

486th Knowledge Seekers Workshop May 18, 2023

(Transcription, Proofing done)

(Auto transcription by Elias)

Ascension of Christ explained; Made up by clergy; Not use medicine - Soul corrects imbalance; Transmutation controlled by emotions; Skilled KS join collaboration; No fear in U; More on Jesus knowledge with females; Handicap children - Soul; Huge amount knowledge given; Jesus man - Christ Soul of Creator; Nuclear explosion in Ukraine news censored; Secret - abolish emotions - transmute; Correct living - business example; Saved 50 years from cheaters; Ahura Mazda - Creator; U is sphere.

ENGLISH TRANSCRIPTION

(:16).

K- Yes, good morning, good day to you as usual. Wherever, wherever you listen to this series of Knowledge Seekers, programs from Keshe Foundation Spaceship Institute. As usual, we welcome you back. And hopefully as usual, we learn a little bit, and we add a little bit to the knowledge of understanding our own Creation.

Today, if you're a Christian is a special day, today is the ascension of Christ. Today is when was said, that he left, and wherever he's gone to, or wherever he'll be going to. I asked Rick to prepare, or show us what it means in the world of Christianity, by the word of "ascension." If we can understand the terminology of it, maybe we can add to it and understand it more. And find out how the word has been abused by clergy. Would you like to read it, please? What it means how it's interpreted. (:18).

R: Okay, from our handy Wikipedia. It's called the Feast of the Ascension. And so from Wikipedia it says,

The Solemnity of the Ascension of Jesus Christ, also called Ascension Day, Ascension Thursday, or sometimes Holy Thursday, commemorates the Christian belief of the bodily Ascension of Jesus into Heaven. It is one of the ecumenical (shared by multiple denominations) feasts of Christian churches, ranking with the feasts of the Passion and Pentecost. Following the account of Acts 1:3 that the risen Jesus appeared for 40 days prior to his Ascension, Ascension Day is traditionally celebrated on a Thursday, the fortieth day of Easter, although some Christian denominations have moved the observance to the following Sunday, sometimes called Ascension Sunday. The day of observance varies by ecclesiastical province in many Christian denominations, as with Methodists and Catholics, for example.

"Ascensiontide" refers to the ten day period between the Feast of the Ascension and the Feast of Pentecost. The Sunday within that period may be referred to as the Seventh Sunday of Easter or the Sunday in Ascensiontide.

In the history, the observance of this feast is of great antiquity. Eusebius seems to hint at the celebration of it in the 4th century. At the beginning of the 5th century, (:20). Augustine of Hippo says that it is of Apostolic origin, and he speaks of it in a way that shows it was the universal observance of the Catholic Church long before his time. Frequent mention of it is made in the writings of John Chrysostom, Gregory of Nyssa, and in the Constitution of the Apostles. The Pilgrimage of Aetheria speaks of the vigil of this feast and of the feast itself, as they were kept in the church built over the grotto in Bethlehem in which Christ is traditionally regarded as having been born. It may be that prior to the 5th century the event narrated in the Gospels was commemorated in conjunction with the feast of Easter or Pentecost. Some believe that the much-disputed forty-third decree of the Synod of Elvira (c. 300) condemning the practice of observing a feast on the fortieth day after Easter and neglecting to keep Pentecost on the fiftieth day, implies that the proper usage of the time was to commemorate the Ascension along with Pentecost. Representations of the mystery are found in diptychs and frescoes dating as early as the 5th century. Hymns for this feast are found in the Georgian Chant book of Jerusalem, which contains material composed during the 5th century

K- Thank you very much. We'll see even an ascension of a prophet has his own dispute. Man cannot agree on their own prophet. When the soul of the Christ ascends. But what does essential mean? The first meaning of it came in the first few lines, if you go back to it. (:22). It says, today, when the Soul of Christ more or less, went to heaven.

There is a very big question mark, with a present knowledge and technology (T) we have in understanding of the work of the Soul, understanding the work of the Universe (U). And that's the big question, where is heaven? Is there a heaven? Or is the Heaven is for all of us when we die we all ascend. When we die, we all have a Soul, which is freed from the shackles of physicality (P) and will take its position according to its strength somewhere in the Universe. As a dust, as a beginning, as a starter, and maybe as a small planet if its gathered enough, that in explosion of the time and place, that it will create its own Dominion in the first instant.

So first of all, does ascension has any more meaning in the knowledge that we have? Or do we all ascend at the point of separation? And the second point is the Heaven. Where does. Where does this place is? Does it exist? Or is our freedom, which is heavenly, from the shackles of physicality?

In so many ways, once we become knowledgeable in the Knowledge of the Creation, a lot of these rhetoric's become meaningless. So when a man dies, where does his Soul go? (:24). Heaven must be a very, very large place. And, according to the other side, the hell must be bigger, because we are all sinners. Or does it mean that the body of the man in separating from the Soul of the Man (STM) allows the man to take position according to his conduct and what has gathered during the cycle of life on this planet?

How many lives have we consumed? And how many lives have we taken to add to it? Are we a collector of different Souls, of the seeds, the animals, the flowers, and

everything else? That during the lifespan on this planet, we have collected. Now it comes to us to put facts, to understand the truth about ascension. And is it exclusivity of those who some try to promote? Or is it collective conduct of the STM after the departure from the dimension of physicality of the man? Now that you know that you can travel, and you have the opportunity to travel from, let's say, New York to Tehran, through the dimension of envelope of the STM, and leave the physicality within the Soul, what do we call this? Is it ascension to Tehran? Or do we transmute to Tehran? (:26). Because the Soul has traveled. Do we create a new terminology on the basis of the past false belief in religion, say so? Does the ascension has any meaning with the new understanding of the Creation?

When you decide to travel to Mars and to another galaxy through the dimension of the interaction of the STM, and you leave no physicality on this planet, have you ascended, or have you transmuted? Would the Mankind have access? Would the Mankind develop the technology where it can detect the position and the place of the Soul of the Christ where he's descended to? Because when he ascends from the Earth, has to descend somewhere else to find his position. Otherwise, he goes through the roof of the Universe and the Unicose.

In this process, in this understanding, Man now comes to understand one step further. But at ?? the point of ascension, as is believed, ?? where, what happened to the Spirit. Did the Soul of Christ took the Spirit of Christ too, what we call, the Soul of Physicality (STP)? And, what was the emotion? But, one of the most interesting thing for us, doing the test in the past year, in Enhancement Unit (EU) has been, (:28). people who came, deliberately, with a wish to be in, to contact, or to have a sense of dimension and connection with Christ. And we saw some of them so touched by going through the experience. Does it mean through the wish and fine-tuning, they managed to connect to the strength field of the Christ, that does not matter where he was, which heaven he was, that still an ordinary man could make contact. Still an ordinary woman, going through the system, with the expansion of the fields of his body, what we call the Soul, could feel his presence, as many said. As one explained to us, the color of his hair, the color of his eyes, his shape, and he ?? wasn't blue eyes.

So, what do, in the world of science of today, call ascension? Or with the knowledge we have, ascension has become meaningless? Does the new knowledge puts a "nail in the coffin" of abuse of the religions, by names and what I call, massive misconducts? This is what many, many of you will come, (:30). and many of the Mankind will come to analyze and understand.

That every single one of you has a choice of transmutation or ascension. What does the ascension mean in that process? What does the ascension bring in that process? Does it mean the one who ascended, does not carry the STP, and it's the end of the cycle of life? That's what we ?? don't understand, and that's what we need to understand. And how we explain this? The whole process, the whole understanding has been, was the ascension part of the process of taking the STP with it, or the Spirit? Or, is this understanding of the death of a man, termination of Totality? Separation from dimension of physicality of the man?

There are special cases, one can do this, one can separate the STP, and leave the physicality with it behind. In so many ways, if the body of Christ was not there, when they went to look for him, did he transmute it? And if he did, (:32). this puts an end to the fallacy of ascension. Because he took the physicality with him. The way you do from New York to Tehran. Then, would we, could we, are there any remnants of his time, from him, that we can connect to, that we can get in access to, where his Soul has ascended to, that we can connect with?

This brings an end to a lot of fallacies and made-up things, 300, 400, 500 years ago, for people to gain reputation, or gain notoriety, by creating something new. And then, creating that special separation from. Making up lies. On basis, without any basis, new terminologies and conditions, that get the others to accept, because they could do so. And, the ascension is part of the fallacies of the Christianity. The same is with what we call, not finding him after three days. So, many of you will not be found in New York, (:34). Beijing, Tehran, or wherever in next few years, as you become mastering the art of transmutation, and then you all become new prophets.

This Planet will have 8 billion new prophets. Because you all can transmute, and all can disappear the physicality, and do it in a fake accident, and three days later do it, and then you all become new Christ's. And then 40 days later, we ascend you, but God knows where the heaven is. Now you understand, science and technology puts an end to mysticism and fallacies of before, what has been created to abuse the Man.

In one of our test, where we have all our volunteers coming to Linz, he can tell us where he's been, what it is, what he sees, and whatever. But the physicality still left behind. But the Soul can see the dimension (D) of the physicality on this side. Has he ascended to us? Or has he transmuted to us? Or has he kept the body behind, but the Soul moving around? So, with the new understanding and technology, new systems which are getting developed, you all have become, you all have the possibility, (:36). you all have the knowledge and will gain the knowledge to disappear the "third day." And wherever we find you, that'll be the new heaven. Would it be on the back streets of Bangkok, or on the high streets of London shop? Depends what is your taste and what is heaven to you.

This comes to one point. This brings us to expansion on the knowledge of the transmutation and transportation. If we bring the position of transmutation on the field strength, if we bring you on the point of transmutation to one place and then you want to go to another, how do you direct the Soul? Or how do you direct the STP? In the world of physicality, if we are going straight, we can stop, turn left. We can stop and reverse back, or we can jump up and jump down, and change direction and position. How do we do this, with the STM? How do we move and hover, and enjoy the position, or enjoy viewing different direction or dimension within the STM? I would like to go to the left, I would like to go to the right, I would like to have the full awareness of the 360 degrees all the time. How do you do that? (:38).

Or do we ascend, leaving the STP behind? Or do we ascend and leave the Soul behind? Then you become the ghost. So how do we, in the space T of today, we change position, we change direction? How do we dictate a new direction? And can I choose a direction to the heaven? And if anybody ?? wants that heaven, you will see Christ in there. I'm most probably sure you will see the father too.

So it comes to one point. What is the method of the choice of direction? How do you change direction, if you want to go from one field strength to another? You traveled on the magnetic field of the Mars, now halfway through you want to go to one of its moons, or another moon, or another position. How do you change direction? How do you create motion and direction of motion? Do you change, you strengthened to land on Mars, but now you changed your thought, you want to go to Jupiter. So, what does this mean? How do you do it? In the world of the flights, you change your flap and you go to the right turn, in the car you turn your wheel to the right. How do you change direction in the dimension of travel, or ascension of your Soul? (:40). Or transmutation of your Soul? What is the technique? What is the method of change of position and direction in the dimension of the STM? How do we choose? And how can we dictate the change of direction? Can be done internally, or can be done externally, or can be done through the emotion of the fields of the STM in interaction with the STP.

As the emotion says, I miss the father who's in another universe or another galaxy. What is the method? What would us will come to understand to do. You're in a dimension of the Soul, in dimension of transmutation, and then suddenly decide to go from New York, to Tehran, you go New York to Paris because there's a nice show in Paris, or a cousin has turned up there, I want to be there.

In the process of transmutation, you have a tool within the STM, which is part of the structure of the Man. Change of strength through the emotion of the STP and in the STM in the direction of the motion will create new direction. What does this mean? (:42). Man has more control over the STP than the Soul itself. As the Soul has a dimension of the strength that the Man, some will be able to master. But mainly through the change in the strength in dimension of the motion of the STP, you dictate the new direction in the dimension of the transmutation and the direction of the motion.

In world of physics, you turn the wheel of the car the right way. In the world of transmutation, you change the field strength, given and taken in respect to the STM, through the creation of the field strength separation and position from the Soul. Very much is like the brain of the Man, how far you are from the STM, in comparison to the STP, creates the emotion of the joy, happiness and the rest of it.

So, Man has to master the change of direction, how you achieve it, for the STM. Otherwise, you're a "one track pony," can only go from Earth to Mars and that's it. Till you learn something, somebody teaches you, another strength will take you to planet Zeus, or you can go to another galaxy. But I do not know how to get there, unless I come back to Earth, put the new strength up in the Soul, and that will take me to the new

position. So you keep on going back and forth, every time you want to go somewhere to Earth.

The change of position, in the direction of the motion of the STM, (:44). is done by the strength, position, absorption and the emotion which is created between the fields of the STM and the STP of the Man. In a way, the inner Soul becomes the dictator of the direction of the motion. And that is only created by the strength of the emotion and the filtering between the two.

If you remember, I explained in some of the teachings in the recent past, that when we want to send you to the Moon, we just don't put you there and tune you to the Moon. We deliver in advance in a different way, maybe part of the strength of your Soul, that the direction and the dimension has cleared for the Soul where to go to. With this method, you can control the dimension of the interaction and attraction. But this cannot be done with all cases. What happens if you want to go to the back of the Moon and the front you can see.

So in a coming time, as we teach more, We show you dimensional directional systems, which dictate, which teaches you how to control the strength of the STP and the STM and creation of the emotion between the two, that leads to transmutation or ascension of the STP of the Man to the dimension, new place and position. Even though you might call it, Heaven. The heaven in the dimension of the talk of the Man is where the Soul is happy to exist and serve. We don't have a corridors of the power, which ends up in the what we call, the oval office, or a red room, (:46). or the heaven. The heaven in the language of Creation is where the STM feels best to serve the rest. So is the heaven for the Soul of Christ, serving the humanity to reach and attain new dimension of understanding of the world of Creation? And where that place would be? Has the Soul of the Christ chosen another galaxy, or is nearby, where he can keep and feed his followers, the ones who connected to him through their Soul. Then they see the path of theirs, stays clean and clear, for understanding of the time when the knowledge opens up.

So where is the heaven? And how can you direct your Soul to that position? Be it the heaven of Mars, the heaven of planet Zeus, or the heaven of another galaxy. Directional transmutation and transportation is one of the key points of understanding in coming up time.

And then, if you reach a point that you can serve best, then you might decide, this is the point where I do not need to change the strength between the STP and the STM, as this is the best place for me to be positioned. Does the STP, and does the STM have learned, (:48). or us to understand, to learn, about their interaction in dimension of the field strength, and not by positioning, and moving in a steering wheel. Where you'll find out, you change dimension and direction instantaneously, and not by turning in possibility of the rollover. The only rolling over for Man has to be to roll out these fallacies, which has been ingrained and we have accepted in our ways of thinking and thoughts.

With the new knowledge, with the new understanding of the world of the Creation, there are no ascensions and no "disappearing act after three days." Because now every one of you has the knowledge to do it. Then we have 365 days, and we have 8 billions, how many ascension days will create on this planet? This is what was said in the Intro, and I emphasize, not for the last time, but for remind you that, understand the science. That no one can ascend you, or descend you, or vanish you, as you are the only one who can do all according to the emotion of the feeling of your presence. This room has a bad feeling, and I do not want to be part of it. So, I shall descend myself to another. (:50). We go for a break, we come back. And I hope you understood the meaning of ascension. And with today's knowledge, the ascension of Christ to heaven has two big flaws. Did he ascend? And where is the heaven? Thank you very much.

<< **BREAK** >> 486 KSW May 18, 2023 (:56).

K- No, I'm here. Just sorting things. Keshe Foundation operations doesn't stop because we take a break. There're things happening in the background. Ok. Go ahead.

R: So are you ready to take some questions then?

K- Can we just remind you about the sessions for elevation of the children's Soul, who've been abused, this month and for the next month, for the abusers. And hopefully, we should be able to do a lot of good. I was asked if there is anything left of what we've been donated, more or less everything has been allocated, has been delivered or is completed the cycle. So, we have no more, what we call, gifts or materials to be asked for. Our donation packages are completed. If any of you would like to make a donation to the, as a goods to the others to enjoy, that process is always open.

Any other question?

By the way, the, the courses for the sessions for the dentists, if you have any dental problem for the trials with our dentists, is still on. And the same is with the salinity. That if you want to change anything in the dimension of the course, and for the doctors to

learn about the... in the clinical trials which they are doing for themselves, to understand more of how salinity affects the conditions like, (:58). what is one of the man's biggest fear, as we've been told, with cancer and the others. And maintaining a, what we call, a balanced field within the body.

The results coming from these tests are very, very interesting. And, it's interesting for us in two parts. One is how the body reacts. Secondly, how we can transmute, or transfer through our system, in four corners of this planet, and change through understanding of the technology, the salinity of the body of the Man, remote. This has an enormous, enormous implication and application, in what we did with, for example, with feeding you. In how the doctors in the future transmute the, what we call, medicine to you. The reason for us... (audio breaks ...)

.. I come through another channel because the other channel...

R: Yes, we just lost your voice there for a minute.

K- Yeah, one of the, one of the systems has failed, just one second please. Okay, so what is important for us, with the test with salinity, (1:00). is not just for you to benefit from it, to change the condition, that if you can change the pH of your body over 7, to keep away from all different conditions. But it's for us to see how effective the transmutation of the materials through the systems, through especially new wireless systems are. And this is one of the main reasons we took this position with the doctors. And what they report us from their cases, (says) that actual salinity of the body of those who are in the observation with them actually changes during the process they are on the system, and the days after.

So, this gives us a very good insight. How we can use the Enhancement Units (EU) for feeding. How you, as we heard in the Intro, we say, Monday between 4 and 6, you can have as much tomatoes as you like. And between 6 and 7, on another channel, you can have as much cheese as you like. And so, these trials are part of completion of the work. And now we have a confirmation through trials done by the doctors and those of you who are volunteering to be part of the salinity. It's not just for you to be helped to stop the future cancers, or future problems with neuro systems, or whatever you think of. It's for us to be able to show, (1:02). and as we have shown, the what we call, the progress in this process.

When we put the trials of the systems for the dental care, we showed the data to our doctors first, what we had, and how much we have 6 or 10 weeks later. And it is part of this which is important to us. When our doctors shared the pictures of what we call, their cases. We look at how things have changed, how effective it has been. Are we changing things? The trial with the tooth, which now is handled by our doctors, is very fundamental. Is that showing that we can change the condition. And how many children's life we can change. Because now the technology is available. I'll show you a couple of pictures. And now you understand how effective this is.

This is what we call, the condition from a child (shows picture). And we cannot do anything with this at the present time. At the present knowledge, what we do, what we have, is, in fact, how we can change these conditions. (1:04). How do we come to, in a way, bring a new dimension into what we call, what has not been available in dental care. And the technology today allows the change. The technology today allows us to bring that condition, which done remote. This is not anymore sitting, taking chemicals, and the rest. But this is restructuring the brain. How to produce and change the conditions of a tooth, or a condition of a child's life.

And you will come to understand, this has huge implication in what we call, the world of dentistry. When you see the conditions before and after. When you see how you change the totality of a condition of a child's life, with what you have created, or what you can create. When the whole condition changes, (1:06). and when we go and search, and we see such a thing is impossible in the world of what we call, present science of dental surgery. How you can change in a very simple way, using the new understanding of the creation of every part of the body of the Man controlled by the STM. Then you come to create and understand how powerful the new technology is.

Where we are (not) talking about one or two. We are talking about a complete change in what we call, the structure of the whole life of a child. When we look at these kind of pictures, when we look at these kind of effects, our dentists will tell you, these are impossibilities to change in the present world of medicine, in dentistry. And when we ask you to volunteer, (1:08). it's for us to understand more of, and how such changes can be achieved in very few weeks, remote from thousands of kilometers away. This is the tooth of a child and you can see it (shows after picture), literally to their flesh. And this is very few weeks later, where the tooth is literally recovering and growing. And when you see the changes are so fundamental. And this is what our doctors and dentists are achieving.

This is a life of misery, pain, tooth extraction. And this is today, a few weeks later. And you walk away for all the problems. How far this will go? Will it become a complete tooth in the next 6 months, 12 months? And would we see the changes? Because if you're a dentist, and if you're an ordinary Man, you can understand the difference between the two. No chemicals, no medicine. Nothing was used. The target of our dentists and doctors is to grow a tooth where it has gone. (1:10). It's been pulled out. If it's possible, it's been the dream of the dentists. And using the new technology by them, I'm sure they will try. As you can see, the difference between the two is very clear. We see new bones, new structures, new covers of ?? teeth.

It's the same for us with the, what we call, the world of salinity. Can we create the condition? Would you like to change the screen, please, Rick? Can we come to the point that with application of the remote, we can deliver directly, for example, to build a piece of wall of a heart of a baby, the way we did with the tooth from thousands of kilometers away without open heart surgery? Can we rebuild part of the kidney which has been damaged and you're on dialysis machine? Can our doctors within the new technology remove kidney stone without any intervention? Do they need to change the salinity within a kidney for the stone to melt? Within a few sessions. (1:12).

And now you understand why we tell you, volunteer. Do you want me to go to multinationals and tie your hand with research? Or do you want to do it yourself and help the others and our doctors to understand? We are not in medical practices. We are in elevation of the Soul, how the Soul decides to change the what we call, dimension within dimension of physicality. And secondly, all these trials is done by the doctors. We are providers of the knowledge. So if you want to see if it works, if it can bring a new understanding for us, volunteer. And opposite to the other researchers, or doctors and institutions, where they go out and look for billions to pay scientists to find out. Keshe Foundation asks you to pay for, as volunteer, for us to learn, for scientists to bring the new dimension.

In the coming time, Keshe Foundation will have access and be part of a structure of one of the largest research organizations in the world. Our research centers from Austria will move out in a very short time. And Keshe Foundation will join and become part of the, one of the largest nations research organizations into space development. (1:14). We have signed the documents and the process needs time. Keshe Foundation has and will become one of the major research organizations, for the support of one of the largest nations on this planet. One of the most powerful nations on this planet has signed itself to develop the Keshe Foundation technology. In the incoming time, they will announce their way and how they do it.

So many of you who are Knowledge Seekers truly in research, will be called up in numbers ?? you, to join us. And if we find your way fits the new research development, you'll be invited to join the research teams of the Keshe Foundation, worldwide. No expenses will be spared by the organizers and our partners in this research and development, as long as it's beneficial to all of us. We have signed ourselves to this agreement. And those who are working with it, they know the process has started. We have appointed our management team to run, and to see this system through step by step. Over the next few months and years, you hear more about what Keshe Foundation has become and what we deliver, according to what we have signed ourselves to. Which means, we are out of the game of what we've done up to now, (1:16). but in a very big way, on the international arena of work, and national levels, for development of new technologies.

If you have, not just because you made one Gans's, you think you are God, but scientific background in different applications of the technology of the Keshe Foundation, we'll invite you to join us, we'll assess you, we just don't take you up because you're a Knowledge Seekers and you made one Gans one day, but it has to be a thorough research, in what we want and we'll pick up on the scientists, to join us. And you'll be part of the National Government Organization and Keshe Foundation joint work.

Any questions?

Q: .. Good morning Mr. Keshe and all Seekers of Knowledge. Today in this class we have a combined sequence of numbers, starting from Knowledge Seekers Workshop 486,

Day 18, reaching 3, 6, 9, where the wonderful Tesla declares that these numbers are the key to the Universe. Our Souls have a Tesla strength, even the wave of a certain force that becomes emotion, laughter and joy, has a force that can be measured in Tesla. (1:18). Can you guide us better about these numbers in Plasma Technology? Thank you for your attention.

K- Plasma Technology has no numbers. Three, sixes or whatever comes to eighteen and nine is what Man has made numbers of. And it works on the strength fields, and the emotion of the strength. And symbolic numbers has no meaning in the world of the Plasma. It's very much... some of us don't believe in number 13, and if you are Jewish in all the hotels, which is 100% Jewish, you always ?? have block 13. In the Chinese hotels, you, some places, don't find a fourth floor. Because number 4 and death have near the same sounds. Nobody wants to die on the fourth floor. And some people believe number 9 is lucky. He's at the end to start from zero. But what happened if our ancestors would have decided there would have been the 10 with the figure instead of 1 and 0. And 11 would have been the beginning of. So, this is all manmade, a way to keep himself busy.

Any other question?

Q: .. Good morning Mr. Keshe. (1:20). The Plasma Science, through the technology, comes to show us that the true freedom is within our reach. But for this we need to have the courage to deal with several inner issues, that bind us to the physicality and to the planet. Something that I feel is a source of attachment is fear. And many times we are so used to looking for protection all the time, that we are not even aware that fear keeps us numb. Can you tell us a little about this emotion of fear that permeates humanity?

K- Fear is what maybe we call, used or developed out of man's need. Would my need be satisfied? Fear of not having food, fear of heights, fear of hunger, fear of thirst. And we have created this for us, as a means of maybe finding our own limitation. And this is, this become an emotion. If you had all the food, if you had a wing, does a bird have a fear of height? Does a fish have a fear of water? We have created these for ourselves. And it's something that in space has more or less no meaning. (1:22).

Will you have a fear of height if you jump off a plane? And would you have a fear of height, if you jump out of a spaceship in the middle of space? Which height, in reference to where? Would you have fear of hunger in the space, or thirst? Will I be fed in this place? If you have learned to live with the dimension of the Soul, and you know there are no restaurants and no water holes for trillions of kilometers away, then you have learned to tap into the fields of the Universe, to receive the energies which, actually you call it water, or banana, without actually having anything in your possession to eat or drink.

So, fear has come out of the Man's, what we call, limitation of understanding he can have, and it's him who has to create the conditions. Become a bird. Does a bird when he flies, keeps on, "oh, how high am I? Can I go down? What happens if I fall down?" Or he just, ?? enjoying a flight of fancy. And it's the same with the fish. Would the fish ever think, "oh, what happened to the water? When is the next one coming in?" So, we have

created as a human, that in the brain of ?? human animals, out of what can bring our demise most of the time. (1:24).

Fear does not exist in the space, if you become the true Man of space. The only fear of the man, ever, even in space, has to be, how far, close do I become to my Creator. And how well I have ?? done served. And that should not become a fear, that should become in a way of understanding. And it should not exist, as it doesn't exist in space. If I throw you out of the window, or you stand behind the window, do you have a fear? Or till I explain to you how high it is?

I was with a very young child, last few weeks. And the child was standing, more or less, looking down, on top of a, what we call, like a skyscraper, very, very high building. And enjoying the view and going from one glass to another. And I said, "this child and this young ?? kid has no sense of height." If the window wasn't there, she'll jump out. It's us who puts that fear in her. It's us who creates that condition. Doesn't matter on the first floor or on the 100th floor. There is no fear, because it's no awareness of position. (1:26). And we learn a lot from children and how we create that fear in them. Because it's the fear within us.

How many of you have frightened your children from the dark? "Oh, it's dark." What about, "wow, it's dark." Dark is greeted, and the other noise, dark is feared. It's us who see that in ourselves, and in our children, and in space, it's dark. And if I throw you out of the spaceship, no parachutes will work. Because, you don't even know where you're going to land, and there is no height, because there is no point of reference.

Any other question?

Q: .. Good morning Mr. Keshe. First question, would our ascension be directly linked to our conduct here on Earth, and at the moment of our "dis-incarnation," would we seek places according to our fields of attraction, which could be the heaven or the hell, as the religions say?

K- Direction of ascension is very funny things to put. (1:28). Because, what happen when your Soul supposed to take position, is on the other side, where you have to go right through the center of the Earth, to go to the position you go. Or does your Soul turn, surface around the Earth, and then you go North Pole, up? Does magnetic field of, or field of the strength of the plasma of your Soul, position, time and space dependent for its point of ascension? So, if I can answer you in a very funny way, if you're in North Pole and you're supposed to ascend, you go straight up into the sky. If you're in South Pole opposite to ascend, do you actually go through the Earth and then go up the North Pole? Or does your ascension come through South Pole going up into space?

So, what happened if Christ would have been on the South Pole, when ascension took place? Now you understand that it's field strength, position, time and place. If the diameter thickness of the Earth is no obstacle for the Soul to go through to the Sun, then you can imagine which position, how many stars will go right through them to get to the

position of his destination, or in heaven. As I said, servitude is the heaven. (1:30). And when you stop serving, you already in hell anyway. You don't receive the ?? rays, to elevate your Soul.

Any other question?

Q: In a past teaching you said that one day you would bring other information about Jesus that we don't know. Are we ready to hear more about these revelations about Jesus life?

K- Yes, very soon. The way we unraveled about Moses and the Commandments, which is the ?? .. Jesus had access to many, much, much more information. But the pleasure of female was more than the pleasure of sharing. He shared some of the knowledge he had with his female companions. And in the future time we see how the rabbis in the synagogue who their wives has relationship with Jesus, used this as a way of declaring knowledge and work.

Some of the rulers of Jerusalem in that time, because Jesus wasn't just a pretty boy, a very handsome man. He was very talkative and he wanted to share knowledge, very much like me. Sharing a knowledge of Creation is unlimited. (1:32). And when you enjoy the presence of your partner, and you're still in the realm of showing what you know, Jesus shared a lot of knowledge he should have shared with his disciples and other people, with the pillow mates, and they (it) made sense a lot to them. That's why they loved him so much, because of the knowledge. And some of this knowledge in a pillow talk with the real husband, was given to their husband, but they were admiring the lover, which was Jesus.

And he didn't companion poor and ordinary people, he companioned the richest and the wealthiest and the influential. And some of these influential people, the knowledge they gained through their wives, as the lovers of Christ, then was used in the history of what we call, Judaism. And some of it became science and knowledge. In the future I, the same as we did with the Commandments, will show how, actually Christ shared a lot of knowledge. And, but he enjoyed to share it with women than men. As they fell in love with him deeper. And he enjoyed being loved. And he shared a lot of knowledge, huge amount of knowledge, with his female companions.

Any other question?

Q: Dean .. Thank you, Rick. Good morning, Mr. Keshe. (1:34). Mr. Keshe, you spoke today extensively about the teeth. And I know the emotion that this causes within children, because I experienced this myself. So, and I know that if you have something like this, and you have a physical appearance, how it affects you. So it's not just teeth. This is any bodily function that humanity has. And unless you have this condition, for others it doesn't exist. So for the ones that have it, it does contain a very strong emotion that affects your whole life. So, these physicality's that we carry around, they cause us all sorts of conditions that we have to be part of. By balancing this out and taking this emotion away, it will greatly enhance the children of humanity to experience a much

more functional emotion. So, I know how beautiful this will be once this takes place. Is it very much also like the transmutation of a body, as it would be the same for a tooth?

K- What do you mean by that?

Q: Well, we say it's Ascension Day today, Christ ascended, and all these sorts of things. A tooth is very much has a Soul. So it has the same capabilities as any prophet. It can come into the matter state, function, and then go back into a plasmatic condition. So, it has the same properties as any prophet. So, is it like an ascension? Is it a transmutation of a tooth? (1:36).

K- In the case of a tooth, we create condition through the Soul. And as everything has to be balanced, the process transfers into the physicality. We don't sit deliberately to grow a tooth or repair a tooth. We sit to satisfy the need of the Soul to have a what we call, balanced field. And if that is taking the pain out of the body of the man by creating a tooth, where you have to chew on your gums and with the pain of it, that ?? won't happen. This is what I keep on emphasizing. And Knowledge Seekers and the world outside Keshe Foundation doesn't understand. We are not in the game of pharmaceutical. We are not in the game of medicine. We are in the process of the expansion and elevation of the Soul. And this is what no one wants to understand, because then they find out that we are attacking for nothing. We are dismissing for nothing.

If you have a tooth missing, if you have a cancer, you're suffering. If you have a problem with your kidney, which causes you disbalance in the fields of the interaction between the STM and the STP of the Man. And then you bring it to where it actually started through the interaction of the two, and you fix the problem. You create the tooth. You get rid of the, God knows, kidney stones or cancer. These are the secondary effects, not the primary set to create. (1:38).

Magnetical field and Gravitational field creates the mass. Then, in respect to that Inertia, then you create the secondary condition of the weight. If you understand this, understand that in the world of the Creation, you could have a thousand tooth or teeth and you can have 20 kidneys and you'll be happier than having one. But would all of them be malfunctioning or would they create you more pain? Or would they create you another condition of suffering? It's not that with the new technology we cannot create anything. With the new technology we understand to create the balanced fields between the STM and the STP. And the rest follows by itself.

A lot of you go through, a lot of men, especially women go through plastic surgery, to gain a feature that they think will look good for them and they want to look. If our doctors become knowledgeable, we can do a beautiful plastic surgery job through the STM, with everything perfect to the satisfaction of the STM, where the STP will adjust itself for it to show. As I said, you decide to have a blue eye now, (1:40). and in the afternoon you are with a lover who likes a brown eye. You change it to brown. And in the evening, you are with another person who you want to see, you're I'm not racist, he's black and he makes himself black to appear the same. This now is at the reach of the Man

with his knowledge. It's just Man has to understand how to control it and how to use it. But, would the color of the skin of a black at night ?? would be to the satisfaction of the STM? Or it's just that the STP wants to show itself that it can? Then you understand you failed.

Q: .. I don't want to really speak about myself, because it is for others. However, my experience was that, another Soul... I had a perfect formation of my tooth, and another Soul decided to... to take this away by an action in a school yard, a playground. And... was that Soul...

K- Did you knock it out or did you break it?

Q: It was knocked out by a catapult. So, I had ... I was...

K- In an English private school I presume?

Q: No, it wasn't private school, this is a very normal school. And, I was tapped on the shoulder and I looked round and someone already had this catapult pulled and let go of it, the stone hit my tooth and cut it in half. And it affected my whole life, in strange ways. But was the Soul put there for me to experience this? Because, yeah, it's a little thing.

K- You're not expecting our dentist to grow it for you, are you?

Q: Yeah, but now it's moved on from that now, Mr. Keshe, where the dentists have interacted over years and changed the condition drastically and caused me a lot of other conditions, (1:42). where they've done things that. Yeah, a lot of trust has been taken away by what they've done. And I've had to live with that for a long time. But it's affected me. And I have to admit that, "A" to myself and then to others. And it's such a small thing. It seems so ridiculous. This is why I was trying to explain that for the other children, that child you've shown, it was a much more traumatic and physical thing. And I feel for that Soul, because I know how that affects everything that that child will have within its structure of, and this is just the teeth. You move on to the other bodily functions that we all as a human beings, we don't have certain conditions. And so when the others, we see it, we see the pain it caused, but we tend to, unless you're directly connected, you sort of pull away a little bit. And so there's an energy transfer that occurs, whether it's magnetical or gravitational. And this is the same with all body functions. And I think a lot of this, there's very few people, I think, walk through life totally with nothing. There are a few, but not many. And for those that do, are they in a higher position? Are they reaching a different position in their Soul level?

K- Purely lucky.

Q: Purely lucky, okay.

K- And you think they don't have (problems), they still do... My mother used to tell, I used to tell to my mother .. I said, you know something? If there is no problem at home, you put a cup of water on the edge of the table, and you knock it off, and you start worrying, what happened to the cup, if I wouldn't have put a cup there? I didn't have to clean, and the rest of it. So, when people always create that "cup," and they just tap it to go down, (1:44). that they have something to worry about.

R: Isn't there a Jewish saying, Mr. Keshe, that they say, you're not married? What do you do for aggravation?

K- Yeah, this is part of life. But we are not in people's lives to understand that they have nothing, and never happen anything to them, that they have no worries.

It's very strange. We were talking about this some time ago. You know, in the West, in the magazines, they glorify these very slim girls, and they brush them to show how thin they are. And it has caused a lot of social problem for other girls, for young girls who want to be the same. But if you go to the countries like Thailand, China, and the rest, the features which they put as a dream feature in the, what you call, Western magazines, is a daily life in hundreds of thousands walking the streets. So those who live anorexia life and they want to be so slim, when they go to these countries, they might literally suffer so bad that, how come this nation is so thin? And we glorify the Blondie with a thin body on the Western magazines to show that's how a people's life should be. How many of our children, literally, in thousands are suffering because the media has chosen what we call, "figures" to fit that cannot be achieved, and how they brush them. And how many of them live in agony, not eating food, (1:46). going through bulimia and the rest of it, just to see that I was a perfect, I'm not perfect.

But every child in any shape or body is perfect. How Western media, or magazines or publications have created so much disease conditions with children. Some of them even take their lives because they can't have the shape of the body on the such and such magazines, where on the streets of Bangkok and Beijing and other places, this is normality of ?? . And when you walk with these ?? human bodies and these people in these environments, who actually have the body, you find out they're full of diseases and conditions and everything else which goes with it.

Just because your eye looks perfect outside, doesn't mean inside was perfect too. We create these conditions. We have created these false images. And not everybody, or some people, have never had any problem, and they all look happy. I think that percentage is absolutely zero, in the life span in the life of the man.

Q: Mr. Keshe, you said that every child is perfect. That's a beautiful thing. And so when we understand that, when we realize that the perfection is already within us, and we don't... what we reflect out, what we need to show to others, is an emotion with inside ourselves?

K- I have a philosophy and I work that way. And I'll leave it to be understood, because I never speak about it. (1:48). But in a way, you live through it, but partially affects you physically or emotionally. Is, if you have a child who's handicapped, if you have a child who is autistic, do you see the physicality outside? Or have you learned through the teaching to communicate with the Soul? And if you can establish that way, to communicate with your child through his Soul, would you see any imperfection in him

anymore? Or would that condition lead for the Soul of the child to perfect the imperfection in their physicality?

We try to get children's physicality or illnesses fixed by medicine and operation. But the only thing we don't do, we don't go into their Soul to fix their Soul. Because maybe Soul that needs that imperfection, for it to receive what it needs for next elevation. But when you speak to the Soul, you don't see the imperfections. You don't see what is not there. Many parents with autistic children tell you, oh, he is this and that. Be it. Enjoy the beauty of what it is. But it's your problem. You have to learn to communicate with the Soul. And I've taught many ways you can do. Then you see the beauty of your child, and the physicality, in public or private, is irrelevant. And if you can establish that connection of the Soul with your child, then you'll find out that maybe you went through the elevation of the Soul communication and interaction with the Soul. (1:50). The physicality will fix itself.

This is why I keep on saying, most of Knowledge Seekers will not comprehend what it means is, when you create the children of the Soul, there shall be no imperfection. Because if you see as an imperfection in physicality, communicating through the Soul, you understand the reason for it. And you admire that what is imperfection is a beauty. And maybe today is there and tomorrow will not be there. Because your Soul transfers its emotion to the Soul of the child, that this, what you suffer with, bothers me. So, for the love of you, the Soul of the child change the physicality, for you not to suffer. And this is why I call the next generation of the children of the Man, born through the ethos of Mitra, will be perfect.

Q: Yeah, thank you Mr. Keshe, that's beautiful. May I ask a question?

K- It's reality is not beautiful.

Q: Yeah, I know, I know, I know. May I ask a question Mr. Keshe, if you could please? So, if a Soul takes another position, so today we're talking about, we've spoken about the belief system of theology and Christ, and that Soul has taken a new position. Did that Soul have physicality issues, that would have effected it in any way, or was Christ of a different construction? Or was he just, he was a man that had the same as any man?

K- Christ was the man, as a man and no different from any other man. He only understood more interaction with the Knowledge of the Creation. It's the only difference to what we call, Prophets of the past, or scientists. (1:52). They unravel another step in the cycle of the Creation which is already there.

I was explaining this very recently to a Knowledge Seeker. In past few weeks and months, a huge amount of knowledge has been released, which with it needs a lot of understanding. Not to you, but in a way for us to see what needs to be done to bring Man to the new level. This knowledge is far beyond the understanding of the Man today. But we teach it, but you don't understand it.

In the teaching of today, speaking about the, what we call, ascension of Christ, I have given to you some very precise, detailed information, which I promise you, at this moment of time today, even if you listen to this teaching a hundred times, you have not, you will not be able to understand. To you it's something, "oh, this is what I know." But, if you listen to this teaching, about ascension in 10 years time, plus what is going to be added on the knowledge, then you see, "ah, this is what he meant with that one there."

We release a lot of knowledge, for elevation of the Soul. We release a lot of detail, precise "know-how" of how to do things in the world of Creation, in space, whatever you call it. But Man is like a blind, does not see the light. What's the use of explaining between this difference between green, yellow, and whatever light you have? (1:54). And this is what it is.

There is huge amount of knowledge, is passed on to you as Knowledge Seekers. And, what you call, in time, like a lot of you go on 140th teaching, 5 or 7, 8 years, or some of you go on the 200th teaching and find out something new and you go and tell people. In the future, people will listen to this teaching of today, understand what we taught about the Soul and transmutation transportation of the Soul, what you call, ascension. And I can go through the teaching of today, two second of it, pick it up and make you to understand in two, three hundred hours, what that two seconds meant.

Q: Hi, sorry Mr. Keshe to stop you. Carry on, sorry, carry on. I shouldn't stop you.

K- Carry on, no problem.

Q: So I know exactly what you mean by, well not exactly, but I understand what you mean by this, because I've experienced this many times, and I think many Knowledge Seekers have. Where we pick up some of the teachings, some of the things that you say, and then we go back and we understand in a much different level and it's according to our field strength and our experiences that we have, then we gather the knowledge and then we go back and then as you said we understand it in another way and it does mean that sometimes it's in a totally different way and it's almost like a gravitational magnetical, it's almost like a complete flip of knowledge. And yeah, it just constantly grows. I know many Knowledge Seekers experience this a lot, a lot. (1:56).

K- I was in a meeting very recently with most probably, not necessarily powerful, but influential man for what you call, decision making of a nation. And next to him were two scientists. And I tried to explain to this man about the decisions you make, if you understand the technology, what we're talking about on the table, will effect your nation in next 10 or 15 years. So you have to make decisions on this table, in what this technology is going to do to your nation in 10 or 15 years, even though it will look to the people today, what you are doing for next 10 or 15 years is irrelevant. Because you've seen the knowledge, you've seen the technology, and you know it'll bring relevance, and it'll bring changes into the life of man in 5 or 10 years. So you plan for next 10 or 15 years, knowing what knowledge is on the table.

And he could not... he understood, and the scientists next to him were shaking their head, this guy is not understanding what you're telling him. We know what you're talking about. The changes which the technology will bring, in the decision making and financial structure of the nation in 10 or 15 years, what you decide to them stick to, even know what is to come, is wrong. This is what we have a problem with. (1:58). Knowing what is to come, but fear of others not be able to carry, then you carrying it, that the others to join, is one of the biggest problem in the structure of our lives. Does not matter a family, does not matter a nation, does not matter whatever.

In... we share the knowledge and the fear of what I call, grasping it and be able to bring it to the next step, is one of the biggest problems for a structure like ours, in the next 10-20 years. In next, maybe 12 months, maybe 6 to 12 months, when the Keshe Foundation becomes one of the prime structures of the science and technology, the way we see it, it's on the horizon to come. Many world institutes, many scientists will go through these teachings, and spend thousands and thousands of PhDs and doctorates to decipher every word and what it means and implication of it in the world of the science of the Man. And when you get to that point, then there is no question of what somebody decided, because he had the fear of how to translate the, or transfer the knowledge to bring a new effect, then he might lose his position, then what actually will bring, and it shows and strengthens his position.

We start giving you a lot of hints, we start giving you a lot of readiness to prepare the Knowledge Seekers for what is to come. (2:00). And it is not that it might come. We have signed ourselves and the nation, that has signed themselves to us. And we are doing it in a very slow pace, step by step, even though we passed many steps before. But we're ready for that change in a coming time, very, very short time. The top administrators and people who run the Keshe Foundation have already engaged into this change.

And then, most of this knowledge will be deciphered in public. And it will be taught in public, in the next 5 or 10 years. And how much our present world leaders will come to accept and to change. And how much of it is there for them not to have the fear of their position, to bring that change. The Keshe Foundation top management team, people who work very close with us, already going through preparation for this. And in the next few weeks and months, we start preparing you as Knowledge Seekers to be ready and prepared for what is to come. And, it's not as a talk, as we have signed ourselves into it, with one of the largest, most powerful nation, or leadership on this planet. (2:02). It's just that, we have to go through a position of transition, and, they have to understand, and somewhere down the line, in the next year or two years, building the trust and working step by step. We're already engaged into this change.

Q: Thank you Mr. Keshe. I know how you spoke about the leader, and understanding his position and how difficult this can be for, you have this strength within you and you feel that you are in a position to help others, or to give to others and it becomes an addiction. And then that addiction grows, and then it's being able to release that, so that you do become more of a giver by doing that. and then you give more to the nation, you give to the Souls of the nation. And when you start interacting on that level, then you, as you've

spoken about earlier, when you take a new position, and if you have enough field strength, then you may become a planet, or maybe a sun, or maybe a galaxy. You have this ability within you when you interact with the Soul of Man. And this gives you another position as an eternal being. Thank you, Mr. Keshe.

K- Thank you. As Knowledge Seekers, we inform you in totality. We prepare you for what is to come. But this time around, (2:04). we leave it to the nations to announce what they have brought with the knowledge of the Keshe Foundation. And, this is to come in and to come out as a knowledge of the Foundation and the world as a whole, as Knowledge Seekers you contribute to what you believe in. Technology in exchange for Peace. And we have signed ourselves to it. And the nation has signed themselves to it through the structure of leadership, through this process. But they still want to be safe. They still want to see more. They still want to do things in the small steps that it makes sure that the nation is solid on what it shows and brings. And we are there to collaborate and do so. At the top. Management of the Keshe Foundation now working day and night, in that way, in past few weeks.

Any other question?

Q: .. With the ascension, is there a connection between our Soul and our Spiritual "Sun"?

K- Explain the Spiritual "Sun." (2:06). To me, the Spiritual Sun is the Creator, if you put it that way. So we're all connected to this. We're all part of it, not connected to it. Connection is different than being part of it. You know, I say, I know such a person, but I'm the son of such a person. You understand? We are all the sons, not by knowledge knowing. So, it's us to accept our position and understand there is no limitation.

Q: Also, through my studies and that, the Christ and Jesus were ... has been indicated as two separate individuals. And, and during Jesus life, the Christ worked through Jesus, a bit like, you know, the Buddha working through Gautama?

K- Let's, let's, let's explore this a little bit, you put it on the table. Jesus is the physicality of the Man. Christ is the "Soul of the Creator" within the STP. It's not going through, it's the same. If we understand this, then we understand we're dealing with the same person, the physicality of the Man or the STM.

And this has been misinterpreted and played with a lot. It's like "so-and-so" and such a job. (2:08). The job goes with Mr. so-and-so. You understand? So, when we talk about Jesus, is the man, physicality of it. When we talk about the Christ, is the Soul within the man, which is connected to the Soul of the Creator, which we all have the access of. We understand, always been there, but we denied ourselves to it. So, is your physicality and the Soul, which is within it, belongs to somebody else or is something else? And if we clarify this, we clarify a lot of things in the world of Christianity. Where Jesus is the man and Christ is the Soul of the Creator within the man.

Q: So, in your understanding, is the Christ the love of the Creator?

K- He's the Creator, he's not the love of Creator. He's the essence of his existence.

Q: Which is in, within all of us, everyone of us.

K- Yes. Of course.

Q: So, so when there's joy in our hearts, He feels it. When there is pain, He feels it. He feels everything, yeah.

K- Yeah, because it's us, it's Him. You see, this is the part where money making took over a lot of things with Christianity, when they found out they can make a lot of money out of it. Especially as we see after third, fourth century. ?? especially in past 30, 40 years, Vatican has spent unlimited amount of money to destroy all the books, (2:10). or collect the books and hide them, or any article which does not comply within the Vatican wishes and what they want to indoctrinate. It does not matter what religion, and it doesn't matter which sect of Christianity.

As you know, there's a summit meeting of European leaders in Iceland in past days. But none of you knows the reason for this meeting. It's the first time for a very long time, the Council of Europe has been called in Iceland for the crisis in Ukraine. How come this week? How come in such a hurry? How come the knowledge in the background is not open to public, why the Council is meeting? One of the time part of the Council met was during the growing of the Russian nuclear reactor. How to prevent, how to protect Western Europe and most of the Europe from the fallout of Chernobyl.

The Council has met in a hurry for the nuclear bomb shells, which have gone in Ukraine last week. (2:12). And most of the Western world has been kept, especially blind by this. When we saw the first pictures of the British showing the Ukrainians these shells some weeks ago, I warned of a nuclear disaster. And this nuclear disaster has happened last week, but none of you is aware of it. The reason being, one of the countries, which is on the main line of the fallout is Berlin. IAEA in the past, even 48 hours, shows high level of radiation increase in Western frontier.

Q: Is that the bombing of the nuclear power plant? Is that what you're talking about?

K- No, no, no. Some people... We became aware of it the minute it happened. I was informed by the, what you call, nuclear intelligence, that we have, we are on the verge of a nuclear disaster. And, Keshe Foundation has declared his position to the authorities, that we are ready to react the way we done in Fukushima. But, the Council of Europe leaders, now in Iceland, have tried or see, how they will break this to us, because they recognize it could be limited area. And in over time, maybe in 10 years, 5 years, we open it up after it happened.

The British moved all these tank shells with nuclear, what do call ?? radiation ?? (2:14). into Western Ukraine to be used on the cities in Russia, or in the front line. And as usual,

British are hold with what we call, Russian ?? loved people. The position of these ammunitions were released or was aware of, or the Russians tracked it. It doesn't matter whatever you put on it. And the Russians with two supersonic missiles hit the (ammunitions) depot last week.

Q: Oh yeah, I heard about it early today...

K- If you look at the cloud, .. is very much a nuclear cloud. If you look at the pictures which are coming out of Ukraine, satellite pictures, we see fire within the center of the mushroom, which shows a high temperature meltdown. When you burn something, it goes. But when you see heat right in the center in the mushroom, it brings a lot of attention into the whole process. I immediately responded to authorities of Keshe Foundation on the "stand-by", we have the materials, on stand-by to deliver, as we did, January of this year to IAEA.

Many, many casualties of this will come. And what we've seen in the past days, two days or three days, we see robots in this military base putting the fires out and no fireman. We don't see any personnel in this area. (2:16). And everything is done by remote machines, fire extinguishers, which is used for nuclear and biochemical power explosions.

Q: Terrible news Mr. Keshe.

K- It's a fact, Fox is keeping it off the line, because Europeans and Americans don't want it to be known. But as Knowledge Seekers on the front line, Germany, Berlin, coming down to Prague, to the point, use heavily, and measure the gamma radiation on your, what I call, environment. Use extensively, Cup (of Life) number 2 Gans's. Mix it with Magnesium. And use the waters of it. Wash your body and everything else where it need be, if you see high level radiation. Gamma radiation in this explosion is double to triple normal in past week. Because Knowledge Seekers, we are responsible for you. Try to keep your children inside. And make sure most of the vegetation, whatever you use, vegetables, fruits or whatever, especially if you buy it in open markets, are washed with Gans 1 and 2 mixture water. And always add a Magnesium to it. And be prepared.

Q: Will the rays effect us here in Australia? (2:18).

K- We expect flow down line into northern France. Italy will be most probably partially, but depends where the wind takes it, or will it blow back into the Kiev. But at the moment Berlin is on the alert for us, especially if you are a Knowledge Seekers in Berlin area, down the line. Take the map, look at where the explosion is, look at the wind flows in past few days. Even the wind charts have been adjusted not to show this in many, many things.

So, it's not bringing you a fear, it's just a knowledge you have to have, like the Corona. In the problem area on that side, you're on a higher alert because this explosion is very much down the line for you. And continuously, for at least the next at least 6 to 10 weeks, use Cup 1 and Cup 2 Gans's. Produce as much as you can. And mix it with Magnesium,

tablet of Magnesium in the water, in Gans water, very small amount. And keep yourself very, very safe from this. and keep your children as much as possible indoors, or away from the open fields radiation.

Q: So food, food contaminated, food...

K- It's falling, it's a fallout. It's a massive. We see in the report ??, supersonic missiles hitting. You see the first explosion and the heat inside it, and the mushroom cloud. (2:20). You see it, we saw, I came to see this within minutes when it happened. And as we stand advisors to some parts of this structure.

It's your job to protect yourself. It's our job to inform you as Knowledge Seekers. We have a heavy number of Knowledge Seekers into that side of Germany. And all the way down the line, ?? sorry, Berlin and down, follow the windfall, in northern France, part of Luxembourg, Holland, Belgium, right across, West, sorry, South, East coast of United Kingdom, possibly up into Wales. Depends how the wind changes and how the flow we see. When we had, what was our biggest fear of a nuclear explosion in Central Europe, in past week, through...

Q: We can only blame ourselves Mr. Keshe, the British supplying the weapons that caused this problem. You know, and of course, you know, when there was a time to negotiate the peace, the Europeans didn't want the peace?

K- No, the thing is, in a way, this has two sides, it's chaotic. If these individual shells would have been used in different part of Russia by the Ukrainian joint forces or whatever, we would have seen massive devastations in different part of Russia. Or in the Ukraine part, which they were hoping to gain back, they would have bombed themselves again to it. But, now there's a very tight lips on this one. (2:22). And I'm sure this is not all the ammunition, there's more somewhere else. We'll hear about this, use of these things, by the armies, Ukrainian army.

But at the moment, we just inform you, Knowledge Seekers. If you live in that part of the world, be prepared. Keep yourself very tight with it, buy radiation detectors if you can, and measure continuously the standard level and the higher level, if it comes to your way. And just look after yourselves. There are pictures of it on the internet. I can go into details, nuclear explosion, you can see it's a different than a standard explosion.

R: It's quite hard to find information on it right now, because Google is screening it quite, censoring it quite heavily.

K- Yeah, we know. I can give you pictures. I can give you, we actually measured the heat in the center of the top.

R: One article talked about, it's about 500 million dollars worth of weapons, basically, so yeah, there'll be a lot of heat, I would think.

K- No, it's a radiation heat, it's different than the normal heat.

R: Mm-hmm, it's so much of them together in one place.

K- Yeah, yeah, but just to be safe Knowledge Seekers, even those of you who live in Kiev and that side, try to produce as much as Gans's of Cup 1 and Cup 2, you can use, add Magnesium to it. Because if it's inhaled or digested, it still can take it out. (2:24).

Q: Now, I'm left whether to thank you for the good news or bad news.

K- In a way, it's not the news, it's the way it has been done. And the British were trying to get rid of the problem, they had for years, they didn't know where to dump this. Now the whole Europe will get the fall out of it.

Q: You know, they talk about Russia compensating Ukraine and rebuilding it, and that, the British should be compensating Europe, in my opinion.

K- When I had this news you were talking about, it made me actually laugh. Who is compensating Iraq, Libya, Palestinians for past 10 years or whatever? How come the Russians have to compensate and not the British? Don't forget there is a court case which is completed. They're trying to duck and dive with the past, God knows, decade plus, for the European nations to pay compensation to the Africans for the lives they took out of Africa as slaves. They were convicted, they lost the court case. And after decades, they're still battling not to pay. Compensate for the life they took out of Africa. When it comes to...

Q: And the resources they have stolen...

K- Yeah, but either way, it's, what you call it, now this situation in Ukraine brings out a new dimension in the game. (2:26). And as I said, I wonder how the European leaders will end up in Kiev in coming times, till this is settled. It's going to be in the air for next three months and God knows where it's going to sit. It's a clear nuclear explosion. I've studied every second of its rise, heat temperature, and as a nuclear physicist, it's a clear, clear, what we call, nuclear explosion.

Q: Is there some sort of implosion device that can minimize?

K- We announced of being ready to IAEA for deliver material last December. When the problem was lighting up on the largest nuclear power station in Europe. When there was a problem or possibility. We have declared our position to the Chinese government, readiness to deliver if Chinese military decides to intervene with the delivery of the material to contain this radiation. And IAEA has access to the same.

But news ban on it and the control is their way. My job as the head of Keshe Foundation nuclear physicist to warn our Knowledge Seekers in Western part of Europe. To be ready and to, not to be ready, please start protecting yourself. You have the technology, you

have the knowledge. (2:28). And buy a few detectors and see if radiation in your area has risen, no where, or is keeping up above. Then you know how to protect yourself.

Any other question?

Q: .. You know, there is something I read a few times, some places, it's called Trinity. It is Father, Son and Holy Spirit. Is the same thing as the Soul, physical Soul and the physicality?

K- More or less.

Q: Is it correct?

K- More or less, depends how you read into it, how you want to interpret it.

Q: Okay. And then another thing is, I saw an interview, they were, this parent, they had a twin, and the twin, they had a genetic disease, and from the time they were very little, they constantly had conditions, they had to be hospitalized, and the doctors told the parents, by age of seven and eight, they're both going to die. So these parents were very Christian and then they were talking to their parents and the mother said, "I got to the point that I told God, "They are not mine, they're yours. If you want to take them away from me, you can take them." And then talking to the father and the father says, "The same way Abraham was given, was told to sacrifice his son. And then God, and he said, okay, and then at the end, God gave him a lamb to sacrifice." (2:30). So, they went to church and the whole community knew about these two kids and they were very, every Sunday they would pray for them. And then when the mother at the church, she said, "when I said that, I said, God, do you want to take them? Take them." They were talking to the kids. The kids, now they're 14. And the kids were saying, "At that point the disease, we felt the disease left our body." And then the mother said, "I asked the Holy Spirit." So, my question is, how this thing happen? What is the logic behind it? When something like this completely disappears and the children who were supposed to die, just completely become healthy?

K- Good morning.

Q: Good morning?

K- We do this with our Enhancement Unit. Mother does with her Soul. Nothing, no mystery to it. She has given birth to them. And in a moment of position, time, and emotion she releases energy which corrects what she created with, and in the, with her own creation with the other two children.

This would have been a mystery 10 years ago, 5 years ago. But now you understand the power of the enhancement, the power of enhancing the Soul. So it should be no mystery how does it happen. You do that with a tooth. We know that people with different conditions. But, we have to fine tune to find the right strength, mother created two. (2:32). She had direct access to the strength to change. When you are with the Soul, it changes. Now, all these things are... what you call it, should be to you as Knowledge Seekers straight forward, you should understand this. And the only way you can. You

give me a brain, I created any man, any color, or shape you like it to be, in the dimension of physicality.

Any other question?

Q: .. Hello Mr. Keshe, if possible, please talk about the effects of Nano coat, and he calls it 'Eddy-Carnet'. I think he means Eddy currents.

K Eddy current, yeah. What about it? What do they want to talk about?

<< Problems with the microphone of the Knowledge Seeker >> (2:34).

Q: .. (2:36). Is the Keshe Foundation going to release new reactors soon, meaning stronger type of reactors or systems?

K- We are ever developing. We are very... we are forever developing with different Knowledge Seekers in different ways. And depends what you call reactors. There is a lot of new knowledge. What you see in the front is about 5% of what is actually developed, that is getting developed in the background. And one of the ways now, is that we do not release our technologies in the hand of public. Where we centralize them for all the public to be able to use, doesn't matter where you are. The same with the food, the same with the energy, the same with the space, the same with agriculture and the rest. Centralization to deliver is one of the advantages that we cannot lose it, and we cannot get it abused.

Q: Good morning Mr. Keshe and everyone. Are we ready to raise the body pH to 7, we can do that? (2:38).

K- Yes, we have done and we are maintaining. Our doctors are doing it for past few weeks, yes. This is the trial which was announced last week. A lot of people look for 7 plus, especially if they have specific conditions. And, after a while, yes it can be done and we develop this technology to do so.

Q: .. Hello, Mr. Keshe. Your books number 4 through 9, will they be published for humanity?

K- When I get the chance, yes. When I get the chance, yes. 4 and 5 are fully written, 6 is half done. 4 was completed before we leave Belgium in 2013. I gave the book to Dirk Laureyssens, because he had a habit of reading in the book three, four times, coming up with understanding of the ideas and what needs to be drawn. And we went through it a couple of times and, as I knew we were going for exile out off Belgium, I went to him and I asked him for the book and all the files he ever had on Keshe Foundation, and 2 terabytes of hard disk and I sat there with him. And we wiped out Book number 4, that will never come in public.

Q: .. (2:40). How can the Eddy current effect being increased in conductive metal with plasma, if it is possible?

K- If you understand what Eddy current is, or what the way we understand it, in the Plasma technology can be used, but we call Eddy current, magnetical fields, or what we call, gravitational magnetic fields in the other pole. The reverse current flow. We don't have a. We have a magnetic field flow, so in Plasmatic Eddy current which is a flow of the Plasma, reversal direction of consideration, or what we call, reference, is always measurable. One cannot exist without the other. And the same way, if you know how to implement it, you can change it into increasing the Eddy currents in the matter state. Which increases the flow of the current in the other direction itself. The more you pull from one end, the other side has to fill it up.

Any other question?

Q: .. Will we see extraterrestrial replicator type technology? The technology which creates matter from MaGravs Plasma energy in space. I heard that scalar energy of Nikola Tesla has infinite speed just as the MaGravs energy. Can both of these energies be utilized together?"

K- Watch the space, watch the space. (2:42). As I said, we are going through this process which has started, and as I said now to many Knowledge Seekers, and I repeat it till all of us understand and comprehend what is happening. With the new Keshe Foundation technologies, you have an option for space, of ?? motion of travel. You can build yourself the UFOs, the aircrafts, or whatever you like, and play a "toy game" with it. This is one way of the availability of technology. We did this in 2008, the ?? within Sharif Tehran University in public, by building the first space reactors, double core. Or those of you who are advanced in the knowledge and understand it, and especially in past few months and year, we are promoting it.

Second method of the space travel, or travel in any position on space, is by creating a plasmatic field and put yourself in it and travel much faster than the, what you call it, the UFOs. Where with UFOs you're still are part of the same process of creating the shielding and the rest of it, and dimension of motion and the rest of it. Where with the shielding, magnetic shielding, or magnetic enveloping, you don't have such a limit. You travel, at the moment, from, let's say, New York to Tehran, 12 hours. With the UFO you do it in 10 minutes. With the plasma field units you do it within 10 seconds. So which one do you want to take your time? (2:44). Now you have option two, physicality within or fields within. You can put anything you like in that envelope.

Any other question?

Q: .. My question is, what do you think about trans-humanism and artificial intelligence and its dangers for humanity?

K- Which part of it is dangerous? The biggest danger you have, is that once this technology opens up, all these robotics and everything else will have a Soul too. And with it, to have a Soul it means they will have emotion directly, you don't need to chip it, you don't need to develop a technology for it, you just create the condition of the Soul and the STP and your robot has emotion.

R: I'll just like to add to that, that if you're looking at our image of the background image for today's show, it was actually created by artificial intelligence (AI). And we created it in the Keshe Plasma Reactor Group yesterday, as a group exercise, and we came up with a simple sentence, and had the AI create an image from the sentence that we came up with. And the sentence was, this is for Dali, (2:46). it's called Dali, the AI that creates images. And we... our one sentence was, "Create a Plasma background Field image for the Keshe Knowledge Seekers Workshop Series." And that was it, that was a simple sentence, we plugged that in, and in a few seconds, it generated this image. And some other similar images as well, you get like four to select from. And this, amazingly, this was one of them, so it seemed, I don't know, kind of appropriate for the Knowledge Seekers Workshop, so I selected it and used that as the background image. Now strangely, today's topic seems to be Ascension. And if you look at the image, you almost see like a... this... a concept of Ascension, you could say, with the... it looks like male and female characters, and maybe different types of energies that are... they're engaging with, and so on. So, I don't know how the AI came up with this, but just from the simple sentence that we fed it as a group, this is what it generated. So, it's quite powerful and amazing. And ... we're trying to find ways to use it, you know, for the benefit, rather than thinking of ways that it could be used for adverse ways for humanity.

K- Can these artificial intelligence systems claim patent rights?

R: Well no, because they can't do that basically. It's the artist, you're considered an artist when you use the AI as a tool, (2:48). as you would use other tools, as paintbrush or something else. We don't ask the paintbrush for copyright protection, but the artist needs that protection. So, it is becoming a bit of a gray world, because some artists are using AI to duplicate other artists. For example, you can duplicate someone's voice that's a musician, and put whatever words you want to their voice, and show their image, and everything else, even though they're not singing it. So, it's going to become a tough, brave new world of copyright questions in that realm for sure.

K- Okay. ...

Q: .. Yesterday, in the private Soul teaching, We came through an ancient teaching of yours.

K- My God, have I already become ancient?

Q: Yeah, through this knowledge what you are bringing Mr. Keshe, every second is ancient to the other. We came across 15 minutes of your teaching, and we tried really to understand it, (2:50). the manifestation of the physicality and when it can be, in a way,

disappear as a physical term, there is a process and there is a condition of it. And I think what you taught today about Jesus Christ, it's similar exactly what we learned yesterday, that you can be transparent, you can be vanished from the scene, if you go to the other section of your power. You don't need to be manifest in physicality. Only if you go to a balance field with the environment, then you will not have this, what we call, light, or what we call, ?? corrections. Is it in reality this is what real happened?

K- What do you mean by that?

Q: When they came to Jesus Christ, they didn't see him. He was vanished from the scene. So, he chose not to interact with the environment.

K- I have tried to explain this in detail a few times. I've had battles. I remember in a meeting with people from Vatican years ago, this discussion was brought out. It's not invisible (Christ didn't become invisible). Now we understand how we transmute. It is not being balanced with the environment. You can actually not be there. (2:52). Or if you choose to be there, but not to be seen.

And the knowledge of it was available to Christ. It came available to him when he was on the cross. It wasn't a knowledge beforehand, if they put me on the cross, I know how to vanish. It was a given knowledge at a point in time. And that knowledge sits within the Soul of the Creator.

We always have escape route. As teachers, we know we always have escape route. It is one of the, what I call, "pre-contract requisite." That we choose the time, the place. And we don't sign with a pen, we sign with a pen of the Soul. How do I get out of this? He's there. And he was, he became aware of the knowledge, he could do this on the cross. He managed to add up one and one to make two. (2:54). It wasn't something planned by Christ, now, I'm going to do this. He moved the Soul that the physicality does not feel the pain on the cross, emotional pain. He did not disappear. He did not. He was there all the time. he was aware of what was going on.

Carry on.

Q: In the same teaching you brought up when some of the humans in accident time, they will come out of the accident as nothing happen to them. Absolutely nothing. No injuries, no nothing. And the other ways, let's say, you brought up like a airplane crash and you see someone come out of it well. What happened in that time? You actually learn it really very well, by using his energy without knowing, because he was in a different condition.

K- I don't understand what you're trying to tell me, Jalal.

Q: I mean, if we use our emotion, (2:56). in the strength, in the level, towards the Soul level, now, the physicality...

K- I teach you something, if you understand it, you have "cracked the code," as we say.

Q: Okay, let me... I am all ears, okay.

K- All ears, okay. You sit comfortably, close your eyes, open your ears, take all the wax out, put your leg up, get a cup of coffee, and listen very carefully.

The secret to expansion of the Soul is abolishing the emotion, which emotion itself comes from attachment. If you understood the last two sentences, you have found the key to the secret of Creation. If you abolish the emotion, you find the key to transmutation. You find the key even to create the strength, to be at the strength of the Creator, to be able to feel Him. The biggest barrier for Man is his emotion. (2:58).

Carry on.

Q: Thank you Mr. Keshe.

R: Mr. Keshe is the emotion of presence, in the similar realm of emotion of what you're talking about, or is that different?

K- It's all the same. It's all the same. We... our biggest problem is we hate, we love, we feel cold, we feel hot, we feel anger, we feel everything else. If you can overcome emotion, then there is nothing for, to keep the STP away from the Soul.

Any other question? ... Just one second please. (3:00).

K- Hello, I'm back, sorry about that. I somehow got kicked out of my other Zoom, I don't know why.

Q: .. Now I'm confused, is there not a better word than abolish? Emotions held as a steady state or held in balance?

K- What do you mean?

R: Well you said that we need to abolish emotion.

K- It's not to abolish. If you are transparent between the STP and the STM, there is no emotion, there is no brain in between to create the emotion. But still fields, their own strength, create emotion. This is the way it works.

If I can put it this way, if you can get rid of the emotion of fear, you can jump up any height. So, if you can understand this, then it's easier to operate. If you have a fear of emotion or fear of losing a love, (3:02). and you do anything to hold it, you have no more fear.

The best thing is, I've said that many times, but if understood, you know when you fall in love, you do the most stupid things. And then, yes, they think, "why could I? How did I do this thing?" And you don't think about it, because being with the lover, giving a joy to see a smile on the face of your lover, or to create the emotion just to be near to, takes out

all, all the fears to zero, because it doesn't exist. When it doesn't exist, you can do everything.

I've done that many, many times when I was young. And you think, oh, God, what would have happened if such a thing was there or happened? What would have happened? But you do it without fear, because you're so much in love with whatever you want to do. I have faced this lack of fear and they always tell me, you're arrogant because of... No, because I have no fear. Fear, not having a fear doesn't mean you're arrogant. It means you are confident that it's not a barrier, it's not a point.

And I always, I never negotiate from a point of weakness, because then that gives you a point of fear. But, I always negotiate even the other side thinks, "oh, they're victorious, they got what they want and ?? nobody else." As long as I get what I want, what I'm going into negotiation the way I want, does not matter how the other side feels. (3:04). Because I know, I calculated it.

I came out of a negotiation very recently and I told the Knowledge Seekers with me, "let them feel they are victorious, but I got what I wanted, and what I brought the Foundation to get." They are happy with what they have, and the Foundation gets what it needs for its work. Does not matter how it might look, because we will be, we come out with everything intact, we want it plus what we wanted on it. They don't know what my target is, they don't know what my expectation is. But they feel fulfilled the expectation. And it doesn't matter how you do it.

You never go into any kind of negotiation with a fear of loss, or being subordinate. There are the ways of thinking and doing and even you come in you look as you be inferior, but what you get over the time from it, it makes you superior, you get what you wanted. Superiority or achieving your emotional gain.

So, fear should not be in the vocabulary of Man. Considering, being thoughtful, what can be done, yeah, but fear in a way of fearing somebody else is higher or, you lose something, you already lost it if you have the fear. Has Jalal managed to get his two minutes? (3:06).

Q: Yes, I am back here Mr. Keshe. Mr. Keshe, this conflict of really not understanding or not achieving, what the Soul teaching or doing, is it by the conformation?

K- No, it's by default, being a human.

Q: Default. This is a conformation also.

K- No, it's by default, being a human.

Q: Now you love to be human Mr. Keshe, you said it. You are here to enjoy this touch and...

K- Oh, you don't know how much.

Q: I know, if I give you some kebab. But, is it us who is really stubborn?

K- Not really, it's what we set our target for. And what we see, doesn't matter how the other people look. Because, if you set your target and you know you are right with it, and what you do is the right conduct, even if it goes wrong, it turns up to be right.

When I used to be in world of business. People who work around me for years, they always called me a ruthless. I said, "no, I'm not ruthless, I know what I want." And, what I give you, is what you can live with, is, then I can work within the frame, (3:08). that I can, what you call, achieve what I want to achieve. I don't tell you something else, and I don't do something else afterwards. What I do, I sign to, even if I harm me long run, I stick to.

And this created a lot of enemies for me, but enemies who became later on friends, many of them. When we used to go into negotiation of purchase, I used, we used to be, what we call, we were not a normal trading structure. We were, what we call, "stock cleaners," we used to buy stock. If you had a 20 pieces or 2 million pieces ?? to us was that, can we make a profit on it? And, we used to give a figure for what it is, what we think is. And they used to come back to negotiate, "can you go any higher?" I said, "this is what we gave and that's what we say." You don't need to accept it. Go in the market, see if you can get any better, our valuation, our price stands. And sometimes they agreed, but they said, "you ruined us, you take what you like." I said, "you don't need to sell it to me. You don't need to do anything with our organization. Keep it, do it, and when you think you can accept it, it's beneficial to you, or sort something else, you come back to us. And then we'll talk, but this is our figure."

And negotiation always used to be very tough, Because, when I put a figure down, I would not move. This was one of my worst habits, and I knew. Because, I had a certain pattern of thinking, if the guy has made this, he's made his money, or he's made a mistake with all his expertise, if I buy his mistake, I have to buy it somehow, (3:10). that I make this mistake to a profitable mistake. If you sold an item for 100 pounds or 100 euro, and you sold so much of it and you are left with so much of it. You made a mistake of, or you made a profit, this is your left over, for whatever reason, it's irrelevant to me. And with your expertise, what you created, what you developed, what you've done, you cannot sell your product for whatever it is with it. For me, is an unknown thing, because tomorrow this is one thing, for me tomorrow will be something else. I have to make it something that people can buy. If you sold something as a manufacturer, as a hundred, by the time factoring in the market, transportation and profitability, and the rest of it, end up in the market, let's say for 400 or 500 pounds. For me to make this for anybody to buy, I have to buy it at 10 pound. That anybody on a high street can buy at 50 pound, ?? not at 500. They buy it because it was, you know, it's the valuation. And I used to stick to my 10 pound. The guy says, "it cost me a hundred, this, that." I said, "this is for me, workable." And, I used to stand my ground, that was it, because then I used to take the loss with it, if the guy with the expertise considered me with no expertise, where do I stand? When we

used to get that 10 pound, we used to sell it, let's say 25 pound, that the retailer double the price, which to them was very profitable, and they still were at 10% of the market. Okay, I double and a half my profit. And, I make a lot of money with it. Because when you buy 200,000, 50,000, whatever these figures add ?? by those figures. (3:12). Then, we build the business that way. We never reneged, we never said, "oh, he gave us this, we agreed that." That was it, I should have done my homework on it. So I came out always with it and that was it.

And, years later the people came back to us, they said, "why did you come back to me if you know you're going to lose." He said, "because you do what you say, you give what you said, that's it. Even if you lose, or if whatever it is." And we need the money. I said, "okay, so you need the money, this is my price." It's the same as 10 years ago, you did business with us. Nothing changes. Then it's not a headache to me. I'm straightforward. I put down what I think, and then it's my problem.

And it's the same with life. You do things you do, the way you do it, and then you let it be other people's, for them to decide, not for you to do something wrong, that make them to decide. And you have no, you have no worries, there is no emotion involved. And that's how our life should be. You do your work with it and that's what you stick to it, unless the situation and condition changes. But, you don't look at, if it changes, you don't look at it, or I don't look at it, "oh my God, this went wrong." I say, "what's the reason for this going wrong, that I have to learn from it?" And, "why it went wrong for me, what is to come?" And then, when something else happen in the back of it, you say, "oh, this was the reason."

This is where, why all things happened from the beginning. And this is the way you take the emotion out of everything. (3:14). Be it with the relationship, with business transaction, whatever. You look at it and you always, you stay correct. Can I live with it? And is it the right thing to do? That's a criteria. Doesn't matter what you are, what you do, or the way we look at it, the work of thing to be done.

And even in the current situation, as all of you are aware, I took a decision to expand the Keshe Foundation in a very big way, two years ago. We got involved with it. We got the Keshe Foundation committed to it. Some of you helped us with it. And we came across the situation was a fraud. We told you a few months ago, and we looked at it as a huge loss. Effected us drastically and maybe worse in the next few weeks. But in the process of waiting for this to happen, we concentrated on the others to be ready to go. And when this collapsed, everything was ready.

And then, out of nowhere, but in a way, because we did a lot of work in the background for years with it, another situation which used the new situation came up and has become one of the biggest successes for Keshe Foundation ever. In a way, what went wrong, financially to get done, prepared us in the background ready for what is, has happened now, and brought Keshe Foundation in totally different dimension. (3:16).

If we would have gone with what we invested, we're trying to invest, and we lost, it would have taken us 25, 30 years, 50 years, to get where we have achieved in past few weeks. But, maybe in concentrating to be ready, we are ready for what was really the Souls decided to be ready for the Keshe Foundation to be where it should be.

We are not aware of a lot of things, but we know a lot of things happened and I always said, "when it came there is a reason for this." We lost so much, we went through so much. Created some hardship for many of you Knowledge Seekers who supported us. But if I tell you the joy of what is about to come, what the Keshe Foundation has signed itself to it, everyone here agree it was worth.

In the background, preparing us for everything to be there. And now, were we wrong to make that decision two years ago? These people coming to our path was, in a way, it was ?? making us ready for what was coming up, shortening the cycle by maybe 50 years. But standing next to one of the most powerful nations in the world. Most probably the most powerful nation in the world. As a collaborator, as a partner, as people who take the responsibilities of everything else away from us and leaves us with our research and development. (3:18).

I could not thank the Souls in what has been done, and doesn't matter whatever happened in past two years. We didn't put a foot wrong, we kept to what we said, we did everything. We got some of you wanted to be there, but in a way from what we've done now, all the Knowledge Seekers, because within the next few months, whatever you supported us, you should be able to get it back. Nobody has lost anything.

They want me tomorrow, take time. It's still has to be completely set out and done, and our management is working more or less day and night to bring it to that point. What was as a big loss, a lot of problem, has turned up to be the most beautiful thing ever happened to Keshe Foundation.

So, what I tell you, you don't know what the Souls have set up in the background, for it to be, to be prepared, to develop things ready for when the time come, and when the time came, it was there.

In the coming time, from what we sign ourselves, and what we know where we are, organizations like Microsoft, NASA, and many, (3:20). many others will be like a child play into where the Keshe Foundation technology will be reached and achieved. Opening up the space and will touch every single man's life on this planet.

Any other question?

Q: .. Hello, good morning Mr. Keshe, Rick and everyone. If I may bring a subject a little different, but in the direction of the topic of today's teaching. I've been trying to understand the energy and type of manifestation of a Soul called, Ahura Mazda. In some Zoroastrian descriptions he was considered to be a supreme God, and in other books as the Lord of nothingness, and that he can interact with Plasma fields from the Sun and

other stars, like maybe a reactor's core voidness. Could you enlighten us a bit more about it? As always, thank you very much.

K- As an Iranian brought up in the school of Zoroaster, Ahura Mazda means God, the Creator. And nothing more and nothing less. The way in Christianity you call it, God, and everything else. Ahura Mazda means the beginning, the Creator. And there is nothing above it. (3:22). And they signified in a different way on the entrance of the school of the temple of the Zoroastrians in Tehran. It's just another name for Creator, but in the tradition and the meaning of it in Farsi, in the old tradition of Farsi.

Any other question?

Q: .. So when the Soul elevates, does it merge with the Cosmic Rays? And these people that go on about the "Golden Ratio," does it absorb more energy to release more, to grow, like the 129 Tesla? Like the Italian Star Formation?

K- Elevation comes by being enlightened, to be... to understand more. That's all it means. To have more access to energy as knowledge, or more understanding of the world of Creation. Elevation is not sitting in an elevator and going to higher places. (3:24). You got to realize, as I said many times, the Universe is a sphere. So you cannot go beyond its boundary. So, the height and the highest is totally meaningless. You're equal distance from the center of it. And doesn't matter if you're on the North Pole or the South Pole, that's the highest you can go, because there is no more further to go with it. And that's all it is. And the Soul gets more access to more knowledge. But the more knowledge you gain, the more you realize it's all connected to one, to the origin.

Any other question? Shall we call it the day?

Q: .. Can you talk more about the "Emotion of Knowledge" that you said we need to learn in the 354th Knowledge Seekers Workshop? ...

K- What do you mean? Explain.

R: Perhaps... I think it was in the chat earlier, it was mentioned about the Emotion of Presence and the emotion of knowledge. And I had asked also about, is the Emotion of Presence the same as the emotion that you mentioned that we should try to abolish, (3:26). or to, you know, to move beyond. So, he's asking, I guess, to get more information about that emotion of knowledge that was mentioned back in that previous workshop.

K- I don't know, we have to go to the title of the workshop.

R: Yeah, maybe we can let that go till a later date, let's say.

K- Until we understand more what it is.

Thank you very much for today. I hope we learned a little bit more, or we got enlightened a little bit more. And, we're sure that you will understand more, a little bit, maybe not today, maybe tomorrow, about the whole functionality of the work, and what's the purpose of the teaching. And hopefully we'll be able to go to the next step. Don't forget about the, what we call, the meeting we have later on this month regarding the elevation of the Soul of the abused children. And the same, if you want to join any of the trials with the doctors regarding the pH and the, what you call, the dental situation with the... and what they want to learn more on, how it can be done. Thank you very much for today, and hopefully we meet next week.

R: Great, thank you Mr. Keshe. As we can see on the screen there, it mentions that workshop that Mr. Keshe talked about, elevating the Soul of children. And Friday May 26th, starting at 12 noon, and bookings can be done through the Keshe Foundation store at keshe.foundation/store. Okay?

K- Thank you very much.
