

460th Knowledge Seekers Workshop; November 24, 2022

(Transcription Proofed)

(Auto transcription from Elias)

ENGLISH TRANSCRIPTION

(:20).

K- Yes, good morning, good day to you. As usual, wherever you listen to these series of Knowledge Seekers of the Keshe Foundation Spaceship Institute. As for usual to gather some more knowledge. And to understand a little bit more, as we never understood as we discussed. This Intro, if one day mankind understand, that part of it, mankind will bring universal revolution, not industrial revolution. And this universal revolution working through the energy fields of the universe, then the matter state will change a lot of things. It will bring a lot of joy. It will bring a lot of new conditions. It will bring a better understanding of the work of the Creator and its created, and generally universal work.

In the last couple of weeks, we made a number of points, we made a number of some announcements, and we like to divide today's teaching into three parts. First part is to do with what we announced last week and the week before. In respect to the wellness side of the Keshe Foundation work. (:22). As we are a space technology based. And many of you came to Linz to see how you can take the flight of fancy. Some of you with a couple of Rick's sessions, we came to you, what we call, the remote control through Mobile systems.

We are still expanding the work of Keshe Foundation, Spaceship Institute working in different nations. We opened the door to test what we call, prelude, the section before we go into transmutation, Mobile systems. What this Mobile system will have, what effects will have on you while you're traveling? If you have a Parkinson, if you have Alzheimer's, if you have a cancer. When you're traveling from New York to London, within a few milliseconds, or a few seconds, what would happen to you? What would we get the outcome? We cannot go without it, we have to understand it. We have to understand what we deliver. Would you get in with a cancer, and come out with a no cancer? Would you get in with Alzheimer's and you see reduction of Alzheimer's? What does this technology brings?

When we start transmutation? What do we do? Do you go from Earth with one leg missing and you arrive on the Moon with three legs, four legs, three arms? We have to understand. How do we control it? Are you comfortable with it? Can you handle it? As part of this work, we announced what we call, the process, that we look at the conditions. We look at in how things go. And we have had tremendous response.

To this response, we respond back to the following. We have the Keshe Foundation, divided the operation of the controlling the wellness. (:24). Now, instantaneously and automatically into 4 sections. European, Asian, and South American, which means now automatically those of you who get in touch with us for any condition, you will be assessed and sent back to your centers. You are from Brazil, you will be handled by doctors in Brazil. You are from Iran. The doctors in Tehran will handle you. You are from China. The Chinese doctor will intervene, work with the Keshe Foundation and introduce new technology.

What does this mean? The same system will effect a Brazilian, will it effect the same the Chinese, as will do with citizen's of Tehran, and the rest of the world? We need to know and to this effect, we have started the process. The Centers will handle directly their citizens. This way, your doctors are responsible for you. Keshe Foundation is to bring this technology across.

In the process of receiving so many emails, people with cancer, people with Alzheimer's, with Parkinson, with the most strangest diseases and conditions. Some of them brings joy, because we know we can make that change, and we handed over to doctors in that national, in that land. Some of them bring us pain. We try to sort out. There is a cost involved in everything we do. The machine you come and sit in and you paid the 1,000 Euro, for one session. The center is there, the staff is there, the running expenses, the center is there. The building, the structure, the research, and the background is all there, and it has to be covered. So we have put a price per hour, per use of the systems. (:26). What would it take? How long would it take, and what we see? What percentage our specialists allow? We have 30% success, we have 40% success.

So our doctors team decide in the Centers, what hour of the center and system will be needed. In most of the cases, you will pay back to your own national companies, which we have set up. This does not go back to nowhere, except your own position. You work out of Europe, your illness, you're a citizen of Europe, you handle by the companies, which are set there for that purpose. You go right across the same in China. The same in Brazil, the same in Tehran. And you deal with the doctors who understand you, understand the culture, understand how to deal with, but they're trained as what we call, Keshe Foundation Scientists. They look at it through the what we call, science of plasma.

As I said, we started this Satellite business, of changing people at the point. We build it up. We can build up to a few hundred in the coming weeks. And then, as the centers open up as we are completing the development of the new systems, we go to the next step, what we call, rooms, as you will seen before with the servers, rooms with the systems. With the different diseases, with the cases different conditions, which we'll handle by the doctors, and they know which system they have to do. When is the next step, what they do.

We do not interact, we do not get involved in the medical side. This is not our job. Our job is technological backup. And in these processes, we see how we can support. We've had many of you, writing to us expecting help. We go through it, we pass it on to your

doctors. We pass it on to the centers we set up. The team of doctors behind. Now we are adding step by step, number of doctors to each center. Doctors which can help us to understand more, and they can decipher the technology back to us.

In this process, as I said, we centralize everything, and then the center keeps hold of all the data. You all go to, as we gave before, health at, the condition, the email which are given. And then, once it's processed, you'll be contacted through the center, in your center, not by us. Because we hand it over to doctors, and we keep a track of how you change.

Many of the emails we received has brought us joy. Some of them brings us pain, some of them brings us, to know the reality about mankind, and how they are. In the process of the past week, a number of people have gone through the hand of the doctors, and are going through the hand of the doctors, to be set up for the conditions and the rest.

We have to stay always neutral. We are providers of the technology. We are not doctors. We don't get involved with a medical part or what we call, whatever is needed to be done. In this way, as we receive more and more emails, our eyes opens up to more conditions, that we have to change our system to accommodate those which are there.

Our doctors and our advisors. Now we see we can handle a number of cancers. In the process of past few weeks, and the tests was done during the time when many of you came to Linz. Many of you for flight tests we gathered information, we gathered the knowledge. What we need to do. (:30). We can handle Parkinson's, Alzheimer's, we see a lot of people, a lot of people asking. We looked at different things. Keshe Foundation has done a lot of work with immune system. Keshe Foundation in the background has done a lot of work with genetic defects. And we now open those doors.

In a way, we see everything to be controlled by the brain of the man. So when you have a genetic defect it's set out through the brain. We understand a lot, we don't disclose how we see it, and we have put it to test. And it seems to respond drastically. And it seems to respond immediately. Over past years we tested this technically very softly, and see what it is.

Now, we are going full blast. We would like. we look at, our doctors are prepared to consider genetic deformation. And as we received requests for this, we've seen a number of people who have asked us for help for their children, for their family, for all sorts of conditions. Conditions never existed. The first generation of this but ?? Fibromyalgia. The conditions which left in the families, and they said it was inherited. It's part of the gene, that's a defect, that we all born to be blind, all born to be that way in this family. All these now can be looked at by the Keshe Foundation doctors.

In this process of receiving emails, we received communication from a young mother, healthy, balanced, with two boys. (:32). Little boys are very young age. One is more advanced in genetic defect, than others due to the age. We have seen this in some families

three or four are effected. From two brothers, the two children, the siblings are effected, which shows the grandfather, or grandmother had the defect in the gene.

We see a whole family, uncles and aunts having the same effect, but it was accepted, it was in the genes. Now, ?? which way into scientifically, what we've done in the past and you understand why we've consider it, and we consider it to be correct. In receiving an email from the two, about the dear youngsters, our doctors, we decided we'll handle it. We assessed it, and we wanted to see with ourselves, do we have an effect, can we bring that change.

We brought these two boys into Austria and into the Center. One it is in a wheelchair already progressed. One will be in the wheelchair in the next couple of years. Lifespan will not be beyond teenager, or by that time the disability will be so devastating, that these children will die of it. (:34).

The mother is young, and combination of the mother, and ?? upon the X chromosomes has led to this condition. And all children with this condition, go exactly precisely to the time, year, through the same changes and to death.

The Keshe Foundation has decided to take this challenge up. By allowing the boys with the parents to go through the flight system and observing the changes in a short time by being there. It gives us a conclusive effect, that we have to try. We estimate the Keshe Foundation with these two boys, will be engaged over two years. It's a genetic. Success rates, we don't know. But the most important thing is that we are prepared to challenge, to try. We don't use medication. We don't use our Centers. We use what we call, remote control Satellite system. We can operate these now from any center around the world.

In this process, it is done, what you do at home. It's you who decides to put the headphones on. We release the fields across this planet, it's you who's there to receive it. This does not get involved in any shape, or form, in health and medical application. It's like a television, it releases the waves of the video, of a song. It's you who has to tune to it, and to listen to it.

In this process, we have started to allocate two units confirmed conditions by the Keshe Foundation, to support this to understand more. (:36). Because we've done genetic modification before. I'll explain to you how, and how it's been done. It goes back to the early ages, early days of the Keshe Foundation. In this process with these two children, and we are now considering what we saw with the parents in the system, we can change the condition of the mother, possibly the what we call, the defect. This will cost the Keshe Foundation, something around 1.7 million to maybe 2.5 million Euros. We cannot sustain this, and we have come with the permission of the parents to public. We would like to raise the funds to save the two child, the two children.

The beauty with it is, that the mother has allowed us to go public with, because she wants to save the life of the two boys. It is important for us to be able to save the life, or try to

test to save the life of these two boys. One is standing behind and soon he'll be in the same position in two years time. The boy in the front could walk six months ago.

It's the responsibility of the KF with the technology we have, and with the knowledge we have to reach. (:38). And in a first trial we did, we have reached, so it can interact. It's there to do. We can allow, to announce, that all the people with this condition around the world, to ?? tune, to lock into a condition, and the whole private citizens at the same time to benefit from the same what we call, "change of," what we call, "X chromosomes."

No one can stop the Keshe Foundation to do such a thing. And we need your support immediately, to be able to finance this, as of today. Two lives and many children like this. And many of you suffer from what we call, genetic defects. It's done on the international basis. We tell you what time to be there with your child, or yourself, and you tune into.

The Keshe Foundation has decided on a ?? parallel work, that majority of you will benefit by it. We will do the same. We will announce a standard like the teaching of today. A number, that you as the Knowledge Seekers (KS) and the rest of the system of this planet, can go to and walk away from addictions. If you're a heroin addict, if you're a cocaine addict, if you're addicted to sex, if you're addicted to alcohol, if you're addicted to anything, which has brought misery to your life.

Keshe Foundation will run this channel freely. Which means there is no setback. There is no pains of interaction. It's your brain which sets you to walk away from addiction. Will be transmitted on a regular time, that you do not know when your addiction hits you, but the minute you feel it, you tune, you listen. Silent. (:40). But you change your emotion. You change your direction of life. Then it's on you, how you support the KF.

If you have children with addiction? You have the most "beautiful people" with addiction? Any kind of addiction. We'll start transmitting in the next few weeks on a continuous basis, what we call, the "addiction line." In a way, it's a Blueprint Day. The technology has to be at the reach. But the technology has to be reached the correct way.

In a way, if you're an addict in New York, or you're addict in Los Angeles on cocaine, or you're a addict in heroin and amphetamines in Tehran, in Istanbul, or in China. All you need to do at a given time, listen to the silence, and see what it does for you. But the beauty with this is, that once the addiction is overcome, it does not come back. Because the brain has set itself to match. The brain has done the repair. The brain doesn't work. No government, no officials, no authority has power over the Keshe Foundation to stop this process.

We spread the systems across the planet, that cannot be attacked by drug traffickers, and those who benefit from drugs. In a way, we don't fight. We give you the solution that there are no customers. (:42). American authorities and many other authorities have been fighting drug trafficking. I used to work with the British drug trafficking units. We disposed of the cars and vehicles and everything else, which carried drugs in and out of

the United Kingdom, for years. Those who are close to me, they know exactly what I'm talking about. Cars which are built to carry heroin and cocaine. Cars and furniture's, which came from South America with cocaine built in as part of the arms of the ?? clock.

I flew to Dover with the instruction of the British government to inspect a truck of frozen doughnuts, because it wasn't sugar spread on the donut. It was cocaine. I used to work as one of the top guys with the British government for drug control. Well known people worked around me. One of my companies is highly geared up with this work, to make sure that addiction does not reach the way it was going in UK.

I respected the British government for their support, and what we did for years with them. So now what the government's could not stop, the Keshe Foundation creates the condition of "no customer." You are from Brazil, addicted. You are from China, addicted. You're an addict in Sydney, or you're an addict in Tehran. Our technology knows no language, knows no border.

Our purpose today, as I said is in 3 sections. The section is about the life of these two boys. I want the change. Maybe we are too late for these two, but the knowledge we gain, will bring comfort to the others and the parents. That most of the genetic defects can be eradicated primarily through plasma Technology. (:44). Genetic defects, we have confirmed majority of it, comes directly through emotion, which means is connected to our ancestor's emotion.

Why do we go paralyzed with the leg? With these two boys we have pinpointed exactly in which part of the ancestors, has come in. So we know where we sit, and why they are here, and why the gene has changed, the chromosomes has changed. And we can change it very much like a Parkinson's, very much like ILS (means ALS). It's the shape of ILS (ALS). But the wishes was done by the grandfathers, and the forefathers, and the grandmothers. And these boys now carry these emotions of the grandfather, which is touched the chromosome, to do, to bring that change. So most of what we call, "inherited diseases we carry," genetic defects comes from the emotion of our parents, forefathers. We have to understand that emotion. And with the new technology with the plasma, we reach it, as we reach many of your emotions. The way we can reach Parkinson's, the way we can reach Alzheimer's, the way we can reach our ALS.

Now we understand, Keshe Foundation stands solid on its ground. I stood 5 years of persecution by what I call, "damnation" of the government of Belgium, not to spread this technology. The muffle is off, and the technology is so advanced, that now no nation can touch, no one. Let those who in Belgium are addicts, pedophiles, the habit of raping children, now go through the system and change them. (:46). I hope the Kingdom of Belgium changes through this technology, those who understand what they done wrong, and what they do wrong. The technology and the knowledge belongs to humanity, and not control by those who are born in the damnation of Belgium. We have no problem with. We handle every governments on the basis of, let a judge tell us, you cannot bring help to the people. This time they cannot come into court with guns and submachine guns and threat.

It's the responsibility of our Knowledge Seekers to save the life of these two boys. It's our responsibility to understand and bring the change in genetic defects, and how it can be done. And how can be layered ?? on orange, what I call, the onion rings of this disease.

In early 2000, when I was invited by the Belgian government to assess the technology. The Belgian ?? atomic authorities allocated to understand what I do. I told them, you don't understand anything. But I can give you things, that you understand the work of the Universe. The teaching of what you just read, heard before as an Intro. I gave three bottles of liquid. If you remember that time, they were baffled by the Coca Cola bottle, that made, what we called, the mysterious liquid, which was creating Nano coating and energy, as many of you have done that.

I provided three bottles, about 1.5 liter of each to SEK and the scientists in research centers of atomic Nuclear Research Center of Belgium, in ?? Malta. (:48). I told them one bottle is the energy of the man. One bottle is the energy of the Earth. And one bottle is the energy of the universe, cosmos. They, through all the technology they had, went through the liquids. And they came back and they said, can you supply us with some more liquid, because we run out of the material testing. One and half liters consumed in a matter of two or three weeks. Raman spectroscopy, every other things they could do. And then, repetition was given. Then I was asked to go to SEK for a direct research in the center.

Days were allocated, where I spent in the what you call, one of their top secret laboratories. We did a test. We opened up to see how we can produce nuclear material level, as that's what the only thing they were interested. In a vacuum of glass container of 1 cubic meter. The rule before that day, was that any nuclear material transported from one building in the research center to another, had to be registered? You cannot move anything without registering, if it goes from building one to two. That day they after the test, they immediately changed the rules. No material can move from one room to another without authorization.

They realized nuclear technology has changed. We can create nuclear material and Cosmic Rays (CR) on demand. Conversion of the cosmic rays into what we call, "field needed for everything." That was the time the Belgians, and the Kingdom of Belgium, and the king of Belgium understood, (:50). that one of the most powerful technologies on Earth is sitting in their laboratories, but they could not understand.

Today, in the Intro of today, some 15 years later, you hear about Cosmic Rays. These rays were produced in a very simple way, 15 to 20 years ago. I produced the first of Cosmic Rays as a student in Queen Mary College on top of the nuclear reactors, testing site. My doctor Weil ?? Shore told me, Mehran you shine, what you carry with you. I said, it's the knowledge you don't understand.

Now you understand. What we teach today, what we do today is not just coincidence. It's just, I have to find a way that ordinary man on the street understand. Not for elite. Mr. ??

Graba, the bastard son of the king of Belgium, in the first meeting of us in ?? IMEC, most advanced Nanotechnology Center in Europe at that time, walking down the room up and down, say, Mr. Keshe, you're writing your paper and knowledge in such a simple way that everybody can understand, this has to be written in a more complicated, that becomes valuable. I said, I write that every peasant in the back of the villages of Africa understand that the white man like you cannot abuse them like you did in Congo.

Now the knowledge is in the hands of the man in the back villages of Africa, from Senegal to Ghana, from Kinshasa to sitting in the back villages of Brazil. Now it's time to change the position of the knowledge. (:52). Now it's time to bring that change. Those of you, your mothers, and you've been crying, and writing to us, and the parents, and you an addict, help me, I have addiction. I gave you the gift of life today.

Like the teaching of today, we open Zoom channels, that you all come and listen to silence, the silence of the elevation of the soul and building up the layers of the brain of the man, that you will never touch a single cocaine and addiction.

Many of our Knowledge Seekers are suffering with this. Those in Los Angeles who are close to us, those who are in different part of Austria, Belgium, Tehran and the rest. We have responded as One Nation.

In a very near future, we will open this channel for all of those of you who are addicts. To amphetamines, to tablets, to sex, to any kind of addiction. Elevation of the soul brings the limitation of, what we call, need. You will not get those craving, and you will not get all the bends and the pains with addiction. Like today, you come every Thursday morning to listen, we allocate a certain time and date to start with, that you can ask your son, your daughter, your child, yourself, just to listen to the silence of the elevation of the Soul of the Man (STM), and walk away from addiction, and many, many other diseases and conditions while you do it. (:54).

We run as One Nation, and the bandwidth, and the Mobile phones, and the Satellites is our "government." We administer, we cover and we give freely to all of you. What we have, as we done up to now.

The whole point goes back, once we can confirm the genetic modification, then we can move on. Then we go for the immune system at the same time. So, Thursdays you come here to listen for, what we call, the teaching. Fridays you tune for addiction. Mondays you go, if you've got a gene defect. Tuesday, you go if you've got immune system problems. You can repeat this, and change it, and see the change.

Going back to how we know the genetic modification can be done. It goes back again to the nation of Belgium. Now, you start talking about Gans and agriculture, in past four or five years. In 2009, after I returned from Tehran, and we had a successful flight testing with the creation of gravity, with a friend, a close friend, a good friend Belgian, who is an agriculturist and worked in Africa, in a number of discussions, we agreed to finance a

seed research. Where we took seed, registered seed of wheat, from the agriculture center, (:56). in round the city of ?? Varahan, where they do agricultural tests.

Some of you might remember, if you ever still go back to early time of the Keshe Foundation, on the Internet, we said, we want people to grow seeds for us across the world. If you remember, you all received the seed, round about March, and on 21st of March you all seeded. We watched how the seeds grew over the time. We tested ?? Diller and the others. With our scientist agriculturalist, in Belgium, we gave him a green house, we paid for all the water system needed to run a very systematic research.

We tested different conditions. In those days nobody knew about Gans's, but I created the Gans's that the seeds were pre-prepared in, what we call, packages, and packages were sent in different time, that they don't interact, and we evaluated how we see, we can bring that change in genetic, modified genes in the crop. We knew the seeds we carry was genetically modified. We observed how some people in America, some in Europe, some in Australia, and different parts of the world received the seed, and I'm sure some of you here were part of that, the trials some 15 years ago.

In the trial in Belgium, with a scientist, (:58). with the process of specific processing of the seed, this documented, this full report, it used to be on the Keshe Foundation website, you most probably know where it is, some of you can dig it up. We saw that the wheat went back to its origin, genetically modified, and became grass. We could even decide in which level of the evolution of the grass to weed we want to watch, we want to observe.

When it became to the original grass, where it came from. We didn't see one stem with the flower. We saw a spread like a grass, and we saw 10 - 20 stems coming up, like grass. Then we understood genetically we can enter. We reported this back to the people who were concerned and doing this, that with this technology we can change the GMO.

In the process in China, in during my stay of 2 or 3 years, and some things we did with the Chinese authorities, we've proven that GMO can be changed. To this effect, we have received collaboration call from the Chinese government to enter into the building of the factories in the coming months, to change the GMO and harvesting increase in China. In next few days this contract will be signed by our team in Beijing.

So, we know genetically we can interact. As humans and the seeds all use the same protein based from the atmosphere, so it has to be the same as we have seen with some other tests of ours. (1:00).

So, in a way, in next couple of years, you will see massive industrial operation in China, for changing of GMO, which forces the people who create the GMO to give up. Or, you make it, we reverse it, we are back in where we want to be. The reason for change of GMO is important to China. Is that China is buying seeds which they cannot re-grow. So, they always stay consumer.

We've seen hundreds of thousands of farmers in India committing suicide, because in the past the seed used to give flowers and they can use the seed for next harvest. Now every time they have to buy the gene.

So in a way, what we see, genetic modification can be done the same as what we do with your, with drug addiction. Farmers will be given the facilities remotely in the corners of this planet, to put the seeds in a specific position and condition, again, using plasma technology to re-modify and start using it. No farmer in India can be committing suicide, because he has a GMO. Because they have the pure seed in their hand.

Now you understand why we did the test, why we asked you to become Satellites, and why we asked you to enter into Mobile, what we call, transmutation and transportation. In this way, we end up with the diseases and we end up with, what we call, hunger. Where no farmer shall kill itself.

We allocate a specific times for the farmers to place the sacks of the rice they buy with GMO, to non GMO and plant it. If it's good for the goose, it's good for the gander, as we say in English. If it's good for the male duck, it's good for the female duck. (1:02). If it's good for the Chinese government to benefit by it, it should be beneficial to the Iranian, to the Indian, and to the African the same. We take charge by bringing a balance into humanity as of today, and it's very simple.

Our system sits across this planet, and many of you with all those Gans waters you did, you set the scene for us. Those of you who volunteered to become Satellite you have already joined in. All of you who became, and come, and came to Linz to be, you brought us the data from different cultures and nations. That's why we can link into it so fast.

Today, we bring that change, and I ask the Keshe Foundation to raise the 2 million to help these two boys, because it brings, it gives us a lot of knowledge to bring the change for the rest of us in the next few weeks. One of our richest people listeners lost a daughter to drug addiction, with all the millions could not do anything. Now they understand the importance of this. She took her life two years ago, and all the wealth of one of the richest people did not help. Talking to her on a continuous basis, I feel the pain and how has changed the family. This should not be the pattern. We should not lose our children to addiction and all the psychological damages which it brings.

We ask the Keshe Foundation Knowledge Seekers, (1:04). and those of you who will listen across this planet to respond to this request. It allows us to run the channels for addiction, allows us to run and see what happens, and there is no limit, because the Keshe Foundation belongs to you.

R: Mr. Keshe, I was sent a link to the seed experiment. I can show that briefly here.

K- Would you like to after the teach, just after this session, please.

Now, you can see we don't talk out of line. Within minutes Knowledge Seekers in the background, know what this knowledge has been stored over years, and they can call up on it.

Can we change with this technology the condition of the pedophiles, that no child can be touched? We saw Vatican this week releasing the report on 2021, only, of the priests who have abused children, and they don't dare to go beyond, because it's so messy. And even 2021 report is shameful. How many priests are abusing systematically children in the church today? Can we give a headphone as a gift to the priest and say, you go to Sunday mass, on Saturday listen half an hour to the silence of your own Soul and change. The changes are fundamental. Many of you have been through it.

Our doctors tested a person with Parkinson 10 weeks ago, and yesterday it's finished with the whole process, with no shaking, with no Parkinson. (1:06). They are gradually reducing the medication in the background, that there'll be no sign of Parkinson in his life. The same they are doing with Alzheimer's, the same is done with other cases around.

We cannot do it with Gans's. You cannot do it with (Gans) Patches. It needs the understanding, the complication, and completion of, what we call, the knowledge of understanding the universe, universal work.

In the next few months, once we start this processes, if you have anyone in coma, buy him a headphone, they walk out of the coma, they'll awaken. In the next few days we will be giving an interview to a prestigious international broadcast for the first time in years, and the new space technologies on the agenda. This program is totally and completely concerned with the space technology, and nothing else. We'll ?? find more in this program, and the programs which come after.

I ask the Keshe Foundation to respond to our request for the funds to be set up, to be start adding up in the next days, as we cannot ??do these children. Every day day more cells converts to more proximity and closeness for, to lose them. (1:08).

When they were in the system this week, it was such a joy. The boy in the front, I asked him to go to the Moon. He said, I went to the Moon, he felt the Moon. I said, now I want you to walk. That simple. The parents report how even the sleep changed so fast in one session. We can reach, we can really change.

We don't need any government to tell us how to travel the span of the Universe. There are no governments above one kilometers, or even 100 meters, because it can't reach. We need 1.8 million to run this project for these two boys. It's you who decides, and with it we'll come back to you to support the Keshe Foundation for addiction. You pay thousands for cocaine, you traveled to Tijuana to buy cocaine, and to put Keshe Foundation to shame. You go to the other places as Knowledge Seekers, you are ?? addict, you walk away, but you go back to the addiction again.

All this has to stop, all this has to come to total understanding that we cannot, and we will not allow the governments, and, what we call, (1:10). ?? self-serving pharmaceuticals to stop the system.

They cannot reach it. It's not on computer line, that they can block it, or they can jam it, or they can hack it. I received the threat from a Jewish lady, that we are connected to Mossad and we're going to bring everything of the Keshe Foundation down. Making threats against the work of the Keshe Foundation, when they defrauded the Keshe Foundation. In the past week I announced that we lost millions, because of the fraud by a Knowledge Seeker who came close to the Keshe Foundation. The Knowledge Seeker is not from Europe, and is not European. He lives in Europe, but he's not European. He set out to defraud us, and we've been defaulted heavily, and we stand by it.

Those of you who supported us, we'll try somehow, we return back in next few weeks and months, what you gave to the Foundation, because it was my responsibility and I stand my position. I don't walk away from it. It creates some hardship for some of you, but we still stand. The finances from the projects will not be allocated for the loss. We always have made our way through our technology in different ways.

I request from the Keshe Foundation Knowledge Seekers, two ways. If you're a drug addict, give what you use for your addiction to the Foundation, that we can run our projects, and others don't become addict. (1:12). From 20 dollars a shot, to thousands a year. Those of you who know, and you have the wealth and you sit on it, does your wealth matches the life of 2 of these boys and many others. These two boys, two happy brothers, they could walk and run together six months ago, will not be here through genetic defects of the wishes of the ancestors, in next few years. We don't use any medicine, we don't use anything. We just reach the STM. We need 1.8 million, and we need much more to be able to stop the addiction.

This is the change. You asked us to bring the change, you came to Keshe Foundation to see the change. Now we start implementing it. There is no Centers, there is no where they can attack, there is no way they can shut down, there is no way they can hack it. Hack the Satellites, and break down whatever you like. The knowledge not to be an addict, becomes assets of every man around the world.

The only people who will suffer from this, will be the kingdom of United Kingdom, where the royal family made his living on drug trafficking for years and centuries. The biggest, what we call, (1:14). drug cartel sits within the, what we call, British monarchy. How they brought China with addictions to knees, and how they tried in Iran and the Middle East, even in a hump of a camel, to traffic.

I bring this session to an end, and then we go to the teaching in the next session. But we need, I don't need, you need to bring that change. We are here just those who support and has the knowledge to support. We need to raise millions. I used to do it on my own, and with what we've done with the Knowledge Seeker to stole so many millions from us, we have to come back to you. We need it today. Every second, a cell in this body of these

two, changes preparing the body to die. The father was holding the elder son in the system, he said, he never seen his son so relaxed. He never felt him so comfortable and relaxed, as he was going through the process. The mother writes, every night one or two times a night we have to get up and take him to go to toilet, (1:16). this night he did not even wake up.

Now we know, and now it's your problem. I provide the technology and knowledge of Creation, it's for you to run the structure, that can benefit all of us. No millions in the bank will bring the daughter, which commits suicide from drugs.

Rick, if you like to show the modification, genetic modification of what you found on the internet. Then we take a break and we come back to the teaching. As we announced last week, all the health matters has to go to health@spaceshipinstitute.org, and will be handled from there as a center. Go ahead, please.

R: Okay, this is the link to the webpage from the Keshe Foundation website. And I put the link in our chats as well, so people can access it directly. We can scroll down and it's shows it's the 9th of August, 2012 seed experiment with agriculture. There's a bunch of information here. Do you want me to read that, or do we have time for that Mr. Keshe?

K- Just show it as it is, people can go on read the link.

R: I'll make it a bit bigger so they can see easier online. And just talks about the proposal, and tests that were done, and it shows a series of pictures, and seed packets, and the letter that was sent to people with the seed packs, and the Gans water, the Gans that's used as part of the program. You see some weighing of materials.

K- Because there were sent the liquid, at that time, we couldn't teach about Gans's. They were sent a package of liquid, how to do, what to do as well, or how to make a liquid, different people, did different structures, and different instructions. That's why they show that liquid in the pack, and what they have to do, and how they make their own liquid, and the rest.

R: Everything has to be sterile, and proper...

K- This is done by one of our Knowledge Seekers this way, he was very systematic. This is not the original trial with the seeds in Belgium. This is one of the Knowledge Seekers when they received the packages from the Keshe Foundation, he went through the process.

As you can see the color of the seed (red color) it shows it is GMO. (1:20). These are the chemicals they put on the seed to control it. Normal seed when you get you see it. GMO's are usually coated with materials, that actually affects the genes of the seed, controls it. That's why they are these colors. These comes from the experimental seed center in the city of ??, or, what we call, the ?? Anaheim area, the ?? experimental area which they test different corn, and wheat, and everything else it was taken from them, they gave it to us. So all the characteristics of the seed was know. Go back to the bottom where they grow. yeah there ..

R: Lots of detailed pictures.

K- Very, very detailed, yeah. We did this in China with the "Tiger Nuts." They ran the two next to each other. The Tiger Nuts, if you go back, you'll find it somewhere. It'll take 30 or 23 days before you see the first shoot, and the division. (1:22). With the Gans technology we see it within six days. And the harvest is much more.

You see, those days we couldn't tell you about the Gans's, but the Gans's were already, 10 years ago, 12 years ago was that, it was given to the Knowledge Seekers without them knowing what it is.

The whole purpose, if I remember correctly, we allowed the two seeds to grow separately. Then one without and one with the Gans's, then to compare, and to see. It was set out exactly what they have to do. Like now you volunteer to come to Linz to test the system, Knowledge Seekers at that time, volunteered to do the seed trials.

I used to do a lot of teaching with NASA, what we call, and then they banned us, because we were teaching to freely, and the NASA scientists. We did the same here, Knowledge Seekers in those days started growing testing to show what it can do, and how it can be done. And you can see it. We literally .. changes. The name or address of the Knowledge Seekers are on the envelopes, given back to it. This is done the same.

Now it's at the reach of you. You've seen it, we've (the wheat has) gone back to grass. If you go to the last picture, what do you see in the growth you can see that specifically certain, what you call, (1:24). wheat take actually natural, they go back to grasses, as they were not ever wheat.

So, genetically we can interfere, genetically we can change the situation back to the origin. It's the same with the boys. They go back before the emotion of the father, or the grandfathers, or the grandmothers. This is the way the technology has to be.

We pay for it through our own free will, and we use it at the time of need with our own free will.

Thank you very much Rick. We go for a small break and we come back, and we go back into teaching and then we'll go ahead. (1:25).

Proofed to here >>

<<< **BREAK** >> 460 KSW November 24, 2022 (1:30).

K- Yes, willing able and I hope we can do. In the teaching of the past few weeks and months, we always spoke about the STM and STP, and in that process, we always spoke with how the two would interact, and the two will what we call, work together. In a way if you understood that, the STM is in the center of the body of the mind, in the brain of the man. And the, what we call, the STP, surrounded it, (1:32). this will come from the extremities and different parts of your body, how you touch, it feels. How you felt when you touch your partner's skin, how you felt when you cuddle the dog, creates the emotion, and that emotion in sense from this to this, creates at certain position an emotion.

Let me make this bigger, then you might understand it much easier. This is your Soul in the center of your brain. Then this is your blood circulation, around it. We don't see any blood vessels inside the brain. The Soul does not allow nothing to work and distract it. You want to contain me, sit around me, not inside me. This goes your arms, and legs, and everything else, depends where you are. What it brings in interaction with the environment, in sharing it with the Soul, and in what comes out of the Soul in saying what the Soul feels, this gives you the point of emotion.

Which with the conversion inside the brain of the Man will become different emotions in respect to different parts. When this blood transfers its emotion at this point, (1:34). when it comes to do what it wants to do, and it goes to it, and transfers it. At this point to go to the Soul, here this becomes a joy, where here becomes the pain.

So the intermediary is the tissue cell of the body of the Man, which sits in this manner across. That's why when we open a brain we see different textures, different densities, absorbing the rays from the Soul. Very much, as I always said, you cannot have a Solar System if it's Sun does not sit in the center of it. You can't have a Solar System with a Sun sitting outside somewhere here and not being in the center, does not work. The whole system will turn towards it, and become it.

It is the same, the Soul of the Man sits within the structure. The proximity we saw, the size of the Solar System, the Earth, the Moon and rest, becomes the kidney, the liver and the shape of the Man. Do you need .. an intermediary between the Sun and the Earth to tell what the Earth needs to do, and to put the Sun in a position of work with Earth? (1:36). Does the Sun negotiate, talk to someone to teach Earth how to rotate, how to move, how to become that emotion of being there? Or, as now, he has the control and understanding of his physical structure, it communicates with it direct, with the understanding of other fields and the environment. So, the Soul of the Solar System, the Sun, you call it, the Soul in the body of the Man, does not need any intermediaries, as it interacts. Now he has his dimension, he has his parameters, and he works.

The biggest question now for you as a human race is this, if you understood this, that the Sun, and the Solar System, and interplanetary system, where it does not need an intermediary negotiators, how do you as human race allow Mullahs and Ayatollahs to tell you how to feel between your Soul, and the STP, and your physical life? But now you understand you're responsible for it. This brings an end to the abuse of religions, if you understand the principle of the knowledge.

Ayatollah Khomeini of Iran, walk away from that. Otherwise, I bring you to a shame. You abused enough Iranians. Walk away from the office of Ayatollah Khomeini of Iran, and the Sepah and the military advisors. We don't need any intermediaries, as we as Zoroastrians, we know, (1:38). we don't need to be, between our Souls, and physicality, to stand, to be correct.

The same goes with the office of the Pope in Vatican, and the Jews in Jerusalem, and the rest. Mankind has matured, that it does not need abuse by false intermediaries, as the Man now has a direct connection between the Soul, the Soul of Creator and STP of the Man. Bring the Koran and I challenge you sentence by sentence to show, that the time of Messiah has come, and he's amongst us as a Soul of every individual of. Now we understand it. This come to an end to the religions.

If, as I said to the other, what I call, diplomats, the only way to stop the wars is to show the fallacy of the religion, as Man now is mature, that does not need intermediaries. If there is no intermediary between the Sun and the Earth, there is no need for intermediary to control the emotion of the Man between the Physicality of the Man, and the STM, who lives by the ethos of Zoroaster and Mitra, the ethos of the Creator.

Now we understand, that the Man is matured to the point, that in the depths of the Universe, when you have no dimension of Physicality (P), but the Physicality sits within the structure of the energy of the STM, the conduct has to be the same. (1:40).

Why do we need to entrap the Physicality within the Soul for it to conduct good, where we allow it to abuse, when the Physicality takes over the Soul, or engages the Soul? This brings us a lot of understanding. This brings an end to the religions. This brings an end to the abuses in the name of the Creator, that not even single ray of the lights, of the Cosmic lights of Universal lights or rays of the Creator haven't reach Ayatollah Khomeini of Iran. How can they claim to be of it. The same with the Vatican. I put my life at risk, but I've been here for thousands of years. I just changed the frock, and we get you.

The challenge was that they're the protector of the faith, the protector of the God's will, the God is here, answer to it. Otherwise ?? you will never end. The God is amalgamation of the Souls of the humanity.

This is a call for all the religions to end, and you challenge, we'll show, we'll stand. My direct call goes to those who are setting Iran to protect the return on Methi. He has arrived, disarm, it's your own Soul, you have to walk away with it. (1:42).

Ayatollah Khomeini of Iran, I have a direct call to you, open the Koran verses by verses, and we answer scientifically, knowledge verse by verse. The time of Methi has come, and the Methi is amongst us, as is us.

Now, when the Creator hasn't got intermediaries, but the people who inform of the knowledge, he does not need intermediaries in the name of the Mullahs, Ayatollahs, Vatican with their report of abuse, Jerusalem priests, and, what we call, rabbis, with the misleading of the conflict between the two nations and, what I call, one nation of the Palestine. The same goes to the, what we call, Buddhist and the rest of it.

Religions become one, when Man understand religion means the conduct of the Soul, and not a way to, what I call, put it through as the faces of abuse. If you understand this process, if you understand how you can connect, and how you are connected back, like the Earth to the Sun without intermediaries, then you should understand there is a bigger scale of work. The Universe, the Unicose, and other levels in between, which Man is not aware of, and finally the Totality of the Creator.

We've come from this end by knowledge, and our job is to come to and go back to. (1:44). To you the cycle of coming and going back to, maybe 50 or 80 years, to us is billions of years, we have plenty of time.

As I said very interestingly, very recently, if you go to Tehran, there is a district where they have built in a military base in central, now Tehran used to be in the north of Tehran, out of the city years ago, a religious center with a dome, which they gather for big events. Where Ayatollahs give talks and whatever. Ayatollah Khomeini of Iran. The center dome, where you have built in ?? Aposavah, you know exactly what I'm talking about, right in the center of the dome is where I was brought up, and where I lived. You have already built a place to protect the Soul of the Creators work. It's not accidental.

I went there, I saw it. I said, I knew what I'll be at the age of 8 in this place, and you have already built a dome over it, to protect it. Right in the center of the dome is where I was brought up, and I became to understand what is to come.

Mankind has to become to understand that the time for intermediaries is over, (1:46). as when you are in the deep space, there are no intermediaries, and your children will understand about the behavior, the truth of the message of Christ, not about the fallacy about the Man who did not exist, and the Man has created to believe in.

You have to understand it, you have to come to realize that it's you who's your Savior, it's you who has to be the giver, it's you who has to expect none. I told you few minutes ago, we give the knowledge to you if you're an addict freely to walk away from it. We make it now possible, that we don't need to go in the systematic ways of Alzheimer's and Parkinson's. There'll be sessions in the coming time when we ?? eradicate the whole process, that anybody that suffers from the Parkinson locks into the system at a given time. Hundreds of thousands of you (will) walk away without Parkinson.

You support me, I support you. You betray me, you betrayed yourself.

Now you understand why I went for you as Satellite. The Soul of those who become, and became Satellites is already aware of the change to come, and they will be part of it. (1:48).

The understanding of the transmutation of the fields of the Universe will become the new occupation of the Man. In a way, up to now we looked into the skies to see the UFO's. Mankind will look into the skies with the eye of the Soul, not with the eye of the Man, and Universe and Unicoise is its oyster. You've got to understand that with the new understanding of the fields of the Universe, fields of the Universe in motion, what you call, energy, fields of the Universe in the uniformity of the motion you call, plasma, now has to be understood, now has to be integrated into the structure of, what we call, life of the Man in the space.

We need to bring this change in, as now mankind has matured enough in numbers to be able to bring that burden of the change for the rest. You will be amazed, in next few weeks and months, how the drug traffickers will dump and try to make the dogs and the cats addicts, because they can't reach their bosses. You do the same with your cats and dogs, just buy them a headphone. Put them on the line, (1:50). the hours that is transmuted.

We have set our system that there is no hacking. Now you have to understand how to bring the two fields of your STP, you call it, a spirit, and the STM to work together, that does not need the brain itself. But it works without it, the way you shall do when you become the passengers of the Universe, as your brain in its amino acid cannot exist. We don't have a brain between the Earth and the Sun.

It's got to be part of the knowledge of Man in the space, that sooner or later, mankind will come to understand that the totality of the knowledge shared belongs not only to Man, and is the right of every citizens of this planet. It's the right of all of us to have access to it. We don't make a game of it, we make a life of it. (1:52).

Keshe Foundation is set to bring that change through the technology, and we will have many enemies, those who want us not to be there, and how they can bring that condition for us not to be there.

Try to understand, what the emotion is. Try to understand, how you create that emotion. Try to understand, in what condition of Physicality you create the strength with the interaction of the field of the Souls, that gives you that emotion. Then go to your Soul and create the same field strength, that interaction with STP creates the same emotion. Then if you become mature to this, then doesn't matter if the Soul is the protector of the Physicality, or the Physicality is protection of the Soul. They work in synchronized manner, because they're both aware of everything.

When you work in that strength, all the other Souls of Physicality's work on the same strength, then Man shall not lie, Man shall not cheat, Man shall not kill. Because, I'm hungry, I need fields and I'm given fields.

It's got to be understood by majority of the people, and gradually by all from the point of the first education, (1:54). what it means to live with the Soul, and what it means the existence of the spirit, or the dimension of physicality. Our children will be educated to the knowledge of the Universe from birth, the way they inherited the X chromosome, and became paralyzed, and become all the diseases we call it. It's just an energy and emotion which is brought that change.

So the same shall be when the Man understand this in his childhood within the fathers and the mothers energy fields that has no X chromosome, or Y. ?? When the children of Man are created from the fields of the STM, Man shall bring no imperfect child to this world. That time has come, and that time is amongst us. It's the time for us to bring it.

In the coming time, in a very, very short time, as we are working in the background in development of technologies, as our team have to understand it, there'll be no room for vaccination. We transfer the energy of, what we call, the virus, which your body of dimension of Physicality, could be a virus on this planet, but another planet, or position in the Universe is your food, to understand the transmutation from position to position. So, you will come to the point, that if you want to have measles protection for your child, this channel, this time allows this to be received as an energy.

There'll be no ADHD, there will be no autism because of the mixture of the viruses. (1:56). The injections are fake ways they do, deliberately to damage. Now, gradually your eye is opening up, the capability and the possibilities, which is now, is open to mankind.

You go on channel 24, you can have as much apple as you like. But you won't put an apple, you won't kill an apple. You want to have a lamb, you go on channel 26, you get the taste, the food, and everything of it. You don't need to slaughter an animal. Now you understand how extensive this will touch you, and how Satellites are needed. Because the electronic satellites have the limitation of physicality.

We need the Soul Satellites, which is of same, and transmute the same. I am there to give and to exist. I made Man in the image of Myself. Is our Creator ADHD, or is He a drug addict? None. So should be the Man, now the Man has the knowledge. This is the cornerstones of the teaching, this is the cornerstones of understanding the embodiment of the Cosmic Rays, the Soul, the Gans's and everything else which goes with it.

What will be the next step for you to understand the strength of the Cosmic Rays? Which one you need? Which one you don't need? (1:58). How do you attract it to yourself and how you reject some, because you don't need it, even though they're are target?

Very soon, very soon, once we start these systems to go public, for you to tap into. You will tell us how you feel. You will tell us, today I didn't eat, I'm not interested, because today I received what I need as energy through the, what we call, the channels which is set by Keshe Foundation.

We govern the planet, not pieces of land. We govern through the Soul, and technology, and knowledge, not by the gun policy, and whatever sits with it. We need your support to be able to bring that change scientifically, correctly, and with the process, and understanding of the whole lot, that we do not bring the change by wars, we bring change by love and creation of new condition.

I hope you understand what's on the table today, and what is the part of the teaching. The main target, the main objective of today is, you do not need intermediaries. Nobody can protect the right of the Creator, when themselves are abusers of the name of the Creator, in the name of Ayatollah and the rest of it. (2:00). I hope you understood the teaching of today. Has come to an end, and you understand scientifically why, through the abuse of the Man by the religion. Unless you enjoy an intermediary, because you still think, I have found a leader, so I double in weaknesses of my own lack of understanding.

Look to understand, try to find out the knowledge, and at the same time try to be precise, that you don't need another intermediary. You understand the knowledge, that there is no need for an intermediary anywhere in the Universe.

I always said, my message hasn't changed, it's for you to understand and mature to. When I said to the professors in Jeddah University in early 2012 – 13, when they wanted to send their students to the KFSSI, which direction do you get your student to pray and bend, when is traveling in the span of Universe, and the Earth is rotating, and they're upside down, and they are in different parts of the Universe which rotate itself? Where do you find your God to pray to? Unless your God is within you. Understanding the conduct. The message has not changed. And the technology and the knowledge has not changed, we just explain more of it, that you understand it more freely. (2:02).

Questions:

Are there any questions? Or do you have any questions or doubts in what your capabilities are?

R: .. I have a question. How are you going to get a headphones onto a cat?

K- Easy, put it on his ear.

R: Yeah. Okay, well, I'll let you try that one first.

K- The cats have ways to be done to. Don't forget, you don't need to put the headphones, you can put them in an environment, even in their box, that they are entrapped in it. You understand?

R: Sure, you can just... It doesn't have to be a headphone necessarily. .. a speaker or something.

K- Yeah, how many of you had a headphone the first time we tried it? How many of you just listen to it?

The reason we go for the headphone, because we understood in our trials, people who come and sit in the units, they have problem with everything else. Seat is not comfortable, this, that, that, it's too short, too high, whatever you want. A reason to distract themselves. When we put the headphones on it's amazing. The efficiency goes up by 10 times more. You understand? So, that's why we go for the headphones, (2:04). because it directly sits. Your ear, the two ear holes literally crosses the Soul.

We'll teach you slowly, slowly, how even when you have ear phones, the things you can do physically, to move the fields to different parts of the body. It's no use fixing your head, your brain, I call it, with the position where there is, let's say a, Parkinson damage, or you have a disability. Without actually ?? which disability you're talking about.

There is much more to this technology than just thinking, "oh, it's a headphone, I can make things." As I said, you will find a lot of people, very soon, will bring stations for food, or whatever. But you'll find out none will be able to deliver, because there are hidden technologies which is a space technology, Universal knowledge, which has been put into Keshe Foundation systems. We don't allow interference, that then these people can abuse it.

Even our own people don't understand when they make things, why they are making it, because it's made in a way materials, and their conditions, that creates the effect we want, and that effect stays as it is.

Now try your cat in a box. How do you get a headphone over the fish, which is always anxious. You can't ?? buy a headphone on the fish can you. How would you reach the lion not to kill? How do you elevate the Soul, you can't put a headphone on the ear of the lion. (2:06).

Any other question?

R: Okay, thank you.

K- Now, have you sorted out your position with your cat?

R: I don't think I'll ever sort out my position with the cat that visits me. It's usually due to come in right about this time 2 - 3 o'clock in the morning. It hangs off my windowsill until I open the window and it can jump in.

K- It's the neighbor's cat paying you a visit?

R: Yes.

K- The food must be delicious, yep.

R: Yes, better, and that's the end of it.

K- It's amazing how people behave towards their cat. In our factory in Austria, the people are very kind, and very generous, and whatever. They start feeding a cat, which was stray

around there, we thought. After a while, the owner came and said, can you stop feeding this cat, he is not eating at home. But I think the cat gets a better food at the factory, and the lab, than it gets at home. So, he always comes for the food. And they tried to feed him. So it depends where he enjoys more.

R: Steffania says in the chat, cats choose their owner.

K- The whole of Keshe Foundation is a cat owner, is the cat .. owner of a cat, it's gorgeous. They always hangs around there. I think it takes from the fields coming from the Center.

Q: .. You said in the 458 Knowledge Seekers Workshop teachings, (2:08). that there is the same structure of life as on planet Earth throughout the Universe and even in the Solar System, but without the dimension of the matter state. So, the question is, two questions. One, is that system where we go when we dream?

K- Not really, because when you dream you still got the physicality left behind. You become aware of its existence, but you're not, in a way, you left the totality, because the body still left behind.

In some cases, you can replicate the, what you call it, we can create the physicality. But the physicality is a different Physicality than you actually have on here. Many people have done it over centuries.

I think if we teach the beautiful people how to do it, we will see individuals, as they want to be. Maybe .. we can free them from the shackles of four or five of them in one house, as I call it. We'll run, we'll run a test for the schizophrenic.

One of the Knowledge Seekers right on the top of the Keshe Foundation, not there anymore, is a schizophrenic, with four different characters, and responds to different names to each character. If you call this name, the behavior is this, if you call that name, the behavior is like that. (2:10). Would we gave four physicality's, to four of them and free the shackles of it? One always lies, and one is always aggressive. They don't interact, they are aware of each other, but they never, they don't like talking to each other or doing anything. Maybe by giving them different physicality in the dimension of Soul we see the true beauty of each one of them. And you have to call the right name, the right Soul will appear, and Physicality even then changes in that dimension. Some of them a lot of you know.

Any other question?

Q: .. The second part of the question, do people who disembodied or die, go to these places and continue their lives there in this dimension?

K- We always said, the Soul has a field strength, that it gathers position for that. One of the beauties with the STM, it's one of its contributes, is that it's created by interaction of the multiplicity of matters state field Gans's. So, it fits, more or less, anywhere in the Universe. It's not mono-energetic, it's not monocycle life.

When you look at your body you have, (2:12). every element that there is in the periodic table, is in the body of the Man. It cannot be, because if it is part of this planet has become part of the Man. We've lived here for centuries, thousands, millions of years, we have taken it in, doesn't matter what it is. And there are still parts of the Universal Cosmic fields, which converted to the matter state in the body of the Man, which the scientists up to now, have not even understood. So, we carry parts of the fields of the structure of the Universe too within us. Just because we don't understand it, it doesn't exist. As we never knew there is a uranium and plutonium, then we found out there are. Then when we tested, they said, "oh, it is in the body of the Man too." All of us carry good amounts of uranium, and plutonium, and all sorts of things.

But there are other elements, just because we couldn't understand, we knew our chart was up to, let's say, gold or silver, we could never imagine the material of plutonium, uranium exists. Now, we know what it exists, and we checked it's in the body of the Man. The same is the spectrum of the fields of the matter states, or what we call, energy fields as a Gans's of the Universe is within the Man.

And Man will adapt to it, when it comes to it, when he approaches, and then reaches, or when arrives at the given position, because on Earth you need very little uranium, but on planet Zeus you need tons of it, for you to confirm ?? existence. But because you have the essence of it in the source of your life, you can call upon it, to extract the fields of the Universe, to confirm your existence.

So, when you look at the body of the Man, and you say, you got so much gold, or so much silver, (2:14). there are more materials the Man hasn't understood which belongs to Universe, belongs to beyond the Cosmos, and we are part of it. We came through that cycle. So it's part of us, but we haven't found that yet.

Many materials the scientists imagine will exist, or exist, or it could exist in the Universe through the, whatever you call, blah, blah, atomic mass, atomic weight, or whatever. You have imagined that, why you're looking to find it in the mines of the. Look within the body of the Man in the right way, you'll find it. Then you don't need to call it imaginary or something exotic. The exoticness is the lack of understanding of the Man, was not understood the process of Creation, that's all.

Any other question?

Q: .. Monday, you visited my great granddaughter with autism. For her to participate in the treatment, she needs to have treatment, but we don't have possession of the 15 to 20,000 Euros costs. Is there anything we can do so she can get the treatment?

K- First of all, we don't treat. The doctors were online when you spoke to them. (2:16). We assess if the plasma can work on your granddaughter, or whatever. The cost has to be met, because we have a cost to meet. We are a NGO. We don't make profit, whatever we make we put (back) in, and for years I put millions into it.

We have come to this point, because we were defrauded by a Knowledge Seeker, so called Knowledge Seekers, so called. They are not Europeans. Because we heard some of these. Somebody wrote in the German chat, Mr. Klaus has defrauded the Keshe Foundation. Mr. Klaus has put his life on Keshe Foundation. You dream to be him. Again propaganda by the pedophiles in Germany.

We have to meet our costs, we have to cover our costs. It costs thousands every day to keep that place, you come for half an hour, as a Exhibition Center. None of you have ever paid for it. The factories, we paid, we lost the money. We gave to people in America to open factories and do things for us, millions of it. We never spoke (about it). Now, maybe it was a good thing in the hindsight, that this guy came, and with the team, he brought the team defrauded for millions. When we asked for our money, they threatened us with everything. You'll be amazed, we'll release these documents, because now it's in the hands of the banks. That how threats I received to my life, (2:18). and the Keshe Foundation, everything else, once we asked for our funds back. So, I covered it for 10 or 15 years. We're still covering it. We're still here. But you want to use the knowledge and the facilities, at this moment of time, we have to cover extensive costs.

R: So one thing people might do is, you can start, what they call, a "GoFundMe," or other similar fund and allow people to support you in.

K- Support each case, yes. This is the way. We did it with these two children. Keshe Foundation came out, because we know the implication of it. And all the doctors you see in the background. It wasn't just, I come there to assess, scientifically we can change such a thing. It's the doctors who make the decision. We don't come online on our own, we're there with two or three doctors in the background in the setting. All these in the long run has to be run. When a doctor puts his lifetime on serving you, he has to be served.

The same with operation in the Centers. Our expenses run into double digits every day sometimes. Put thousands in front of it. You have to cover the costs. I did for years. Most of what I put in was stolen by deceiving Knowledge Seekers, (2:20). in Europe, but not from Europe, they're still playing innocent. So now you have to carry the burden, otherwise you lose everything. Because it's not there to support. I have done for 20 years.

It costs, .. when we charged you 2,000 Euros for half an hour, that will cost, for to run the center. It has to be covered, if the systems around the world are there to serve. It's like the (computer) servers you use, you have to pay for it. You rent a car. You pay for that house, by the house you use. Simple as that.

At a moment we are in that stage. We try to bring the changes. This process of addiction, it's going to cost the Foundation, once we complete it, about 2 to 3 billion dollars. This is the money you don't pay for, to drug traffickers, for cocaine and the rest of it.

You know, now in Europe, it's tradition in America, they grow harvest wheat, or whatever, and they throw it away to keep the (price) control. Very soon, the way we're

going, the drug traffickers will throw all their goods into the, on the streets, because nobody needs it. Even in the street you don't want to touch it, because you have a cure for it.

Actually, in a way, this fraud has brought us, in a way, you want to help yourself, you have to set up in a way, that the Foundation can survive to do it. I would like to see, because of the. A lot of scientific results for our team and doctors, the change in these two boys, and I'd like to raise 1.8 million. (2:22). That's for us, it can be down. We need at least 150,000 to start with, immediately. We're not coming to sell you anything, it's your responsibility to safeguard the, what we call, the technology and the next generation to understand it, and to share it.

As the gentleman says, for granddaughter. We have something, most probably 1 billion grandfathers and grandmothers wanting to see their grandchildren healthy, and their children. You pay National Insurance, you pay to your governments and at the end of it you get nothing. It's the process of we do it. Sometime in the future will not cost anything, because it's just a structure of people putting it.

Many people came to us as volunteers to Keshe Foundation and then they asked for payment. Then when we cannot do, they were volunteers, now the wages, and they go, and that's it. They didn't come to KF (to serve). People like Rick have been here for years, and there are others. We didn't come for the money of it. We came to bring that change. Somehow we support it. We find a way to run our lives in the background. I lost my son because of the Foundation, but I'm still there to serve. (2:24).

The best thing happened to me was, my divorce was completed months ago, and I could physically separate my Soul. It's just that you understand what you do is for betterment of the millions and the changes they bring. A marriage has a soul and the STP. The point of divorce separates that STP and you're free.

The same is with you, you have to decide where you want to bring that Soul with the grandchild with the others. We are here, we try to create a mass delivery, and sometimes we have to do things, which fits that the mass can receive it. It's your job to create ways to fund it. We cannot do, I cannot tell the guy, you come to the Center, how many of you come there, hundreds of you? Yesterday, there were 10 - 20 people visiting, going for the tour. Did they pay a cent, did they do anything. They just came, they learned, they got, uh, a new knowledge, and they left. There is a light, there's a person who teaches you, we had two people yesterday teaching, the facilities, the cleaner, the rent on the property, where does it come from? It doesn't follow from the sky.

Mr. Keshe paid for 20 odd years, 30 years for it. Now, we got defrauded by one of you deliberately, so, we all have to cover it. So, if you ask how can you pay for what is there, (2:26). this what we ask is, what is there to keep the system running. And you pay not to the Keshe Foundation, you pay to the doctors, to the offices and everything else, not to us. It's set up to benefit your own community, and it's set up to benefit your own process

and then we get paid for the services we provide, as a service provider. Technology, knowledge, know-how, and the rest of it.

Any other question?

Sorry, the thing is, what we get paid, we invest back in you. So you're investing in your own life and your own future. Just to run this Wednesday teachings and everything you see in the background, it costs nearly 10,000 - 15,000 a month. And you come just for three hour session and you walk away, I learned something, or it was this, or it was that. Carry on.

Q: .. Have you considered having the clients work with a bank to extend, some kind of credit facility?

K- Pardon?

Q: Have you considered working with a bank where the clients can be extended some credit facility?

K- That's not our job. (2:28). We are scientific people, that's not our job. You go to bank and borrow, not us.

Q: No, what I'm saying. In fact, if the clients work with the bank.

K- You see, we are international organization, which bank do you want us to talk to, which country? You know, the financial arrangement, you have to be the citizen, you have to have a bank account, you have to have everything else to be able even to consider, you have to have the assets, you have to have collateral, and the rest of it.

Q: That's part of it. That's what I'm trying to say, maybe you don't understand. I'll give you a scenario. I have a client willing to get qualified in his country by his bank. They will give you a guarantee that they will continue the payment, but in installments ?? payments. They give you a deposit. They go through the process, but the bank gives you .. like a guarantee.

K- We are not in this kind of game. This is not our problem. This is something we don't want to get involved in. We are a scientific organization, we listen to some people if the case is interesting for us.

You brought the guy from Nigeria this week, and you sat with them, yeah? The family has spent thousands and ten of thousands on their child, taking them all over the world. What happened? They already tell you, they use the Gans's, they believe in it, and whatever. Then what accusation they made, when we did not give their way? We became the worse. They have to live with that child, not me. They have to wash him, they have to feed him, he cannot walk, for the rest of his life. (2:30). It's not my burden, it's their burden.

We are there to see the possibilities that we can help, one we help, we can do the others. We are not bankers and I don't want to get involved in this kind of things. It's a

straightforward, you go to the bakery and says, give me a loaf of bread, I go to my bank, I pay you in installments every day for part of it.

It's you who needs it, it's you who has got to sort it out. And secondly, it's the decision of the structure in each area which they see. Maybe in Tehran you cannot pay 25,000, but you pay ??, but the decision is made by the doctors and the people ?? at the point, not by us.

And when they don't get it, they accuse you of everything. I have a very simple, simple straightforward mindset. I don't have to live with the disability and the pain, why do you make it my pain and my disability? Because you are too greedy with everything else. They live in a Mansion of hundreds of thousands, millions, and they do everything else, but they just want to say, we are trying to do just for internal satisfaction.

Q: They accused me of stuff too.

K- Exactly. We don't need it, it's there. If you're there, and you believe in it, you'll find a way to do it. These two children we saw, and I know the family was not expecting, everything they had they bought the wheelchair, they bought the car to be able to put the wheelchair in now. They have to change the car now to be able to two wheelchairs very soon in it. They have to install the lift in the house, (2:32). every cent of the these two young parents is going to foresee for next, maybe after the day the two die, what happens to the car, what happens to all this time, what happen, they invested the love, and care and the emotion they left behind. That's what we are responsible for, that emotion. They're trying to stop that.

We all die, we all go through the process. We're prepared to spend on ourselves, but not for the others, because, I always say, when you think of giving to the others, you're taken from. You've got to make it available, that it is there to be done. Now in two calls we see.

We are we're literally getting bombarded by people who need help. But before you call us for help, understand there's massive expenses in the background with all these things. We have very few people who work, or being around the Foundation, like Rick and the others, who put their time freely for years to come. Anybody else you've seen they come and gone, it's because they wanted to be paid. Come sweet the first few months, and I did this, then I need to be paid, because I'm doing this. If you have be paid. One time when we fell for this people, Foundation was paying 350,000 a month, wages and expenses. Then we watched the Zoom private conferences, that we are cheating Mr. Keshe, he is stupid, he is paying us, we just sit there. I watched their videos. They're so stupid, that they put them on the Zoom recording. Now it's yours. We've done everything we can. (2:34). Now you want to help yourself, you have to cover the expenses of it, because now it's real. The Microsoft doesn't wait for, there was a three, four thousand bills every month for the software you use, the Zoom does not. All these Zooms, all of you use private Zoom of the Keshe Foundation. We pay for it. Sometimes it shocks me to see how much I pay to Microsoft, to Zoom, and all these providers of services, which you just sit there and enjoy.

Any other question?

Q: .. Are there still spaces left for the "All Purpose Simulation Flight Experience"?

K- What does that mean?

R: Well, I think it's advertised in the KF store as the "All Purpose Flight Simulation Experience."

K- Yeah, that's the first one, we still exist. People come up, still see one or two, but then it has to be organized to fit into the other times.

R: So, they can still apply for that, then?

K- Yes, he can still apply.

Q: Salomea ... I'm very happy to inform you that I had a urine test and it's alkaline, because I use only natural Gans, I mean, the leaves. (2:36). I drink for one month only juice of the leaves, only small. But I need distilled water. And for this reason, I am kindly asking you, how I can make myself this distilled water? Because in my urine was crystal or phosphate. And I think that I have to use distilled water with the Plasmatic technology. If you can help me I will be grateful. Thank you.

K- You cannot create a distilled water as you boil it, and take all minerals out unless you have a specific, what you call it, systems. You can kill the germs, you can take elements out of the water. But the way you distil water by evaporation, it is possible, it can be done, but it's too expensive at the moment, too expensive. So, you still have to boil the water and collect the steams. As a friends of mine said, the best distilled water, is the salt of your own sweat.

Any other question?

Q: .. I've noticed that having Gans's in the same room with people I know, that have never seen it before, (2:38). changed the way we talked and what we talked. We talked in a more lovely and open way, could that be a possibility?

K- 100%. 100%, not 99. We use Gans's for change of emotion in families. We make a specific Gans's. I've done that many, many times, you just place in the house, where there's a conflict, and anger, and whatever between the family, and you wait. And you keep on seeing the Gans's reduces, and you top it up, a few days. Because when it goes (Gans reduces) it means those are the energies which you use. The leftover (in the jar) is not what the family needs. So you keep on topping it up, and then you see the changes.

We had a strange relationship, (fighting) like cats and dogs, as we call in English, husband or wife. Nowadays, the house is absolute silent. People stop fighting. Because they don't need to take energy from the others. When you fight, you're trying to prove, they try to take get energy. When you receive that energy without fighting, you don't need it.

The point is that, the amazing thing with the new Wellness Centers is, there'll be rows of systems, but you won't see anybody in the systems, and somebody around the world somewhere is getting benefited by that system, being in that Wellness Center. (2:40). That could be you, that could be a Chinese guy, whatever. Instantaneously. We are watching how instantaneous this system works, and it's amazing.

Now, when we said we are going to the Mobile system to move you, we have to do all this tests, just like what we move, what we don't move, and how you'll feel, or whatever. We are seeing an amazing, amazing data and realities which are coming up. How people feel, instantaneously they change.

We had a case, I'm sure the person is on the line, it's one of the old Knowledge Seekers, when you come on line with us, and when you talk to us, like the way we did with you with the first trial with Rick, you don't switch off your microphone. Whenever you're in these processes anywhere in the world, you have to leave your (microphone on). Because people think they put a headphones on, and they switch off their microphone, as they cannot be heard. It's like one way traffic. You hear my Soul, but I can't hear yours. How can I feed you back?

So, when people come with the process with the Keshe Foundation in all the Centers which are coming up and they are ?? running. You leave your microphone open. We tested this in a very funny way recently that, by the Knowledge Seekers switching off their microphone, as they don't want to hear, they might fall asleep, they don't want you to hear them snoring and the rest of it.

We realize now, we know about it, we just tell you, can you switch on your microphone, otherwise it's just one way traffic, you get nothing from us. And immediately they switch on their microphone, they see the changes. (2:42). This shows the system is interactive, this shows the system works so fast.

This is how it will be built up. We are looking, if you have any kind of. Don't come up with us, I have a sausages they are .. We get these things from people, I had two eggs, I got poisoned, can you help me with my things, because I can't? We've got more other things to look at, and the rest.

Before you get in touch with us, look at your financial situation, what it can do, because expenses has to be paid. When you go to the doctor, you carry your money with you. You have, when you approach us, you have doctors on the line, it's their time, and the facilities used. When you go to a doctor to use the MRI, you have to pay for it. You facilitate it before you go out. I remember Dr. Kostova used to tell me, people come to my surgery, they're sick, and they come with a chicken, or eggs, or vegetables, that's my payment. I go home with a sack of fruits for the whole day, and they go home being cured. Unfortunately we can't accept eggs and raw potatoes down the line at the moment.

So, when you approach us, when you come in, when you send it, look at your financial background, Foundation has costs to cover. At the moment, as we increase the numbers,

the expenses go colossally higher. The thing is, when the doctors in Keshe Foundation handle you, it's for life, it's not for, what you call it, for a few hours. The change is fundamental, the changes in all your body, everything. (2:44). Because we don't go to your body, we only handle the fields of Universe in your body.

Whatever your body does to it, it's how it balances itself. We are not in the field of medicine, we are in the fields of, what we call, energies of the Universe, and that's how it works. Any other questions.

I said to one of Knowledge Seekers as a joke few days ago, I wonder if somebody get sick in planet Zeus, what would he like to pay to the Foundation? What they have there, is no use here. So be prepared. It's there. We're there to respond, we're there to do things. But, it's like you go, you actually go to doctors now without a destination without an appointment, and they have to be paid. If you go nowadays on the line, there's a credit card, you pay the credit card, you can speak to the doctor. Now, this is facility, doctors around the world are providing their wages, the centers, all the machinery put in there has to be compensated.

Any other question?

R: .. Jefferson put a question in the chat here regarding buying your ebooks from Amazon, or even from the KF store that directs to Amazon books. In Brazil, he says they're not able to buy your books, that are from Amazon.

K- That's a limitation .. which Amazon puts on which countries we can sell. There is nothing... I'll ask the question, but I know. (2:46). we had again another Knowledge Seeker who is with us, introduced a guy in London who was supposed to promote us, he sold thousands and thousands of our books, we haven't seen a cent. He took 10,000 Euro from the Keshe Foundation. They all came sweetie, witty from Greece to rob us, and they disappeared when they started robbing. We know he put the Keshe Foundation on Amazon in a separate way. Now we're trying to even block that one. We trusted the Knowledge Seekers a lot, when they came in, we found out that they're the worst ones who come to deceive and to cheat. We'll wait and see.

But it depends, Amazon decides which countries, or our team has decided in which countries we want to sell things. But, I will ask them to be checked. A number of Keshe Foundation at the center if you come, books have been signed, because a lot of people asked for signed books, they are there and we put as a special thing to be put, a very few books are kept there signed. But we stopped selling for example, the signed books and you only could buy it in two or three countries the signed books. Because a lot of the signed books were blocked and stolen by the Belgian government and ?? they were kept there. And they were not delivered. So, you'll have to speak to Amazon Brazil, or we check and see why you don't ?? get them.

Any other question?

Q: .. (2:48). Recently you told us about worsening depression associated with Corona. This week I accompanied an infected Knowledge Seeker who started the protocol and recovered very quickly. But she reported that her emotional state was severely shaken and she had strange thoughts. Could this be a new mutation of the virus?

K- It is a new mutation. We've seen it. This is the new virus mutation. It's not a mutation, it's a stronger, it has moved from the physical strength to the emotional strength. Yes, they feel suicidal, they feel tired, they don't want to live, they get sick very quickly. Some of these new versions brings down their immune system lower.

We see now when the Chinese government has brought the enforced two or three weeks ban (lockdown) right across China, for next 2 or 3 weeks. Each district decides on how they handle it, and what restriction is. Many, many areas of China is running to problem because of this. Many, many places in China have a problem, people cannot move, they're becoming aggressive, we've seen problems even in, god knows. Local areas people have been literally locked down. They want to get over this new version.

But actually it has a solution very easily. If you get the emotional condition with the new Corona, you just need to add a little bit of Magnesium and increase the Zinc, with the AA of it. It takes a few weeks to get rid of it, but it's horrendous from what people we've seen, they've been through it. (2:50). Many of them are becoming suicidal. This is what we've seen, and yes, it's a new version ??

The only problem, or the only solution we see if this Corona gets on a stronger length or a strength, what would it do? Would it move more, because your brain works in a very different way, then what we are used to.

We see, this is the brain of the Man (makes drawing), this area outside is the blood circulation, then you have the physical part of the brain, which this part on the top layer is to do with your Physicality, your ears, your fingers, your arm, all sit in this area on the extremities.

So, the strength of this field, as it goes in and increases, in contact with the Soul, then it creates different emotions in different layers. You have this as the layer of the emotions.

Then you have layers here (close to center), which Mankind has not even understood. These are the interactions and emotion with the Universal Community. We already have it built in our brain. Then you have the, what we call, number of layers here, which brings disabilities, it brings, what we call, separation of the physical life. Then you have a very, very subtle extreme layer here, which is the layer of death. When this weakens, which becomes, in a way, equal to this one, it's how you go dreaming at night. (2:52).

Then when this layer there, completely balances off with the outside, this opens up and you die, your Soul leaves. The death layer is a very specific field strength. So, as you go through the body, you have the emotion and, more or less, the emotions goes in this

manner, in the both sides, left, or right, or whatever. Then you have the other layers which sits in the body of the Man.

We have a layer which has been, and work has been ?? it's something which now we have, we come to understand it. It's the layer of the visible, or what you call, the STM with the dimension of Physicality in the space, Universal level. It's a very specific ?? layer. And it has actually, what you call it, sections. In which you have one which sits most ?? outer to do with, for example, the Earth, and then you have the Solar System, then you have the Galaxy, and different strengths ?? allows, as you go deeper you go, and somewhere in here at the end of it, before contact of the, what we call, the "death cover," is the level of the strength of the Soul of the Creator. We all carry that.

With what we do with the EU we weaken this (red line erased = blood flow around brain). This is what we take out. And our system takes, in a way, condition of it (takes over blood flow fields). That's why now the Soul is free to move. (2:54).

It was very interesting when we were talking to the boy who you saw him standing in the stand, upright wheelchair. We asked him, we said, did you go to the Moon? Because he wanted to go to the Moon. He said, no, but I felt the Moon. I said, this is beautiful. It means that the Soul has already moved, the Physicality doesn't matter. He has already said goodbye to his Physicality, because of the pain he's going through, he doesn't want to be with it.

Any other question?

Q: .. How can we best communicate with other Souls?

K- Very easy. Find their strength. How do you tune to a channel on the ?? wave (length)? You find the strength in your machine that you tunes. It's the same with the Soul. But with the Soul it's not the frequency, it's the strength of this ?? field of the Soul. I have this with a guy, I especially nowadays do a lot of it with people around me, actually more or less continuously when somebody talks us, "oh, this is what I was just about to do, I'm doing or thinking .. what is it. Because I don't need to talk anymore. Communication doesn't need to be there. Because the Souls ?? know.

Any other question?

Q: .. (2:56). .. I'll get off the subject of today and ask about dreams, which is, actually is coming into today's subject. Days ago, I dreamed of seeing myself as a boy and I remember saying, "I like you." I felt a very good emotion and it was very happy at dawn. But what brings me here is about a dream that recurs throughout my adult life. Someone steals our car. It's been this dream many times. I don't understand why that. Thank you. And lots of light to all.

K- Two things. Because when you have such a repetitive situation, it means somewhere down the line you're associated with it. Find out where and how. Did the Father say,

they're going to steal our car if you don't sit in it? Did something happen, the car was stolen, your car, and you have the fear of losing it.

You don't remember the incident, but in the interaction of the fields of your brain, does. That's all it is. You have to go to find the incident, and then you find the solution. Then you'll never dream it again. Of that car. It's the fear of loss and somebody has triggered in.

It's like with the children, never, ever frighten children of the dark. They see darkness as a light, and they enjoy it. Some children when you don't bring that fear into them, they like to play more in the darkness, because in darkness there is a mystery. (2:58). Where is the hand, what is moving? Where is the toy that I can pick? Am I correct in picking it? Once you put that fear, that becomes part of psychological pattern.

Any other question?

Q: .. Recently I dream military entities quite a lot. It is related with your Soul teachings. I need to know if there is a good way to raise the Soul of them, to allow human beings to evolve freely?

K- Soldier, military, it's just the way you have to. You have to change how you can give. When you become a Satellite this is one of your jobs, to reach out, to inform through the Soul, not by posting an email.

It's amazing what you can go on, and what you can see, and what is come up. A lot of us today talk here with Knowledge Seekers, but many of our Knowledge Seekers are not with us today, those who live in Ukraine. They bombed their power stations, the substations, they bombed their power supply, water supply, and they are going through in the winter time, more or less, through hell. These damages will take years to repair. (3:00). Russia is doing its maximum best to bring the nation to, what we call, starvation and whatever. One hundred rockets yesterday, targeted only for power supplies, and water supplies, dams, and everything else.

Who fires these things? Who made them? If they knew that they pay, and then say, my son died of this, and I have got a cancer of that, and I pay for it. Yes, you made the bullets, you made the rockets, you tightened the screw. We just ?? ... the soul of the soldiers. I will not fire. I will not do this. There is always a solution to it. And as always, it's you who decides.

It's a beautiful things coming out of Iran. Many, many heads of militaries and others, walk ?? and object to it. We're here to defend the borders not to kill our own people. Because they decided, I'm not here to kill. Many soldiers walk away. It's them, they have to decide. They have to decide if they want to be. So many Russian soldiers just put their clothes on and walk away. They don't want to be in that thing.

You have to realize, soldiers are the tools of propaganda by those who want to be, or possess power, and they want. (3:02). If you look at the whole structure of the military, it's a joke. I decide, oh, .. and so I'll call myself general. And you listen to me because I say so, because I've been there longer, or I cheated better to get where I am. Then there's the next one in the same way, till the, what you call it, the boot soldiers come in, which they say, I'm higher than you. Where does the ranking comes in, in the military?

Shouldn't be the rank of military to be by the Soul? I served a nation, I planted the trees. As a soldier I did this. I had an uncle, he passed away, very dear to me. My father's brother. He became a soldier. I remember when I was young, he said, I'm here as a soldier to serve my nation. He has planted over 1 million trees with his division in the whole of the north of Iran. His name is all over the military zones in Tabriz and Northwest of Iran. The man who planted trees. He said, I'm a soldier to serve my nation. He used to come home, and the soldiers bring home sacks of seeds of trees, that they used to take to different mountains and hills, just to plant. He always said, this is how a soldier should be, to serve his nation, to be better. Since when I go, people go to the forest and they enjoy what I planted 30 - 40 years later. (3:04). That's what we need as soldiers, and our military don't do that.

It takes the elevation of the understanding. That's the job of Universal Council, and now Satellite Souls, which are coming in the back to support.

Any other question?

Q: .. How long to leave seeds, say in, CO2 and amino, just to give a boost to the seed without bringing the plant back in time. In other words without regressing it too far?

K- It's used in the farming. People who use in their farm they use in all ?? sorts. Xiao Jing in China .. does a lot of farming processes for the Keshe Foundation where we do these huge lands and these things. And he has his own way of how long to seed, and how to do, and what Gans's he uses with it. But sometimes he doesn't get the Gans's the right way, or the seeds are not what it was supposed to be, you don't get the growth.

You have to understand everything, it's not just as all of you keep on doing, a CO2, and Zinc, and that it, and a CH3. It doesn't work with all the plants, especially .. if they're GMO. GMO plants respond in a different way, application to the normal plants. (3:06). Because they have a jacket on them, there is a change of information, that jacket of information, you have to reach. There's a specific way you have to prepare the Gans's to reach every plant. Knowledge Seekers say just, oh, I put a ?? good for next. You have not understood with the total principle of it.

R: In the last two Plasma Reactor Groups, Gianni has showed some interesting work that he's doing with the farmers, applying Gans's to the crops, as well as showed some pictures, some microscope pictures of the seeds. I think they were wheat seeds. When they were sprayed, for example, the seeds have a totally different look to them, then when they're natural, and get revitalized by the use of the Gans's, and so on.

K- The problem is that, you have to realize, there are different ways of supporting... Why the Gans sometimes doesn't work with you lot? Because the land is more hungrier for energy than the plant. You're feeding the ground. And you say, it didn't work.

You've got to understand how, and why, and the way you use materials. When you put a Gans, if it is a balanced environment, it will stay there for weeks to allow the growth. If you put on the plant is different. If you create an environment for the fields it's different. (3:08).

In many, many cases, we have proven that the, what you call, Nano materials in a specific way, create much bigger harvest, than the Gans's. Because Nano material, in that state energy stays longer. It doesn't matter what the plant takes. But you have to know. When you put metals in the .. garden, in your fields, next year, you'll have a problem, it's contaminated. But you have to know exactly what you do.

We did an experiment some years ago, and it's very interesting when you do these experiments, we had the possibility to do this. We took a copper wire, and we allowed layers, and layers, and layers of Nano materials on it. If you go this way, trying to get the layers off, you have to go one by one. But if you can develop the technology, which we've done, and now Koreans are using it as part of the Keshe Foundation work, to go this way and take this layer off (take the first layer off closest to Cu). Then to go this one. You will find that the minute you touch this, the whole (all layers) disappears. But the interesting thing is, that you'll find your Nano, what you call, Cu has a different structure on this side and this side. It's not the same. (3:10). This has a lot of application if you understand in the world of metallurgy and physics.

Any other question?

Q: .. My question is, through the understanding of genetics and the family tree. Could your plasma technology rejuvenate, or make the heart like new again?

K- He's got the heart problem, doesn't he?

R: It sounds like.

K- Yes, it can be done, but you have to know what you're doing. That's why we keep away from it. It's the job of the doctors. The heart surgeons who are open to these things they can manipulate a lot, yes.

It can be done now with the new technology, but there are much higher priority for us to understand more of, with the doctors, and the teams and to do and go. I know heart is important, but we'll see.

We are still looking at this, because it's important for us this Parkinson's, Alzheimer's, FM, Fibromyalgia, that kind of thing, people are writing to us, I had operation on my toe, or my stomach hurts, can you do something. (3:12). It's not our job. We categorically put

on what we're looking for. If you come with those, we start looking at it, how our doctors will take your time and do what is needed.

Q: .. Is the arrangement of the main formation of elements in the plasma as follows, and he lists some elements Hydrogen, H₂, Carbon, Oxygen, Silicon, Phosphorus and Calcium.

K- I don't know how he made it? One of the best guide if you come to understand the bracketing of the, what you call, periodic tables, and if you go to the patents, we tried to cover it in there, but people don't understand it. One phase to another in balance fields operation, are inert gases. When you start looking at inert gases, what does make one gas, and then elements, and then another inert gas, which means ?? no interaction. These are your division lines.

Helium. Why is a Helium inert gas? The next inert gas, and the number of inert gases, because each section in between, behaves, and has different characteristics, from one inert gas to another. (3:14). Scientists have not understood this.

I always say, they haven't understood, but it needs a lot to understand, and we use this, especially in the physical flight test you need this. You don't need to create element, you just create layers of inert gases, and the fields within it operate in a different way.

If you create a field between this and this, and then you put your higher inert gas in the back, you can do it, there are ways to do it, you go up one, down. You don't need landing gear, because the gravity decides by the interaction of these (different inert gas layers).

They call it centralization, and we use, if you read the original patents on the Keshe Foundation, you'll see, I rely a lot on inert gases, Argon and the rest. Because we understood this very early stages of, we don't need to create a wall and make it different reactors, you create the reactors by the thickness of the gases.

Periodic table should be written in respect to each division, not the way they're doing it now.

Any other question?

We'll put it plasma, what you call, periodic table. It's in the beginning of the patent, (3:16). if you read it, now maybe you understand why we're using inert gases.

R: We read it yesterday in the Plasma Group actually.

K- You've seen it there, the gases, the inert gases very. It's the wall, it's a partition, and you can flow things between them, in a very specific way.

Any other question?

R: Okay, we have a hand up here with Dean, so should hear from him now.

K- He is a regular questioner. Yes Dean.

Q: Dean .. It's great to hear these teachings and see them on the whiteboard. We have many Souls, we have many people that walk through the doors, who have walked through the doors of the Keshe Foundation, with many different beliefs and interpretations of the nature of themselves. How does this technology interact with them and bring about a balance for them with their beliefs? Does it balance a Soul? Does it elevate their Soul? Do they feel a difference? Or are they experiencing it in their life, in this moment?

K- They most probably do, it's a source of fields, it touches you.

It's like, you know, the disaster, not a disaster, the situation we are in with the whole of Keshe Foundation Austria. Half of, or a lot of our females are all pregnant or giving birth. How come, they're only there, and they all suddenly decided, since they came to the Foundation, to get pregnant, and we have a bunch of new babies getting born in next few weeks, and already born in the Keshe Foundation. (3:18). Is it the effect of the Gans's? Is it the emotion of the Soul?

Now in Keshe Foundation we have number of our staff on maternity leaves. Actually we are expecting one to be born any day now. We have one coming, and one has been born, and one is on the way, on the line, and all sorts of things happening everywhere. Is this the touch of the Gans's? Do the ?? Will touch, without the shadow of a doubt, it's a free range. And see.

Proofed to Here >>

It's very interesting, you know, when you walk upstairs in the bottles, some of the bottles have already lost it, there is just a little bit left at the bottom. It shows the visitors are desperate for ?? (those energies). I was looking at them a couple of days ago. Some of the Gans's are just, more or less, water. The Gans's has gone out of them, because people are taking their energy from them. When you go through walking with Mario in teaching, the all walk around, sit around, or whatever, talk around these Gans's. You can imagine, I was walking, I said, "uh, these people here are shorter of this and that, and they need to be refilled. Yes, we somehow will reach something they need.

Q: I've noticed that Mr. Keshe, when you have an emotion, a condition where you need some energy, or something, then the Gans's do drain out of the containers, and the water does disappears, then you have to top it up. So that does respond, to understand more.

K- I'm doing an experiment in the flight system in this respect. Actually, I was doing it yesterday, I was checking it. (3:20). The room temperature is exactly, you know the table in the back where, the black table, the two glasses with a specific Gans mixture with the water, has been left for nearly a few weeks in the same position. One is near to the unit on the left, one is near the unit to the right. The unit which is, gets, and receives and takes, the water level hasn't changed, it's in balance. It has been exactly the way it's been for weeks.

The one which is on the right as you go in, the water, literally, I have keep .. I topped it up yesterday. And they had the same amount of water. The unit on the left is the one which receives and gives, so it's always in balance, it doesn't need much from the cup. The one on the right, which can receive and cannot give, is the one which depletes all the time from the Gans's and water. ?? .. are exactly the same.

Q: So, this leads on Mr. Keshe to, sorry, this leads on Mr. Keshe, to a question about the human body then. So, would the human body respond with the water levels, and the salinity of the body structure?

K- Yeah. Must do. It must do. This is how the groups like McDonald's (American hamburgers) tune that you crave for the food. By, once the salt became part of the added to the minced meat, for example, it's not salt anymore, it's an energy. If that energy gives you energy, you become addicted to it. (3:22). You go to McDonald's all the time. This is how it works. They put a specific amount of salt, which matches the salinity, which matches your saliva, or your imagination, or your memories. And you keep on going to McDonald, you have to have, you crave for it. Because it has found the balance to give that energy (?? back) within.

Q: Interesting Mr. Keshe.

K- Now we have to... You see, we look at life in a very different way, we've been brought up. But when you buy mincemeat, when you mince, or you, let's say, mincemeat, because it's Gans's. So, it has a magnetic field. If you can tune to the right strength of, and put something in it, like the salt or whatever. Now the salt is not salt anymore, it's the field of the salt which matches to the soul or emotion. That's how it works.

It's like spicy foods, like Indian foods. If you get into a rhythm of eating spicy food, your body craves for it. It's worse than drugs, because it stimulates something in the brain. They have proven it. It's worse than cocaine. If you get use to that adrenaline, or the strength, which released by the chili. And it goes for it, it doesn't matter what it is, you have to have it because the body got used to it. It's a cocaine, but it's in the form of chili, addiction. That's why the Indians eat a hotter and hotter, whatever they do. Because it's part of the cycle of the salt, it's put in, the hot, and you sweat and it's good. Now it becomes part of the gene structure. (3:24). This is how they get us addicted to.

Q: So if we scale this up Mr. Keshe, and take this to the oceans, how are they effecting the totality of the planet with what goes into them?

K- Oceans are still salinity containers. Your salt content in it, which creates, dictates the salinity of Gans's produced, dictates what animal lives in it, more or less. That's all it is. So, when we interfere with it, when we interrupt it, when we change it, we expect changes.

All the chemicals and everything. The study we did for the Italian government with the water problems there. It's amazing how they tried to solve a problem, where actually the problem (means solution) has to come through Plasma Technology. You cannot wash it. You cannot do anything with it. With the plasma we can literally neutralize. That's all it is.

Q: This condition only exists in Italy Mr. Keshe? It doesn't exist anywhere else?

K- Oh yes, it does, it exists in number of countries. In China heavily, in United States. It's in number of third world countries where they close their eyes and allow these things to be dumped afterwards.

If I tell you the name of the company, most probably within half an hour they'll take us off the line (Internet). (3:26). They paid heavy penalties up to now for this. They've been sentenced to a lot of penalties, hundreds, and millions. But they cannot do anything with it, they have contaminated it. The processing in Italy. It is reversal, but it's going to take time to reverse it, and it's one of those situations that nobody can do anything with it.

Q: Mr. Keshe, with the knowledge that you've shared with the Knowledge Seekers, would they have the ability to change these conditions, with the knowledge that they have?

K- Of course. It's how lazy you are to not to use it. That's all (laughs). It doesn't go by my intelligence, or whatever it is. I would not touch. I will not come anywhere near to touch, what you call it, an ounce of Italian olive oil, or anything with Italian wine in it, from certain areas. I have the report, I know, so I'm not talking somebody, that just talks. So, we know the knowledge, we don't touch. When I go to supermarkets, I don't even go near Italian olive oil. I don't go even near the Italian, what you call it, wines.

There are certain areas in United States it's the same. The Chinese ?? got into the vineyards, and they're trying to copy. They are working with the same contamination. India has a certain amount of it. (3:28). We have a lot of these contaminations in where they wash leather. It's catastrophic, but it's part of, what we call, structure, which we all have come through it, and we need to understand it ourselves, in one way or another.

Q: So simple applications that you've taught the Knowledge Seekers, if they apply some of the knowledge into certain areas they could affect large areas, with very small applications of the knowledge.

K- Yes, yes, yes. It can be done, in a very different way. <You have to allow me a second, because one of my system is going down, and I have to go out, just one second, please. Okay. So, we have to switch over system because one is running out of battery. Can you hear me now ... >

So, this is the way things are set, and the way they are. We cannot change it. (3:30). I'm sure this is not the only case, there is so much contamination nowadays with the farming,

and the whole capuddle of the past was, try to guarantee and sustain food for the nations, and pharmaceuticals, and the others, took the nations for a ride. Nitrogen, nitrites, heavy nitrites, heavy other bits, and it's still going on. It's not going to stop.

One of the worst things with Ukrainian war and Belarus not exporting, what you call it, ash and backbone of fertilizers, we are seeing a lot of chemical companies coming with crazy things, trying to make profit out of this situation. The next generation will tell us how things take shape. Or some of us will do.

Vaccines never tested on Covid - only modifies genes - European Parliament

You have to understand, pharmaceuticals are the most opportunistic groups in the world. You saw how big organizations, saw a chance for the president's to make money, and it became Corona, and injections, and everything. When they brought him to the European Parliament a few weeks ago, they said, we never tested it (the vaccine), this is just for change of genes, it's not for Covid. The head of Pfizer's refused to attend the European questioning board. And the lady who came said, we never tested for Corona.

This vaccination which billions of us took, is genetic modification. But what genes have been changed? Wasn't that the dream of how to control people through Bill Gates game? (3:32). Why billions of us, or millions of us, got injections by two or three brands, which are genetic modification, and not virus protection. But pharmaceuticals made billions. Look at the records in the past years, how much profits ?? (they made).

Q: How does this condition Mr. Keshe, come about, where a whole planet can be locked down through some very wrong intentions?

K- We have to have had education. We have no knowledge about viruses. What you don't know, you're afraid of, and that's what they do with you. Now we know what viruses are, and they don't let the Keshe Foundation to come out, because then they cannot do these, all this rubbish vaccinations, and the rest of it.

The point comes, how we can control it, and what we can control, how much do we understand by the viruses.

Q: You would know a lot about viruses Mr. Keshe. You've spoken many times about the viruses in spaces are many, many orders of magnitude stronger than the viruses we have present here. So, you've talked extensively with One Cup One Life, and many other applications for the treatment of viruses. So, you know how to balance out the condition and drain out this condition.

K- We still get hit ourselves. We still get a flu here. We get a flu there, we just know what to do, it's very easy. I was talking to a couple of Knowledge Seekers in past few hours. (3:34).

A lot of people use chemicals for decontamination using. If you worked in the, what you call it, in the factory where they have wheat, or whatever, they use a lot of chemicals to hold the pests down and everything, and the workers are happy. They just spray, and they've done it for years. What happened is that, the residue from these chemicals used, now sits with the body of the people who did the spraying.

These are metals, which up to now the doctors can't tell us. You know, you use pesticide with aluminum in it, you use sprays with lead in it, and then we see Alzheimer's with these people. We see long problems with these people. We see all sorts of problems, and nerve problems with them. But we don't know, up to now, where they sit. And why so physically effect the body?

Why do you get all sorts of pains, and aches in your body, where you used a pesticide, or to spray something years ago with aluminum in it? Sit and think for one second, how could something I breathed in 30 - 40 years ago, now, it is still effecting me now. (3:36). And it's effecting me physically and emotionally at the same time. Depression, anger, ??.

With the new knowledge, with the new teaching, with the new understanding, it should be obvious, that this material has taken position and is embedded itself somewhere, where it touches both the Soul and the physicality, feeds both of them. Doctors get a scan of your brain, there's nothing in the brain, and it's okay. But you test a blood test for materials, you see, voilà! This is it. But where is it? How does 40 years later it's still so high? But it's not. It's actually, in a way, energy to itself, to the body responses, and creates too.

The only place, there's one place only, where all the contaminations which we take, or has come into our body through the air, can be found. And it's just inside the nose. This is on the passage to feed the physicality, part of the brain, the emotion, and the physical body, the Soul.

In a way, the material as a Gans energy, becomes psychosomatic both, it just feeds the psychological side, and it feeds the somatic side. Up to now, what I explained to you, nobody knows this, this is the first time we disclose this. There are specific places, when you're looking for different contaminations, you have to provide, develop technologies for it. (3:38). You don't need to go to all sorts of tablets, and injections, and suffering, if you know where to look, but what, how much ?? of it (contamination ??) you can take up.

Q: Mr. Keshe, so, humanity has this strange ability to create conditions for itself, that harm itself. We all breathe the same air, and we all share everything that we have on the planet. So, why do we create these conditions for the sake of a few pennies, that make many suffer?

K- Mankind has done that all the time. It's not the first time. It's not the first time. Man always has done one, or the other one, to themselves or to the others.

Q: So when does mankind, the soul of mankind, when does it come to a position where it understands and elevates enough to join the community, the bigger totality, and all the beliefs come together, so that we have this unity between all the nations?

K- Sorry, I accidentally put myself out of the Zoom, can you repeat?

Q: So, why does humanity keep putting itself in this position? Why do we not have a condition where all the nations become as One Nation? (3:40).

K- Gradually, gradually. We started it. Let's see how we perform with this addiction (program). Then how we perform with feeding. How we get response from you Knowledge Seekers in respect of these two children, that we can start supporting genetic mutation. It's humanity, it's not us.

I promise you, none of you will respond. .. You get to that cul-de-sac of, it's somebody else's problem. Or, "I'm okay Jack, I got away with it, or I have it, and that's it."

It was very interesting position in past few days, the, what you call, system of producing materials will change. How are we going to work with no more mining? How we're going to create jobs, life for people who are miners today? The implication of the new test you all came to Linz, to test the flights.

You know, if we are the way we are going, maybe because of the speed of its application, (3:42). in very short time, who wants to go to the airport, and wait, and take a taxi, and go to the rain storm, (airplane) might crash, and take 12 hours door to door. When I can do it in 12 seconds, soul to soul, and be where I want to be.

What's going to happen with all these jobs? What happens to the shipping lines? How are we going to feed all these people who become unemployed through universal revolution? Then how much are we there to support each other to see through this? How many of you will share your food with a miner, who, there's no need for his mining?

The biggest crisis will come when we start putting foods on the lines of the communication of the plasma, Why none of you appears in the supermarket anymore? Who's going to make all these tins, what's going to happen? Would we see people locking up shelves of supermarkets and walking away, because there's no customer? Would our great, great, grandchildren pass these shelves, "oh look, humans used to do this with these plastic and metal things."

This is a reality, it's there, you've made the Gans's, you've made the Cup of Life, you tasted the orange and the rest of it. Now it's just, you don't even need a satellite, you can tune to the Satellite of the Soul of the Knowledge Seekers, you want paracetamol, (3:44). it would be there, you want an apple, it would be there.

Q: This goes back to the original question Mr. Keshe, about touching the soul of the people with all different beliefs and intentions, that have interacted with the knowledge in many different ways, where they've received an emotional gift, a balance, just through touching with this technology that you've brought forward. Also, some have received it in

physicality where they've actually touched it through the Gans's, and everything else. So, it's an ongoing evolution of filtering for all of us.

As you said, it's here, the first drop of it, it's already been placed. So, this continuation of the elevation is unstoppable. It's present in this moment, and many have been touched by it.

K- Yeah, but there's just we learn more, we learn more. The more we learn, the more we spread, the more people come up with the experiments and new ways of using it. It all goes down the same line. How it will go and how we will see. We just opened the little, little gap in the door, we still got to open the door of the knowledge of the Universe. We're just getting that little twinkling of the light coming through. The Sun of the knowledge has not hit mankind yet. And it burns you, if you understand it.

Q: I remember you said Mr. Keshe, (3:46). that by the end of 2022 mankind would have a very beautiful position. Do you still feel that this may happen?

K- You have, it depends how you look at it. Today's announcement, today's work, the eradication of addiction, understanding genetic modification for us, release of the fields, all this. This is all there. It's just how mankind does it. How they will accept it, and how they change it. It's a glorious time, 2022 the change has come, but people don't understand.

R: I tell you one change that I've heard on the radio recently, is that they're putting out repeated ads for a class action lawsuit, for anyone that's worked for Boeing, Raytheon, or any other aircraft company, or other manufacturers, that they've had birth defects in their children. They're to apply to this class action lawsuit. And it looks like these manufacturers are going to get hit really seriously...

K- Hammered, hammered by it.

R: And that should liberate funds for just the type of work that you're talking about Mr. Keshe.

K- But you're talking 20 - 30 years, it's not going to happen tomorrow. It's not going to be our generation time. Maybe the next generation. By that time you already got enough Soul travelers, that nobody will consider this, because nobody will get these things.

As I said yesterday, when we put the knowledge compared to the knowledge of today, it's a big vast difference, if you understood. If you understood what is about to come and what is there. (3:48). Then we will run into addition of the knowledge, where we are going to bring more in, for more people to be effected, that we can change more.

We bring so much knowledge, now that we open the Cosmic Rays (CR) and others, that you understand it, that it can be replicated, that it will bring that change. We have to do it, we have no choice.

Q: Mr. Keshe, may I ask, how the team is doing with the Cosmic Rays that are interacting, as they make these conditions? Are you still seeing the beautiful shining Souls being present?

K- I'll be there in the next two or three hours, and I'll tell you next time. I am going in there ?? deep ends , and see what is, what's going on. Every time you go there you get effected by it in different ways. I'm going to dive in and see. You see, they make things, but they don't see it, they don't feel it, some of them do, but they have no understanding what they're doing.

But when you go into this, what I call, environment, you don't need to be sensitive to it, you know you're going to ?? absorb. It's just like, you know, you go to a restaurant is a Chinese, you got an Indian, you've got whatever food, and you only get attracted to the Chinese, and that's the only one you see. You're not interested, curry is too hot for you, the other one is whatever. With me, I like all the food, so I know the taste of all of them. (3:50). So, I see all effects and aspects of the, what you call it, what pleasure you get from each one. This allows you to see more of. Mixing, what it does, if you mix the Chinese with the Indian, let's see what we get. It creates a new condition of information.

When you go into these zones of environments of these kind of massive fields, especially Cosmic Rays, it's an amazing experience. It's just being a child in a candy shop. I'm that child, and the candy shop is huge.

Q: So Mr. Keshe, these beautiful Souls, have you asked them how they see you, if they look back?

K- I don't ask, you feel. Ask is the job of the Man. To feel is the job of the Soul.

It's very interesting, when we had this young boy in the wheelchair in the machine, he was actually flat on his Dad's chest. The father said, I've never seen him relaxed so much. Everything is just, has no meaning to him. He was there. And I asked him, did you go to the Moon? He said, yes, yes! I said, how was it? He said, he was happy, he enjoyed, and the mother translated to us that he felt going to the Moon, he felt it was Moon. This is more important actually, the feeling, the emotion of being there brings you to that position if you want to change the dimension of physicality. That's what it counts, the emotion. (3:52).

Q: This child Mr. Keshe, did he have, obviously I don't know. So, did he have, was this condition from birth? Was it from an accident?

K- No, no, no. It's genetic. When they were born nobody knew, both of them are the same. When the boys were born they were normal. It's just that, they did not walk till, I think, 16 months, with the oldest one. The second one didn't walked till I believe 18 months. Then they start observing other things, and other things, and by the age of five they had to do the test, and they found out it was a genetic, and they know what it is.

In past six months he has gone from walking into a wheelchair, then the process goes to the heart, and all sort of spasms in the arms, and legs and everything else. The second boy is following this ?? exactly the same pattern. Gorgeous children.

When they came to the center, I told them, if you want to go to the Moon, and they were so excited they can go into a space machine. They grabbed it, as there was the, you know, the dream in the cartoons, as I call it. We'll see how they change, how they feel they change. You watch the pattern of psychological behavior inside, what goes on. Let's see what life is, let's see what the changes will bring. But our position is as I call, as it is. (3:54).

Q: .. Is the Micro Plasma Reactor from the patent, set specifically to function within Earth's magnetic field space, or can it work as it has been written, using the radioactive materials such as Potassium or Sodium?

K- What? Repeat, repeat, repeat, please.

Q: Is the Micro Plasma Reactor from the patent set specifically to function within Earth's magnetic field space?

K- No, no.

Q: Or can it work as it has been written using the radioactive materials such as Potassium or Sodium to cascade into the Hydrogen, Neon and Argon, anywhere in the Universe? Or do we need to change the radioactive material to another one, to achieve the same results in another Solar System, or another part of the Universe?

K- When we speak about radioactive material from nuclear physics side, or my nuclear physics side, is the materials which can radiate free energy? Energies that they don't need. That is what we are looking for. (3:56).

When we talk about, change the name... You have, for example, Uranium 237 - 235, and all the isotopes of 239, and you go into Plutonium and the rest of it. These materials on Earth are releasing extra fields we call it, radiation. In other positions in the Universe, they're gravitational, they absorb as much as they can get. They don't behave as a nuclear, as a radiation field source. It's to understand it, in where, and what needs to be done, and how this can be done, in what direction, and what position you want to attain it.

Tritium is not radioactive in 80% of the Universe. Tritium in some Universal Flight System is used as a gravitational, because it's heavy with one neutron. This is the most important thing, this is what we are waiting for, and that's what we are looking for. This is how we will see in the space, (3:58). and what condition it will come to be, and it will be, what you call it, create, and what material you need.

If you look inside the material in the EU. You've been there, you're taking a lot of pictures around it. These units can create composite materials, depends how we set each reactor. This unit can create mono energy material, means you can make 100% pure gold, or you can make an alloy, or whatever you need for whatever.

So, it depends on and how ?? it turns. In what form and shape we will use these materials. A material is not radioactive here, suddenly become radioactive in different conditions. Suddenly it moves on to a non-radioactive, or negative radioactive condition. How we will change this position is part of our work to understand it.

We go through this process in a very, very specific way, that the scientists of the future have to understand it, how to do. (4:00). We call them metallurgists, that they understand different properties of different metals, whatever. But when you bring the metallurgists into nuclear it's a different, even if you are a metallurgists. Now we become "plasma-gists," In a way, we have to understand the behavior of the plasma, how it interacts and the way it interacts.

To change a metallurgists to a plasma, ?? or to understand the effects of plasma to become metal, it's god's work. Because they have their mindset in a specific way, the metallurgists, they can't see you convert energy to matter. It's like the curse of the god.

But would they, and can they see that you can change nuclear radioactive material, even they become metallurgists in nuclear, into energy, used for energy. I've had this battle, since I was in, what you call it, nuclear, as a university student, and the rest of it. It still goes. My brother-in-law is one of the well known international metallurgists in nuclear industry. He published hundreds of papers and ?? done a lot of things. He came to nuclear because when he finished the metallurgists in university, I said, go into nuclear, and then he became a nuclear metallurgists.

I still have a problem to tell him, you know, you can change this and you don't have no nuclear material on the boards of your reactors. He is one of the well know international scientists in nuclear materials. I said one day to him, I can't take you to the other ?? (thoughts), (4:02). your mind is set, you cannot understand the difference between the plasma, and its energies, and conversion of the new nuclear material to a non-nuclear. The way we did in Fukushima, with the introduction of small material we changed the Tritium to Gold, a component which was introduced to Gold.

You can now, if you change that component, become one of the most radioactive materials, where now is Gold, behaves as monatomic. These are the things which scientists have to understand, and have a very clear cut understanding between the behavior of the plasma as a matter, and behavior of matter as matter.

When you come into Linz, in the Exhibition Center, I deliberately set the first table, or stand you come to. On the left side is a Copper and Zinc, in the middle is the Book, the three books, and on the right side is the Nano coated materials, and then on the next stand immediately is Gans's.

When I have government officials and other people, which I bring exclusively, privately to go through systems, through understanding, I tell them, this is the knowledge of the Man, where the Zinc plates and Copper are. This was our knowledge till ?? last century.

This book has brought a new knowledge in how to make the, what we call, Nano coating, Nano material, which is attraction of the molecules to each other to make matter, (4:04). to singularity of atom to be connected to each other. That's all Nano technology is.

And I said, now, the knowledge of the Man finishes at this age, at this stand. This is where we are now. When we go to the next stand, I explained to them, this is now the difference between Nano material, which is, they're stuck together as a collection, to singularity as an energy, which is here, we call it, Gans. Man's knowledge today is at Nano, they have not jumped that gap, to understand energy of the matter. Man history finishes in the first stand.

In the new stand a new life starts. Gans's, there are different Gans's of CO2 gases, and everything else. Then you put them into application. Some of the Gans's on that table, I don't know, Mario is here, I think about 10 - 20 of them, if you combine them together, they become radioactive. If you combine them together they become gravitationally absorbing.

I can change a non-radioactive material within milliseconds to one of most dangerous radioactive materials. I have the knowledge, I've tested it, I know it's there.

So, is radioactive material ?? subject to the understanding of the Man? Or radioactivity is in the position, time, strength, field dependent? (4:06). That's the one of the biggest problems for us scientists in the future. Plasma physicists in the Gans plasma, and the plasma physicists, plasma materialists, and materialists people in the world of science will have a battle with each other. They are all right, but in their own compartment. If we can cross it, you can do wonders.

There are three elements in the second stand of the exhibition, which I can mix and create the most powerful nuclear weapon in the world. They will not even have the material to test it if they come with it. These are radioactive Cosmic level, and Man has no knowledge of it. I'm a master in what I do. You want to create a nuclear explosion anywhere in the world, you don't need Uranium, you just need to understand the characteristics of the plasma, releasing the energy in a specific length, that what you call, neutron stars. Out of nothing, you become massively radioactive source.

And I watch many neutron stars, just disintegrating with the radiation fields of what they have, and what they absorb. So, when you speak about nuclear materials, again it's energy strength, time and position dependent. (4:08).

You have to redefine radioactive as extra energy to be given, dynamic fields available. Then you see every element at a given position becomes dynamically available, in respect to the environment which it ?? is. With one Hydrogen you can make a black hole. But you have to know how to play.

Thank you very much. Hopefully we see you next week. We'll see what the world brings for us.

K- The only announcement is, please support this, with what we're trying to do with, what we call, the genes with these two children are just ?? applied ?? of the new technology and new knowledge. Many of us around the world suffer from these mutations. We see it, if we can ?? prove it. We give it to the other scientists to pick it up. Thank you very much indeed. Thanks for all your time.
