

459th Knowledge Seekers Workshop; November 17, 2022

(Transcription Proofed)

(Auto transcription from Elias)

ENGLISH TRANSCRIPTION

(:08).

K- Yes, good morning, good day to you. As usual, wherever and whenever you listen to this series of Knowledge Seekers of the Keshe Foundation, Spaceship Institute. We welcome you back. And we endeavor, as I always say, to learn more with all Knowledge Seekers, we are here to understand and to see what we can add to our knowledge, that we might help us somewhere down the line when need be.

First of all, we congratulate the Americans who managed to get themselves off the ground successfully yesterday. And hopefully, in next three or four days, as they say, they will reach the orbit of the Moon. They'll spend two or three weeks there, and as usual, like a baby, they'll come in and jump in the pool and make a bigger splash when they land. And it will be interesting to see how the development of what we call, half a century of waiting, will bring us. We hope that they will make their way to space by 2025, as they are hoping, and return back to the Moon. As we said, I was talking to someone yesterday. We'll have the table of the wine from Italy and some other things waiting for them to greet them back. (:10).

The true knowledge of the space comes out of understanding the work of the space, not the work of the man to overcome the work of the space, as NASA is doing, and the others do.

In the past four or five months, you have been with us, you supported us in every shape or form. Some over 200 of you came to Linz, some of you joined us from distance. And more or less, a lot of you became part of the what we call, "Mojhans", the members of the human race who endeavor to take the first steps. When you see the Apollo people will go to the Moon, or back to Moon in two years, is exactly what you've done in past 4 months. You're one of them. It's getting out to see what is there, what it will be, what they might be, what experiences are, that the next generation can open the door, that we get more people and somehow, over the next half a century, man with a dream of NASA might make a base with a few people, as we've done with the what we call, the space station.

But the interesting point is, as we test it, we have now, delivering the new systems. The life will change. The life will change for many of you, and has changed for many of you from today. I'll explain to you in a step by step, as you all been with us, and you came across the line with us. And you worked with us. In a way, us, as the Keshe Foundation, some in the front, some in the back. Some people we know, some people we don't. (:12). But we take the knowledge and we make the best of it, what we can do.

One of the biggest problem with going to space, as I explained in the last session, is understanding that, the energy we are used to, is the energy of the Earth. That 20% food which we consume. To become man of space, we have to understand the energy of the Cosmos. Because otherwise, we'll die.

In space, we don't need that 20% energy anymore. Because we do not know which part of this universe we are citizens of. And what is the need in that point. So the feeding of 80%, understanding how that 80% receives his food, become paramount for the man, if he is going to jump out of that flight suits that the Americans have created for the astronauts, and the Russians, and the Chinese are hoping to do.

This week, we have reached out to the what we call, Israeli scientists to join us in this endeavor. We'll wait, and we'll see the response. We need a lot of them, the Russians, the Chinese, the Iranians, the Israelis, the Americans, the Brazilians, and the rest of us in Europe, that we collectively cross this line. The feeding of that 80%, understanding that if you can make the 80%, and you know how to manipulate it, you can get the other 20% from cosmos too. If you stay within the body of the man.

In a teaching of last couple of weeks, (:14). I refer to this because as I said, we become universal passengers. We need to understand the cosmos. We need to understand how the rays of the Creator transfers across the universe, what we call, cosmic rays. These are God's rays. These are the rays from the source, from the Creator. That through division and interactions are what I call, travel the span of the U. Somewhere down the line, this will create another Sun, these cosmic rays, and then with it we'll see life, and we'll see the love of Creator within that star and the Solar System which they create.

So when we speak about cosmic rays, we speak about the rays of the Creator. What their motion has lead to creation of our Solar System and others, and will lead to creation of others, and other lives in the future. Then we have to respect and understand the Totality of the knowledge, when we call it a cosmic ray. When we create the rays, which can match the rays of the Creator. This is what cosmic rays are. This is what life to me as a scientist is.

We saw the birds fly, we made aircrafts. We saw the brain of the man and we made computers to match it. Now we understand the process of creation. And we attempt to create the lights, the rays, the fields, the emotions of the Creator, through the understanding of the man, through the new systems.

Initially, we brought this out to you as enhancement units (EU), where your soul became that star, your soul became that point and the units, and the reactors around it, became the satellites. (:16). In the process of all this understanding, we tried, and we endeavored to push the limitation of the understanding to a further point.

In this process, we have gone a step further. As now we understand, and our team are working, and now have already developed the condition of the creation of the cosmic

rays, through the fields of the magnetic field, which is the basis for the fundamental understanding of what we call, Creation.

A new cycle, a new what we call, technology has emerged in the past few weeks. Where, as we said, last week, we have managed, and now we can produce fields, electric current, and power out of the motion of cosmic rays. Which means we have achieved the ultimate goal to be able to produce fields, which is at our, at the strength of the human body. Which means we can feed the man, which means an end to hunger, and end to pharmaceutical. This process will go to a step further.

Gradually, in the coming days and weeks, we introduce new technology, new dimension, new understanding. And with you, as those numbers who became groups, are coming to Austria. Those of you who joined us in one short session with Rick, and then another session with Rick, with many of you online, without you knowing, (:18). we were testing huge technological development. Which we're going to share with you, part of it today, and gradually in the coming weeks. In the process of past weeks, as you were with us, as you came here, as you became Mobile, and whatever to be part of.

We continuously tested things in the background, to understand the process of transferring and understanding the process of the completion of the cosmic rays. With some of you knowing and unknowingly became part of that process. You gave us the information we were looking for. The guy who tasted the mango, we set it up to see exactly how it does. Because I set the system to feed and he got the food. I asked him, try to eat something. We tested this with a lot of other things.

One of the major points which has been for us, one of the major stumbling blocks to release the health technology of the Keshe Foundation, was that we had to rely on what we call, the diagnosis. Diagnosis on the physical dimension (D). In the Keshe Foundation, we don't touch health, we process the life. The health, hospitals, and the rest is the work of what I call, physicians, and what I call, for pharmaceuticals to supply.

We have entered a new dimension. (:20). We have entered, as we have in a very simple way, in the past we explained to those who came in touch with us, the doctors and the scientists. When I gave clear what I call, explanation to Naturopathica, of the Belgium years ago, what this technology means. Maybe now you understand it more.

In the process of any change in the body of the man, be it a cancer, be it an ulcer, be it a heart problem, be it ligaments of your leg, or be it a cell in your brain, all have, and all receive, and all work through the Soul of the Man (STM). The interaction of the STM with the Soul of the Physicality (STP) of the man, creates the emotion, which that emotion transfers it's what we call, fields, to every part of the body, which has the strength field of absorbing it, receiving it. You'll feel cold, every hair on your body stands. You feel love, it shakes every cell in your body, that it feels love. You feel hunger, every cell feels it, and it's shared by the STP and the STM. In this process, we have come to the point that now we understand, and we have tested through the

Enhancement Unit, and all of you who came to us in the past few months, and those who we work with. (:22). The process of completed.

One of the main problems, or one of the last hurdles, or last understanding that our technology is perfect, was that, you came to us saying you have Parkinson's. You came to us saying, that you had Alzheimer's. You came to us you had a brain tumor. You came to us having cancer, or whatever. The solution sits within the STM. The solution sits within the strengthening, the expansion of the STM. As I said, it's no use repairing a car all the time after accident, when you have not changed the brake.

The whole structure and the work of the Keshe Foundation in past few months, with you being happy to go to the Moon, with you happy to go to see your uncle, or god knows go somewhere else, was for us to see the path the way our system was setting, and where it's going, and how it goes, and how it sets, and how we can get there.

Interesting, as I said many times, you didn't go to see the uncle most of the time, or you didn't go till we instructed you. You were waiting for the instruction, which plane to catch. So, it became clear for us, that the technology we developed was 100% Correct. We could reach, we could in a way, set the path. Not dictate but create condition of. And one of the major problems with the whole of the work of the Keshe Foundation, (:24). has been to pinpoint diagnosis.

As I said, if you are doctors and you work with us, in any country, usually the patients come with a blood test, blood pressure, size of the cell, everything else, but the truth about the construction of the man. In a way, they show you the damaged car, but they don't show you where the fault is, that this damage you see on the paper sits.

We introduced the condition of a new type of blood tests for the doctors who work with us. We ask for the elements of the body of the man, which means the copper, zinc, the Nitrogen. Interaction of the ?? and how they interact, where they interact, leads to the blood results the doctor gave you. This is what the world of medicine have not understood.

But now we go one step further, the composition of these elements in the blood report of the Zinc, and the copper, and whatever, is dictated by the interaction of the Soul, with its environment, with its spirit, or the STP. So, up to now, we brought you, the doctors and the people who work with us understood, that now we work with what we call, what led to the car crash. But for pastimes, we worked with what was the principal. (:26). Now we gone to see who actually made the brakes, that was faulty, that led to the accident, that then you get the repairs.

Now, we have seen strange achievements with just that elements. Now going to the what I call, the guy who made it, and led to the creation and work of that brake, which in his component have the zinc, and the copper, and the rest, which led to the accident, has become the target. This is where we call working with the soul, the essence of the Creation of the physicality of the man. We could not work with that side, if we would not

understand how it's fed, who was supplying it. Where does its energy come from, where does materials come from? What kind of material reaches it, that in interaction with the spirit of the man, creates that elements, which creates that blood ??

The missing part for us was to create that field, that source of energy, we call, the cosmic rays, that feeds the soul. That in interaction with the spirit and M field of earth lead to creation of the elements, which their interaction leads to the creation of the blood, and the man.

In a way, as I always said, physics starts with magnetic fields, the interaction of the fields creates what we call, the world of plasma. And then interaction of the plasma leads to creation of physics, which is the elements and the interaction of the elements gives us chemistry. And the interaction of the chemistry, which gave us a blood, gives us the physicality of the Man, which is the matter state, which is us.

So, we had to bring you in past 10 to 20 years, to get to the source, where the cosmic rays are, how they come, and how much the Soul gets. Go back to my teachings, for past decade, I always said, we have to come to the point, that to feed the Soul, that the Soul feeds the physicality, that man shall not kill, not only himself by psychosomatic conditions of the cancer from a prostate cancer, to God knows every other thing.

So, the whole structure of completion was to achieve the cosmic ray, that we can feed the Soul, and now we have achieved it. Now that we have translated it into the energy fields in the MaGrav condition of the fields of the universe, man is free.

How this is going to build us. How this is going to touch humanity in the coming time, all depends from today onwards. I explained to you why is from today onwards. We have built the what we call, the Head Units, to create condition of feeling the what we call, the Soul. (:30). And in that process we have come to the point, that we can replicate the source of essence of the creation of cosmic rays, and a power system that can maintain it. Which means, we will, and we shall, what we call, continue with expansion of the fields to the STM.

With the new technology, as of today, the process of feeding the man, the process of helping the man with his needs on the, what we call, level of the physicality, becomes simple. We have built the systems, and we have seen the production of the Gans's, and the gases, and the cosmic rays, as I call, that white bright light.

Now we reach a pivotal point, we will change from today the history of the man. You will understand why. We have parallels, and we understand this fully, because it's a working parallel. Today we have opened computer centers, we have opened service centers, where we go to, as a Google, or something else, to get knowledge, to get access, to get information. (:32). In a way we have created farms of, what we call, information banks. But none of us knows where they are. Nobody has or can access them, except you have the access code. They can be anywhere on this planet. Some of us we call it, the

cloud. Some of us we call it, hard servers and server houses. But in fact they're there, and we can reach them at any time.

With what we have gathered today, with the knowledge we have, and what we've done, we create, what we call, "cosmic centers," where it will be like the hospitals, it will be like the supermarkets, and it'll be like many other things, which the man needs. Which means you can tap into it and receive energies, which are needed by the Soul to feed the Physicality anywhere on this planet. What we call, "wellness farm centers will become a reality in a very rapid way. You tap into and you get diagnosed, what you call, in the past few minutes. You tap into and you receive the energy and information, which will change a given a specific fields, in the Soul strength, that will change the STP and the Physicality. (:34).

The biggest problem, it will be the transition time. How we go and reverse the cancers through the Soul. How we go and reverse the Alzheimer's, the Parkinson's. Then we bring in, what I call, balance. We come to the point, that once we get to the balancing point by going to this, what we call, cosmic centers, through the phone line, through Satellites, or whatever. On a regular basis, as we get fed for what is short, there'll be no more diseases for us to cure, for us to process. Because we, what we call, we take the disease out of its source at the point of the Soul.

When you are not happy with your son, which leads to the cancer of your prostate, 7, 10 years, 20 years down the line, by receiving the love which you wanted, by the energy you required, that the son does not give you, never create that cancer. So, pre-empting or, in a way, creating condition of balancing over a time, will get rid of the disease of the man. All what we know will not be there, prevention by feeding will stop the catching and creating the diseases of the future. (:36).

In a way, prevention by allowing thus, what we call, the cosmic centers will allow man to tap into at any time. The beauty of it is that, no pharmaceutical can lock it up. No government can stop you receiving food. No government can block you from gas and electricity. As Keshe Foundation technology becomes a process of a free access to all. Nobody can sell you a better version, a luxury version, and God knows, a poor version. We all get access to the same energies as we are fed through our Soul.

With this process, man will become independent of the Earth and allows us to become the passengers of the Universe, because in progressive development and understanding of the technology, we tap into the universal cosmic rays from the source, the Moon strength, the Mars strength, another galaxy strength. It'll be instantaneous, as many of you have tasted and tested in the Enhancement Centers, you went to the Moon, you didn't wait for three days, four days, for the rocket to take you, you're instantly there.

The new, what I call, MaGrav Cosmic Centers for man, will come into operation in next 24 hours, 48 hours, the first units we already have in Linz. Our team are just putting the last touches to it. As I said to them this morning, give me the good news, that you achieved what the target was, (:38). then you can put it out and we can show it.

In a way we have achieved, now we can miniaturize it to millimeters, embed it even in the body of the man, that if you are somewhere out of the reach of your cosmic, what we call, farm, you feed yourself. You hold it in your hand and you possess what you need. You carry it within the structure of your body, it's everywhere in the Universe to feed you. You will never go short of energies or, what we call, human hunger. The cornerstone of this is set. We are going through tests. We need to test more, and we develop this technology in a very rapidly way.

In so many ways, what you were thinking, and what we asked you for remote and Mobile transmutation and everything else, we have been testing in the background with a number of people on the health, and on the food, and on the connection exactly where we want, to diagnose without the present man knowledge of diagnosis, we diagnose the essence of the emotion. We diagnose the, where the Soul with the Soul of Physicality have come to a misunderstanding or creation of cancer.

You've been waiting to become the Mobile people to transmute. We have been testing the Mobile systems on real cases, diagnostic, (:40). delivery, extended of it, and seeing how it changes. We see people walk into unit, bent over, and walk out different. If you do it three or four times, which every cell has time to repair, you will see no, what we call, mis-physicality.

One of the biggest completion for us was diagnosis. Now, the process is developed, and it can be diagnosed. In a way we don't look at your physical shaking, as am Epileptic, we don't look at you for getting as Alzheimer's, we don't look at you with cancer in your prostate. We look, we feed where in the brain we see the problem. You call it a pain, I have a pain in my head. You call it a pain, I feel heat in my brain. It wasn't there till we introduced it, till we interacted with it and it was diagnosed, this is what it is, that's where the damage is, that's where the repair comes from. Then this will create the emotions, how to handle it, how these emotions will come to be complete.

It's very interesting to see how in the coming time Knowledge Seekers will go through. You remember four or five months ago, we came to you and we asked you to come to Linz, to perfect the system. (:42). Thank you for all of you who came, the system is complete. But that was for transmutation. Now the Keshe Foundation as of today, is ready to complete the process of processing your conditions.

What does this mean? You came to Linz to see what you can dream, where you can go, and teach us, and for us to learn, which part of the technology we developed is perfect. We started with three chairs, we went to one unit, two units, and two more new units, and two more other units are getting developed on the back of what you brought us, and our people could build. Now we come to you in a different way. We are putting it to you in a very, very simple way.

We are looking for those of you who have cancer of prostate. We are looking for those of you who suffers from Epileptic attack. We are looking for those of you who suffer from

MS. We are looking for you who suffer from ILS (means ALS). We are looking for those of you who suffer from, what we call, ADHD, Fibromyalgia. We are looking for those of you who have and you come to suffer from what we call, (:44). a specific syndrome through the lack of oxygen at the point of birth, which affects the brain of the children, ???. We are looking for those of you who have come to us asking how we can help with the process of, what we call, depression.

The Keshe Foundation processing team doctors are ready to handle from today. Go back to the conditions which I explained. We are not handling pharmaceuticals. We are putting you in touch with the doctors, who through understanding of the process of Keshe Foundation technology will be able to process these things back. Keshe Foundation does not go into health business, as we are a knowledgeable processing system, which means we do not come across pharmaceutical. We've got nothing to do, as we don't touch.

We go through the process of the energy of the Creation. Those of you, as I explained, listen to them, get in touch with us today. As last time many of you came to Linz to go through the process, we don't need you to move from your home. The changes will be brought to you, in your chairs, in your beds, in your homes. The Mobile, what I call, cosmic ray process will start from next week. (:46).

The way you came to us to help us to develop, to understand, to confirm the process of the manufacturing our system. Now, the Mobile, what I call, processing of the conditions through the work of the Foundation, is at reach of everyone of you. As I said to a mother yesterday, you do not need to travel from Brazil. As I said to another man, you do not need to come from Texas. And I said to another person, you don't need to leave China. The technology is complete that you can get processed by the farms, nobody knows where the systems are, and you receive the help.

We have 20 spaces available for next week. The way you came to us to test, send your request directly to health@spaceshipinstitute.org. You can do it now. We have conditions you have to meet. We go through your process, and then from then on we'll see how we can do, and we'll bring you in next week.

Just one second, please.
Sorry about the, you cannot stop the postman.
Just one second, please. (:48).

R: Just as a reminder, here's the email address that Mr. Keshe was talking about, health@spaceshipinstitute.org.

K- We have just received the message that, one of members of Universal Council, due to an accident has passed away. Dor Naim as a member of Hebrew Universal Council, (:50). we just have been informed, has passed away due to an accident yesterday, and this brings us sadness. His funeral is this afternoon at 3:30. I worked in the background with him in the understanding of working with the Israeli Government to bring peace to

Middle East. We wish for the elevation of his Soul, and I'm sure he has achieved what he came here. A beautiful man.

Universal Council members are the connection between the man, and Universal Community and the Creator. (:52). He did everything possible to bring understanding to the Israeli Government about the technology and the things it could do. Yesterday morning, in my communication with the Israeli connections of our, what we call, structure with the new government by the turning of Netanyahu back into power to start dialogue. He was supposed to establish the first lines of the talk between Keshe Foundation and the Israeli government. There's always a reason. And I hope, he still keeps his line of connection to bring what was his wish, in the direction of physicality to the nation of Israel.

I would like to go for a silence. Then we come back.

(Silence :56)

The strangest thing is, that yesterday morning at about 10 o'clock, talking to the Israeli officials and our go between, (:58). Naim was supposed to start meeting with the Israelis in Tel Aviv to lay down the transfer of technology in the space level to the Israeli scientists. That we could bring the Iranians and Israelis to work together in the space, the new space era.

I'm sure after the teaching when I inform the negotiating go between, of this, will bring us a lot of what we call, re-organization to see where we can go, how we can do. He was a military man who became suddenly devoted to peace. He was to spearhead the peace negotiations. Transfer of technology and the ethos of Keshe Foundation to what we call, his nation.

Sorry to hear him passing and I hope he finds peace and elevation in all levels. (1:00). He was working very close to do things, to bring that change. Thank you very much, I hope he receives all the blessings. He has a very young family. Can we go for a break and come back? Just put one of the small teachings about the Soul and come back.

<< BREAK 1 >> 459 KSW (1:10).

K- Yes, sorry about that. Thank you very much, Rick. My condolences to the whole of the Keshe Foundation family, and I'm sure we'll find somewhere for peace, and to

understand, and let's see what comes, and what brings, we go to the next step. And why this has happening now? ..

There is a reason for it. And I'm sure, somewhere down the line, we'll see, you'll understand, (1:12). and we'll come to comprehend why it had to happen this, yesterday.

Going back to the teaching. As I said, we have now achieved a position to do the whole of the operation of the processing through remote. We need to do this and to understand the Totality of it, that as we are completing the transmutation systems, we can make any adjustments or anything that it might need to be added to the systems before they are literally completed and going to operation.

What does this mean is that, those of you who understand the process, you can join us, the link is given above to join the process, it will go to the team of doctors, they look at it and they see if the case is approval for them, then we start the process. Everything is ready for, to start next week, the first part of it. So, we just received a couple of people sending emails and making, what you call it, inquiries, which will go to the doctors, and then they will decide, and you will be contacted in next few days, that we can start the process like we did with the others on Tuesdays and Wednesdays, and see as we succeeded in the completion of the flight system. We complete the, what we call, the processing side, (1:14). and then we can go to the next step.

That when we go for, what we call, the space test early next year, will be complete, will be completely there to, what we call, have a complete process of transmutation. Not only the physicality, the process of the feed, and the process of, what we call, being able to correct and adjust everything which needed.

The most important thing for the whole adding this together is that, we have a full comprehensive flight system. As I said always, while you're in that process as we tested with some, many of you have been there, understand the process, and for us completes the next step.

With this process of, what we call, the working of the body of the man, the physical condition, and understanding what will change and how it will change, will give us an opportunity to understand how others change in interaction with us. What effect we have on the environment we live in. What we change, what we need to change to receive the other 20%, that we shall not do what we've done up to now.

Mankind is ready for that change, and we are there to learn, and support it, and go further. We learned a lot from your visits, and on your support with the EU. Now in next four or five weeks, (1:16). through this process we complete, adjust all our systems, that the new systems are, what we call, a cosmic system.

You made the MaGravs, and I kept on explaining many times, don't look at the physicality of it, look at the fields they create. If you remember, Jon showed how you walked amongst them, and how they could turn up their fluorescent light tubes in some of

their tests, and how they could measure the fields distance away from the collection of MaGravs.

Now with the achieving, what we call, the Gans's and Cosmic Rays, you can see the whole thing complete, the whole structure complete. Producing a cosmic MaGravs System, which creates that field dimension, was the ultimate goal of teaching and everything else. Bringing the Gans, the emotion of the Gans, the fields of the Gans's, is in conjunction with the power generation system, which creates.

This is how the stars work. They create their own energy, they create the combination of interaction of the fields, and with it they create a M field, which the interaction of M field leads back to the generation of the energy, which is a, what we call, a self-sustaining condition. This is how planetary work, how the stars work, our solar systems work.

Now we have achieved it, the systems are complete, and they are going through the test. In that process, we see more changes. The new in EU, as I said, you feel the strength of the Cosmic Rays (CR), the fields of, what we call, the magnetic fields. You'll feel it when you enter the zone, when you enter the system. (1:18). Because now the two systems are built, they are next to each other, they are getting fitted. The, what we call, the energy units have already been built in, and we feel it.

With the Creation of cosmic rays, and now adding up the energy unit, they become independent, we don't need to charge them, because they receive the fields they need from the system themselves, and they create that as they need. The new Enhancement Unit MaGrav, what we call, Cosmic Rays, you'll see, you'll feel the light, you'll feel the energies. This is the energy which we were short of. This is what we grab from bits from our Soul, what we call, through the dimension of our Soul, the central energy of our body, from the Cosmos.

Now we don't need to grab, it's there, we take what we need, and this allows no deviation, doesn't allow any fault, doesn't allow the process of, what we call, Soul of the Physicality (STP), or what we call, the spirit, or what we call, the interaction of the blood field flows in the body to be short of.

Then we do not see diseases. We do not see anything else, because everything is fed and it's balanced. We saw this when we had the people in the flight test. When you ask them to go to a place, if it's in balance and we put a partner on the other side, they feel each other. We've seen, as one partner explained, sitting on the lap of the other. We've seen when one partner in one system shakes with the legs, the other partner shakes in the other system as a passenger, the same emotions as the other partner is on the lap. (1:20).

Now, this is a lot of things which is added up to the completion of the system today. So, we have come to understand through the process of the MaGrav system, through the process of the Gans system, through the process of everything else, the creation of Cosmic Rays, which is the backbone, is that 80% energy which is missing, and the lack of it leads to all sorts of defects in the condition of physicality, as it goes through the

brain of the man, as it cannot be fed. So, in Totality, now, the systems are more or less complete.

We are, and most probably, we can completely go through the process of the new "Tokomak" system. What it means, what was hoping to be a cold fusion to lead to energy production. What was hoping to be the new fusion centers to create that energy fields that you can tap into, now we can do in a simple system, with, what we call, "Cosmic Systems," which we have developed.

They can be as small as a battery, they can fit into anything as we dimension it. It can be as big as a gas cylinder. But you create now energy at the point of need and for permanent. These systems do not run out of energy, unless there's a leak or some misbalance. You can set them, that they work. You can set them, that they create energy from interaction of their own fields, and you create the condition for the fields to interact the way you want. (1:22).

This will change a lot of things. I was hoping that we could show the systems today, our team has a little bit more to do. We most probably will show you the first, what we call, "Cosmic Plasma MaGrav Systems" in a matter of days. Maybe even if they complete today, we might show you tomorrow. It's not completing it, it's just, what you call, testing it, because they already achieved. They already achieved the micro amps and voltage. We have achieved condition of the, what we call, creation of cosmic rays.

This is the final system, or beginning of a new systems, that is the new generators. It's what we came here originally for. We had to feed the MaGrav systems with the current, that they could work. Now, the current from the process, they create their own, with the Gans's, creates that process, what we call, perpetual production of energy, and depends on where we want to tap into it, and how we want to tap into it.

As I said a couple of years ago, the Enhancement Unit (EU) will be self-sufficient, which means they will not have any connection. Now we have achieved that point. That process can be miniaturized to micro, and mille-watts, to megawatts and whatever is needed.

We saw the preparation of this in Sanya (China). The same process in a different structure was tested in Sanya. It was done, it was built and it was tested for that time for us to see its work, (1:24). and how it will. How it released massive amount of energy, that lead to the, what we call, damages in Sonya, to a lot of things. But now we have managed to control it, it's a controlled way, it's done in a beautiful way. I saw Chan Ling, he is here, he was here a few minutes ago and he's gone. Chan Ling was one of the guys who built the physical structure of these, what we call, energy units in China for us. He was here, I just saw him a few minutes ago.

But, what we build in China compared to what we have now, it's a dinosaur of that time. The technology has moved forward quite a lot. Now we can create, and we can deliver a complete system, which is energy production, self-sufficient to produce that elusive, what we call, Cosmic Rays, the background fields that all of our creation, all of our life

depends on it. The new, what we call, structure, the new Enhancement Units have already got this built in it, they are actually physically this, what you call it, Cosmic Plasma Units, are already built in. So, we've seen it, it's not something to be done.

In a way, what you saw as the Gas Production unit, and what you saw as the (Plasma) Energy Power units, some weeks ago, we showed live, has moved to the next step, to a higher order, to a higher understanding, totally different in a way, but part of the same knowledge. (1:26). The MaGrav systems, which we many times explained to you, to look at the fields of it, and not the, what we call, physical system of it, we had to connect it to a power supply, that it could bring that cycle of release of plasma. Now through the Cosmic Ray production generation, we have created that power source, that we don't need to plug in anymore. This has changed the game, and it's a beautiful system.

Hopefully, if we can show it in the coming days, you will see it at its work. It is tested, pre-tested in another laboratory of the Keshe Foundation in past two or three months. This one here is an accumulation of more understanding of what we tested in another position. So different parts of the research has come together, and we can deliver the, what we call, Cosmic Ray System, which...

In a way, if I can go back, as I was explaining to our people earlier on today, if you remember, and many of you, you sat in those, what we call, headphones, what you call, like Head Units. The Head Units stand free. If now we place the, what we call, the Cosmic Systems, to the foot of this unit, the Head unit, you walk in now directly into a total new environment, and into, what we call, a Cosmic field environment, which this will change everything else. (1:28). Where now you only interact with, what we call, the Head units, when you go in it, as you've seen the pictures of the units from Linz.

Now we're allowing the, what we call, the Cosmic Rays, Cosmic Units to come into operation and interact with the Head unit. This will allow us to deliver a complete, what we call, environment. The phase will be very rapid, because it's instantaneous. We can achieve everything, which we really wanted in a matter of seconds, not waiting that you might enter that zone of, what I call, the bubble. We pre-create the bubble, and we allow the next phase to come in, and what it is needed to be done, that we can reach the position of the rapid transmutation.

We need this bubble, then waiting for you to create it by the work of the Head units. Now we preempt it, it is already there, it's already set and allows us to go in. The Jalal team was trying to create a remote power supply. This will be that remote power supply and will allow us to extend to the next step of the research and development. It will change a lot of things in the production for creation of the, what we call, flight system. For Body Enhancement Units, the whole thing with this will go ahead in a much faster way. We can achieve what we could not imagine, (1:30). maybe another two or three years with this development, it's just been brought forward.

We can develop this to become the next step for zones where you can walk in with diseases and walk out without diseases. You can walk in hungry, and you walk out

fulfilled. This new, what we call, MaGrav Cosmic units will bring us a new dimension of operation and completion of the work.

What it will do, it allows the transmutation, it allows the transportation, and it allows the, what I call, the process of understanding for the whole cycle in a much faster way. We don't wait for your Soul to expand, the way you could see the bubble. It's already there, you walk into it, and you interact immediately, and you can become part of it. You will create that condition of, what we call, transmutation instantaneously, because you're already in it, you're already part of it.

This will allow us to bring forward a much, much needed, what we call, speeding of the technology to come out. This allows us to bring in the farming, what we call, the "Enhancement Unit farms," or we can, even like in Arizona, anywhere in the world place these, and any of you can join in, into it. (1:32). It will change a lot of the work which Keshe Foundation has done, and it will bring in a lot of new dimensions of work, which you Knowledge Seekers, in a coming time, will bring forward.

We always given you the first step and you have built on it. Now we bring you the whole understanding, a new way, and more or less what you saw in the system, these Head units with, what we call, the Cosmic MaGrav units in the base of it will become an independent unit, you can... This development of the Cosmic Rays through the work of the Enhancement Unit, through the work of the understanding of the MaGrav technology in a plasma state, not in a matter state, allows us to even have these at home.

These units you go in, you sit in, you're fed. You go in, you want to go somewhere, you're there. You go in, you feel sick, it's there. I can envisage this to be, now it has become a practical unit to be. But in the EU which we are building, that, it brings a dimension of protection, which here you don't have, you need to you need to be protected in a different way, and establishment of the big Enhancement Unit, it's necessary for what we are doing for protecting, and everything else. With this as a household unit, you can do everything with it.

In a way, you don't have to worry what will happen with the electricity. Would there be a food? What happened, can I afford the health cost? (1:34). This will change the pharmaceutical world. Would the pharmaceutical exist with this technology rapidly goes.

As I said, we set out to create, to bring huge amount of finances, that we could make the technology reachable by everyone. We got cheated. We lost a lot of money, we found out this week. It stepped us back.

In that process now, once we secure the technology completely, the way we did with the MaGrav system, we'll teach you freely across the world. This is the property of humanity and not the Keshe Foundation, we are the developers of it. The way we taught you to do the MaGravs, the way we taught everything else. Now we planned a lot of things, that once we get to this point we can give you everything, but now we lost millions, ..

everything. We accepted this week, that whatever we invested in the past year, we have been cheated out of.

Now we go back to the same way, we bring this in, to be taught internationally freely. That from China, to Brazil, to United States, to Iran, to Africa, anybody can build these systems, can feed themselves, can have the medical application available to them, can have, what we call, transmutation to them. A man in Africa will not be confined to the jungles of Africa, or the jungles of Brazil. He can come to the west, he can be there, the governments have no restriction on it.

We will go through this, we will... Once completed in next few weeks, we'll put a green, what we call, the Blueprint Day, and we'll teach you how to do it. Because I came with nothing, I go with nothing, I have no claim over anything. But the knowledge is there to be given. (1:36). We taught you a step by step how to make the Gans's, how to make the MaGravs, how to make everything else. Now this is the next step.

I've been waiting for this for 40 years, and now it's completed. Maybe we lost what we lost. (We were) trusting another Knowledge Seekers to bring us to a point, we got cheated by, and everything else. This way, at least it brought us this waiting of a year, to the position that we can deliver, we developed it, and together we brought it to where it is.

In a way, if you learned how to make a car, you can make a car anywhere. Once we complete, as I said to all of you, the way you supported us with the testing past four or five months, support us, and we have a lot of things to do from next week to come in for processing of your whatever conditions, which I explained at the beginning. We need, we specifically asked and specified certain conditions that our doctors can process. Because this will complete the part of what we want to do, with the completion of this, what we call, transmutation system.

Go through the list. Get in touch with the Keshe Foundation, and our doctors will come back to you, explain the conditions, what needs to be done, whatever. Like the other time, we bring you. You don't need to come to Linz, we come to you. We tested this with the headphones with a lot of you in past two or three months in couple of tests. But this time instead of doing the transmutation, (1:38). we bring you the, what we call, direct Mobile system into your homes.

We have tested it, both for diagnosis and for processing, and it works, it works beautifully. We can literally pinpoint where the Soul interacts with the Soul of the Physicality, where the emotion is, you feel that emotion. It's not us telling you, you tell us where you felt it. Then you'll see the change, and then you'll see the, what we call, the processing. Then you come to understand how much we have gone forward. How much we have, what we call, moved on. How much the technology has moved forward.

You registered to support us with the, what we call, the flight system, now register yourself. You have any kind of condition. We are not curing, our doctors understand the

process of the field transmutation and transportation, and they will help with the help of the, what we call, new technology to bring that change .. Parkinson, Epilepsy, CVS, clinical fatigue, FMS, Fibromyalgia, children with a brain damage defect during the birth. (1:40). You have a handicapped child, our doctors will ??.

These are not going to be free, it's cost a lot of time and money for us to get these things sorted. So, we have to recuperate our costs, and it will be put in that way. The way you paid for flight unit, you have to pay for these things too. When it's completed, then as part of what we developed, we share. You suffer from prostate cancer. Prostate cancer is very important for us, because we have a target for it, we have to understand, we are 100% correct in processing it with our doctors. You suffer from depression, our doctors would like to understand and then they process the whole thing. You suffer from anything else. Maybe there are conditions we are not aware of, our doctors will look at it.

We are not, as Keshe Foundation, in the health game. As Keshe Foundation we are in the space program. A space program is complete when all needs of the man are met. Not just getting him there, feeding him, looking after his condition, his health, looking after him to be fit. Other part of the exercises which will come to you, is how to keep you fit in space. How to be ready for the next step.

It's no use you landing on Earth like a zombie. You have to be in a condition that your Soul and the Soul of Physicality accept to be in this condition to be ?? healthy, to be to be part of the society, (1:42). not to appear as a handicap to be a sucker on the society. The whole structure has to be correct. It has to be.

If you come in with, say, I got, I can do part of the financial thing, we try to find another part, but the costs of the Keshe Foundation has to be met. We've been there, we always supported, we support where we can. But we are ready to accept through our doctors, from next week, the conditions which they see fit to process. As I said, health@spaceshipinstitute.org is been opened, send your request.

Don't tell us I have a brother, I have a sister. They have to understand what they're doing. You have to be able to, just not to bring them, and then you can't drag them in, because it will work. Because mentally they are not set for it, they will not accept it, and you'll say, it doesn't work. Bring or come into the condition that it brings that position. Then we, as I said, we'll put you on through the doctors. The doctors could be, as we said, everything which ??. You could be going to Germany, you could be going to Italy, we can send you to United States, or to Brazil, where we will place these, what we call, Enhancement farms. It makes it easier for us to do, and it makes it easier for more people to reach.

As usual, at the beginning it looks and is expensive, (1:44). but when it goes and develops, the structure will become more common, then it becomes easier to do. Have a look how much it costs the Americans to put this rocket into space yesterday, estimated 30 billion. Many of you Knowledge Seekers went to the Moon, went to the other places, you felt the sand, you walked on the sand, you went to see what NASA cannot take it to,

your grandmother, your mother who passed years ago. And you contributed 1,000 or 2,000 Euros, we learned from it, now the other people are in you're going to enjoy it.

You went to the Moon on the cheap side. You felt it, not somebody else. You met the mother, NASA has not reached that point yet. They're hoping still to get physicality, or one or two to the Moon. Many of you through the space instantaneously, many of you felt the warmth, the cuddle of the mother, and the father, and the friends which you lost, and the ones who were far you could not reach. Now we're going to the next step.

If in the space, you run out of food in 2025, with NASA flight, or the fuel tank goes something wrong, you're not coming back, because we did not calculate the loss of food, we did not calculate the loss of fuel. With this technology, you go fed, because you are the center you absorb the energies of the Universe.

So with the new Enhancement Unit, with the new system, which we have brought out, we move to the next step. (1:46). We move to the direction of correct conduct to be. You suffer from any condition that, don't tell us, I have a headache or a pain, because, sorry, at the moment we are "out of aspirin system." With the conditions which is a challenge for us, what we understand that we can extend the work for the next generation.

We are interested to expand the technology. We are interested to bring the technology to the next level. As we always done with you, you have to feed us back, to be able to do. Bring forward the knowledge, which we need to learn with your conditions. Then we move forward to bring that next step in.

It doesn't mean that we can process everything the first time, and it doesn't mean that it will be 100% successful. But if we can bring small changes, or many changes, then we can understand there is a next step we can do. Join, the Keshe Foundation we'll put it on as a prevention unit. You come in, we set you up for prevention, which means you most probably take three to six sessions in the system, remote, you don't need to be in Austria, (1:48). and it prevents you from the future problems.

In a way we give an insurance policy. If you come up with a condition in five years, in ten years time, you come back to the system. The "prevention package," which we'll put out, is, what we call, "universal insurance policy." It's not the cheap way out of it. But it's a way that you come to us healthy, we try to keep you, maybe we might even want you once a year, to the system to adjust, in a way strengthen the Soul of you, till the Universal systems are everywhere. That in a way we offer you insurance policy for, what we call, processing of your well being.

In the next 24 or 48 hours, our team will put these on the Keshe Foundation website. We are not selling insurance policy, we just put the sources. You can come in every few months, I would like to use one hour, or one session, just to top up, just to gather energy, and for next 10 or 20 years, once or twice a year and you do that.

This means preventing a lot of things. You suffer from the pain of the, what it call, "betrayal of the husband or the wife," instead of ending up with a cancer, or you cannot handle the son, you end up with a cancer. You top it up. It didn't happen two years ago, it happen today. Why should we get a cancer in five years down the line? You understand, gradually the implication and application of this technology. What it means, what it will bring, and how it prevents the future problems. How it will bring the future forward. (1:50).

Go at the Keshe Foundation website, the way you supported us, hundreds of you, with the test flight, this time it's for you. We don't give any kind of guarantees, there are doctors who will go through it. They will assess the process, and we'll see how the next step can be. You don't need to travel halfway around the world anymore. The remote system, Mobile system, now it's tested, it works, and we do our own diagnosis. Then we'll see how the next step will be. Our doctors will take over, and as they're physicians they direct you.

Now go for a break, if you can, and then we'll come back and answer any of your questions. (1:51).

<< BREAK 2 >> 459 KSW (1:58).

Q: .. It's about world population. It was estimated to have exceeded 8 billion in November of 2022. (2:00). It took over 200,000 years of human prehistory and history for the human population to reach 1 billion, and only 219 years more to grow to 8 billion. What is our orientation regarding this event in relation to the Universal Community, and the planet? Thanks for the guidance.

K- Not much. It's in figure, very small to what this planet can support. In reality, it's just another number man has made for himself. What happened, how many ants are on this planet? How many flies are on this on this planet? How many trees are? Do we count their population? They still consume matters, whatever, in their own proportion. We make these figures to feel we are important or we progress. Compared to some of the animals on this planet, we're not even near to their numbers, but they sustain life, they became to live with what the environment in that position gives them.

So, I always look, I know yesterday, I think it was the 15th of November, when was the milestone of passing 8 billion and then they said another 15 years, I think, if I'm correct, we'll get to 9 billion. India is supposed to take over China next year, as the most populous nation. There some years ago, we were about 6, 7 billion. (2:02). They estimated if you stand all the man with the size of their feet. Isle of White, in South of England will fit all

of them. What are we going to do with the rest of the population on this planet, ?? left of the space we have on this planet.

When you travel vast fields are still empty, nobody lives in it. We didn't live in them because they couldn't get water, now with the new technology we can have the all resources for life. We'll move into places we could never imagine we live. Central populations now are based by the rivers and water resources from, what we call, sweet water.

With the new technology there is no such a limitation, they can live in space and come to Earth, you go to your office and go back to space. There's no high quality purpose positions anymore, the way we buy a piece of land for millions of dollars. All gone, all gone. And go more, the pharmaceutical business, once we start releasing this technology will go through the floor. The way we seen in past few weeks with Bitcoins and the currencies man tried to make on the Internet, they couldn't have enough gold to make them in the banks. There's not going to be much change, it's just more of us and we always have found how to feed us. We going to feed 1 million, we are 8 billion and we are still feeding. (2:04). Walk in some of the supermarkets in the West, walk in some of the supermarkets in China, walk in some of the supermarkets in around the world, we throw millions of tons of food away, because we have nobody to eat. There's no shortage. They like to make it, because they get more something in their bank account, which I don't know what they do with it.

But essentially, this planet can support another maybe 20 to 40 billion. By that time, as even now started, we become passenger of the Universe, numbers don't count.

R: I was looking at that report, and it actually mentions that the population is starting to level off on the planet. And that, for example, because China's now recording its lowest birth rate in history. And India's just dropped below the replacement rate for its birth rate. That's about over a third of the global population, right there between those two countries. And they're not replacing people at their replacement level birth rates, as most developed countries are in the same situation. In Canada here, if we didn't have immigration, we'd have a negative birth rate.

K- Yeah, but you've got to remember, it's an instinct of survival? I want to have a life, can I afford giving that life to my child, if I can't, I don't create. Most of the humans work that way. I'm a peasant, and I have so much land, and I cannot grow more than what I can feed two children, I don't want to create children. You'll find some Asians, they do. But the majority of common sense people don't do. (2:06). This is how we control our population. .. Meeting the needs of our children, our offspring's. ?? is control.

R: Mr. Keshe, how's it work in countries like Africa who have. They traditionally have had a birth rate of around six and a half children per woman, and now it's down, it's actually decreased a lot. It's like to four and a half or four now. But they have a large families, they have large number of children. Yet apparently they... How do they support that, compared to developing countries ...

K- The land does that. .. Africa up to now has a structure that in the West we have changed with Social Security. Children, as you have, are part of a bigger family. So, the whole family becomes responsible for the family, if you understand it.

This is, when we used to work in Gambia years ago. I don't know if I've said this to you or not. I asked my driver, what do you do with the wages we give you? Because it was a complaint from the other companies around us, we pay our .. too good, .. to our staff, the way we did in Ghana, and we run into problem with the government. He said, most of the majority of the money I get from you, goes in the 50 kilo sack of rice. I said, how do you eat 50 kilos in one month? He said, no, when I didn't have a job, for years, other members of my family who worked, they bought rice, whatever they bought, (2:08). We all take a couple months, what we need for a month, then that's what it is, we live.

So it's a family collection. That's how life in Africa is. And most of the families who can't afford any more, they don't have any more children, and what the land can give you. We don't have that system in Europe. In Europe you call it Social Security, go get something from the government to eat. The bigger family looks after in Africa. And they always bring limitations. Now that is connected gradually to monetary values, you'll see less and less children to be born. Because now they have to go to school, now they have to have some clothing, or whatever, and the family strives, I can't afford this, so I don't create the children. Gradually we see the balance.

China one child policy damaged the nation beyond. Psychological damages of the one child policy will show in the coming time, it's not the right way. All the one child families they have to find somebody, to call a brother, to have somebody to know what love is, what they mean, because they didn't have the cycle to love someone. They were left with the grandparents, and the mother and father came once a year. They left to build the nation.

There is a huge problem in that one child family of China. The population has dropped, but we have a huge psychological problems, which is coming up now in the forties, fifties, thirties generation of one child families. We have to reach balance, and somewhere some families will have one, some families will not have one, some families have three, but in a way economical condition are forcing the numbers. (2:10).

What would happen now that we move to the next cycle, once people understand, children of the Soul. Not very easy to be a parents, and live through the children of the Soul. It's much more difficult than children of the physicality, much, much more, much more. It's not difficult, it's more pleasure to be with than spending time away with. When you hold the child of the Soul, it's not a feeling of holding, it's a feeling of touching emotion, and it's a different things. It's different level of understanding. So, population will dictate now financially, and then in the future the strength of the emotion. Don't worry about it, they can go to about 30 or 40 billion, this planet can still support.

R: And you mentioned before, we're going to need that those numbers of people in order to have the engineers, and scientists, and so on, to support the new plasma technology and to go to space.

K- Look at it this way, you said about the Canada if you haven't have the immigration it would be negative. Go back to the statement of the Canadian government, around early 2000, that the number of engineers, and experts, and technologists, and doctors they received during the Iranian revolution it would've taken the nation 20 years to get these numbers. Immigration to Canada has brought mainly the wealthy and educated, which the other nations have lost. (2:12). We don't see beggars off the plane with a backpack on them begging on the runway, do we? We see them all smart, dressed up and come out. So we have these things.

But, as I said, would the guy work in Canada, and go back and live in, what you call it, Africa for lunch, and come back home. Today I saw, this week I saw a beautiful news from Dr. ??Paravisch, in Dubai, been awarded one of the top, what you call it, awards of the nation for his work in the field of the holistic level. As our doctors move to that level, to become holistic, means to cover all the Soul and physicality.

When the Soul is satisfied, which does not create the illnesses of physicality, do we need the hospitals? I think there's, what they call, holistic, like Dr Paravish are getting recognized, and with the support of technologies like ours, to feed that technologically, will bring a lot of changes. As I said, it was amazing to see an Iranian, now with the situation in Emirates, to be given such an award. It shows knowledge wins over politics, as I said, and that, what we call, it's beautiful to see that these things are achieved. These things are achievable by, what we call, our scientists who understand both dimensions. It is fantastic to see that borders, (2:14). knowledge doesn't know any borders. It is beautiful to see, politic doesn't come into it, science stands on its own. It's an, what we call, achievement on it's own level of what it is, what we call, understanding of this. These are the next levels. When, what we call, understanding of the work of the Soul brings the conditions in to, what we call, improvement in the physical dimension.

Any other question?

Q: .. Can you give us a detailed explanation of the Cosmic Rays, please, in a plasma science understanding? ..

K- Cosmic Rays are the rays, the fields, (2:16). which have not found the matching balance to interact with, or are on the path to reach the fields or environment, that can interact with the field.

In a way, they are like a lover looking for the love they have, to meet, to interact, to create life. In the world of physical creation, we have a man and a woman lead to creation of a child, a life. Cosmic Rays are the rays which are on motion till they come to interaction to lead to a new cycle. Some of it could be fraction of lights, some of it can lead to creation of new condition of life. But they're the energies, they're the magnetic

fields in motion, that have not interacted, and are free, and I called, available for the next phase. Become part of your body if yours, of the same strength interaction in the, with the body of the physical matter planet, or whatever, or with another fields that the interaction leads to a fraction of other new fields of the Cosmic Rays, that might lead to creation of the new cycle of life, or a new plasma. They belong to the Cosmos, they're not still have a name tag on them, that they become part of the human body or an entity.

They have a strength which is very much connected in one end to much powerful energy source. (2:18). They're not usually, the Cosmic Rays, a bandwidth, a cut piece. They always have connection to their source, the majority of them. Because once you establish a point of contact, and they go to the point of break, and division, they start a new cycle, so they always have. It's like when we look at a star, it's always that light which comes to us, it's always connected to that star, to that point. They always have a point of reference, we can find out where that point of reference is. And if you can travel at the strength of, of what I call, rivers of these fields, we can end up in most beautiful places in the Universe. But it's instantaneous, this is what most of you done in the EU. You instantaneously go somewhere.

Any other question?

Q: Dean .. Mr. Keshe, I'd like to first of all, celebrate and give to Dor's beautiful life. Condolences to his family and thank him for all the beauty that he's brought forward, and his wonderful Soul that is out, it's now present in a condition where he can bring about the change, can connect and be the beauty that he is, or was in this moment. (2:20).

Mr. Keshe, how does it change or bring about a condition when situations and conditions take a life, however it's taken? Is there a ramifications, does this affect further on down the chain of the Soul? How does the Souls involves?

K- It's a maturity, it's a maturity, it's a point of cut. When we die natural death, we call it, the end. Everything is prepared for it, all the cells deliver their energy, all the Souls of the cells deliver their energy to where it's supposed to go.

In a way, when you die a natural death it's just like when you, you know when you are traveling, traditionally you go from, let's say, England to America, family comes, each one gives a gift, or something to take with you, you're going there you're not coming back, to remember us. The Soul of the Physicality at the strength of the Soul of the Man, they give all their energy as a gift to the Soul to move on. Then you still have the Soul, the physical Soul of the body, which stays behind.

But what we call, at the point of death, the Soul of physicality becomes part of the Soul of the Man. It delivers whatever it carries. Then you have the Soul of physical cells which stay behind, the physical body of the man.

It's progressive, it's like, we know you're going, we give you everything, gradually ready to go, and it comes to the point of tipping point. I cannot hold on anymore, you close

your eyes, the field goes. That's all we do in the machines (EU). (2:22). Your Soul strength ?? begins ?? the Soul of the physicality.

At the point of accident that cuts off. The Soul has not reached maturity, and STP does not deliver everything which he has. If the STP is much stronger in a field, than the STM, the STP sometimes remains till it gives that energy to the Soul. Separation is too fast. We see this, we call it, ghosts. It's the STP has not completed its transition. We have it till it just delivers, till they find, it's like become like a twin star, the other one has to match up whatever is to be given. It cannot go anywhere till it's done.

This process is... not much you can do, we sometimes, we can give from our Soul to the STP to get that bridge, to get that match up with the Soul. There are a lot of things we can explain what happens, physically you say, you see ghosts, you see shadows, whatever. These are this, what we call, the Spirit, the STP, which has not delivered totality what was supposed to be delivered to the STM for its elevation, for its move. What I call, it wasn't a smooth handle, something was left behind. The Soul travels. The Souls finds his position according to their strength, where it should be. (2:24) It might have been another 20 years, it would have gathered more. It would be in a different position.

Q: So Mr. Keshe, was Dor Soul aware of this, was his STP aware?

K- There are different ways of life. STP bring us to a position of the handover, or the physicality moves, that other things create that condition of the separation, like accidents. Some of the accidents are predestined by the Soul. They have completed, doesn't mean something is left behind. Otherwise, all of us die in a natural cause. There is a very clear separation.

Q: .. So, if Dor's Soul, obviously was involved with his physicality soul, his body, everything that he was, is, was involved with the Foundation? He was about to bring about a very beautiful condition for the whole of humanity, that could have brought about many, many beautiful experiences for many people in physicality and beyond. So, if that is now been taken away in the physicality, how does that get dispersed amongst all the Souls? How does that change within the fields?

K- What do you mean? Explain.

Q: Dor is now taken another position, he was put in a place, or his Soul took him into a position, to serve and give to humanity, that's been taken away, (2:26) in whichever shape or form. So, how will the Souls involved around, or the physicality's around the Soul of Dor that have been involved, how do they get accommodated?

K- It's something, partially it's preordered, partially is to be done. We can be, accidentally we can come to an accident, but if the Soul is not ready to go, you come out of that accident. But if the accident is there as part of the process of the transition, the Soul will do their jobs.

Q: So, let's take it to another position Mr. Keshe. So, when you have another person that is on, let's say, .. in a conflict zone, and they stand before another and they take that life with an aim directly, is this the same? Or if it's done indirectly through somewhere else? Is it the same?

K- No, not really. No, no, no.

There is, you and I can come up with a lot of examples of it. When you target deliberate to take a life, you're responsible for that life, you pay, you have to find a balance with your Soul. This is how we see with a lot of soldiers, when they come from war zones. It's not the gun and the blood, (2:28). it's the guilt of what they've done, and what they've taken. That they have to pay for it all, they have to release for the balance of what they've taken.

And that brings a psychological condition. They say, we've been to conditions, horrible places, and we've seen things and then we are psychologically damaged. Ask a question, did you take a life? Were you the cause of a life to be taken, that everybody down the line pays? Yes. Then you're responsible for it, you pay for it, you have to balance the books. It's that magnet, as I always say, Rick puts, and everything has to come to balance.

Q: .. There are many ways that... I've been in that position, there're psychological positions that to cause many distress and for them to lose their physicality. So, this happens in many different ways, it's not just in a war zone, it can be in many situations in normal life. This happens.

K- Many, many, all the time, 7 billion different ways. It's not the same all the time. 7 billion different ways. And plus all the animals come to an end in different ways. It's not just exclusivity of man.

Q: So, the soul of an animal that goes through a conflict, that doesn't have the same intellectual understanding that we believe..

K- It has, it has.

Q: Of course it has, I know, I know it has.

K- I'm going in there to become the top dog, so I do anything. So if I do that, it's not instinct, it's my decision. You understand? It's a very, very simple... (2:30). We call them animals, but have a look at them, they eat, they have an eating pattern, they know where to sleep, they know how to show affection to another one. So, it's not just an animal just, because it suits them, they don't talk. They have everything as we have. They feel sorrow, they feel pain, they feel joy. Yeah?

So, it's our imagination to justify that the man is better, is the king of animals, and you can do this and that, but they have the same. You see when a whale dies, what the other whales do. You see when a dog dies, what the other dogs do.

Q: And this is the same Mr. Keshe, for our vertical friends? .. and all souls present?

K- Everything, of course. All Souls, even in deep space. Even in the cosmos. It's not the exclusivity of man, because man makes it exclusivity, that he is something special. The only specialty of the man is, he thinks he is special, that's all. There's not much, there's not much more to it. Maybe we would like to think more, we would like...

In the past few days I had to encounter a lot of emotions, which I never wanted to. But I woke up this morning, I said, why did I have to go through this? What was there for me to learn, and what was I supposed to bring for the others? You were there. We battled for a year to get things moved. I said, there's something wrong, I'm pushing it too much. I've come to agree that. this is going to go somewhere, and I have to walk away from it, because it's taken too much.

And we opened the door of the knowledge back in the way it should be. (2:32). I said, okay, we open this side, what we've done today.

Q: That will be a beauty Mr. Keshe, when you give it this way. I think humanity can utilize it and bring it into manifestation with their thoughts and intentions, it's bringing it .. down to a level that they can grasp.

K- You see, we did our best to bring this change, which I thought it should be there. Maybe it will be there, but the time is not for it. In a few weeks, a few days, whatever. We put every effort to it. And trying to get that done, we directionalized the research to, when it comes, the research will be complete. Now the research is complete.

The research is the asset, not what we try to do financially. Do you understand? What we were pushed in past 12 months, to push the technology to where it is now. I'm sure if I would haven't done that decision, we would have been somewhere else, opening another factory, the way we were going. But now the knowledge is complete. Now the Totality is complete.

Now, the wealth sits with the knowledge, not with what we invested. I know, through the knowledge, the wealth will come, independent of others. Because if we would have got. I mean if we would have, what we brought up, they would have attached us to different organizations. "You see, this is what they've done, they were always behind them. They just .. " Now the knowledge, the technology, the wealth is Keshe Foundation. (2:34).

I cannot, most probably, most of you don't see what is come out of the knowledge. When we produce these Cosmic Rays. We did this years ago in the flight system, in Iran. Every time I saw the Cosmic Rays, the light coming in and starting, it was just gorgeous to see it. These Cosmic Rays is not something new. Years ago, years ago, when I used to do the research in the lab in Belgium. I used to create these lights.

We used to be on a hill. So the other hill across and the lights used to go out. They could see these lights I was creating. What we did, we put black bags with the cellophane, and another black bag on top of it, to block these lights, that people couldn't see. The light was a space light, it's a Cosmic Ray, it's a dusty white, silverish, at a high intensity.

I used to work in it, I became part, I could see myself part of it. If you go back to the unit I used to do the flight system test, original flight system tests, which then it came out of Iran, before Iran I produced it in Belgium. If they haven't destroyed the garage, you see windows are all blacked out, totally blacked out. Because of the lights, I used to create Cosmic lights. So, what is just achieve, getting achieved in our labs today, it's already been done 10 years ago.

Q: Mr. Keshe, isn't there 7 million plus Cosmic Rays already walking around the planet Earth?

K- No, seven trillions. (2:36). What about the animals.

Q: Exactly, yeah.

K- So, we'll see what it comes. So, it's nice to see now it's shared, it's a common knowledge, and then it will become more common knowledge.

Would you take hundreds of tablets a week, which some people do, 20, 30 tablets a day, one side effect of the other one, the side effect of another one. Where you're repairing the shakes and damages of the physical condition, not walking, where the actual thing sits in your brain? And if you provide the facilities for the brain to absorb what it needs, there'll be no more shakes. So, do I need the medicine?

This, what I call, Cosmic centers farms will change the history of the medicine. When we place lets' say 50, 60, 100 of them in Canada, 50, 100 in US, 1,000 here, and a 1,000 there. You just dial a number and you'll get access to it.

The system through the fields of energy will diagnose your illness, what it is, your condition, and again knows this needs this combination, so, you sit there. People who start these processes with us, it's exactly as you are in the flight system. We don't sing you a song down the line, you hear absolute silence. It's the fields of your Soul interacting with the fields of our system, and they find a balance. Ours is powerful, so yours raises, so you say, I've (been) helped, I don't have the condition anymore. That's all we done. (2:38).

Q: So, Cosmic Ray Mr. Keshe, is a Soul that interacts with the physicality?

K- Cosmic Ray is a Soul from the Universe, if you put it that way. Connection to the Soul of the Universe, we call it, a Cosmic Ray. If you look at Cosmic and you want to change it, see what you can come up with.

Q: So you can't change a Cosmic Rays, or you can?

K- No, you can. You can interact with it. Cosmic Ray is not one ray, it's an amalgamation and collection of many rays.

I think I explained this in, I think this was one of the papers, or in the book, I can't remember exactly where, I talk about Translucent Light. Translucent Light is created by interaction of Cosmic Rays. It's what we see through the sky, we see other planets, but still is a light, it's not black that you don't see. It's translucent, through it we see other stars, other planets.

R: I think sometimes that's called the clear light as well, right?

K- Yeah, some people, it depends on what you call it, yeah.

R: So, these would be, these rays would be the primary rays, it's what you're talking about, from source?

K- Some of them, yeah. But not, because they already interacted with something, somewhere. It cannot be, that some of it, very remote part of it, yes. But don't forget, part of the rays we have in our Universe comes from the Unicose, which is interaction with other Universes. (2:40).

You know the way our Sun shines in interaction with the fields of .. our Earth and become the daylight. Our Universe fields interacts with other Universes, that their interaction creates, what I call, Universal light.

We are not aware of this knowledge yet, it is impossible. We call it Cosmic, because of Cosmos, but when you speak about the Universal lights, the Universal lights, some of it comes from the Creator. Because those Universal lights are where the Universe is lived within. We all need to speak about the Cosmos, what is within us, within our Universe.

When you go to Universal lights, then we talk about some of the lights coming from the Source. And some of these lights, if they get through a Universe, become part of, what we call, Universal, or a Cosmic light. When you look at the back of Book three, you might just grasp some of it, we haven't gone to the source yet. We're still taking crumbs in our Universe.

Q: Mankind seems to be, .. its position of where it is in these moments, the crumbs seem enough, Mr. Keshe.

K- The crumbs of the crumbs, of the crumbs, of the crumbs, of the crumbs, yes ??.

Q: He's happy with the crumbs.

R: We take what we can get.

K- Yeah, in a way, we take what we can get, yeah. Here we take what might be on the table. This is part of the whole Totality.

We hope our team can show the, what you call, (2:42). the units in next few days, the, what we call, Cosmic Energy Units. This will change the history of man. This will bring something beyond the imagination of mankind. Because we will start a new path, we'll start a new way. We will go through a condition of new understanding.

Because, with these Cosmic Rays, Cosmic lights, from the units we have, we receive higher order fields, you will be enlightened. I always remember something, which has a lot of meaning, depends where you stand with it, I spoke with this long time ago. Go in the, what we call, music channel. There used to be in nineteen seventies, eighties, a band called, Hot Chocolate, black guy. One of the first black guys who came into the scene, very popular. When you read about his biography, he says that, I think he came in from Jamaica with the mother, mother managed to borrow money, or whatever, she was working to the mortgage and bought, what they call, "Two up and Two down" in London, which is a working house. The mine owners used to build for the workers, when you lost your job, they kick you out of the house. She said, he says, he writes his biography, I went to school, a public school, I wanted to be a plumber, a cook and a chef. (2:44). The mother decides, this boy is more talented to be a cook or what do you call it, bricklayer, or whatever. She rents one of the rooms, and from the rent of that room, pays for him to go to a public educated. So, she works harder, the money from the room he changes his school from what we call, public school into private school education.

He said, by going to the new school, now I wanted to become a doctor, an engineer and professor. Books and educations were the same, the environment changed and the eye opened to differently things. It's the same with the man. The knowledge is there, it depends how, what we see ourselves to be fit in.

Cosmic Rays have always been there, now we learn the knowledge. What do we become, would like to be? Do we still want to be man to kill and do whatever we do, and get in the back of a donkey, and get on the rocket 100 meter tall, to burn? Or we use the Cosmic Rays and we travel the span of the Universe?

It's just that the enlightenment it brings, and that enlightenment comes by availability of understanding of what we could not understand that was made available. Bananas today are in every shop and on every table, 50 years ago was an exotic fruit, a few could afford. It's the same with the knowledge.

Now the knowledge of the Universe, with the completion of this Cosmic Ray Unit, and what we call, Cosmic MaGrav Unit, it is abundance of the new knowledge, man needs a lot to do. So I said, (2:46). why do these nations fight for nuclear disarmament and somebody not to have, when knowledge above it is years, and hundreds of years above it, is available to the man? What are you fighting for, unless you're trying to prove nothing. We still treat each other the way we see, and the way we see each other. It doesn't matter what level we are. ?? humiliation is not just for ordinary man. Humiliation for top levels of world leaders is worse, it hits harder to the whole nation. We need to understand this.

An example of it, if you listen to the daily news, everyday comes and goes, it's, as you know, there was a meeting, a meeting of the world leaders G20 and environmental, or whatever, together. President Biden goes to Hanoi, last few days, I think, for a meeting. The Russian foreign Secretary arrives around the same time, out of humiliation the Foreign Secretary gets a red carpet. President Biden had to walk without the red carpet, because 40 years ago they brought this nation to smithereens ?? and ?? lesson. So, in a way it was a humiliation. You destroyed everything, you walk on what you destroyed. And the Russians walk in the red carpet. These are the things we learned, how much, what we do and what we take from it.

Q: Is it ?? trying to forget them Mr. Keshe, to remembering something that happened a long time ago, no matter how bad is that, is that bringing it forward in the right way?

K- (2:48). Maybe they were waiting 50 years to do this. You understand? What we call, revenge.

Q: ?? intention...

K- But in the level of the Soul there is no humiliation, it's accommodation, and what we see, and what we do. It's a different ballgame.

Mankind this morning, with what I explained to you today, if you understand it, has opened his eyes to a new cycle of knowledge, and technology, and life. If you understand it. If you don't understand, it's still like, the workshop number tada, tada. Some of you go to that workshop tada, tada, tada, after so many ?? days, say, "oh this is what he said there, now I understand." Some people understand the teaching of today.

What we announced, what is to come, it's a beginning, it's actually opening of a new cycle for man. Now you're opened up that creation of the fields and energy the way it's done, this is on the hand of ?? everyone, last week I spoke about the Micro, what you call it, batteries. We slowly, slowly opening it.

I have to make our team to understand, we cannot drop everything else and they can't see it. They make mistakes, they do explosions, they do everything. But step by step we need to understand it the correct way. We have brought one Knowledge Seeker, and a bunch of people who have no knowledge about the knowledge, technology, but they all have become better than you Knowledge Seekers. Because they started feeling it, they started understanding it.

Q: .. So being around these systems Mr. Keshe, brings that change, conditions that Cosmic Rays touch in their very essence?

K- Of course, of course it does. It feeds knowledge. (2:50).

Q: So, if anybody that comes into contact with these kinds of Cosmic Rays are going to receive this elevation to this...

K- Depends, if it's at the strength that you need. I walked in there last week, and I could see exactly what it is, and sometimes I tell them what's going to happen in advance, they just hear it as a voice, and then it comes to them few days, and then they think back, "oh, you said that, at that time." This is what it is.

I see a very clear line. Keshe Foundation is going to come under a huge attack in the next week, two weeks. We are waiting for it. To be taken off the lines, to be called a terrorist organization. They're working on it very heavy. They haven't stopped. Then we'll see how we come out, we'll see how things take shape. We'll see how the knowledge will take over.

We will launch everything to the best of our abilities to be at the hand of people. We tried, we tried to stop it, but there are forces they think Keshe Foundation has not to be there, because the knowledge has become too available. Doesn't suit. But it's there, it has to be.

This is what I tell you, any diseases you have, anything, to sign in today, meet our demands, meet our requirements, and we will step up. We have accommodation for about 20, 30 people next week, to go through the cycle, and you can start straight from home. If it means I have to work 12, 18 hours a day to bring as many as you through the line, that we can have a full knowledge by our system to be complete, we'll do it.

Q: Will the system Mr. Keshe, receive the information, it's like the flight room? (2:52). It receive the knowledge of the individual coming into the system?

K- In a way, yes. Yes, yes.

Q: So you add in to the knowledge.

K- Yeah, to knowledge. I saw it in past two weeks, three weeks, past few days, how things are, how things are take shape. How things will be. We don't have, what you call it, limitation, we work on what is available.

Unfortunately Dean, these people are all remote, you can't video them, maybe you can record them for what they do or what they change. As I said, if you have any condition go on the health@spaceshipinstitute.org, and within 24 hours, 48 hours, we'll get back in touch with you. If we see your case is something interesting for our development. We are looking specifically for the conditions we asked. It's important for us, (2:54). because then we can handle the whole operation of the body of the man.

We need the prostate cancer, which is a physicality, extremity of the, what we call it, dynamic part of the body of the man. With the emotion to the brain, we need the structure of the depression. If you have a condition of the Parkinson's, Alzheimer's, we have a requirement of the payment, has to be met. Sometimes Foundation can support part of it, and everything else which goes with it. It won't be people, "this is my condition," we ask

people. We are not asking for volunteers, you volunteer for this, and you have to cover everything else which you need.

We'll take about 20, 40 people, 20 people, 30 people in next week, two weeks, and then as the other centers come into operation, like Arizona, and Germany, we increase the numbers to hundreds. Because now it becomes a Blueprint standard locking. The, what we call, Universal cover on the wellness, we put it up, it's there's, it's going to be a decision what we see to cost, how much you can use it. You cannot come with a illness and then come, "oh, I got it this way." It has to be the way we bring it to a position, and then maybe once a year, twice a year, you use the facilities to upgrade or, what you call it, bring everything in balance in your body.

As I said, we start governing, but we govern in every aspects, that everything ?? is done. Then we'll see how it takes shape. To put this, what I call, Cosmic farms in position that everybody can access, will take 10, 20 years, it won't happen overnight. It has to be done the right way. (2:56). You see when we put the Health Enhancement Unit, they came up with the "Medbeds." I wonder what else they'll come up, Medbed this time. It has to come, when it comes from us, it has to come from the Keshe Foundation, you will see what it gives you, what it covers you. It's the next step to it.

But the way you responded to the, what you call it, to the Enhancement Flights, this time, if you need that support of the wellness, you will be handled by the doctors, not by the Keshe Foundation. We keep a central position in the Spaceship Institute that, as I said, we'll open a center that all the information, all the doctors will go through this health link. It doesn't matter which part of the world you come (from). Then we drop you off to the country you come from, to Brazil, to Germany, or whatever, and the doctors will take it up. But one central position from the beginning through the health@spaceshipinstitute.org is setup for this purpose.

We are not individualizing it to countries and everything, this is a .. we start the centralization from the beginning, and we keep it that way. But if you send an email, this is my condition, if our doctors are interested, we'll respond back immediately. Parkinson, depression, Alzheimer's, specific cancers. Our doctors are interested in the, what you call it, the depression, the, what we call, ADHD, Fibromyalgia, ALS, FMS. We want to see how we can change the direction through the Soul in the physicality. Don't forget, we've done the physicality to reach the Soul for 10 or 15 years, and we've been successful. So now we ??go the reverse, which is much easier. (2:58).

Most of you, if you like, you can. We'll give you a date, when your situation will start next month, next week. But for the first ones we choose next week, we can take about 20 people for Tuesday and Wednesday, and you don't need to travel anywhere, you just stay at home. It's the beginning of the Mobile transmutation, when we said we start the Mobile now, we have to complete the health side of our system, that we can support everything else.

Any other question?

Anyone, anything with auto immune system we will not respond to. There's a reason for it. Auto immune system is a physical condition, which is a complication of the interaction of the STP with the physical body of the man. More or less, has not much to do with the condition of the operation in the Soul and the brain. Auto immune systems are a different kettle of fish in our understanding of the work of the body.

Q: .. If the animals and fish quit eating, will that not disrupt the natural cycles of nature and create imbalances, before the rebalancing occurs to the new state of planetary plasma balance?

K- Always has be, always will be. (3:00). How many of them have done this? How many of them animals, we brought them through our work, into that ?? and they found their way, and they are fighting back?

There is a question here, somebody. I just noticed, posted something. It says, "Fibromyalgia is autoimmune often." Not a way. Fibromyalgia is the most psychosomatic effective process in the body of the man. Fibromyalgia comes from abuse, psychological, physical abuse. Manifests itself in total disability and some people cannot even move, because they are too tired, because the brain, Soul and STP are consuming everything in the brain, that is nothing left for the physicality to have. That's why you feel drained, you cannot work, you're tired.

Teach you something, learn something, according to research, what you call it, a scientist who works in the lab uses more energy, consumes more energy than a face miner, the one who's got a chisel and hammers to the wall whole day. Calorie wise.

Now we can understand how Fibromyalgia touches you, when the brain is engaged in acceptance of the submission, of the abuse, that it has no time to feed the physicality. (3:02). And when you balance that, there is no ?? physicality (problem). We've seen so many of the change in Fibromyalgia, and we are 100% correct in that position.

Fibromyalgia, CVS are one of the most horrendous psychosomatic conditions created by abuse, when the abuser accepts, he is the guilty party. And it's all done in the brain, not in the physicality. When you sort that out in the brain, physicality just walks.

If you go to teachings, many times I referred to people who have used the technology for this, especially in Holland. They call it a Lyme disease, some people, which actually has no meaning. It just changes name. You go to Holland it's called Lyme disease, you come to other countries is known as Fibromyalgia. They're associate it with an animal, that they can ?? justify it.

One of the most horrendous psychosomatic conditions of abuse, known as Fibromyalgia. This technology is prepared for it, because it sets the whole structure the right way. You look at the person with a Fibromyalgia, they walk bent, they cannot even stand up properly. They accept, already the submission. It comes from abuse, before age of

puberty, when it happens in a hierarchy, we know it as a CVS. It's more horrendous because you have no energy left. (3:04). These are research base data, which we have gathered over years, and it's not just random. You can do.

This technology is absolutely perfect for these things. and we see their effect on the brain and the expansion of their Soul. We see to the expansion of physicality and everything else. Many of you suffer from joint pains, joint damages, ligaments or, what you call it, ?? carpal (tunnel). Keshe Foundation has already developed a technology for this, and tested it, and it works perfectly. Very soon we'll release it like other Gans's, (which) you buy from the Foundation.

But if you have any of these conditions. You meet our condition, you can start in the next 24 (hours) or next week, we are ready. Because the systems are free now. We don't do any more flight tests, we have adjusted it. The system is, what you call, total test for, what you call, the systems we ready with the doctors to take over.

Any other question?

R: .. We have a couple of questions on the prerequisites for the universal flight tests.

Q: .. From our part is there primarily an attunement needed to connect to the Cosmic Rays or fields, or at least an openness to allow the fields to be felt, to access the infinite Soul power based on freewill. (3:06). And I would combine that with the other question from Cristiano, from Brazil, do the 12 people who apply for the universal flight test need to meet some prerequisites?

K- No, none. None ??.

R: And he's concerned about what will change in their lives? Will they continue their ordinary life and family and work?

K- More or less yes, should be. It's like Armstrong, what does it change? Just become somebody who's done it, and then become natural, everybody else does it. How many more people have been to space and come back, and do we know every single one of them. Only their families and their community. The rest we forgot, or don't want to remember. There is Armstrong, he was the first one who done it. It's like the first one person who went in the Enhancement Unit, was a Bulgarian, one of our Knowledge Seekers. The first couple will go through the Keshe Foundation Space Technology to Moon will be a Russian and the German, husband and wife. We'll remember them, because they are the people who took the first ?? flight. But the rest just come naturally. But we need to complete that.

R: And certainly the people, or at least many of the people that have come to this system, have been profoundly effected by it. And that will change them from that point going forward. They might make some different changes, or different choices, rather than they would have without that experience. So, certainly that could change things but...

K- Oh yes. It changes you.

R: Doesn't necessarily effect all his life, and family, and work, and so on, (3:08). Depending. Some people it might, I suppose.

K- It changes in a way, but you accept it to be part of life. You don't connect it to what you did, that brought that change.

You know, it was like we immigrate to a country and we live the life there. That's what we have to live with, because it becomes part of us. That's what it is. We immigrated to a new condition, we accepted it and everybody else lives with it.

I remember a few years ago, in Holland, we came across a lady with a COPD, which is the lung disease, she couldn't walk meters without taking 10 minutes rest. After, the husband said, this is all fake. This is something where, you know, you're just grabbing people who need to do something and the technology was... She said, I am the one who's suffers with (it). I can't walk one meter without standing 10 minutes to recover. She went through the process. And about two or three months later, she went cycling, and she started walking around and she started living. The guy invited, they invited us to their home. The guy said, apologies, I didn't know, it is now, that we have a wife, we have a mother at home.

This is how life is, we bring the change, because we understand it. But it's for the others, that they brought that change to them to understand what is to happen. The technology is a revolution in the science.

At least we are lucky, up to now, they haven't hang us, like in Pisa, (from) the church tower, yet. (3:10). It's the next step in technology. It cannot be stopped. A lot of you will come up with, a lot of scientists are coming with different conditions and positions.

Any other question?

Q: .. Can you comment on the conversation humans are having about some people's belief that the universe is a hologram? And that this reality is holographic?

K- That depends on you, how holographic life you live. It depends what you call holographic. What is holographic to you and to us. What I call it, life is a mirage.

R: In some cultures, the dream state is what they call reality, and what we normally call reality they believe is the illusion. So in that sense, the things that we do in our waking state, running around and doing things, just as to the knowledge of the dream state, which to them is more important than the daytime, walking and doing stuff.

K- Yeah. (3:12). It depends in what, on how we do things, hum? How we see things, and how we appreciate what we see?

Any other question? Or shall we call it the day?

Q: .. In a city of approximately 800,000 people, what should the government do to absorb all Corona fields from the environment in order to protect the human population and the other living beings? And what guidance would you give to Knowledge Seekers who are in contact with these governments?

K- Governments will do what they like. Now we hear from, since what happened in the European Community, that nobody believes about the Corona, and what we got to know about the Corona. A lot of governments don't even consider to be serious.

We were expecting a lot of things this year from the governments, regarding the Corona, and we have not seen it. Is there a condition? We know in China they're still extremely working on it, and, what you call it, (3:14). we see European governments don't pay any attention to it, and some governments have totally abandoned this thing. So, it depends how and where your community and your government sits, and who sits where.

Any other question? Shall we call it the day? I have to go to a meeting.

R: We have a question to carry on till next week. You can think about thorium as an element that might be used instead of uranium

K- What?

R: Thorium as a radioactive element that could be used instead of uranium and plutonium for a reactor, or some kind of energy situation.

K- We don't work in that level. I don't see any need for that step of work. When you work in the Cosmic Rays, the Cosmic Rays are the creator of whatever plutonium, uranium, you call. We're dealing with the mother, why do you want to go into it?

R: Why deal with the middleman?

K- Yeah. Why deal with the foot soldier when you work with the generals, as I call it?

The Cosmic Rays interaction leads to creation of stars and life. Why do you go down the road? We can do everything.

R: A perfect explanation in a very short sentence there actually. Yes.

K- So it is, there is no need for that kind of things. There is no need for it.

R: Okay, we'll leave it at that for now Mr. Keshe, I know you have leave.

K- Ok. Thank you very much for today. Please support, what we call, (3:16). it's for your benefit this time, than the Foundation, but the Foundation benefits by it with gathering the knowledge. If you suffer from any kind of condition, and you think we can do, especially what we asked, and you can meet our .. medical requirements, you can start from Monday, Tuesday. Doesn't matter wherever you are in the world, you don't need to come to us, and we can sort it out. Or we can talk it to see, we might be able to support it through our engineers, and through our doctors and technicians, that we can bring that change.

Thank you very much. Hopefully we see you next time. I give from my best parts of my Soul to Dor, that passed away the physical life yesterday. And I'm sure he has found the beautiful places to be in, and start a new life with. Thank you very much.
