

466th Knowledge Seekers Workshop; January 5, 2023

(Transcription, Proofing done)

(Auto transcription by Elias)

Teachings focus on how to live in space; Have to transmute whole package and protect it from outside fields; MG fields of planets stars effect us; Mitra gifted knowledge to jump over UFO - UC come to Man to learn; New CPCU units CR plasma units - feed - travel - everything - connect directly to Linz no phones; 2023 year of Change; New Books to come out; During sleep absorb CR; Electricity is plasma lower strength; How to use Butterflies - feed; Monthly sessions to elevate leaders; Meaning of "Non-judgmental" hidden teaching; Soul of Prophet and STM merge.

ENGLISH TRANSCRIPTION

(:16).

K- Yes, good morning, good day to you. As usual, wherever and whenever you listen to this series of Knowledge Seekers of the Keshe Foundation Spaceship Institute. We welcome you back. A New Year to those of you who believe in the path of Christ. And I know some of you will celebrate the Christmas tomorrow or the Epiphany. (:18). And some of you have already celebrated the Christmas, and some of you know Christmas by name, as you believe in a different path of believing in your Creator, and whatever way you believe to live.

This week's and this year's teaching it will come in a new way. In a way, that we work through different direction and dimension (D). In a way, that we bring and we start the teaching and working in the dimension of what will happen to us, how we live in the space. We tried, prior to Christmas, in moving individuals from different parts of the world to Linz, in the dimension of the strength of the Soul, or emotion or, and physically. We have, in a way, understood and understand, and perfecting the art. And by the end of this month, or early next month, the new systems will com into operation, which allows us to do the completion of transmutation, the completion of the time, the completion to be able to bring people in, and bring them not only as a matter of state. This is something, which in the world of science today they're trying to move, or transmute an element, be it an atom, be it an electron. But what they don't consider, that these elements in combination of working together as an entity, have emotions, have feelings, which you cannot contain by transmutation of the fields of the man.

For man to be able to become a passenger of the universe (U), (:20). for man to be able to travel the expanse of this planet, or the Solar System, he has to be able to deliver the full package, which means the body, the emotion, and the Soul in the same condition as you left it behind from one place, to go to another. We can move an atom, so be it. But what happened when it becomes the molecules, and what happens to the interaction of the fields of them, which keeps them together as a molevule?

What happens when you move a man, and then you have to have him to move, in a D of the emotion and the Soul. What's going to happen then? We have shown in the trials with specially cases of coma and others, that we have the capability, and understanding of moving the emotion, and the memory, and the Soul, does not matter which part of it is, or has been left behind or damaged.

The technology, the space technology of today, considering a plasma, considering magnetic (M) fields of the universe, and the body of the man as a universe, becomes fundamental in the structure of the future space technology. It becomes paramount into the structure of the flight, in the structure of the life in space technology. And we have to understand how we, as total, as a whole, will travel the span of the universe. When we move a man from New York, to Linz, we can't just bring his body, (:22). we have to bring the information, which he carries us memories, who he is, how he feels. We have to bring with him, the Soul, that when he arrives here, we have a total man.

In the experimental sections of the Keshe Foundation in Linz, we saw how we can transfer the Soul of the Man (STM). The physicality (P) of the man was left behind. You travel to, you go to. So the new technology, the new understanding of the Space Technology is, how we as people will move forward. We go to. We understand by. We complete the cycle of. And then there on, we understand when we arrive we have a total man.

Then it comes as we have seen in the history of the man, what happened with what we call, the passengers, when you're in the space? What happens with you on traveling from Earth to Moon, with the interaction of the fields of the Solar System? We are not immune to it. It's an envelope in the wind of the universe. It's an envelope of your Soul, in a condition of traveling in the fields, which part of the strength is the strength of the body of the Man. What would happen then? What would we do when we see, we feel, we understand that, even in traveling to space, (:24). even traveling the Soul of the Man in the space, what happens to him once he, in the dimension of travel, comes in touch with a stronger fields, weaker fields, which can interact with him?

What happens when you arrive on the Moon and you have been, you added to, your Soul, in the dimension of its travel, other fields. Would you end up with another virus? Would the body of the man when it comes there, will come in a new dimension? What will be our reaction? How would our DNA will change, to respond to the travel? How would we, as a total, as a collection of the fields, appear? Would we appear as we've seen with another things like Corona. We added some things, we didn't know what it is, that becomes another burden for us in our travel?

What is the next position? How can we protect Man? Do we need to create a condition that the envelope, the STM is protected from any interference on the way? The deeper we go in towards the center of the galaxy, the stronger these fields come, which are, and could be at the strength of the Soul in certain dimensions. What will happen to them? What would we see? And how would we see this position? Would the mankind be in a

position to be able to manifest itself in that dimension? We need to become more aware of the Totality. We need to become more of what has been, what has been brought, and what it will be bringing to us. And the new space technology systems has to have the ability to create that condition of protection.

In a way, when we send an envelope from Linz to New York, it does not matter if it's stormy weather, if it's shiny weather, if the truck is new or old, or the aircraft is damaged or perfect, the letter still arrives at the destination. And it's the job of the structure of the new technology to create that safety.

Up to now we spoke about transmutation of the body, transmutation of the Soul. But now we need to understand. We need to work to understand, that there has to be an extra package, a Cosmic Ray (CR) package, which allows the body of the man, the STM to travel safe across the span of the universe.

This brings us to a new understanding, this brings us and pushes us to further evaluate what we have developed, what is going to be the next step. What is the understanding of this? What is the essence of the existence? And by just carrying the Soul as a shell, would we carry the nuts inside the shell, which is the physicality of the man. And we need to understand this further and further.

Maybe in the future, (:28) we open this knowledge further. Maybe in the future, we will come to understand this more, as we start tackling different dimensions and directions. We have seen this effect of the space energies, or viruses on the body of the Man. We saw it two or three years ago as Covid. First it effected our lungs, that he moved as he strengthened more different organs. And now we see a new version, which is a strengthen more. And now it tackles our emotion. We hear from many people Knowledge Seekers (KS) and the outside, that they are suffering from depression, they are suffering from suicidal thoughts, and are suffering from everything else with a small cold.

Because now the situation is not Covid. Now it has become an infection. Now it has become just natural cold, that most of us will tackle the virus before. Now it goes to the next strength. Would we travel the man into space, and then we find him suicidal. We find him depressed on this, in this space by interacting new fields. Maybe by the fields of his own body that have begun to go through the transition from one position to another. And this has created the condition.

We should not think that the space travel, which we enter this year on, is going to be a "hunky dory," and a solution to everything we've been looking for. To escape from this planet, or to be able to escape from one position to another. In fact, this is much, much further in understanding of the true space travel.

We need to understand, we need to develop technologies, we need to develop systems, (:30). that protects the traveler of the energy of the man across the universe. In the future, man will become much wiser to these kinds of travels. Man will become much, much what we call, uniquely adopt itself to be able to travel the span of the universe in the

appropriate way. But the Knowledge Seekers of today, the scientist of the Keshe Foundation and the future scientists have to understand, that man needs to understand that the problem is not solved by just traveling.

Man will not achieve much if he gets the knowledge of how to have a UFO. There are more and more complicated, complex conditions in the space travel, than just trying to go from one to another. It's as (when) we created the jet plane, we had to create a compression inside, we had to create a new ways to extend what we call, oxygen levels in that the people can have a normal flight. We had to add so many safeties, safety parameters into the structure. So it'll be in the same in this space travels that are coming up.

We have to see if the energy transfer of the arm, the leg, the body, the brain, the emotion, all have, and kept intact in the dimension and position of travel. And by how much, and how, and which way, and in which direction. And in which position, we need to come to understand that, (:32). the position of the understanding and doing things. How we can extend the life. How we can extend the living entities. How we can move to the next level of understanding of the Totality.

Maybe in the future, maybe in a time to come, man will be in a way knowledgeable to go to the next level. How would be, man be able to deliver the knowledge, and how man will work to be in the condition of what they call, manifestation. And we have to see, how we will change these things. How much we understand, that we can bring that change. And would the man in the coming time deliver such a knowledge and technology, as one package, and not as what we call, pieces and parts.

When we start the space travels, we have to see how does everything, which we do, will bring the man to be delivered as one entity, at the end of the process. Be it the travel from A to Z, be it the travel in the dimension of the Soul, be it the travel in the dimension of the space travel, (:34). from Earth to any other position. These are the systems and technologies, which now we find ourselves, need to develop, need to understand, and endeavor to extend this, that we can deliver these technologies. But then it comes what would be an easier way for us to be able to understand these. What does effect us? What do we. What have we seen on the planet Earth, that we now understand it works on the system, which we will travel with?

In a present science of cosmology and astronomy. We look at the position of the stars. We look at the position of the planetary system in our Solar System. We look at the position of the moons in respect, at the position of the planet, in a given position in the Solar System. These are all plasmatic magnetic fields. These all will effect us. We have moons, and conditions and emotions in respect to the summer winter, spring or autumn, cold and warmth, sunshine and cloudy. Because they create different field strength to be absorbed by our body. But what happens now, now we become the passenger of universe, understand the interaction of the fields, what will the position of the stars have on our emotion.

Now, on Earth, we talk about Mars, and another planet, and another planet are in line, or in opposite direction. (:36). What fields do they create, and how these fields interacts with us with the fields of our emotion? Does the position of planetary system. Does the position of the stars in different parts of the galaxy as we move over the lifetime, effects us, effects our emotion, effects or physicality? Do we behave every time when the Mars in opposite position than Jupiter? What happens when our Moon is in a different position, in the same position as them. What happens when their moons are in a different position, when they arrive in the same position as the past time?

All these magnetic fields, all these effects us. All these brings changes and in the space technology of tomorrow, we have to be able to consider this. We have to be knowledgeable to this. We have to understand, that all these brings us effects, brings us results, brings us a lot of other things, which we never considered before. This will bring us germs and diseases. This brings us all sorts of things, that we never considered.

The package of the space travel of tomorrow is totally different, than the package of the space travel of today. Now, we are worried about the wind storms. Now, in the space travel we have to become aware of the gravitational magnetic (GM) fields of the entities plasma, plasmatic, and every other angle. We have jumped over one level of technology, (:38). which is what man wanted to do. We called it the space technology like UFOs. We were happy to understand how they travel in dimension of physical, and build objects doesn't matter how big. We build it in the middle of space, the UFO is the size of the Earth, and the rest of it. We have jumped over that space, building such a thing, and we go to one level higher.

So that our problems, the structure of our understanding, which is missing in the knowledge of the man to be able to travel in this new dimension and knowledge. We know how to make airtight aircrafts. We know how to make UFOs which can work against the gravity, and be attracted or repelled. We gained knowledge. We have the knowledge and in the communication and interaction with the Universal Community, we'll become knowledgeable, more about their doing. Then what happens? That knowledge is not the knowledge, which man has gained now through the plasma technology of the next step above it.

How much research and how much understanding do we need to have to bridge this gap? A leap in technology. Understanding of the technology. And how do we jump this? This is the job, which we will have in the coming time, in the coming weeks. Next week, (:40). we will start the first transmutation in a complete process. As we said, by January we'll do. We have the backup and technology to start.

We start taking records of the people who we are going to transmute, in how they are today. In every organ, and every part, that when it comes to the transmutation, we see how it is. We start psychologically and physically preparing those who we have set up, to become the first what we call, Mobile Transportation.

What would we see? We have brought their Souls in. They have been with us. They know and they've seen and they've tested. What would happen now that we start transmuting physicality? Would we get them here depressed. Would we get them happy? Would we carry the whole package? This is very much understanding of the new technology with advantage, that we know most of it. At least some of us have access to be able to complete it. That in the timing, in the coming time we can teach.

In understanding this. In being able to deliver such a technology, many things of the present time overnight, becomes obsolete. Many things overnight, will become out of date. Things like your financial structure, things like the political structure, things like what we call communication lines.

In the next few weeks, Keshe Foundation will deliver new what we call, like a headset to you all. (:42). Where you do not need the mobile phones anymore. Where you do not need the handsets anymore. You don't need the headphones anymore. The new systems, which we'll deliver. By using it, you directly connect to all the facility of knowledge of the Keshe Foundation at the time. We are the only people who can switch it on and switch it off. We tell you on Tuesday nine o'clock in the morning is a breakfast time. You put your unit, your headphone like what we call, the "Plasmatic Phones," and you connect to the Center.

This time is the "education time," within seconds you start learning languages. In the next few weeks when we release this, these are the first stage preliminary systems of the new space era. We do not need satellites. The time of satellites and mobile phones the way we know it, which will come used to it, for the past 30 - 40 years, will become the way we used to use the hand phones, and the landlines.

The new technology, the new understanding, which is delivered by Keshe Foundation in the coming weeks will bring a new change. 2023 is the year of the change, where the man, from "man of Earth," becomes "man of Space." Because these units and the more complicated the structure of these units, will become what you will carry with you in the space. You carry. You go to a desert, you don't look if there is a connection, if there is a satellite, is there is a mobile connection. You're connected all the time.

We have offered this technology to NASA, (:44). and other space agencies in the past two or three weeks. They have problem in the space station at this moment in time. We can in the next excursion, deliver such a technology without them even taking food with them. You will see this time, on the 16th when we did the trials, you only had, you only felt in what you were directed to feel. In the trial of December, of January 20th, you will bring a new dimension in.

Hopefully by February, a number of you will be equipped with the new Plasmatic Units what we call, "Soul Connection Units," that you will be connected directly to them. These units will allow you to be able to be in touch with the Keshe Foundation research center in the knowledge, in food, and everything else that you might need. And then we test, and then we'll see. You would like to have a "Fish and Chips." Today's menu is fish

and chips. You like to have a steak and kidney, the menu will be a steak and kidney. If you're a Chinese you like roast duck Peking way, or another way, all will be there. As we develop this technology, the need, the use, the what we call, connection with Universal Fields will become part of the whole structure.

When I explained to you hold on to your black disks you bought, (:46). you have, it will be a new dimension, in the coming time soon, you'll understand how and why. So, this year, we start a new revolution in science and technology, in the space technology of the man. We tested these systems, we know these systems, how it has to be brought out. Very soon Apple will be something you used to have. Very soon launching of the satellite is something, which man did, and it's not any more theory.

You have access, you don't need a Google, you have access to knowledge of the universe, the minute you think, how would life be on Mars if I was there? Is there life there? Is anyone living on Jupiter or Saturn? Can we feel their emotion? Can we understand them? Does our knowledge goes to that extent? At this moment of time, to you it's far-fetched, but with the systems we have developed and it will be released in the coming year, you will understand how man has jumped the space gap of knowledge. Where we don't even consider UFO's as something we want to contemplate on.

It's very much the situation of today, Africans have the most advanced communication systems, where the Americans are still suffering with it. Because they still laid the cables and they have not made the money for the investment they did. So they're holding the nation back to develop fast. But Africans haven't done such a gap investment, they jumped in technology. (:48). Now it's the same with the man, man will jump the technology.

And structures like Keshe Foundation, our research centers, and many other scientists will understand this and will bring that job fast. 2023 is the year of Plasma Technology. 2023 is the year of new Space Technology, and 160 of you without knowing, or by knowing participated to confirm many things in that structure. The test of 16th and 19th of December was confirmation of a lot of things, which needed to be crossed - "yes, engine works, yes, fuel is correctly, yes, the emotion is in it, yes, the passengers are on board. We have problems there we have to fix, we did not see this, we have to fix."

But the whole structure was to make one man out of humanity, and you saw it when you came in touch with the Soul of your Creator, physically registered. So, we come to the next level. So, we come to understand what is to come. So, we will deliver the totality of understanding of the technology in 2023.

Last week we closed the session for 2022. This week we start a new life for human race in the space. And you as Knowledge Seekers, and many will come to be part of it, and we do not connect ourselves to the other space agencies to be part of. We expand the knowledge, that they become part of the Keshe Foundation work. (:50). We deliver first, we show first. And we explain this from the religious leaders, to governmental leaders, to world leaders, to common on man, that all have access to everything.

Today, after teaching of the day, after we close this session, I have a meeting with some of the most powerful religious people in the world, to explain the change, which is to come, and how they will take it to their people. By close of today, by the end of the day, a new light will shine in the understanding of technology by one of the most strongest religious groups on this planet. They want to know. They made the call. We have to bring the knowledge, and with it we have to bring the knowledge of understanding.

In so many ways, in the coming weeks and months, you will see new technologies, new equipments, things which does not make sense, did not make sense 12 months ago, but now it's an essential part. When we announce the release of the new communication systems. When we'll release these in the coming days and weeks, you will understand that. How advanced the technology has become, how much we need to understand the change in science and technology. How much we have to go to the next step of understanding. (:52).

In that process, we go to the next step of technology development. What we call, the "Remote Cosmic Ray Plasma Communication Units," will be the new way to communicate. Systems which work on the cosmic ray levels of the plasma, where we create a new protection. In a way today you call it, "encryption." Now, it don't need to be encrypted, but you create a condition, that your knowledge, your Soul, your emotion cannot be interfered with. These needs new technologies, development of understanding of new technologies, and what we call, CPC units, which will come into operation and you will have access to it within the next few weeks, will give you that chance.

You will learn to live a two dimension of life, your mobile phones with your calls, to whatever, and use of the new CPCU's, which brings you, the cosmic ray plasma communication units, will bring you the what we call, transition time to get used to the new technology, understanding of the new knowledge. In a way trying to bring everything together.

In what would like to know, I'd like to know about how to make roast duck, the Peking way, or another way. Do I need to go to Wikipedia, or through the connection of another Chinese Knowledge Seekers who carry one of these units, I learn the knowledge, as his mind, as it's shared with me freely by him. (:54). Then you understand the change to come.

This is why we asked for Satellite (Soul) people. This is why we asked as many nations as possible, cultures as possible, to go through the Linz Center. If you remember we asked you as from all cultures, the Chinese, the black, the white, the Americans, the Iranians, all to come in. Because we needed that transitional control. Now with the new CPCU's, which is literally like a headphone you're used to, but these are cosmic ray system communications. You will be able to tap into the knowledge of the universe, as you wish.

But we will at the beginning, at the start, control how the system goes, how it's distributed, how we can collect, test, see and monitor on our Center how people are using it. Now, you were fashionable if you had an Apple Pod in your ear, walking down the street. In a coming time people on the street will avoid you, this guy is carrying one of these CPCU's, and he's reading our mind, he's connected to our Soul, knows what we think about him. Now we see people talking to themselves with iPads in their phone, we think they're crazy, till we see the little white things in their ear.

When you carry the new CPCU's, what's going to happen, they say, god, we better don't think wrong, the guy sees our Souls, understand what we are doing, and he is present with us, within us. (:56). Don't be surprised if you walk down the street and see a beautiful girl, and you got your headphone on, and then she has one on, and then you wish, oh she's so beautiful, I could give her a cuddle. She walks to you and gives you a cuddle, because now the emotion is ?? carriable, it's not the information in words.

The first use of the CPCU's will be distributed, it will be put on by Keshe Foundation in the next few weeks. Many companies will try to copy it, they brought the new names of "quantum," whatever Keshe Foundation has put in. Now they changed the plasma to a "quantum," and a bunch of lies and cheats. We have seen from "Med Beds," to now, since two weeks ago, three weeks, since we started using the headphones, now, what do they call it, "quantum headphones," "quantum phones."

You want to end up with a disease, you're quite welcome. These are the Knowledge Seekers who we taught and they thought, now they can go and cheat with it.

The new systems will bring in, with the new systems we put out, will show the diversion and dimension. You don't need a "Med Bed," which is cheat by those who we taught, now they thought they broke up, when you can deal with the STM, when you deal with the physicality of the Man, in the brain of the man. As I said to them, this is a "mental" bed, not a medical bed.

You have to understand that the new space technology, the new way to travel the span of the universe by man will come through his understanding of the Totality of the structure of the man, (:58). from the Soul to the seat, which the Soul can be both, the seat of the STM, and the seat of the physicality of the man, and both are connected and interconnected.

The new structure, the new technology, which we'll release in 2023 will bring many changes. Will bring things forth, that man could not even imagine, very much. We saw the mobile phones in Star Trek and others, decades ago, and now it's the reality. The "Beam me up Scotty" is not there, because Scotty wasn't beamed. Now, in real life, we transmute the totality of the emotion and the physicality of the man, and by the wish of the man, will appear at the point of manifestation.

In the test we did in the 16th and 19th brought us a lot of confirmation of the new technologies, which is used and can be used. Creation of environment of others being

able to live, which are not from this planet, we have seen it in Linz Center. We have videoed the confirmation of the plasma within the system, which is not, what we call, the normal atmosphere. If it wasn't because of the restriction on showing the technology open, we would have released these videos. (1:00).

Where you enter, we told you come to a new dimension, new light, new structure, this is what you will see, and what you get. The environment you create when you land, is a new fish tank. If you think of it, the flight unit in Linz, which you came, is a fish tank. A fish tank for the Soul of the Physicality (STP) of the man. Now, with what we have developed, and what is to be developed, and what is to come out, this fish tank will extend beyond what we call, Linz.

The interaction of the new space technology needs a lot of openness, and understanding, and knowing that, us as a human race, have entered what we call, the Universal Community, not as "underdogs," but as leaders, but as a group who understand it. And this has to be obeyed by the leaders of the Earth, it does not matter, religion, political or whatever. That they will understand, that they come to understand, that the change is so fundamental, that in the coming time, do we accept leaders? Do we accept kings, when we see the Soul of the King to be the same as the STM?

Then this brings us to a new dimension, then this brings us to a new direction of what we call, working, judging ourselves, working with the others to be correct in understanding of the Totality. The new systems will allow us to be able to live in a dimension, (1:02). which we never could imagine.

We could never understand, that the man's knowledge can leap so fast from, wishing to be able to develop a UFO, to be those who the passengers of the UFO, wish to be. The leap of knowledge and technology in matter of months, whereas the others has taken millions of years, has completed the cycle of the knowledge of the man. This is what we promised when we started.

In the next few weeks, as we start with the development and distribution of the universal Cosmic Ray systems, then you will come to understand how fast the technology has moved. How fast man has become knowledgeable in the knowledge of the space. And how much, in a very soft, but very intellectual and correct way, we have guided man to become the passenger of universe, equal to the knowledge of the Creator, and not as a passenger of UFO.

Then you will understand why we tested you on the (16th), to become, to wish, to be in touch with your Creator, to show that every man has the capability of receiving the Totality of the knowledge, that every man is matured to reach the level of understanding of the Prophets of the past, and the Creator, and the Creation, as he is part of that process. He is not an outcast, he is not somebody on the wings of galaxy, that happened to be in a part of one of the universes. (1:04). Man has joined the Universal Community as a leader of understanding with the emotion of love, which is given, and it's the attribute of the Creator.

Now you understand how on the 16th of December, 2022, you all took a jump and what I call, a leap in the faith of the man to become a member of Universal Community, and in a way, a member of Unicose. Because when you join the dimension of the strength of the Soul of the Creator, you have to pass, you have to jump the dimension of the strength of fields of the Unicose, the Creation of the Creator.

In the coming weeks many of you will thank your Creator to be born at this age, and be present at this time, that you could be part of, and be one of those as the what I call, the created creation of the Creator. To be, to feel, to be part of. Do you need to have an intermediary, when the intermediary is you, between you and your Creator? Do you need a satellite, when you yourself are the Satellite? Then you understand the process we set up. How those who don't understand, until we develop the complete process of understanding, they become those who will become what we call, Transmutation Satellite System. (1:06). They don't put anything up with their own, but they become facilitator for others to receive, to be part of, and how to change.

I wonder, as I wrote to one of our Knowledge Seekers, and I'm sure she will listen and hear, and maybe she's in the background, in one of the ?? times, she always claimed that "globalist will take over the world, and then they control everything." As I wrote to her, and I'm sure she's listening, we are not globalist. We are not here to take over the world. We are universalists, which means we work through the universe, beyond and what you as globalists are worried about, we already have no connection with ?? much above you. Like those of you working with a donkey, and you think you've got the Rolls Royce and the jumbo jet.

Man can dream, but the reality is that the situation, the knowledge of the man has "frog leaped," the knowledge of the rest of the Universal Community. And this has been the gift from Mitra, and this has been, as she loved the Creator, brought him to the Earth to understand the essence of the love, which is the giving, and what it she brought the gift of the "love of the Creator." Soon many of you will understand. Then you will understand what and how man was gifted, and is gifted with one of the most precious, (the) Knowledge ?? of Creation in the universe.

You were happy with the UFOs, you were happy that you partook in the 16th event. In the coming weeks, you'll be happy that you can choose the point, the destination, and everything to do with your existence. (1:08). We provide the facilities through the Keshe Foundation Centers. As we develop further more new technologies, for man to be able to travel the span of universe.

Maybe in the coming time, many of you will come to understand how much was missed by man in the past thousands of years, if he would have paid a small attention to what was in front of him, and how those who did not understand but could feel it, abused the man, in every knowledge and every history.

I hope many of you as Knowledge Seekers, by the end of this year have made many, many journeys across this planet and across this universe. We'll have some of you with us in the coming months and years telling us of your excursions. We'll have you with us in your testimonial of your Souls in how you felt, how you feel, what you've seen, where you've been. And gradually in the coming years, we all get used to seeing the beauty of the Creation across universe.

2023 is an opening of the space, of the universe for man. Not hoping that you'll be on the Moon in three days, and maybe in seven months on Saturn with some "clicking, clanking" systems up and down the rocks. If you still like to be on a bicycle, you're quite welcome. We still get people who peddle bicycles from China to New York, and they go from China to London. (1:10). But we have those who get on jumbo jets, and get on rockets and do it in one and a half hours. The pleasure is the man to choose. But the knowledge is there for man to choose to become the passenger of the universe.

Would, in the process of what we call, these excursions, you will solve the problems of your cancer, the problems of your depression, the problems of your whatever? Or would you end up with a new depression, and a new type of cancer, which call it, that has no solution, but lives amongst itself as part of the beauty of your existence. As I said, many billions of lives will change because of this, not only the humans, not only the animals, but the other passengers of the Universe.

We were waiting for those who jump the clouds with their UFOs, one day they teach us how. The "man of universe" will come to Earth to learn how to reach to the level to be able to what all of you who were present on the 16th excursion, to be in touch with the Soul of their Creator. None of you had understood the gift you received on the 16th while you were present. Many of you have gone through emotional conditions, handling it. Many of you have gone through physical condition, handling what the Soul wants to bring the physicality to perfection. (1:12).

Many of you will talk, that I was present when it took place, how I felt, and you will tell your children and grandchildren the effects and the outcome of the 16th of December, 2022. Then you understand 2023 is the opening of the Universal Community to man, as much as man to Universal Community. Where they welcome us to them, as they will need, they'll understand and they'll respect the knowledge man has gained to meet with his Creator without actually getting on a UFO to go to the center of the Earth, and getting into UFO's to get into the center of the universe. Where through magnetic fields of the universe, we can travel the depth of the Unicose, and to the Creator of the Creation.

But we'll experience these things in the coming time and weeks. We endeavor to do the first transmutation next week. We have prepared our passengers who are going to do it, and they are getting ready for that step. The first step of transmutation, and then we'll see which part of them will come with them. We bring their Soul, we bring their physicality, we bring a combination of both. And we'll see how this will take shape.

Then when the new systems are delivered to us by the end of this month, and next, we go again on a mass excursion with number of you, at the same time traveling the span of the universe. Most of the February and March tests we'll do with you, is for those of you who signed in for Mobile transmutation. Then with the support of those of you who signed in to be the Satellites. And then we'll see what's the next step. (1:14).

Then you understand, we have to push this very rapidly right across, as fast as we can, to complete the technology for mankind to see the first steps of the change, and the rest will come. Those of you who signed for what the call, Mobile Transmutation, be ready for your excursions in March, and in February. Those of you who signed up for what we call, Satellites, be ready to be called on duty, to be there to bring that change, while those who are with us in what we call, system will be ready to use the new systems to transmute, where your Soul comes into operation.

We don't need you for what we call, manmade mobile system headsets. With the CPCU's, we understand, with the CPCU's you deliver what is needed in the Plasmatic magnetic fields.

As one of our Knowledge Seekers wrote to me, in the past couple of days, you spoke about the energy of the Gans on the page 145, of the book number 3 ten years ago. Now we understand, now we understand what is there. What we tell you is written in the 3 books. Now, we make it to become reality. Whatever we do is written in the two patents. Now, you see it to become reality. (1:16).

The next step for us in the coming weeks is for those of you who signed in for Mobile Transmutation, to start to get ready to travel to Linz, to travel from one place to another, and to be able to return back. We should be ready by mid-February to deliver complete. But the first trials of transmutation will start next week. And we see to what extent this transmutation will bring the changes.

Those of you who volunteered to build the first centers in Canada, Arizona and other places, you will receive the support to become the center for what we call, Transmutation Centers. We'll change the condition and the technology, that it fits those who trusted us, to be the centers for what we call, the new generation of space technology.

I hope, I hope that man will have the patience, the beauty and the elegance to enjoy the new cycle of knowledge and technology. Plasma revolution in industrial scale is upon us this year. And we'll deliver every inch of it step by step. Everything has been made, the Souls are ready. As we said, the technology has been made ready for it to start.

We learned a lot, we teach each other a lot, (1:18). and we'll share a lot, and with it, we'll bring that change which is needed. I hope those of you who work with us, will start enjoying the fruits of your work, and achievement of what's been promised. Those of you who are sitting on the sideline, wish, I would have taken part in it, that I could be part of it. But, at the end of it, we'll all be part of it. When the technology on this scale are shared, will be shared by the whole of the humanity.

How we solved the position and condition, how we'll end up with pharmaceuticals not to be needed. The petrochemicals will be dinosaurs structures left in deserts and cities which man day used to burn the fuel. And we'll leave these highways to be wasted places, and the buildings we lived in will have no meaning, as we structure new structures through interaction of the plasmatic fields, that has no dimension of size, except to the size of the wish of the man.

Changes will come in a very gradual steps, but be ready to see the change thorough. This morning, early hours of morning, from one of those who will be the first passengers of the, what we call, transmutation, next week, I wrote, "I want to know the condition of every part of you, the liver, the head, the leg, the arm, the kidney, the emotion, everything, that I do a checklist before the flight of next week. (1:20). What I need to do, what I need to change.

We are ready to take that step, and we are ready to go into the depth of the Universe. We have the knowledge, we have developed the technology for the man to understand the knowledge. And with the introduction of the plasmatic magnetic fields in the form of Gans's, we showed you the way. For man to understand the upcoming time, and the understanding of what is to come.

You will see, new papers will be released in the coming weeks, that opens a new science and technology into space, the new Space Technology, and how the body and the STM will be conditioned, affected, and live through it. The paper called, the Cosmic Rays, "The Universal Cosmic Rays," will be released soon. A paper called, "The Soul of the Man," will be released soon. As we said, the paper, which is one of the most fundamental scientific papers of the new generation of science, as we call it, "psychogenetic," will be released in coming days. Read them, understand them, and you will see the path into the future of the man in space.

In a way, it's writing a new book, writing a new understanding for the new technology. Some of you already know part of them, as it has been part of the teaching. But now the world needs to know, and how, and the way it comes to. (1:22). We have asked one of the Knowledge Seekers who we know and trust to become the new artists for what we call, graphics, and illustrations. And this job will be a burden on him for a long time to come, as we release the new scientific papers with the new understanding, and carrying the knowledge to be physically done, that every step of the way can be understood.

I have not released any papers for past six years, the first series of scientific papers for the new Space Technology will be released in the coming weeks. They'll show you, it'll teach you to be aware, to understand the principle of the Space Technology to come. It's not anymore about the rocket technology, and what we call, "monkey suits." But the understanding how to dress the "monkey, physicality of the body of the man," in the suit of the universe by itself. Then we'll see how man will change. Then we'll see how everything, which is set on, and based on will bring the changes.

I hope mankind make this time, the journey of the man into space, a safe journey. Not to rush it the way he did with other conditions, and flight systems. Thank you very much for the teaching of today. And I hope I opened your eyes into what is to come.

If you still want to be part of the what we call, Mobile transportation, still sign in. If you still want to be part of the Satellite part of the Keshe Foundation, still sign in. (1:24). If you want to be part of the experience of the January 20th, still sign in. And then we announce it February and March what we'll do.

Our target is for the landing of the first man in space, in March of this year. If we're on target, that our system will be ready, and we'll do the first test in the coming weeks.

I hope you all understood where the Keshe Foundation is heading for in 2023, independent Space Technology, independent and a new what we call, understanding of the Creation and the process of the natural ways, that the universe was created. We haven't developed anything new. We just show you how this universe, and the life in the universe was created.

As I always said, "the Creator is Creator of all, and the man is converter of some." Converter of his knowledge to the dimension of physicality. And what he'll benefit by that conversion, depends entirely on understanding of the man himself, and no one else.

Rick, if your system still works, would you like to go through a break?

<< **BREAK** >> 466 KSW January 5, 2023 (1:32).

K- Yes. ready, willing and able. ... If there are any questions. I received a question regarding the new CPCU's. What we call. We would have called it CPC, but you know, the problem with it, would have been with the Chinese government. As the CPC is the controlling, ruling body of China. The new communication unit, which will be developed a more complicated way, in the coming time, it's a way that connects your Soul, brings it to a dimension of the boundary of the body, and in communication with what we call, our Center point.

What it means, we opened. Those of you who were in the Linz Center, you already seen this system, we showed some of you that. And we explained in the teaching, you can transmit from one unit to another. But you cannot reverse back from one unit to the original one. So we have tested these, what we call, Cosmic Ray, transmutation of magnetic fields. It's not something new.

The tests are completed, we understand it. And now the Head units are there. (1:34). Part of this was brought up some times ago, as part of the what we call, sharing and testing in other parts of the technology development. The Head units, which will carry this capability are there for many of you for different uses and what we call, purposes.

This is why on the 19th, we changed different sections, for us to see how effective it is, and how it works, and what the effects, where in the work of the cosmic rays, which we were putting, we were adding into the system. So collectively on the 16th we looked at the operation of all, and then on the 19th we looked at a specific condition. If you listen to the first part of today's teaching, we explained, if you need food, nine o'clock Central European Time it'll be English breakfast, and we give it one hour, and then we close it. Those of you who are English, know, like, or taste, and have the emotion and the energy of the English breakfast, you'll have it.

We want to see how you feel the next 12 hours, or did it last two days, because the energy was so clear that you took. What happened? You will like to have a taste of orange juice for a tea break, we bring the system to be at that time, anybody who's got a Head unit can test the orange juice. Then in the future this all will become organized. People with a specific unit can receive specific things. (1:36).

Because you can't receive everything, then it creates other problems. So, it's sequential, and how it is. Would it be common in the next few years, you invite friends for a party and each one gets a headset, they can have whatever they like. I don't like Chinese food. If you put Chinese food on the table, I'm not eating. It's your headphone, you decide what you like from Italian to Japanese. The cuisine is spanned the imagination of the man.

The biggest problem will be, would the vegetarian shops and others will have any more market left for them? Would we see the butchers and the other, will be ever existing? Would we go to the supermarkets with meat and fish section? Would we accept this in the coming time? Would we accept the taste of a fish and a meat, as it's a flesh of another entity? Or we just accept the energy? There's a lot of changes, which we have to get used to. Interesting time ahead.

We will release the first, maybe a hundred or two hundred of these new headsets in next week or two, and it will be developed in a very fast track. And you'll find it on the Keshe Foundation website as part of the products there. (1:38).

As one of the Iranians, I was told in the Farsi teaching of Friday said, "is seeing the God, only the privilege of the rich people who have the money to pay? Or getting the health

application only those who can afford?" At this moment of time man is entangled with the physical dimension of paying wages, and renting places and looking after a lot of things for you just to receive the knowledge. It's not a privilege to serve, it's an honor. But at this moment of time everything is entangled in that direction and dimension.

Any other question?

Q: .. Because I lost my job, he's thinking, that he would like to try to... If I can make a living in this way, working with the plasma technology without the intention of getting rich, just to survive. I want to serve and if possible make a living doing it. I'm looking for another job but it's not that easy. Is there a path going forward?

K- Yes, write to info@keshe.foundation, become one of the distributors to sell the products of the Keshe Foundation. (1:40). The products are becoming more sophisticated, more complicated. But yes, you can do. There will be some new announcement in the next few months with the expansion of these things, as the process in Iran is building up and the factory is getting more, coming up with new products. Yes, it will be done and there's more to be made.

The only thing is, we see Knowledge Seekers who used to be with us, I trained some of them myself. And now they're coming with this cheating way, I call it, the "Med Beds." And now since we started, as I said, with the head units, now they call it "quantum headsets," and the rest of it. This knowledge is a fake knowledge, and we know how they work, they talk about quantum physics and everything else.

But in a way, plasma technology has no quantity to be quantumized. And those who have no knowledge, use these tricks. Because we're getting a lot of communication, especially in the past two weeks. People who talk and write to Keshe Foundation about, can we buy your .. Med Beds. We don't sell, we never sold Med Beds. This is a trick by those who tried, the same as we saw in Italy, taking Keshe Foundation knowledge and what you call it, faking it. It stays the same. Yes, write to Keshe Foundation and product range is there for you to sell, and there are many Knowledge Seekers who work as distributors and they make a living out of it. (1:42).

R: What about teaching? Can people earn a living teaching?

K- A lot of people do. A lot of people used to, till about couple of years ago, two or three years ago. I've been encouraging the teaching. I still teach today here at and other Knowledge Seekers places, but... Yes, teach. Yesterday, I think, let me see if he's here, one second. We'll tell you how teaching is going on. I don't see him here, maybe he's in the background. Do you see ?? Rennon anywhere? Rennon was teaching and explaining the technology to the government officials today in Philippine. Yes, you can teach. Put teaching sessions.

A lot of people still needs to be taught the basic of the knowledge and technology, they can't just jump into the plasma. How to make the Gans's, how to understand the use of

the energy of the Gans's, and yes. You've got to teach, that is your responsibility. If you make a living out of it, it's a different thing. When years ago when we used to be in Western Europe, (1:44). side of this continent, I used to teach and we used to get paid for giving conferences.

R: Okay, so that's a good path forward there then.

K- There's a lot of teaching to be done. You have millions of people who still have not heard and are hungry for the technology.

R: Definitely people are becoming more open to the ideas. I can now go to a perfect stranger and start to explain some of this, and some of them actually get it. Whereas years before they would probably look at you strangely and just pass on it.

K- Yes, a nut case.

R: So that's encouraging.

Q: .. Is plasmatic energy different than conventional electricity? Is it an etheric energy?

K- Plasmatic energy is a collection of fields of different strengths. Every plasma has a full spectrum of the fields. And it depends on what the environment, according to the field strength, and compactness of the strength of the plasma allows to show itself. (1:46). Different environmental condition allows the same characteristics, but different strengths, we call it, isotopes, in the matter state.

So, the electric energy or conventional energy system is a step lower than the plasmatic. But it's of the same field, and is of the lower strength.

In the paper which we'll release, a lot of these been explained in a very simple, but in a deeper way, the way I usually write. I tried to explain this in a very fundamental way. Read the paper about the what we call, psycho genetic. There are two small papers, which will come out, which are prelude or will be published at the same time with this paper. It will bring you a lot of understanding of the knowledge of the life in a plasmatic way, and not in the matter state way.

Some of it you already know, but we look at it, large number of population are not familiar with the terminology and the science we use. So everything is gone to the first step. I think the psycho genetic will end up to be a small booklet or a small book on its own. It's the knowledge of life in the space. As usual I start with a few pages and then it end up with tens of pages. And now that we have found the illustrator for the book, it allows us to be able to go back into publishing books with illustrations. (1:48). And the good thing is that, our new illustrator is a deep Knowledge Seeker and has a good grasp of the technology. He is versed with the knowledge, and you will see new what we call, presentation of diagrams and pictures, which makes it much easier to understand.

Any other question?

Q: .. In one of the weekly Knowledge Seekers Workshops before the 16th of December session, Mr. Keshe described the steps from that future session and at the end, at the last part of it, mentioned something about his blood, about giving his blood. But hasn't finished the idea. Could Mr. Keshe resume and explain further more about this?

K- No. We leave it as we left it.

R: Okay, fair enough.

K- A very interesting point will be, would the man will have the same blood in other parts of the universe, (1:50). same composition? And would it hold as a liquid, as a dynamic liquid? Or would our vein change into the energies that the matter level of the Gans's? The answer is, yes. It's part of the structure of the Space Technology.

If we carry blood the way we do. We've seen it, when it goes into cold it freezes. And when it goes to the hot, it boils. When it comes to the fire, it burns. But you cannot burn, freeze, or whatever, with the energy of the Gans as a mode of transportation of the energy. Would the blood vessels of the man, will carry, will change themselves to tunnels, or to channels, for carrying plasmatic field energies, than actually the matter state of the energy, as blood? Or would we change our dimension to a plasma, which everything feeds through it, from it, from inside out? The way we said, the STM will feed the physicality (P).

Many of you have heard me from early times, explaining about we get our energy 80% from the environment and 20% from what we eat. (1:52). Part of this, small fraction of part of this, comes through the interaction of the energy of the cells of the body of the man with the environment. But majority of it comes from the expansion of the Soul, especially at the time of the sleep, where the body absorbs all the energies it needs from Cosmic Rays (CR). Dreaming time it's not the only time when plasma expands beyond the physicality.

Have you ever thought why you need a rest to recover, and then you wake up and you're fresh? In the present world of science they tell you, that the body repairs, or whatever. But in fact, that's ?? where the 20% of what is needed. The other 80% while you go to sleep, and dream, or whatever, the reduction in the field strength of the blood vessels containment, allows the Soul to absorb the energy from the environment, and feed it.

So, when you go to sleep next time, when you wake up and you're fresh, it doesn't matter during the day, or a nap for a few minutes, or siesta for a few hours, or to sleep at night, understand that, that's the time we actually reload. It's not the only time of the dream. So, we are used to loading up, taking energy, but on the strength of the level of the Soul. But we never understood, we never knew. (1:54).

You've got to remember when we say, we speak about dreaming and now we understand dreaming is the expansion of the Soul in connection with the other Souls. It does not just beam them up to one position. It interacts with all the fields of the universe, gives and takes. What you discharge is whatever, sweat, or whatever from your body, is a fraction

of what your body gives, as what it doesn't need during your rest time, to the what you call it, its environment.

If you fall asleep in the environment, where there is a higher range of the spectrum of energies, you wake up much fresher. Because you took a spectral of it. If you find yourself resting in a confined space, and in a way, confined in energy, cosmic rays, you'll find, I slept, but I don't feel good, I don't get what I need. You can sleep deep in the mind and receive everything you need, and you can live on top of a tree in the mountain and receive the same.

It's how your Soul in the expansion beyond the physicality interacts with his environment, takes what he needs, in the energy level which needs. Then you understand how the new, the future feeding system will work. (1:56). We provide a spectrum and you lock into it, you take what you need.

And in a way, maximum time you need to be connected to any system, even in the new CPCU's is seconds, milliseconds. As we tested it in number of people who went through the Linz and the others, they tell you, I saw this in a flash of time. It wasn't long. That's all it takes, a flash of time to download, to receive, and to give what you need, and what you don't. It doesn't need to be hours. It's like the way you go to place from Linz, suddenly you're on the Moon, because you transmute on the field strength of the planet, because you wanted, you tune into it.

At a moment when you want to tune a radio, you play the dial till you get to it. Now your brain has already knows what to dial, from where, because it receives fields from it all the time. We'll get used to this very, very quickly.

It'll be amazing how the cities, like in China, we've seen hundreds of thousands of people involved in making iPhones and iPads, in the next few months and years will change to make what you call, CPCU's, the cosmic ray units, receivers. Then what we call, the Satellite systems of them, and how it will be provided. There is a lot of things in the future will change. (1:58).

In a few years, especially when we start going on excursion of the space travel, there'll be a job which has no room in the world of the Creation, and that is doctors. They become historical things, a medical doctor. Because as we go on, I explained in past three, four weeks, into the full system of understanding to work, and once the body knows what to reach, where to reach, you don't never get sick. Accidental situations will be there, but in a very short time, the technology we'll develop, even accidental conditions can be processed. Being, working in a place called hospital become rarity.

We shall see. I explained this in a very deep way in the psychosomatic, or psycho genetic paper which is coming up. It's been a pleasure to get back on, and be able to write and share knowledge in a deep way. I hope you enjoy reading it, and understand it, not just enjoy it.

Any other questions?

Q: .. In the last session you mentioned that what we are today is a reflection of our ancestors through the structure of RNA and DNA of men. (2:00). My question is, what happens then to the people whose Souls were enlightened by the cosmic rays, will their children get enlightened too, to see the Creator?

K- In a way or another, all of us will reach that point. And our children, especially the children which are born with the new understanding of the creation of the Soul first, have already that connection. They don't need to, they understand the whole process of the Creation, from true essence of, not through what I call, "man's book." So, our children, the future children of this race of the man and the others, will be created out of the fields of the universe without interaction of the physicality. So, they already have that access. As I said to one of Knowledge Seekers, physical man made, will become an extinct, in a very near future.

R: Do those children that you mentioned, have changed DNA, because of the cosmic rays?

K- They have their own DNA. DNA is the physical structure of the body, how the plasma fields are created from the, certain given field strength. You know when you, I've said this many times in teachings. (2:02). You know, they say you have equal to one nail of Fe in your body. And you have so many grams of Carbon or Nitrogen. If you get these matters and put them on a table, they don't pile up to more than a few millimeters off the table.

When you make them, now that we understand, into a plasmatic Gans condition, it gives that structure of the man one meter or two meters high, and three dimensional. Just goes... I did this years ago, and it absolutely hits you, absolutely hit you right in the face. This came out of an experience. I was watching an ad, or was it something on television, where they brought a very, very overweight person, and they said, you like carry 200 pounds of fat. And they brought 200 pounds of lard and they put it on the other side, and said, this is how much you carry. That brought me. Going through the scientific papers, how much nail, how much, what you call it, Fe, how much Zinc, how much Copper is in the body of the man, and I piled it on the table. It's not much. Put the dust equal to the amount of nail, put enough dust, enough for the, what you call it, Oxygen and Hydrogen, you can understand how it will be in the solid state or whatever. It doesn't pack up more than a few millimeters, and most of it is Calcium. (2:04).

Then you understand, you are standing next to it, this is the matter state. So the body of the man cannot be in the matter state, if you stand one or two meter high. It's blown up somewhere. These Iron particles have changed. It must be somehow expanded and can't be no other condition, but a plasmatic condition, a Gans state. That you put balloons together. You go and you buy a pack of 100 balloons for a party. They come in a little tiny bag. Now you take them home, and you put gas in them, and you blow them up. The

room is not enough space for them all to be in. And this is the same as the body of the man.

In the matter state, we don't add up much. In the Gans state we become the body of the man. We get that balloon blown up, that amino acid, that Fe now has a volume, it's not flat. It's not a matter state. It's a Gans state. This explains a lot in the world of understanding the whole cycle of life.

And if you understand, the balloons are not just confined to the air they contain, they're dynamic. Now they interact with each other, they're like magnetic balloons. They space gap each other. Then as they're magnetic, they interact with other magnetic fields in their environment, (2:06). even if they're not in the box you put them in. When you put the balloon in the room, it's a balloon in the room. But if you create a magnetic field balloon in one room, it interacts with the magnetic field balloon in the house next door.

It's a different understanding. It's understanding the true nature of the Creation in the living things. Then the whole thing changes, then science of life of the man the way we've been taught, literally gets thrown out of the window.

Then we understand the true way, why this universe even has a volume. How did the universe expanded. Then we understand the structure of the galaxies. Then we see a lot of knowledge we gained in the present science of physics, especially, especially biology and psychology are good for the (trash) bin. Because we never understood the interaction of the fields. We just understood, mash it, pill it, and ?? it, and that's the solution in the matter state. We dealt with the body of the man in the matter state, not in the plasma state. Read the papers coming out, I explained this in detail in these papers. (2:08).

Any other question?

Q: .. Is MaGrav plasmatic energy different from electricity?

K- Yes, they are.

Q: Can we power appliances using this energy, this plasmatic energy?

K- If you do it properly, yes. But none of the Knowledge Seekers up to now have understood it. Yes.

Actually go back in one of the demonstrations from Arizona with Jon, where one of the Knowledge Seekers was walking between the MaGravs and turning up the lights. That should have given a lot of understanding.

We explained this originally as a what we call, entertainment piece in the Sansano (Italy), and I explained this before many times. Whenever we used to end up at the end of the day when we switch the fluorescent lights off, we used to have the dance of lights. Usually when you switch a fluorescent light, it just switches off and that's it. But we used

to create so much plasma in the building in a different strength, that as they came in touch with what we call, fluorescent tubes, for minutes we used to wait and watch a number of the fluorescent tubes lighting up and dancing with each other, as the energy of the plasma was converted into electricity, or light. (2:10). If you understood these things, yes it can.

Many of you which (who will) receive the new CPCU's, you will see a new dimension of vision, that's for sure. You will receive, or you'll be able to, if you tune to it the right way, to see literally it doesn't matter day or night. It brings you a new visual capabilities, because the visuality will not be through the eyes, but you see it through the Soul.

Many of you will perceive for example, an accident before it happens, because the connection comes through the STM, with the new units coming out. Many of you by using these new units will see changes in your emotion, you will see changes in your physical condition, you will see changes in every aspects of the life, in your interaction with your loved ones, and your associates in your life. It'll bring a new dimension of pleasure. It's, in a way, as I said to one of the Knowledge Seekers in the past few days, it will make life living, worth living, the true life of the man, not in the dimension of the physicality. And this is the beginning of the change, and that's why I said, with the new cycle of technology and understanding, no one can lie, because it's everything in front of you, you see. (2:12).

Any other question?

Q: .. In chapter 10 on page 95 of Book 3, I understood that the black hole in the universe created through the interaction of two or more magnetic fields, and that this black hole functions as a recycling center for magnetic fields and is a source of cosmic rays. I would like to ask two questions if I may. The goal to be achieved in MaGrav, was to create a unit for the creation of magnetic fields, and through another system create the condition for amalgamation of these fields to create thus a black hole, so also is man?

K- The black hole in the MaGrav units is the coating on the copper wires. As simple as that. But Knowledge Seekers have not managed to understand how to harvest it.

Q: .. The units in Linz created a condition where it amalgamates the best fields of all the races, and recycles these fields to create the cosmic rays to elevate the Souls?

K- We don't recycle. They connect to each other, they link up. (2:14). The cosmic rays we produce has nothing to do with the people who came and participated. Cosmic rays are produced kilometers away from the Linz.

Q: .. I am now a happy owner of 7 plasma butterflies, a medium and one small .. One small, one large. I would like to know how I can utilize them for strengthening the field strength of this, my field, or any other experiment that you can suggest?

K- If you received that, or you made the what you call it, the use of the Butterflies from the Keshe Foundation, it's a very specific way designed. They are not the normal

butterflies, you just think you made by the, what you call, the Nano wires. Place them in the ratio way.

For example, put them in Gans's of your choice, and put a large one on one side of the room, and a small one on the other side, and see how you feel in between. They use different positioning and distancing, and coat them with different Gans's, and you will see the effect of. (2:16). The Butterflies of the Keshe Foundation are designed and built in a specific way, and you will see, you will feel the changes. It's like the paintings we have.

If you stick it on the computer or laptop, it's a connection between you and the system. But you can use these Butterflies in many, many ways. You have a disturbed family. You have a disturbed child in the house, you have people who cause problem in the house, put these butterflies in a sequential way under their bed, in the chairs they sit. You see unrest in the family, put these Butterflies into Zn Gans's with CO₂, let them dry and just leave them casually around the house. Don't let their face down, they have to be facing the environment. You have children who cannot asleep at night, put it under their mattress, under their carpet, under their bed, and place one above, change the environment of the room. They'll sleep peaceful.

These units Butterflies have many, many applications, (2:18). but Knowledge Seekers just buy to put it on their iPhone, or iPad or whatever. You have a stressful in the car, hang one in the front, one in the back, or put it in a way position, change the environment of the car completely. In the office you have people who disturb, you just put two across, it doesn't need to be, not just ?? decoration. It's actually made like decoration. There are a lot of things you can do with it, but I don't get the chance to teach.

Q: Dean .. So Mr. Keshe, you spoke about the CPCU's and I just like to touch on that a little bit more. It's like an extension of the Soul. Obviously, you said before that you see everything, that every interaction, that people make on a Soul level before they do it. So is this giving other people the capabilities to be able to have the same interactions. (2:20). If so, wouldn't it be a wonderful thing to give to delegates, that go into all sorts of positions in various institutions, and wherever they are in the communities? Because then there will be nobody that could actually say anything that would be harmful to another, it would be very beneficial for humanity in many ways.

K- If you're trying to tell me, they'll be like a "Pinocchio headphones," maybe, but it will be for the STM. I'm sure the first unit we'll release will be improved and made more sophisticated in the coming time. But in general, they're there to bring the understanding of oneself directly through the expansion of one's Soul. It will be very interesting, very, very interesting, once we put these out and tell you the things you can do with it, how you will react with it, and how it will change you.

In the coming time, we... The main purpose of these CPCU's are for space travel. But we have to entertain you with something else till it's done. They will work in a very special way for specific jobs. (2:22).

Q: .. If they give one the capabilities to travel, is that going to be a situation where each individual will make the decision? Is it the same situation? You're the captain of your ship sort of thing?

K- Yes, yes. That's the whole purpose of it. But you have to be very clear, ?? I said this to the Knowledge Seekers who will become the first passengers. Actually, I talked with one of them this morning, I think he's around somewhere listening, or will listen later on. That is, you have to be clear about everything before you start using these systems. What is the intention of the travel? Am I going to spread love and care to my child, to people I meet? Or am I going on the way to cheat and whatever? You'll find out you won't take the trip. We said, you know, you have many presidents, and kings, and rulers which walk away from the Enhancement Unit (EU). Now this has become miniature EU, but more powerful.

As I said, and we've seen in the past few months, many Russian rich people somehow they're jumping out of the windows everywhere around the world. And we see many, many influential people in the world of the Bitcoin currency are dying very young. In the past few months, we've seen many, many of them. Both cases. (2:24). If you have this CPCU's, would your Soul allow your physicality to go through this? Or then we know this will become impossibilities, then we know that somebody has thrown you out of the window. It's very strange. Only scientist and rich people jump out the window. We saw the Chinese Yahoo gentlemen flew out the window in US when the Huawei business came to light. And in the past few months, we've seen many top Russian governmental, key people, suddenly just jump out the window, it becomes fashionable. Or is it enforceable, has it been forced on? So, these things become impossibilities.

Q: .. So if these people who jumped out of windows, if they had one of these units, they wouldn't even be in that position to be near the window. Is that correct?

K- Well, it depends if they went near the window, or if they were brought near the window. If you understand it. It's a very, very different situation.

Q: .. So, from the 16th, I've noticed my sleep patterns have been very different. I've spent large proportions of moments, very deep in sleep. And obviously, I needed that energy, I needed to take from that for whatever it was. (2:26). Then all of a sudden, I changed my thought pattern, like this morning. Then last night, there was a very big storm going on around here. But I didn't, my sleep was different. I was able to wake up when I needed to today. So is there many transitional things happening since the 16th?

K- With a lot of people. Yes. A lot, a lot of people, physically, psychologically, yes. Because we're getting a feedback. We're getting a lot of feedback, especially the ones who are involved with the Brazilian group. We don't see any more Italians around Keshe Foundation work, which is, was expected. But with the Brazilians we're getting a feedback, with the Germans we're getting a feedback. We see, yes. There has been a lot of evolution psychologically and physically for them. Yes.

Q: You mentioned Mr. Keshe, that, obviously, as part of that, and many other beautiful Souls were present, and they all joined to one, you said, and reached at one point, that Creation point. That in itself it's obviously a massive gift. And when will we come to understand sort of how we've, what we've achieved or what you've given to us? How will we really understand that?

K- I think is the test of time, and understanding it, and not just putting it, "oh, it happened." Why didn't that happen before, as I said, and why did it just happened after. Then you understand the changes. (2:28).

Q: Is this going to be a gradual change for some of us?

K- It depends. I think with the new, what you call, CPCU units, it will be a very, very drastic change for a lot of you. We will see "humane" people, not human people. As I said, we'll see the children of Mitra, or the Ethos of Mitra.

Q: Present in physicality Mr. Keshe, or in field strength?

K- In behavior, in life, in life lifestyle. In how we take that step towards. We know what it'll bring. It'll bring a lot of physical pain, until the psychological, what I call, condition of it, "psycho genetic" is sorted. And then life becomes a pleasure to live.

It's not a key, "oh, I have a cancer, I'll buy a Headphones for that one cancer. You might find there will be no solution for your cancer, because you have not sorted out the emotion how the cancer started. And you block that side. So how can you change the other side? (2:30).

It's not a one way traffic key, it's "me, me, I take, I take, I take." You will find out your own structure will block you from receiving it. Because the intention is wrong, you have not understood the reason why you are in that position.

Q: So, on a Soul level, is the Soul interacting constantly, is in communication. And the physicality, we've spoken about this before, may not be caught up yet. But the Soul is pure and will always guiding. When will that. So how will that that transmute, so that the physicality can actually understand this, really?

K- Physicality understands only by comparison, this is a habit of the man. We've seen it many, many, many, many, many times people who use the Gans's, or use the technology, "I had a headache for years, but suddenly it changed, I don't know why." And the next sentence you (say), could it be because I used Gans's? Hello?. Why did it happen before? And why does it happen when you use Gans's? "But it could be coincidental, you know. It cannot be really. But I don't have the headache anymore, so, I can't test it if it was Gans's." I heard this hundreds of times.

And next time they have a problem, they use Gans's, (2:32). it doesn't work. Mr. Keshe, I tried everything with Gans's. Yes, you cheated yourself to your Soul. So, you blocked yourself. What do you want? You cannot cheat with the technology, with the knowledge of the Creation. So you benefited by it, you denied it. So now it denies you, because you can't accept it, the soul doesn't accept the ?? I.

Q: .. I've noticed this with myself. I've been exactly the same. I've used Gans's, and used the technology. And at moments, when you're in a certain position, and it expands out and you receive the energies, and then other times when you require it, as you said, you're out of balance or whatever it is. And you need it, but you don't receive it. I think you've just explained that, why not.

K- Because you're in the wrong way of getting, you're not getting what you need. You want to get what you think you need, but you actually blocked it yourself in receiving it.

Q: So what we think we need is not always the case.

K- Exactly. I always call it, "Iranian girls with love affair relationship." On (top) the table they push you away, underneath they pull you with the leg, you understand? I still love you, but I want to say, "no, I don't want you." You understand? So, it's the same with the STM.

Q: It's a fine balance position.

K- It's a very clear defined position. "Thy shall not lie." This was one of the things always... Actually the first thing is, thy shall not lie to itself, to himself.

Q: How do you know you're doing that Mr. Keshe? (2:34). Because you don't think, because when we do. I don't ever think of lying to myself. I try always to be... ??

K- We accept conditions, we accept conditions. Then we accepting it, we see it as to be right. We see abuse and << audio cut yeah I am back ... >>

K- The principle of the whole work is "denial to block." If we do it, we accept it, we accept the abuse, and then we become the one who's at fault, accepting it. Then we become the, not the victim, but we become the guy who victimized. If we stop that abuse from the beginning we don't get to that point, because we are honest with ourselves, it doesn't matter what it is. (2:36).

And this structure with the Gans's and plasmas bring that condition, it's you who have to decide. What I want to take, is this what I want to take from it? In a way it's an enlightenment to understand it.

Q: How would this help world leaders? You've just touched on something there that would obviously it's quite a, it can open up into a very big thing. So, world leaders that

are, when is that moment, you made that definition of "you understand not to go there but you allow yourself to." Why do we do that?

K- What do you mean by that, regarding the world leaders?

Q: I mean by anybody, for me a world leader is anybody.

K- I understand. You see, it's very hard to put it, because I do it quite often, I let things to happen. Then they tell (ask) me, why you let it happen? Because I want to see what's the outcome. I'm a big experimental person in every way of shape of life. It's not just with researchers, it's with interaction of the fields, people's behavior.

And I want to see, and then it gets to a point that I say, "okay, I learned enough, that's enough. I walk away from it." Because the one who was involved did not learn, and they saw it as a right (to abuse). Abusive behavior, misconduct, because you sit and think, "okay, one day they get elevated, one day they understand." (2:38). Then it becomes your problem. And they don't see it, as their problem. The problem they created, and you just as observer see, where it's going to go. And when you put a stop to it, then you are the guilty one. I had it in my ex-marriage, numerous misconducts, adulteries. But the Soul never learned. And when you put your foot down, it's your problem (she says, "you are the one at fault").

Q: .. Going back a little bit, you touched on theology again. So, how would this transmute to theological teachings? How would they understand? I know that we need to express the aspects of the Soul, and you've gone beyond like the 10 Commandments of one of the religions, there was these Commandments and you've gone, you've explained beyond this. And so we've taken it to another level for humanity to catch up to, and to understand. How will the theologians take from this to a position where they can actually, let's say, give it to their flock and they can teach it, so that they can elevate to a position?

K- You put your finger on it, and I have a bunch of these in a couple of hours. I have a meeting, they asked for it, in a couple of hours. (2:40). These are world theologians, the leading edge of, and they want to understand. I've been bashing my head, how explain to them without touching their belief, for them to come to understanding, not for me to explain for them to understand. It's a big difference. Maturity, enlightenment and realization has to come from within, not forced. And theology doesn't exist if one understands the work of the Soul.

Q: Can I ask a question Mr. Keshe on that, so why did prophets given the knowledge? Why did they come forward to teach humanity?

K- What do you mean?

Q: So the prophets were given the knowledge of the Creator, and they came forward to give this out, and then it got sort of changed, you know, in many aspects it was changed...

K- You know, if you play with the English language, you're an English man. When "profitability become profitable," they became Prophets. And this goes right across, right across. Prophesizing and just talking, (2:42). and then making it profitable, has been the main problem of the past.

So, this is the beauty with Keshe Foundation, we don't prophesize, we teach you the technology that nobody can prophesize it for you. You take it as you become professor in it, to your understanding. So, you have no more prophets to, or what I call, magicians.

I wrote to one of the Knowledge Seekers very recently, in past few days, that, I didn't come here to make MaGravs and power generation. The whole exercise was for people to make it to understand the physical field forces and understand what plasma is, and that they don't need any explanation in the future, that nobody can abuse them. This is the beauty of working without theology.

There is no theory in the world of the Creator, that makes a theology. There is no theory in how Creation was done. When now you understand how, and you can create it yourself. It's what I said few minutes ago, a pile of dust of Fe, and Oxygen and Carbon is there. And then with the knowledge of Gans's, knowledge of plasma technology, you make a man out of it. (2:44). You understand how, that dust has become the man.

By, not blowing the "wind of God's will," but understanding the process of the expansion of every atom into a Gans, into a balloon of energy. When you go to church they say, we blow the wind of life in the body of the man and the rest of it in different shapes or forms. But now you understand that blowing up of the whatever, is actually expansion of the matter into Gans state of itself.

If you take all those number of atoms in the pile of the body of the man and make a Gans of them, you'll see you get the same height and the same structure of the man. Now we understand what has been theology. Theory of the life in Creation, now has become a science, so there is no theology. There is no theory in the logic of the Creation anymore to call it theology.

Because now with the knowledge of Keshe Foundation we brought the science of the Creation. It doesn't leave any room for theory of the Creation, because now you have the facts, you can create it. So...

Q: Sorry, I didn't mean to stop you. So it would be that if we'd have given the profits and the ability to make the Cup of Life and even now to give these theologians the ability to make the Cup of Life, to understand the technology, would this help? (2:46).

K- I was talking to them before the teaching of today, just before we start teaching, and I said, you need a headphone. Can we have the headphone just this afternoon and see how we do, we see the Soul of the prophets. I said, yes, but the system is switched off till the 10th (of January). Then we believe it. And then even when they do it, then they say, "oh,

he's playing with the mind, blah, blah, blah." Because if they accept it they don't have a job.

Q: So how do you get around that Mr. Keshe, if they ?? cannot get around that?

K- They cannot lie to themselves. You bring it. They bring to the end themselves. I explained last week about when I was a child, people used to come and change clothes. All those people were Mullahs, with turbans, and beard, and their families, all of them without failure. They were chief leading Mullahs and Ayatollahs who changed clothes. And I watched them doing it, because they understood something was wrong in the structure.

Q: Was it just Mullahs Mr. Keshe? I don't mean that in a in the wrong way. But did you. Were there other theologians?

K- No. (2:48). All Mullahs with their turbans and their robes. And I saw them packed in what they call, bundles and taken out. I've seen that many times with my own eyes.

Q: And they went on to live normal lives Mr. Keshe?

K- Normal lives, yeah. They were given jobs, and positions, and places and they moved on.

Q: Were they happy?

K- I don't know. Never met them again.

Q: Were they elevated on a Soul level by taking that position?

K- Most probably yes, 100%. Many, many of them.

Q: ?? really comes into play Mr. Keshe, is that wrong? Is that not so?

K- Yes. Many of them. It wasn't one or two. The reason it made an impression on me was so many of them.

Q: .. How did you get them to understand?

K- I don't know, I was a witness. I wasn't somebody as part of the process of understanding. I was a witness to an event.

I've seen that with my own immediate family, where they changed from one to another. It's the way, it's the course of event, we do. It's just like. The best example I always tell our team, I think, because it's a very natural way, (2:50). it's if you go on, I said it before, the guy called, the band called hot chocolate in nineteen seventies, first black gay guy who actually promoted a lot of things in that society, that in those days people couldn't understand. I explained this before, he was a Caribbean guy in West Indies, who the mother rented the room for him to go to private education. Before he wanted to become a plumber, and a chef. By renting a room, being able to go to public teaching, schools in UK as you understand it, he became amongst people who became doctors, and engineers, and everything else.

The elevation came in the education. It's the same with the teachings. If you understand it, the teachings gives you that insight to understand more. That's all.

Q: It's like the Gans's Mr. Keshe, that you spoke about earlier, where they sometimes they touch you, and sometimes they don't, when sometimes you think you're giving when you're not. And other times when you don't think you are, you actually are, it's that, that contradiction of... ??

K- I always said, when you think I'm rich, is exactly when you're poor. As I always said, when they tell you how much they're worth, and they can tell how much, then you are not actually rich, because you can put value to it. There's always someone who's richer than you, more ?? (2:52). And it's you who has to decide.

I was very recently in a position, a lady decided to be very insulting, very aggressive, and it was a very unusual position. And it happened again itself n a few hours later on, again with the same woman. I said to her, "I've never seen a more insulting and arrogant woman than you. And you're just the receptionist." And she ran after me trying to say who she is. I didn't say anything, and I said, this shouldn't have happened. But I don't know why. But it was very strange.

When she spoke German to the German people, she had a different behavior. When she spoke with people not Austrian, she had but insulting behavior. So, I wrote to her bosses that, is that the behavior of your company? Is it the new policy with your organization? So we avoid it. And immediately within a day, they responded back, that now they understand they have a problem in their structure, and they're going to correct it, because they never realized this is going on in their structure. (2:54).

How do we become one? How do we allow this to happen? How do we choose to be insulting to one, and comforting and friendly with other, on the same table, the same person? What do we accept? And what is the limitation of accepting it? Or, what comes to this lady thinking, "oh, he is a foreigner, he is nothing," whatever.

In the communication to them, I wrote, I can read it to you. I'm an Iranian nuclear physicist, head of the Keshe Foundation, head of the research and development of the new space technology, and my humbleness is not my weakness and stupidity.

My humbleness comes from knowing nothing is worth, if you are not amongst people. This is how people make their position, thinking who they are, what they can do, and what it is. Then we allow them to do it. In this part the life we have is the same with education in knowledge and in understanding. The more we understand the humbler we should become.

Q: So it goes with you explaining not being higher and lower. (2:56). I have been around the Foundation and yourself. I know how humble you are and how you treat people, and that ethos, when others come to understand this in other structures, then we will have this beauty that you have given to humanity.

K- You've been with us, you've seen it. When we have lunch, I ask everybody who is there, do you want a lunch. We get for everyone.

Q: You do, yeah. You do Mr. Keshe.

K- We, I eat with everyone the same.

Q: Yeah, the beauty you have given. And you do, you live by. It is words and it is action, it's all, they all tie in together. And that ethos is what we need to portray and give to everybody to understand this. The theologians if they, those three words, those three attributes (think speak act good), if they brought those together, with inside themselves, then they would find this, the ability to move forward.

K- It all depends how you take it. The minute you see yourself higher than the others, it's the time when you fail.

We had many occasions in Trany (Italy), where we had the, what we call, the teaching center there. We always used to eat together. In lunchtime wasn't, I eat somewhere else, somebody else they bring their lunch. Our housekeeper used to cook and lunchtime she used to come and lay table for everyone. It doesn't matter you were a guest, you were a Knowledge Seeker, you were people who are with us doing research or whatever. (2:58). We all sat around the table and we ate together. And our housekeeper used to cook food and lay the table, that we've laid our table at home and we used to sit and eat, and she cleaned up and go home. This is how it is, there should be no difference.

And this is not something I brought in Keshe Foundation. This is how I was brought up. I took over a company years ago and becoming a major partner. They had a canteen, and the management had a table for themselves. They were Indians. And the workers used to eat separate and, you know, the management table was laid and everything. The first day I went, I saw this I thought, something is wrong in this place. How do you know what's going on in your business if you don't talk to the people who run your business? I took my plate and I went and sat with the warehouse people, and I sat with the workers in the factory, and they were shocked. They could not accept you eat with workers. I said, you know something, while I'm here you can't run your business, because you don't understand what's happening with the workers. Now I'm in charge, I run my way and I abolish the management table. And this is how it should be.

Q: That's a beauty Mr. Keshe. I've noticed that when I used to take pictures in corporations back in the UK, I used to see this a lot. I'm not. I'm sure it's changed now, this is a long time ago, what you've just described.

K- Nothing has changed. It has become more posh. .. They go to more expensive restaurants for lunch. (3:00).

Q: Okay, I understand.

K- Carry on.

Q: So, as I said, I used to see this situation where the management would have their .. tables laid out completely in a different network, segregated sort of area, and then the workers will come along and they will almost sometimes in another room. So, it's exactly what you just said, with them going out to restaurants instead now, and not being with the workers. That ethos seems to have changed. As I said, that was a long time ago, now it seems to be that people management are starting to understand they need to be more with the workers as well, is that not the case now? Is that not being brought forward?

K- It is there because now the workers has come through, the management comes through the working class. It's part of being human, nothing else.

The minute you consider yourself higher than the others, it's the time when you actually finish life. That's the stoppage in growth. I always said, people get fooled by a "tie and a suit." At the end of the day, when you cross the door you're at home, you're a father, you cook, you clean, and you do everything else that they do for you in the office, or whatever. What's the difference? You've been around with me, my drivers, bodyguards, they all eat in the same restaurant, the same table as me. (3:02).

Q: Yeah, they have the beautiful ethos Mr. Keshe that you've bestowed within people, and they understand, it touches them, and it's that mutual beauty between the Souls that they understand. And by being part of that structure they just absorb it, they become it and then it spreads out, and that that is a true Knowledge Seeker, a true beauty that you are sharing.

K- You are in touch with them, you talked to them. They talk to you more than they talk to me. You have seen the way it should be. There should be no...

When you look at the graph on the screen, when it comes to the STM coming in touch with the Soul of the Creator, you don't see a separate line for the Creator, it's amongst those lines. So why should the man be any different.

Q: Thank you for understanding Mr. Keshe.

K- Oh, I understood long, long time ago.

Q: I know, I know it. We have to catch up, we have to catch up, and even when we. As you said, when we think we know we don't, and it's that constant. We're just touching the tip of the iceberg and there's a lot more to always experience, and to know in both, in all the dimensions, it's that beauty of growing, I suppose.

K- You've got to do it yourself, otherwise... I was brought up in a household of maids, or whatever. And my father always said, you have to learn to cook, if they're not there you're going to starve. This is the how it's been. How it should be. (3:04).

When you understand you are part of Totality, you live that life. This is one of the biggest problem we had to start with, with the Belgium and the British authorities. Belgium's wanted securities and everything else. And they told me, you're uncontrollable, you go where you want, when you want, and this cannot be, we can't provide you security this

way. So, we don't need it. Because if it is going to happen, it's going to end up. They were afraid of what themselves, what they're going to do to us, than actually others. You should be able to live amongst people. This is something I learned from my father. Nobody knows who you are when you walk into a restaurant, or you walk into a shop. And you should be like them.

Q: That's a beauty Mr. Keshe. So, is that going, the ethos of the universe of other beings, other souls, this .. comes from this structure?

K- It is. If you listen to one of the Intros in one of the teaching of very earlier on. From a distance now we understand the STM is within the man. The Soul does not see the Soul of a king, or a waiter, or a fish, it sees a shining star. And that's all it is. Because you don't see their physicality, and that's how it will be. (3:06).

Now, the research center of the Keshe Foundation, before we split everything up in different ways, when it was lunchtime I used to cook and take food for the staff, food for all of us to eat together. It wasn't going there for somebody to cook when it was time, when it's there. I used to cook for and take in for us all to share. And that's how it should be. The minute you see yourself different, this is the time when you stop growing. The arrogance takes over reality.

Any other question?

Q: Thank you Mr. Keshe for taking my questions. Thank you very much.

K- .. By the way, Dean, you might be invited to the Keshe Foundation back, next week or next few weeks to take the picture to first landings.

Q: That'd be wonderful, Mr. Keshe. Thank you very much.

Q: .. My question is related to memory from the past time. How can we explain utilizing plasma knowledge in the transmission, or how we can keep the memory from our ancestors and even our past life, or future life? If you have a clue, I will be very happy.

K- I don't have a clue, I know how it's done. (3:08). The clue, the clue-ness comes from something else, but we know exactly how it's done and you can .. tap into the experience, which is received by your ancestors, or yourself through the what I call, the RNA.

Everything, even your ancestors as a mouse during the dinosaur time, can be tapped into. The STM memory is limitless recording space. If man manages to understand how this stacker has got in a way, deeper and bigger, can go back and see the interaction, not see, but to get the feeling of emotion of interacting with dinosaurs, because that is recorded in the RNA of the man.

It depends how you take it back and how much, how you have put a barrier not to remember it. It is a self made "Alzheimer's" of the time. If your ancestors have been witness to the presence of a king, you should be able to, even bring back the visualization of that person, because it's recorded. Everything which passes the ears, the emotion, and

the eye of the man, and the taste of the man, (3:10). the physical dimension of the sensory of the man emotion is recorded and kept in the RNA of man. This is how your DNA keeps its structure.

At the moment, what we call, the study of the RNA and DNA is in its infancy. In the paper written I explain this. But in the future mankind will see, when it becomes knowledgeable, you'll see the different arms of the DNA, but watch it closely, Nano micro space gap difference between one to another. Man only looks at ABC or whatever that structure is, but man has not been educated not to look at the energy field and the space gap in that arm, in that energy structure of the amino acid (AA). Then you understand everything is there.

If in the process of life you receive Cosmic Rays which have had part of emotion of another entity, you still will carry that too. The way you remember a kiss, you will have that information as an emotion, the same thing will be passed on to you, through. You will see the whole of the past, if you wish, in a visual condition as you saw it. (3:12).

Many Knowledge Seekers since the 16th have been through this, they visually explain to you, I read the reports, I talked to some of them. The 20th incursion will bring shock to many, many of you who will be present. It will be an eye opening for those who participate, actually a Soul opening, more than anything else.

The history of mankind is written in the structure of the Soul RNA and DNA of the man, from the beginning of the time. An example of it is, you don't touch a red fruit, why? Because it's poisonous somewhere down the line, somebody ?? ate it and died, and it stayed ingrained in you, because the children watched it and they ingrained it in their emotion, that this fruit you don't touch. It doesn't matter how many generations back.

Q: And we can take in space when we travel all this memory?

K- Yes. No, it's not a memory, it's the collection of information, knowledge. You can make as fancy word as you like. (3:14).

Q: Also Alex said like this, that RNA, the soul of the RNA and DNA can explain this. I was wondering this, if the crystal, and this flower of life, and Merkabah, and star formation ..

K- These are all gimmicks. ..

Q: Yeah. yes (she ignored that he said gimmicks and pursued her own ideas). Is this all the same, of course they are synonyms. That is the storage of information as a memory, this crystal, and Soul, and this is in physicality. But at the Soul level is the same structure, no? But is invisible, untouchable for our physicality.

K- Something like that. (Vague answer - she was not open)

K- Any other question?

Q: .. In the Knowledge Seekers Workshop number 167 studies on the emotions you teach us that, as we understand the value of our emotions, new questions and new ideas will arise about how to deal with and control our emotions. And try not to look at the emotion, try to look to understand where the fields of emotion will create reactions in the physicality and in the Soul, then you will find the way to the Soul. So the essence of change is the essence of our emotions, (3:16). that change as we interact with our environment. That was the quote. The question is, how can we deepen in our understanding of the power of emotion of presence in the cosmic ray creation?

K- You have ?? (your) a presence in every strength, and it's on the point of the observation, or observer, which according to him, or to her, decides your presence, or strength of presence, or what you carry. It's what you perceive yourself to be and what your perceived to be seen by the others, and that's all it is. There's no more, no less.

R: It's a lovely answer.

K- It's very much like, you know, you have two animals in the house. The big one sees you as a boss, and the middle one sees himself as a boss to the other one, the smaller one. Sometimes the smaller one rebels because, "I exist as well," and he barks and runs more than the middle one, which is bigger. (3:18) The middle dog sees himself between the boss and the little one. And one the boss looks at the dog as something, there I lead, and I own, and the bigger dog sees the same thing in the smaller dog. Perception. Are you the small dog or the big boss? But it's the same people, the same thing.

Q: Mehranez ..

I had a question I tried to have the traditional concepts with your new Cosmic knowledge ?? answers. I wanted to ask when this, what it's called, this saint spirit, or Christ, or etc. overcomes a spirit of a man, or a woman. After that his spirit goes, or the whole thing goes. What happens to the spirit originally of that person, (3:20). who was chosen for that mission? Does it elevate as well?

K- It elevates and becomes part of.

You cannot... Tomorrow is the Ascension of what you call it, the Epiphany, sixth of January. I had to explain this to someone in a very deep detail in the past. When you accept a Soul in the level of Prophets, and at the same time you have the STM itself, the STM who accepts the new Soul still exists through the two Souls, but reaches the same level of understanding. And it becomes part of.

At the point of physical death, they don't part from each other, it stays as, because one cannot exist without the other. In a way it's a guest you accept, that it becomes part of ?? you, part of the structure of the life. But each one lives its own existence, its own dimension. (3:22).

Q: Beautiful, and I imagine, I'm sure that as the time goes, the more they remember, people remember that Soul, it adds to its elevation.

K- That's part of the process of praying.

Q: That's the bonus.

K- Yeah.

Q: I have another question, when you talk, I wonder how you are so non-judgmental person, so patient. How could we overcome this natural judgment we have, like, when I saw somebody, for example, the other day, I felt his cheating. I immediately felt that, and how could you control to be non-judgmental, because we have the values?

K- To react, to react immediately. That's my way.

Q: You don't react exactly, I think.

K- I react in a way, in the long term till they show themselves. And when I react it's the time when I don't accept anymore. It's both ways, it depends.

My mother used to say, you're the worst person ever, that you don't react. You have a patience of ?? "no", you know, "no" we call it. And you say. I said to my mom, "mom when things come up, there's a reason for it, why I have to experience this, and what I have to learn from it." (3:24).

But I make a judgment very, very fast, because I see the Soul, and the judgment comes in a balance of the fields, not in the direction of the words. I am very, very patient. I always say, man has the capability to elevate, man has the capability to adjust. And when it comes to a point, that it just become abuse, you just walk away from it. I just walk away. I don't... fighting is. When you fight for something is the time when you lost.

Tolerating is when you say, "ok, I can take so much of," and you wait for the other side to elevate, for the other side to understand, for the other side to be. The same thing happened with what we lost so much in past few months (millions in the fraud case). We were set up by a Knowledge Seekers, preset to be defrauded, and I could see it, but I thought, there is a reason, Foundation has to come to something somewhere because of this. And we'll see.

I did the same thing in my marriage. I watched. I always prayed that it'll elevate, it will change. But when it came to a point it will not change, I walked away. You leave it to them, they find their own way. When .. you set your life that way and you pretend to be something else it's different. This is what it is. (3:26).

As I said too many Knowledge Seekers, the wealth which goes through the Keshe Foundation, I could live in palaces, and a king's life. I never did, because Foundation expansion of the technology is more important than a house for me. When the Foundation is solid there is always a place.

Q: Yes. There is another thing, like when Dean talked about the emotional effects of soul, when the soul changes, the body, the mind changes, it's affected. Like when I proposed deeply, I really thought we have to connect the Souls, and that's our way of doing things. And we started every night at nine o'clock, CET, European time, to connect the Souls, elevate the Soul of leaders, religious leaders and for peace and justice. I was actually in the first, second day, I really felt the connecting with souls everything around. And I was very hyper feeling, I was feeling very much for example, that for example, my mother every year on, needs me and things like that. And even in normal way, ?? ... was that to ?? function ?? so differently. Because all of a sudden, I was in the sea of all these souls and feelings of who needs me and things like that. (3:28). And then little by little, I went slowly. And just to announce that still every night at nine o'clock, European time, we connect our souls, and we pray for all souls living and elevation of political leaders. And everyone adds everything we need, takes a few minutes, but just announce it. And I thank you very much for guiding us through all these years, to this level, that we start to learn, just ABC. I hope we have the honor to teach others. That's the best rewarding thing I can imagine. Thank you very much sir. ..

K- .. The process of what I call, enlightenment of the world leaders and religious leaders, is part of upcoming sessions of the Keshe Foundation. A lot of things are happening in the background for that to take place in the coming time.

Q: Thank you very much. From all the people who need these changes at this moment.

K- I think you need it where you are, more than anywhere else. It needs...

Q: ?? it can hang up to the values. (3:30).

K- They don't know anything else, you can't blame them. It's just, seeing as "ones right," it's very different than seeing as "everybody's right." In time will change.

The beginning of the change of what I call, the abusive leadership has come to an end. It's just that structuring it that we don't go back to the same problems as before, otherwise we haven't learned much. But it has to come ingrained in the structure, in the people.

Q: I hope. I feel like people are learning, because if they don't learn they go again to another color of abuse. So people have to learn themselves.

K- That's what I said all the time. Man has to learn to walk away from killing, it's no use doing magic's. This is part of what we taught about the Gans. People haven't realized why we brought the Gans's and other things. Then in a very soft way, in a lot of teaching subtly, we are putting it forward into understanding that.

Even today, in the question with the Butterfly, understand the fields, understand, do you need to kill? Can you use the Butterflies as a source of energy without killing? (3:32).

Can you... It's just that it has to be ingrained in the structure of the thinking, and not to be so physical.

If we do it, it's (a magic). This is what I always said, we are not here to do magic, and then it's a magician job. Rising a dead, we taught the father how to rise a dead from Naomi.

It's the process of understanding, and it can be repeated. So, it's a knowledge which can be transferred. And there's no magic.

Q: I think with your teachings, we reach a level of, I cannot say serenity, because everybody said, they wish me more serenity. But we kind of get to a level of everything is okay. If there is something bad or good is okay.

K- It has a reason to be good and it has a reason to be bad.

Q: Yes. And it's good for me. I feel like that, you know, kind of being sure of myself in a way with all the faults I may have. But I know even in bad thing there's a reason why it's in front of me. And it's good. I think it's because of your teachings, as the way you give an example all these years. I'm sure.

You know, it gives profounder, some deepness in my knowledge's, which was very little before. So, I thank you very much for this vast know-how, (3:34). a little bit of your part of the whole thing, and I try to be better every day.

K- We'll see. It has to be understood, otherwise becomes a magic and then in the future it becomes what we've seen, a lot of lies in the cover of theology and religion.

Keshe Foundation, it's belief, it's way of ethos of work should never become a theology. It should stay scientific and it should be. Everything you find in the future, don't look at what God wanted. See how God created it. Then it becomes the science. If I was at the time of Christ, I would have asked Christ, how did you raise this one? And he had the knowledge, he could tell, to transfer the energy from my soul to the soul I rose the Soul, not the physicality, physicality followed the Soul. Now you can create the strength of the field of a Soul, as you can create children without the physicality. Now you understand.

Q: ... I wish you all a very good year this year.

K- This year it's going to be a fantastic year. Let's see how many of you Knowledge Seekers very soon, will come to see those who you came to the Keshe Foundation for. From the world leaders to religious leaders, to what we call, Citizens of the Universe.

Thank you very much, I'm due to go into a meeting with some of these intellectual theologians in the next few minutes. (3:36). Thank you very much for today. I hope we all learn a little bit, and I hope you understand what is laid out, as the last week we brought the summary of what we achieved in the past year. This week, we laid out what

the man will, hopefully, try to achieve in the coming years and this year. But we lay the first steps of the man to become man of universe, and travel with a new technology than the old, what I call, fuel based, solid fuel based, and gas fuel based, of rockets, and cars and the rest of it.

Thank you very much for today. Hopefully we meet next week and share more knowledge somehow, somewhere. Thank you Rick.
