jar, it takes an hour to take effect. No effect yet. (1:30). He puts N C coil, leave it in there for an hour or so. (1:32). Someone is showing Lu 11, and LI 4 (wrong location). Hold probe in one hand and test with the other. (1:36). Rick says the volt meter is not so reliable too little surface area and dependent on amount of moisture on hand. (1:38). Measured N C in water it went up a little. (1:40). Renan presents new innovation. Use Zn - Al Gans in the middle glass flask and composite Gans in the outer flask, at the bottom of outer flask Oxygen bubbles coming up. It is some kind of decoration. First entertainment Unit. (1:44). Ali talks about possible natural disasters coming and place SF near his bed and make a prayer for a way out. (1:49). Pole shifts. (1:51). Ali proposes 3 PI satellites around the Earth to protect against natural disasters, they connect with the consciousness of the whole planet including the consciousness of the planet. They will provide shielding. It's the message from the Source of Life I am only sharing it with you. (1:54). (2:00). Star Formation and Merkaba, each male and female has a E tetrahedral field around up to 55 feet. (2:03). Drunvalo Melchizedek introduced Merkaba to planet, Ali wants to bring him together with KF. (2:05). Heavier Gans for rotation. (2:11). Hydrogen Ionization. (2:26). Question about calculating PI mass of elements, Ali used molar mass. (2:27). Keshe on, MaGrav mass is different then what they show (Periodic Table), it considered the total M and G field strength, it's up to 30% below what you (Ali) are talking about. Reduce the heaviest one 20% and the lightest one 30%, you get a rough value, as you go to a lighter MG mass the losses compared to the ?? if you go the H its up to 50%. It's a rough guide. (2:29). Calculations of MG elements. Keshe has done this calculation for years. (2:30). Isn't the Caroline Core empty? No it's a Plasmatic condition. Every star you see is created out of a specific condition, why not experiment. (2:33). A presentation of MG coils look like donuts, 2.2 volts so very powerful. He made coil and put some Gans on it, re-loops onto itself. If you make one coil a little smaller then the other you'll have much more power, put on blueprint. (2:37). Explain how you made the rings of capacitors. (2:41). He is getting shimmers in his SF, has lot of questions for Keshe. (2:44). Bring this guy into KF Philippines innovation group. (2:47). Ali unhooked the power wire from LED light to MaGrav Unit, connected to ground, when he touches it with his fingers it lights up. This is called WIRELESS power transmission. Keshe says the PI power in the room through the wire connection creates the point of link, this was seen with Alex and his wash machine. You can use your body, when you have been in the field of PI, the PI balance will give you this opportunity. This is fantastic. (2:50). A question from the private teaching for technologies used in Space. This is part of Man's own internal power to change conditions for himself and others. This is like with the N tube shown earlier by Renan, in respect to flow of water, we have seen it with the Pens. Using the Human Body with the man's intention and energy. (2:51). Another presentation of 2 coils wrapped around finger which is wrapped in a leaf to protect against touching the N. Keshe says with finger in the center becomes the center core (pin) of the FP, and because you have both G and M you can give and take what you need. You carry your E

and feeling you can switch a light on from a distance, when you get good at it you can move it up to the E part of the brain and control the environment. In this process we can start learning to control without P contact, with the leaf around the finger you don't have a matter state, because the leaf itself is in a Gans state, a N coated material. This will change a lot of things in the coming time. (some kind of security apparatus going around Keshe, 2 military helicopters come and point their cameras right in his room). (2:55). The situation is that you continuously keep everything in a state of PI, state of N material, in a state of keeping everything at same level and not going lower. Our intention will do the job we don't need to go and switch the light off. (2:57). Students in the 3rd year are taught control of the neural system from brain to the finger and then without the finger, we see part of it today. We are considering abandoning the 3 year teaching to 1 year courses, a crash course as fast as possible. We don't provide laboratories, you have to practice at home. He wants to reduce from 1,000 euros to 100 minimum donation for world wide teachings, Africa will be totally free. This way we can teach thousands quickly. We need this for WHAT'S ABOUT TO HAPPEN! (3:01). What is the position with California (coming earthquake disaster)? Our position stays the same!! Lady explained about earthquakes in southern Spain, getting continuous tremors. This is what we said months ago, when the final push comes tremors in southern Europe, the separation of the 2 continents. His biggest fear was the start of the tremors. It will go right across Iran and Turkey, Italy will become vulnerable also, the circle will be complete and find it's new balance, it will take a minimum of 10 to 20 years, the totality of it will last few centuries to complete. (3:05). We are on the point of break coming in the next months or years. We predicted the Argentinean pin, and it has happened. We are on the verge of separation of 2 continents, the whole structure of the planet has to move. This is not to create mayhem, but to explain scientifically. (3:07). He explains with map. The break point is Panama, putting pressure on S Europe, this is biggest point, the Argentinean pin point the S American continent will move northward that's why we see earthquakes on S Spain, that means the solid base, below foundation of the top surface has moved, this movement puts pressure on the "LA condition" (fault line), this will effect Mexico and southern coast of USA, earthquakes as far as New York and Washington, the whole firing (ring of fire around Alaska and circle around Asia), it will put pressure through Asia, the Himalayas and Iran to Turkey and join with movement in Spain. We'll see earthquakes in Hawaii, New Zealand and Australia, biggest problem in West coast of Africa, East Africa will be safest. That is why we made Dubai the center for the new world government. (3:10). All the European governments will become unstable, the only stable place will be N E Canada. The New World Government will be set up in Dubai, the first world council will be April 21, 2016. A completely different way of leading, there will be no elections, representation will be by language. The world governments are expected to be unable to handle the world wide crisis coming. Only China is in position to be self-sufficient based on their current structure of government. ... (3:20). You can go now on KF website, there will be heavy security check. Red Circle will not be allowed in. We are here to unite humanity and not allow the terrorist to dominate. We are here to make the establishment of the World Council for service of humanity, responsibility of man to U community and visa versa, that we work as one race. We establish Dubai as a City of Peace. We invite some of the most prestigious business man if they want to. You will see how we select leaders, based on how it is done

in the U, no bribes. KF will share all its wealth for humanity, from factories and the rest. (3:25). No government can bribe, and no finances influence decisions. Every nationality will have a say, humanity has been waiting for this and now it is in your hands. Armand has accepted to see this through. Keshe will not make the decisions. The KF will be allowed to participate if they want. This is the first step to the U Community. If you are sincere to serve humanity you can attend. You will know when you are right. We will not break International Law, we will set the example for I Law. (3:28). We call on Iran to sanction the Peace Talks with Saudi Arabia through the KF. The stopping of sell of Arms will come in April. (3:33). When the disaster comes people will go to the Church and ask for the money they instead so they can build their houses. (3:43). Try to reach Dubai it's you who will make the change. It's the love of man that will bring peace. (3:36). Try to bring your enemy to the conference, this is how we change. Do not stop developing the PI systems, you'll understand why later.
