

487th Knowledge Seekers Workshop May 25 2023

(Transcription, Proofing done)

(Auto transcription by Elias)

Controlling direction of motion of plasma through emotions; Emotions in brain - moving spaceship - same T; 2 reactors steer spaceship - STP & STM move Soul; Nano materials in magnets change emotions - diseases; Elevate Soul with emotions of STP; Emotion of survival keeps STM together; Man created genetics within himself; Falling in love with UC; Creators emotions same as Man; Incubation T - cocoon shield on Moon;

ENGLISH TRANSCRIPTION

(:14).

K- Yes, good day to you as usual. Wherever, wherever you listen to this series of Knowledge Seekers, programs from Keshe Foundation Spaceship Institute. As you are aware when we had to move the time to between 6 o'clock or 9 o'clock in morning as usual time. Today we had some things to do, very important for the Foundation and we had to move the time. There is a possibility that next week we announce the same changes, but we wait to see.

The teachings of today, (:16). or sharing of the knowledge of today is part of understanding of the energy, of understanding of what we call, transformation of energy. Transferring energy from one point to another. Transferring direction of motion of energy. As we talked last time, going from Earth to the Moon is a straight line, we see it, we observe it, the face side. What about if you want to go to the other side. What about if you want to go to Mars and then suddenly change direction to another galaxy? The understanding of the change of direction of the motion of the plasma is one of the most complicated and sophisticated ways that the man will learn to direct his Soul. It's very much like you change your thoughts. You think something good, then immediately you think something bad, and then you think something emotionally change to happiness and joy, or a cry, or hunger. So these are change of direction, but we call it emotion, depends which part of the brain of the man you use. Man has to learn how to do the same to direct his Soul, direct his source of energy to any direction from one position to another.

As we said, in the future we can develop technologies that you can pinpoint to something you can see, or a place you can direct to with partial energy of the Soul of the Man (STM) that the bigger in trying to bring the other to, or redirects into that direction. (:18). But what happens when the Soul of the Physicality (STP) of the man is inside. When your control room is inside the plasma of what is the ?? outer plasma.

If you look at the space technology (T), in the past we always spoke about this when it came to what we call, the spaceships. What we call if you have a craft. You have a craft. We create a plasma around it. But this plasma (Pl) has to have a direction. How do we

change direction? How do we position ourselves to change the direction. You want, you are moving in which, and in what direction you want to be changed. If you are going in direction A and then you want to change to B, how do you do it? Your dynamic PI inside is rotating in the same direction. How do you change the position of the fields to take a new direction and at the same time to turn your craft to a new position?

It's the same thing with the Soul. Here we use physical systems. In the body of the man we use emotion. If this is your Soul and if this is (A) the space in the brain where is sadness, and B is the space where it is joy, how do we change these 2. Suddenly we go from one to another. It's the same as this (with space craft), it's no difference. With this (the man) we cannot change the Soul. But we change the strength, (:20). the field strength in the dimension (D) of the STP and the point of interaction changes.

So in Space, as now we know, we talked 2 different types of transportation and transmutation. Transmutation is when you have a physical body, we call it UFO, we call it a spaceship. Or transmutation when you actually have only the Soul and the STP and you use the field energy strength without the matter state. There is no more physical body. Man now having these 2 choices has to decide. But the method of the transportation, change of direction, speed does not change.

If you look in the basis of the Star Formation (SF). If you have a SF base, that you have your upper reactor. Those of you who have been with us long enough, you know what I am talking about, then you see what happens. How do you keep this, which is itself a PI to move in this direction. This is a state of no emotion. This is a state of sadness. If I change the direction to this one, this becomes the state of happiness. But it's still the same PI. Or you put a craft in it, and change its direction. How do we change this. How do we come to understand the change in the science and understanding of the knowledge between the two.

As I said, now we bring the two gradually together. What we talked about, (:22). a space T with the Man .. (audio break ..) The energy as a PI. In the present space T we have move to this D (building a UFO) where for a long time we taught about it, because the knowledge of the Man has gone one step further. And then we see how we can use the same knowledge.

Here (the body of Man as spaceship) the change of position comes from the STP with the Soul. Here (in UFO) comes with the position of one reactor in respect to the other. In the body of the Man we call it different emotions. Where we use the STP outside the what you call, the Soul itself. And then we see there is no difference (between UFO and body of man as spaceship). Then we understand PI T talks about the same thing. Here (body) is the energy based with the emotion of the man. Here (STM) is the energy based, with the D of no physicality (P), but interaction of 2 plasmas. When the PI of the STM overtakes the Soul of, PI of physicality, STP. Where here (?? UFO) it is the other way around. And if you bring it to the matter state you speak about UFOs, flying machines, but you use the same T.

If you understand this, we do not need to create different names, different words for the same thing. (:24). Energy production, control of the energy. How you move one energy to another, and how it dictates what position. If you look at the science of the man, we have a very, very special way to change energy in our emotions, we call it the senses. When you have an eye, and you have from the eye you absorb, you see something, you change the energy which the Soul and the STP create, it makes you laugh. Makes you cry. Makes you to run away. So in a way, the energy absorption through the emotion through the sight dictates the position and the strength where with the interaction of the STP and STM creates the emotion. We see something sad, we cry. But it's an emotion of sadness, but it interacts with, it creates a condition with interaction of the two fields the STM, the STP and interaction of third energy coming in, which is the sight energy, which brings information, which again is energy, and then this creates an emotion, which this show most probably as a reaction. You run, you laugh. But does laughter carries on to the STM.

In a way, if you understand this, so when you have a spaceship and you have a central PI, and you have the others, you can dictate different energy plasmas and change direction of the motion in each way, and direction you need or the reverse. (:26). The question to ask is, for example, if we have 2 eyes and we see an incident, is our emotion strength the same as when we have one eye. We might think it is the same, but it's not, because information transfer is not the same field strength, it has not the confirmation of the second condition. Do you feel the same cold if you have one hand or 2 hands? This energy conversion which adds to the interaction of the field of the Soul and STP of the man creates a slightly different position and motion, that brings that interaction of the fields, we call it the emotion of the man.

Using the same knowledge, understanding this principle, now in your thoughts you can dictate the direction of the Soul. Because now the emotion of the STP is inside. You can much easier interact and change direction. Or retract in that ?? pattern. Isn't this what a magnet does when you put it amongst other magnets? When you put a magnet in, it just doesn't stand. All the magnets on the table move in different directions, some retract, some move forward. And it doesn't matter if all your magnets are the same, or different.

If we understand this, if we comprehend the strength of the field interactions, and change of it. We can bring huge changes in the knowledge of man, (:28). not only in the matter state, but in the space and science, in developments of new technologies. If any of you have had any of the reactors I built years ago, and most probably hundreds of you have these reactors somewhere stashed away, blue and pinkish color ones. Open one of them up, and you understand the knowledge. Does not matter if it is in the matter state, or it is in the energy plasma state. You see how I have used Nano materials hidden within the magnets, to create field forces, that leads to creation of different emotions within the man by drinking the water, or becoming near to it.

If your position of depression in the brain as been in this position, and to be comfortable has to be here, how can waters passing a magnet and matter state, Nano state, can change and move. You have Alzheimer's, how it happens this way? This knowledge has been in

front of you. Now you have to understand it, now you have to comprehend the changes you can bring.

Because if you understand this, you can decide the elevation of the STM. Don't bang your heads against the walls in Jerusalem, and don't bang your head on the floor with bending 17 times a day. Understand how you transfer energy directly to the Soul and how you strengthen it. We talked about the vortex, (:30). if you understand, if you have the STM and the STP of the Man, if you can create a dimension of the rotation in different strengths, you can yourself through the STP and emotion of the Man, elevate your own Soul. You don't need the walls of Jerusalem. No way, by banging your head against it to ignorance. And you don't need no prophet. Because more or less, once you learn it, you have already learned the path to elevate your Soul, to strengthen it.

The teaching is consistent. It's for you to understand. Many times in defense technology I speak about the system which has field strength of different ?? dimensions of rotation in the same reactor. How do we create this? How can we redirect one of these (field rotations) to become very much like a laser in the plasmatic field, keeping the other two the same?

How can you keep on adding to these layers as you're traveling? How... if you look at the field strength and look at the whole structure of the rings of Saturn, will explain a lot of things to you. But because we don't understand it, we have ignored it. And it's just there, something rotates as a ring and it's got different ice pieces in it. Because we haven't understood, that the field strength within the center dictates the matter state outside. (:32). Why do we see the same size ice blocks in the same ring more or less near the dimension?

But if you would have done that, if you understand this, then you understand that the totality of the knowledge is the same. The totality of understanding is the same. What dictates, you called, in a way, if you go back to it, putting the brain of the man and you put your emotion of the sadness, joy and whatever, in different parts of the brain, or create a dimension of field strength compression and understand it, you call it, different rings of Saturn. Because now, the inside of the system, field strength in a matter state field energy, dictates the same thing, you call this the ring with the little bits in it, they call it the medium size stone in it, I call it a joy, I call it a sadness.

So the principle of interaction of the fields, mixture of the interaction of the fields and the matter state, interaction of the matter state with matter state, interaction of the fields with fields, and the combination of interaction of the 3 or 4 gives the condition of life in the space, gives the dimension of the motion in the space. Scientists today tell us that as we know the Earth moves at 1,600 and something per hour. And then we have our annual base which is round about 10K. And then we have our Sun itself which rotates something 100K in the galaxy. (:34). And then we have the whole galaxy which rotates at about 1 million, they say, speed of the Universe. Or, we call it, the Universe expands.

How these speeds, without any engine, without anything, is dictated? How does, when we say, Earth moves around itself, it's not always 160, there are differences. But, when it comes to travel in the space of the Solar System, it's not on a ring, it has a fixed pattern. We don't rotate as you see, in a shape directly. All these bumps, and moving forward and backwards, has been created by interaction of the fields of other entities in the Solar System.

Different emotions dictates different positions, different shapes. Environmental magnetic fields, which is a matter state, in interaction with the STM, which wants to stay alive, to complete ?? itself (its cells ??), with the interaction of the STP changes the color of your skin from black in Africa to blonde and white in the North Pole. Change of the color of the skin is not just evolution, it's a sense of emotion of survival.

Then if you put all this knowledge together you understand what will be the future of the man in the space. How do we manifest ourselves. How we change color in different part of space. (:36). We never seen a purple, pinkish man ever on this planet, maybe on the other part of the universe through the interaction of the survival the Soul, with the STP, Man will manifest itself in different colors of the Universe, to guarantee the survival, the existence of the Soul, in dimension, time, position and place.

Where does the emotion of survival comes from? If there wasn't an emotion to survive, it would have exploded, it would have gone to added to something else and not to stay as the STM. The STM, we call it, has his own emotion. If you look in understanding that the STM and the brain of the Man, and the STP, which is the rotation of the fields of what goes through your blood and the rest of it, creates different emotion. What happens when the Soul is outside and the STP inside? Still the same, it still creates emotion. It's no difference. But the strength of the field of these emotions are very different than these (the ones inside). These (outside ones) expand the, what we call, the width of the Universe. Where this (inside the man) is limited to dimension of physicality of the man, cry, run and the rest of it.

Then if you can understand this, if you can elaborate, if you can develop technologies to replicate it, then you can create a plasma to be the STM, the Plasma to be the STP of the Man, (:38). and see how Man manifests itself in a dimension of the Plasma anywhere in the Universe. How you will look on Mars, without the monkey suit of the space.

So, when you go through the whole structure of the teaching, from the beginning, then you understand there is a consistency in the knowledge. Now you can see how it sits. In the total dimension of energy, where the weaker is outside, through the dynamic field concentration controls the strength of the Soul, which is miniature in the center, where then the Soul expands beyond the physicality and creates a condition. Or when you create fields, which is beyond the dimension of physicality what we call, shielding. There is no difference.

Now the whole structure of the teaching comes to next step, understanding how would you change. How would you go from one to the other. And then, what will be important

for you is, what's next for me? This is how I said, in Africa you have a black skin. In North Pole you have a white skin. You go to China you have a yellow skin. And then if the emotion of the Physicality with the emotion of the STM, with the dimension and interaction of the Soul of planet, and position and the time, (:40). changes the color of the skin of the man, it has to have to be the emotion. Emotion of existence, emotion to survive, emotion to carry with the continuity of the interaction of the fields, to keep that.

And then we have developed a technology, or a knowledge or a science within us, that we package this one and we call it, a gene and we transfer it to the next one, next generation. What comes out of the Plasma of us, as sperm or an egg. And in the interaction of the two, we get mixture of Caucasian colors. He's half Chinese, half white. How come sometimes you have a black and a white partner, and the child is totally white, or totally black, no sign of the parents of the other side in the skin, but the feature of the black in a white skin. How did the emotion of the STM has transmuted, transferred the knowledge from both sides? One in Physicality and one in what we call, emotion of the skin.

This is what we'll have to understand. This is what the next topics, and interactions and the teachings will come. Because in the next few years with what we see coming up, with the agreements made, with building of the new space technology, it's inevitable that man will meet his counterparts in space. We will fall in love with the beauty of the citizens of the Universe, worse than when we fall in love with a woman and a man of this planet. How do we create our next generation? (:42). Having a mixed race on this planet is not unique. This has happened across the Universe for millions of years. Now man who goes into space will have that.

How do you transfer the emotion of the man in? How do you keep the killing instinct out of your energy of your what we call, partner that you want to mix with to create a new life? Then we understand, mankind has come to a point, mankind has reached the eventual point of interacting with the Universal Community not only by name and UFOs, but by interaction of the life, interaction exchange of energies, which lead to the new generation of the creation of energies from this planet. From them another side from another part of the Universe. If we see the beauty in the mixed race children, can you imagine how beautiful will be when we see the beauty the mixture of the Soul of the children of the Universe in interaction and the love of the two.

It's our job to understand this before we become the passenger of the Universe, before we break out of this village of planet earth. As I was telling one of Knowledge Seekers (KS) recently, I will teach you how to go from the Soul to Physicality, or see both at the same time. If I don't teach you this, it's like a half cooked job, (:44). but you're not ready for it. Some Knowledge Seekers, "oh, I do this, I... it's perfect." But, if you can do this, can you shift your body to United States in two seconds? The science of the Plasma has not and cannot become fashionable, it has to become understood, to become a knowledge of Life in space.

Then we understand, then we develop, then we progress to understand more of the mixtures of the interaction of the fields of the Universe. How in one second you are a

light, which is a plasma, and the next second you become an entity, you call yourself a spaceship. How in one second you're a body of the man and in transmutation of the fields in the dynamic state you will become just a light. And how you can do the reverse and become a physical man?

This process of teaching will come into progress in the development and the teaching in next coming cycles of what is planned to come. How you can ?? hinge yourself, how you can move yourself from one dimension to the other, or be aware of both? It's very much loving and living. I hold my lover but I'm aware of my physicality, my heartbeat. But I feel the emotion of holding, sharing the love and the care. (:46). These are the parts which we have to learn, if man has to become a passenger of the Universe.

Exchange of the fields, exchange of direction of the motion of the fields. How do you move your STP within the dimension of the Soul, that it brings you different emotion of the Soul? It brings you different understanding and different dimension of the motion of the Soul? Unfortunately we don't have these turning buttons, that you can turn it 20 degree left, and 4 degree right, or press a button left 4, right 4, and the rest of it. It has to come from the emotion, essence of the interaction of the two fields, of the Soul and the STP. Of the STM in the center and the STP outside. And what emotion they create.

When he said, "I made man in the image of myself", it means man has emotion as much as I have in the dimension of fields and sources of the energies of the Universe. I feel the pain of the Creation on this planet, so I change that. I feel the joy in another planet, I increase it. But all have the in essence, the essence of emotion within them. Because it's me who has that and you're part of me, who have created thee, as is you. (:48).

Go back how you made your Star Formations. Try to understand the field strength of it, not what you rotate and what you put in. Try to understand how your Soul works in the same dimension and direction. How can you feed it to gather energy from it and increase it, that the physicality becomes irrelevant. When you see the STM in his position and then you see the brain of the man on the back of it, and then you have your nostrils taking energy and your mouth taking energy continuously feeding it, to become so strong and to reach maturity, that does not need the dimension of physicality. Then you call it, at the point of death, where in fact you get rid of all this.

By eating, by breathing, you're continuously adding energy to the Soul, to the point that it does not need the physicality anymore. And when your physicality is not needed, what happens to it? It rots, it's not, it gets old, because the Soul has matured, has reached the point of what we call, departure. The flower is grown, and there is no need for the root. It's time to fly that seed in the wind to grow somewhere else. (:50). It's time for man to leave this planet as an energy field to grow in another position as a what we call, the seeds of life in another dimension and position.

Up to now we called it, death. Up to now we had no knowledge of it. Up to now, we left it in the hand of the creations and the environment. Now we have knowledge. Now we can change the way we breathe, the way we central, energize this (STM), and decide

where it'll go. And we take the STP, within it, that in a way, the energy becomes the master, not the physicality.

Then we understand how beautiful Man's life will be, that there is no end to life, there is no rejuvenation, and there is no something to make me young. Because you mature the Soul, and Physicality becomes irrelevant, because on this Planet, at this point and place and time, you will look 20. But when you reach another one you'll be 5, but you'll be more knowledgeable and much more mature in knowledge, because the time and space has become irrelevant. Because you gathered enough energy in the elevation of the Soul.

We change by what we eat, in maturity of understanding, in maturity of the physicality. You walk the streets of China, we are used to see short people, Chinese shorter than the Western. The new generation, by taking new hormones, new food which comes from the West and what is mixed. You'll see Chinese that the Europeans are miniature creatures to them. (:52). By changing the input of the energy on the physical side, we have changed the physicality of the man.

Now you can imagine, if we can, we understand and do this with the STM, what will happen to that Soul. We know, we create, we absorb, we add to the energy of the STM, through the food, through the breathing, through the nostrils, energy passing the Soul continuously. And the longer we live the more weathered the physicality becomes. Because it's not needed, it has served its purpose for that seed, that Soul to mature. A Phoenix rises out of the ashes of the physicality of the man in the furnaces of the mortuaries.

And man has never understood. We worry how we bury this physicality, which has led to creation of such a beauty. And in a way, does the physical time have any meaning if you understand how to extend and expand the STM, beyond the dimension of physicality. Then, if the STM is fed by breathing and the food man takes, that it reaches a point that it has no need for the physicality, because he has matured, he has absorbed as much as he could, then we understand we can do the same through the dimension of the fields of the energies which you can direct into. (:54). We don't need to wait for the age of time of 50, 60 or 100 to separate the two. We can expand it and we bring it within, and we can travel the span of the Universe.

This is part of the systems which we developed and the next generation of the system, which come to you. The next generation of the systems, which will come, you will understand how fast man's Soul can change within seconds to expand beyond the physicality. And then it can take you anywhere in the Universe. The systems we have you've seen in Linz, and what is developed in our laboratories is a quarter of the knowledge for the man to be able to do transmute. Our scientists have to understand this knowledge.

And this knowledge of transmutation in full will come out of China. We have committed ourselves to the Chinese government, and we'll take man to space through dimension and direction of space, through the nations which understand and trust the knowledge and

understanding of it. We can take you to the Moon, but you end up in the dimension of physicality. I take you to the Moon in the dimension of the Soul. Energy fields, which you dictate how to expand, how to extend, how to become a new creatures of the Universe, that you can survive. But in essence, within, you are created from the fields of the Earth.

You are not anymore from this village, from this country, you are from Earth, in the span of the Universe, as a citizen. In essence of the Soul, of the physicality, you are Earth siblings. But in the essence of dimension of the Soul, (:56). you are a member of the Universal Community.

Then you understand. Then you become to understand what this technology is going to bring in a very near future. Even the world leaders are scared when you sit and you tell them what is about to come. It's beyond their imagination, but the knowledge is already on the table. And it's not new. When you go into the Linz Center, when you see the two white reactors in the center wall, in the middle of the exhibition, this is what we did 14 years ago, 15 years ago in Tehran. We changed the strength of the field of one reactor in respect to the other. And we dictated the direction of the motion of the ejection. We changed the field strength in one, and we dictated how close, and how and which direction each one will go.

The next cycle, the completion of the development evolution of the STM, will come very soon. When we put you in the dimension of the, what you call, evolution and elevation of the Soul, where the emotion of the Soul will take over the emotion of Physicality, that dictates where to go, will come to you very soon.

Very interesting pattern has emerged in past few weeks for us. (:58). When it was to do with hunger, many of you came for it. When it came to elevation, trying to change you, many of you came in. When we asked you to elevate those who is suffering, not many of you were volunteered, not many of you were prepared to come in, because you yourselves are part of that structure of the suffering. Then you understand, man has a long way to go, to learn to become the citizens of Universe. As he has not learned how to handle the emotion of his own Soul, and the Souls within him, and around him. How he will handle this, how he will change this, how he will change direction of.

It should have been the same number of people when it came to elevating the Soul of the leaders and the children which were abused. Because these will become the future world leaders, which will reflect what they've suffered back in the society of your next generation. Your children, your offspring's and in space.

Everything we do around the Keshe Foundation, we try to understand the emotion. What you call, interaction of the fields which creates emotion, doctors would like to call it, psychology. Psychology is emotion. Another fancy word for the same thing. Now, if you understand what is being taught today, in past few minutes, you understand, should be so clear to you, how to become passengers of the Universe. (1:00). How not to wait on this planet to age and to become withered, and hope that one day will come that I'll be free.

You don't need to be free if you know how to get your freedom through interaction of the fields. How you can change the dimension of the strength of the fields.

Goes back to the vortexes. What you ?? do you squeeze, how much you squeeze it, and how much you open it up, and to what extent you open it up. What you try to change to elevate the higher, that at the time when it became higher, it became opened up to give more. Because once you create the essence of absorption at the higher strength, this continuously comes in, you cannot change it. You cannot change any of it.

When you sit in this vortex and you create the field strength to come in, this strength continuously, wherever in the Universe, will come in. And then it gets to the point of saturation, that it has to go back and to give. While it's now continuously taking, it continuously gives. This is how the plasmas work. This is how the STM works. This is how the interaction of these fields, when they cross each other, lead to creation of the matter state, you call it, the Earth, the Moon, or the emotion of the love and the rest of it in dimension of physicality, or the arms and legs and everything else.

We are coming to the next cycle of teaching, of practicality of making things. (1:02). No more reactors. Now the Knowledge Seekers, if understood what we said, have to learn the knowledge of interaction of the fields, lead to the creation of matter state. Or, creation of energy fields states, which then itself become another child of the Man. Without interaction of physicality. What we call, the "children of Mitra." A new cycle. The physicality of the Man became the children of Adam. Those who now would create it out of the interaction of the fields become the children of Mitra. Where Adam is a dimension of physicality, where Mitra is dimension of emotion of the fields of the Universe.

Now man has a choice. But comes to a point, if you love your children the same, would you create a child in dimension of physicality through interaction of the physical condition, or would you create the child in the dimension of the Soul, which is perfect? And would you like to see the suffering of your physical dimension children? There is a lot to come from man to decide.

Would a sister ?? say to another, you are of the human race, you have a physical dimension, where I can move in the dimension of the Soul. There is a lot for mankind to face with. Would you create a child of physicality with all its, what we call, shortcomings? Or would you create a child of Mitra through the dimension and interaction of the Soul and the fields and emotion, which has no imperfection, (1:04). in the dimension of his Souls and his life.

Then man has to decide. Then we come into that point. Would we create systems that lead to creation of a perfect Soul? That you come into the system and you want to be always 20, you stay always 20. Because the field strength, it never uses the physicality for it to age, for it to diminish, for it to break up.

The science and the knowledge of Creation is about to open to man in a different way through understanding interaction of the fields of the plasma of the Creation. And God

help you. I hope, my wish is some of you will understand to be able to go through the full transmutation and full transportation, depending on the choice and the pleasure of the man in time, space and position.

The teachings are very, very much taking a shape, that now you can see different dimension of the teachings of the past, coming together and making sense. You see a bigger picture. And then, with what we set up, you will see the totality in time to come.

It's not the time for change, the change has already come. It's time to understand the change, to comprehend its implication and application, what is to hit us, what is to bring us to change and how much we want to change. And how much of it you want to accept to go through the change. (1:06).

I hope I have not lost you today, but I hope you now see a new dimension, a new angle into the teaching, in understanding and in a progressive way to move faster towards the completion of totality of the knowledge of the man, in surviving in the span of the Universe. We go for a break and we come back. And if there are any questions on this line we answer. Rick, are you ready?

{ about problems with Livestream } ...

R: More or less Mr. Keshe, I've been busy in the background here, because the Livestream is not broadcasting today, they did an update which broke everything. So, yeah, I'll get that together in a little while.

K- What has happened with your Livestream now?

R: Well they had an update two days ago and that caused a crash, so the Livestream wouldn't work at all, I worked with that for a long time, we tried to get it to work with the Plasma Group. Turned out they made a mistake with their Livestream update, and they did another update today, which fixed the crashing, but it broke the ability to broadcast the audio in ?? you know, broadcast my microphone, but it won't broadcast your audio, no matter what I do. So, I might send a report off to Livestream, and hopefully we'll get ??, I'll fix that later, but not for today. So, anyway let me get some videos on.

K- You mean, so you have to reload the teaching?

R: Yeah, we'll have to put a new video up on Livestream, once it processes in YouTube.

K- Okay. (1:08).

R: That'll probably take about... It might be up to a day before that is available on the Livestream for people there. I told people to go to the YouTube channel, rather than stay on the Livestream. Because, it's not going to work today. Okay, so, let me get some videos up here. Okay, thank you Mr. Keshe and thank you everyone. And we will be back shortly after our break.

<< **BREAK** >>> 487 KSW May 25, 2023 (1:15).

K- Yes. We are ready, we are ready, there is no comments. It's just a reminder, tomorrow is the session for elevation of Soul of the children who have been abused. And in June we'll be elevating the Soul of the abusers, and we get to the point of it. Otherwise, there is not much to announce, we're still working on the same basis. And as we said, very soon we'll close the operation in Linz, of the exhibition center, and the same as the, what we call, promotion of the technology around Europe, will go in a different phase. (1:16). And we shall see how we'll proceed to what we call, transferring technology, to where it can expand as fast as possible, in the best way possible.

If there are any questions...

Q: .. How much longer will Linz be open to go through the systems?

K- Not much longer, not much longer, not much longer. Those who are on the, what we call the, working with the doctors, the systems will be relocated, it's already been allocated to one of the Keshe Foundation positions, pre-set for this. And the systems will not be the way, as people could come, as we stopped it months ago, gradually curtailed, and now, the systems have gone into the hand of the doctors and the dentists, and they're trying the new space technology and it's their way of using our technology and ?? backup. But for sure a lot of developments and what we call, evolution in science will come through new research centers, which we will and I'll see there in the coming months.

Q: .. Can a person with transplants, bypasses and metal parts in it be transmuted using "envelope" technology and how would it arrive to its destination?

K- I think some of it will be "bits and bobs," will not be with you. And some of it, if you go beyond the dimension of this planet, (1:18). or in another level of energy fields on this planet, will not exist.

We don't teach a lot of things in the teachings, but we use a lot of knowledge in transmutation and transportation (T&T), which tells us that even we can see how you will manifest. For example on the Moon first, that it gives you a chance to incubate, to what we call, be able to exist or survive the condition and the position. Through the tests, and trials and developments, what we see, it's very simple. The interaction of the field of the environment, in conjunction with the interaction of the STM and the STP, which dictated its manifestation, will appear in a different condition and what I call, structure. It's very much like when you have an egg and a sperm, you need the incubation of the womb of the mother, for the body to take shape.

But in the next level of space technology that incubator, that womb will be manifesting first before you merge from it's, like in a part of the shell, or it can be very instantaneous. But in essence it will be that way. That you go through the position of, transition of the environment and the condition. (1:20). We have videos of this which we can show in the future that explains it. What we call, creation of the condition of the birth emergence, but you dictate how you want to emerge. You still want to have the essence of what you had, but the environment decides.

This, what we call, incubation cycle, I call it, is very much dependent on the fields of the environment and how in that condition you manifest yourself. For example, if you are, or you have a, let's say, a valve in your heart made of plastic and you manifest in another dimension, this doesn't exist. Or it'll be as something else, which in that environment cannot survive. But, do you need the heart in that position the way you need in the physicality of the man?

In the... one of the tests which we have carried out extensively in next few weeks, I might release some of the knowledge about it, is, if we transmute you to, let's say, to Mars or to Moon or to another position, and bring you back to the same position as we sent you out, where you've gone through the transmutation. When you come back, would you have the same heart and heart condition? Would the pacemaker be needed? Or would it come back as a pacemaker to what to do what? (1:22). Can we create a parallel dimension physical field strength of the Soul that can create that condition?

We have a lot of data, we have a lot of information, but it's not the time for it to release. What you see, what you... we put on the front of the Keshe Foundation, what you see as systems is not even 5% of the knowledge and technologies, which is to embrace the totality which we have achieved.

But as I said to people we were talking to recently, that I will not give that freedom of the Keshe Foundation in research to no one. We go very rapid. If you want to change a system, when you're in a structure like NASA, or another space agency, or in a laboratory, you have to get a permission, you have to be discussed. Is it ethical? Is it going to be doable? What about if it doesn't work? And then it takes two years to discuss something, and we've done it in two months. The way we run the Keshe Foundation, we just do, if we think and we saw the development, we don't wait for another thing. If you go to the laboratories of Keshe Foundation, as I said before, you see a lot of half completed system, because while we were doing it, the technology has jumped so much, or what we learned from it, we don't need to carry on, we just add something else to it. It's a museum of development of technologies.

And some of the things you do, we cannot even tell you, because to you it does not exist, but physically we have it, it cannot be denied. And one of them, is this incubation. (1:24). You go through, you have no choice. It's like you're putting a warm with the cold, you get the cloud, to what comes out of it. So, that cloud, that environment, that cocoon, that, what we call, the womb, is the time and the space you need to adjust to the position, and how to manifest yourself. Because, don't forget, you arrived as an energy. I can show

you the pictures of it now, but you won't understand. It is beyond imagination and understanding of. But it's a reality because we see it.

Very recently I was with a bunch of scientists, very... it's a people we have to work with from now on. And the cocoon was on the table, I put my finger on it and I throw it. I said, "now you see what's on the table." You have the physicality and you have the cocoon. Because they can see it, they can see both.

But when we speak about the colonization of the Moon, that you want to live inside a cocoon of the condition of the Earth, inside the dome, you live. But if you go outside, you have to go through that transition of cocooning. It gives you that shell till you adapt. And how would you manifest? How would you, imagine you create a transparent wall. And you and your partner are on this side. One of you decides to go outside. It's a transparent wall. And you see how your partner will look in the real environment of the Moon. (1:26). Can you accept it? These are the things that man has got to go through. When you see it as a cocoon and then raising, it could be looking like a cat. It could be looking like a mouse. It could be something you've never seen as an energy pack. Because the gravitational field of the Moon cannot hold on to the embodiment of the physicality.

These are not something we imagine. These are on the horizon, these are the things which we now colonizing, and we want to live as a man, or we want to live in the environment, will happen. What happens when you, on one side, you decide to transmute your cat to the other side, see how he feels on the Moon without, what I call, the "monkey suit," or in a dome. And you watch the transition. You won't be looking like a cat. There is no oxygen, the Gravity is different. He has to mutate to be able to survive with shortage and availability of the energies of the Moon. Would it become a solid? And still have a Soul. And you have to respect it, because it's the cat you love. And would you bring it back, again in the ?? transmutation, would it come back the same cat? With the same emotion and love for you. Because now you don't carry the physicality of the animal, you carry the emotion of it too. The cat outside, walking in a new shape, has emotion and connection to you as much as you have to him.

So, the knowledge is there. We see it. We see it coming up. I see how it effects our people. (1:28). I have seen how it blinds the most powerful men in the world with what sits in front of them. And I said, I said this to Knowledge Seekers about the knowledge very recently, and is in the writing of Bahá'u'lláh, bless his name. We test fire, the heat of fire, with gold. And we test the man with the greed of gold, how he will change with gold in hand, how man will change with the knowledge in hand. Because now gold is a dimension of physicality. With us, it's a dimension of the knowledge.

It's so powerful that it made a king of Belgium to kill Fabio. They want to have it. They want to have the knowledge. It's not gold anymore. It's what we carry as knowledge, which worth thousand times more than gold. That man will kill for the knowledge. As we've seen, we lost Fabio to it. This knowledge, if understood, will change many things. But it takes time, because man has become too comfortable as it is. We burn the fuel, there is oil, or we do a bit of jumbo jetting, and the rest of it, and, oh, don't go that way.

Because let it be for the next generation. I enjoy what I've made and greed of me with it. But essentially, the knowledge you see in front of you, it's the Keshe Foundation. If we tell you what we achieved in different position, (1:30). dimensions over years, it's beyond your imagination. There is this ?? couple thing, this is, this is fundamental to creation, transmutation, by interaction of the field.

Any other question?

R: Okay, we have some questions from Stefania, that I'd rather have her do live, because I don't understand some of the questions, the way she writes in the chat, so perhaps Stefania ... Well, we can allow you to speak, if you're available there. Can you talk about your question? ...

Q: Hello, sorry I'm translating so I'm delayed on the recording. So, I saw you put a unmute, so I don't know what happened.

R: Yeah, I want to know what you put four questions in the Q&A. So, I'd like to know, I'd like to have you just ask them, rather than me try to figure them out. Because I don't understand your questions, the way they're worded... I could say your first question, I think you can understand that. Which is, through the physical Soul, we can expand and elevate the Soul, creating conditions together with the environment of Earth, and with the STM, we can materialize the physical Soul, creating condition with the field of the Universe? (1:32). .. I don't understand what you're saying.

Q: Yeah, I just said regarding to what Mr. Keshe taught us before, just now. So, my question was, so if it's correct, ... one, you can use ... the interaction between the STM, the ... the STP, ... and the physical Soul and the environment, you know, together to... to get what we want, no? So, if... so, if understood ... from, if you want to ... flip to ... elevate our ... Soul, STM, where the Soul is inside of the physicality. Then we have to do, if understood by action. So by the doing, you know, doing good, thinking good, act good, so by relying on all these actions, so following the commandment. So as we follow the commandment, so by action, not just by talking, then by then we can create the sensation, the condition, because we're interacting with the environment as well, we created the condition to elevate the Soul. No? So for example, if we take an example, Mr. Keshe, you know, Mr. Keshe through action, he reached the point where he's now, no? If he would stay home and watching TV and sleep, he will not be what it is now. And the same, I thought, if we elevate the Soul, and therefore the Soul is expand, the STM is expand, (1:34). and contain the STP inside, no? Now the STP will interact with the Universe. The environment is the space, no? So, so we, we have no anymore the barrier of the physical body. So, then we have interaction like Mr. Keshe said just now, before, of 2 plus 3 fields, sorry 3 to 4 fields, like the star formation. And through this interaction of this 3 to 4 fields, then we can create this cocoon, that Mr. Keshe was talking about. So, that we can then create, then physicality again. So, I just wanted to know if this was correct, what I understood, from what you've just been said.

K- I don't know what you're talking about.

Q: You don't know what I'm talking about. So, through emotion, no? Through emotion. But, so, so, to, so for example, no? If I said, "I love you", okay? And I just said, "I love you", it is word. But if I show you that I love you, through action, so interacting on the environment, we're creating the strength, this energy strength, that this will create condition for elevate the Soul. No? So the Soul of the body will elevate ... through, through action as well, not just. (1:36). So, what I'm saying is, is that to elevate the STM, you need to ... is the physicality, is the tool, to elevate the STM. Because, I will show you, not just through word, that I love you, no? Obviously the, the feelings of love, is what will direct the whole things, the whole outcome. Because the love is so strong, like you said, for a mother, to a daughter, or children, you know, the love is so strong that, you know, it will make me do incredible things. So this will bring the elevation of the Soul. This, I don't know if I, is, is clear this?

R: No.

Q: No, it's not clear. Okay.

R: Not to me, but maybe, you know, to Mr. Keshe.

K- I'm lost as everybody else.

R: What is your question? Can you make your question one sentence? One clear sentence.

Q: I just want to say, no, if, if the, ?? through sensation, sensation is our tool, no? Of change structure and create condition. And, but, but the sensation is in, is in correlation with the environment, the Soul and the physical Soul. So, I can through feeling the sensation elevate the Soul, and go into space, and then again, through feeling the sensation, I can materialize and create a physical environment. But the difference is that when the physical Soul, and the STM, sorry, the physicality containing the Soul, (1:38). to expand the Soul, you have to have this, you have to create this strong feelings, no? To expand the Soul. And the strong feelings, I think they come through, not just thoughts, but has to be a combination of thinking and doing, you know? That's why we say, be good, do good, act good. So, what I'm saying is, my question is, so to elevate the Soul has to be done through the physicality. So, you know, it's through the physicality that you elevate the Soul, this is my understanding of the workshop today, so it's correct this? And then the second question is, once the Soul is elevated, and we are in space, it's, we're creating, interaction of fields, like the star formation to materialize and create again physicality. I don't know, if you didn't understand, don't worry about it. I do not know to explain it. Don't worry. Is it clear or not?

K- No, we're still trying to understand.

R: Again if you can put your question in one sentence, just one short sentence, then that'll make it so much easier for us to understand what you mean. If you don't understand what you mean then... Just one question, just start with one question, calm down... And just

center and just deliver a short sentence that is your essential question that you need to ask. You don't have to qualify with all the talk, just deliver the question. (1:40).

Q: Yeah, okay. So my understanding is it correct to say that to elevate the STM, you do this through the physical body and the physicality interacting with the environment. So the... and the STM. So the all three interacting, they will make the elevation of the Soul, the expansion of the Soul. Through... it's a sensation who will change the structure. This is what I understood.

K- You mean the emotion which changes the...

Q: Yeah. But has to be done physically as well. So not just me thinking, "I love you" and that's it. I have to show you that I love you. If I close my mouth and you will be happy. But if I don't talk, how do you know that I love you? You know, so has to be some action together with the feelings. And then together you will expand the Soul. I don't know if... So...

R: Have you ever felt emotion from someone without them manifesting something? Have you ever felt someone's love without them having to, you know, show some manifestation? In other words, aren't feelings different than the manifestation of the physicality in a way? Aren't we feeling the fields? Remember the feeling of fields? Feelings are of fields, (1:42). but the manifestation is another realm in a way.

Q: I'm lost myself now so...

K- We're trying to still to understand.

Q: Okay, don't worry, I will think better. and then maybe ?? the question at the time.

K- Thank you very much.

Q: You're welcome.

K- We're trying to understand, but I think I can see what you're trying to tell us. But I cannot see. In a way, what you're trying to say, if we can manifest ourselves, if I'm correct, with deciding different emotion.

Q: Yeah, so the emotion is a tool, tool to structure. But has to follow by action...

K- Maybe in a way, can be. But it still is getting dimension of the, what you call it, the Soul. You interact with the emotion to change the Soul.

Q: Yeah, exactly. So if I said to you, I love you, everything have to go in line. I cannot say one thing and do another one. So my action...

K- But the Souls are aware of it. Soul-wise we are always aware of this. We cannot do. It does not do if you look at it. Because it's the field interaction, not physicality. (1:44).

Q: But the field interaction would you not create it also, the strength of the field interaction, would not be created also, from, also from the combination of what the physicality do, and the Soul feel. So, for example, no, if again, if I said to you, "I love you", no, but my body, my action show completely opposite. It's not going to happen, but if I say to you, "I love you", no? And you can see from my action, I really mean it, you know? Then, the strength grow, because it's in your eyes, in the way you talk, in the way, in the things you do, everything shows that.

K- Yeah, but in the coming time we will not be able to do these things. In the coming time we are becoming more of... I see literally no other way than very soon, gradually, to start teaching Knowledge Seekers, to be able to understand, as they usually do, their physical dimension, but to be able to connect and to interact and to see the ?? vision of their Soul. Where you're physically, you're aware of your conduct, what you're thinking, what you're doing. But the physical side will live, or you're aware of what you call, (1:46). the work of the Soul too. And this will change a lot of things, because you are aware of two dimensions. And in the space of the Universe you live that life, that kind of life.

Q: It's like you become the observer.

K- No, it's not the observer, it's just that being aware of both.. No, no, observer is different than being aware of. You are aware of. When you are observer, you can't do anything. But when you are observer, you interact, you're part of it.

In another word, if you look at it, you can go through the Soul, you can see what is to happen, and being aware of it, in the dimension of physicality, take a step for that not to happen. You understand? Which does not change harm, but it brings a change, a positive change to the position. In a way, they say you see the future, but you don't see the future. You live the two side together, because your Soul is aware of what you've done wrong, and other Souls have set up to correct it. But, because you see what your physicality has wrong, that the other side is right, you correct your conduct, you become aware of your, in a way your Soul become your guide. Your Soul, the life of the Soul interaction with the others, becomes a guideline for you to live the physical life.

When you say, think good, because when you think good, you do good, and you, whatever, (1:48). talk good or whatever, it's because now you're aware of the implication of what you physically done on the Souls. And then you take steps not to do or change it, that change position with them.

Very soon, I see through a lot of interactions with the Knowledge Seekers, we see this coming up. We have to teach how you... You don't live a schizophrenic life, but you're aware of the existence of both. That your conduct in physicality, what effects will have, if it's wrong or whatever, on the position of other Souls. That through your Soul, you

correct what you've done wrong in physical life. Dimension of physicality. And the end of it, if you look at it, whatever your physical life does, effects your Soul. Position and the strength of your Soul.

This is what, for example, you're Italian, I've heard, you've heard me say many, many times, John Paul, a lot of people love him, or loved him, or whatever, would not, most probably has a worse position, as the strength of the Soul, where he should have received a lot of blessing, compared to the homeless people outside the wall of the Vatican and the squares of Rome. Because he was aware of the child abuse which was going, and the abuse which was going within Vatican. And for decades he was in charge, he allowed it to happen. He carries that burden. There is no way, (1:50). there is no way people like John Paul or others who are aware of these kind of harms or whatever, will have a position. If you go strength-wise, you might see a speck of dust light, as his Soul compared to a shining lamp as a homeless guy, just on the walls of the Vatican, sleeping on the windows. Because he did a lot of harm. He closed his eyes to a lot of harm. And the Soul is responsible for it.

Any other question?

Q: Mr. Keshe, sorry, very good, I can wait, I can wait for this, it's amazing, this is good. But then, how, because my second question was, I'll go to question two this time, my second question was, so once we are, the STM is expand and contain the physicality. No, to become physical again, from understanding, from what you just explained before, before the break, the physical Soul now interacts with the environmental space. Because the physicality, the physical body, it doesn't do as a barrier. So, it will happen like this then, that the STM, they contain the STP, the STP they interact with the fields of the space, interacting like you said, three different, (1:52). three or four types of energy fields. They then together can create an environment and then in this cocoon, let's say they create a like a earth environment, for this four different, three, four different fields, and then they can materialize the physical body. Is it correct this way?

K- A little, not all of it, but a little bit, yes.

Q: Can you expand on this?

K- Oh, that takes a hundred teachings. It's a lot of, it needs to understand a lot. It needs to comprehend field interactions. Position interactions. Emotion interactions. Would I... when I... when... Let's say we talked about the dome, and you're on one side and your partner goes to the other side. Would he manifest different way, if he was happy he was going? Or would he manifest himself different way, if he was sad he was going? Because the emotion was touching the Soul, the field strength of this. Would he have one arm less or would it be smaller, would it be bigger, depending how the emotion was of the living to go to the other dimension.

It'll be very interesting in the future when we colonize and we're going through the mutation to live in the environment and we become aware of the Soul, our Soul and the

way, because we went through it, (1:54). would we have leaders in the colonies, outside the colonies, when man goes through transmutation? Because, with the strength of the Soul, we went through transmutation, we know that the Souls are all the same strength. It's the STP within it, which changes the shape and size of the Man, in respect to interaction with the field of the environment.

In a way, if you look at it, if you understand it in a different way, or on a matter state of things. At the moment we say the weight of the Man changes, on the Moon. It's one fifth of the Earth, because of the Inertia of its Gravity. If you take the Man out of this monkey suit of space, he can't hold on to the shape you have, it's impossibility. As a matter, if you go as a hammer, as a screw, or as a step, yes, because you, you travel in strength. But the body of the Man is in a Gans state. It has to interact with the physical dimension of the fields of the environment.

On Earth we become black, white, short and the rest. How would we survive on the Moon, we change, just change of Gravity. Because most of the materials are the same, Inertia is more or less the same. But, that field which decreases our weight by whatever, when it's directly in touch with the field of our body, how would it change? (1:56). Would we become five times bigger? And can you expand at the same time that the heart doesn't explode, because a big body and a small heart, time to grow? Would it go through it, or do we go through a full transition?

And then we create more complication. This, I explained this before, people who go through rapid weight losses, with these small stomachs and the rest, some of them go through diabetic conditions, severe diabetic. And then most of the time leads to a lot of other things. Because the body used to feed a huge amount of cells, now those cells are not there, doesn't matter how much you take less, and then it has to readjust the kidneys, the liver, the pancreas were keyed up to support a 200 kilo weight. Now you lost the weight, but they're still working on the same basis. What you are going to do with it? Your liver has grown to support a 200 kilo, not 100 kilo.

This is a lot of problems which I observed over years, because this is how it's going to come to us when we go to space. In space we do with the gravity and the weight and the mass. Here we do with the physical body of the man in the structure. Would our liver, if we stay as a human on the Moon, stay the same size? Or can it catch up to expand to support five times bigger size? Would there be heart failure because the heart is too small to support a huge body? Or would the heart grow because the outside interaction forces the inside? (1:58). When you look at the man, if he's 200 kilo, if it is 50 kilo, the size of the kidney doesn't change. There's a lot of things we have to consider, to understand.

And I hope, as I always said, I hope man will not use animals for their transition. Be brave enough to test this on his own Soul the way we did. Otherwise we are back into the same, what we call, animal testing. How does a cat looks outside of dome and inside dome, what will happen to us?

Any other question? I would like to finish in the next few minutes.

Are there any other questions?

Q: .. I just want to share something that happened to me, two nights ago. I wake up on the middle of the night, and it was not a dream, it was, I just realized that, I was a bubble, I was inside a bubble. Like, in the place of my head, there was a bubble, bigger than my head, a little bigger. And I was like a bubble, I had no legs, no arms, no nothing. It's like, I felt that I was that, that bubble. And I'm... just want to ask Mr. Keshe, if... is this the Soul? I can define the Soul as this bubble Mr. Keshe? (2:00).

K- I don't know, I wasn't inside the bubble, I don't know what you saw. Possibly, you can ?? expand to see your own... A lot of people who went through the system, in Linz, speak about this bubble. A lot of them, a lot of... majority, a large number of people, they said they were as they felt they're inside the energy pack, their own Soul, they call it. Yes, it's quite possible. It's not, you don't need a machine. And can you expand it? And what will be the interaction of this bubble? It's not unusual, but yes you can. Because we've seen with many people, who went through the system in Linz, they think they were in a bubble of energy of their own and it expanded. You don't need a system. You can do, you can reduce your blood flow, feel strength over your Soul, you can create that bubble. There's a lot of techniques you can use to do it. I wasn't there, but most probably maybe you have.

Q: So the, the job is basically realize that you are already dead, but you just ignore? Can I say this?

K- You don't die. Why do you think when the Soul expands, you die? You actually live better than dying. Because when you see it, it means you are still within you. The Physicality is still, the STP is still within you. You see it through the eye or the strength field of the eye of emotion of the man.

In the future I'll explain this, why man goes from the physicality into the Soul. And what it gives it. It gives it a lot of knowledge about observation. (2:02). In a way, when we say, we get the information from our Soul, Soul learns a lot from the dimension of physicality, and uses it for its existence. It's not a one way traffic.

Shall we call it a day, because we started a little bit late. And if there is not very big questions we can close it.

R: Sure Mr. Keshe. There was some other questions, but I'm sure we can deal with them later. If people want to copy them over for next week, let's say.

K- Yeah. Let's see what we get. Thank you very much for today. We'll meet those of you who came, or who come for the elevation of the Soul of the children who have been abused worldwide. You will understand you will not reach one. You'll reach more or less a lot. And then we'll see how we get this to the next one.

But it was a very, very interesting experience. and I knew in a way we ?? achieve , confirmation of it, is that when it came to me and what I can do and what is to my benefit, I was there. But it's now, I have to accept I'm responsible for the other Souls to change, which I do not know, I don't want to be part of, which is the change, the man has to change. It's a very interesting point.

See you next week, hopefully with some more sharing of the knowledge and the way, I hope you understand today, how I tried to bring the collection of the knowledge's and teachings of the past together, that it brings a lot of sense to you. You understand the way and why and how. And what you want to do. (2:04). The choice is given to you to choose. You can go in a spaceship, or you can travel the span of the Universe with the fields of your energy, what you call this, expansion of the Soul. Thank you very much for today, and hopefully we meet each other next week.

487 KSW May 25, 2023
