

# 500th Knowledge Seekers Workshop August 24, 2023

(Transcription, Proofing done)

(Auto transcription by Elias)

Milestone 500 KSW; History of KF and troubles & successes; BRICS; CIBRIU; How Soul interacts with Soul of planet - galaxy - U; New "Interactive Sessions" - make fingerprint to advance T - discover where come from in U - get home; Bottled water from world changes emotions thoughts; Nuclear power stations Europe overloaded; Teaching what STM & STP are all cells - all organs; re-grow organs; Grow food quickly desert without water - need to chew; Water all over u not same - different energy levels,

## ENGLISH TRANSCRIPTION

(:16)

R: .. Today is kind of a special day, it's a milestone at the number 500. And I have had the honor of being there through these all 500 workshops. And of course, so has Mr. Mehran Keshe, the reason that we have these workshops. Hello Mr. Keshe, are you ready to begin today's teaching?

K- Yes, good morning, good day to you as usual whenever and wherever you listen to these series of Knowledge Seekers from the Keshe Foundation Spaceship Institute. As Rick said, it's a 500 times plus, which we welcome you to the knowledge of the Universe (U). And, even this 500 plus sessions, it's not just even put us on a first step of a ladder of the universe's knowledge.

It's interesting to look back how we started, and the first sessions, and the first teachings, and then building it up, and then growing it up. The whole knowledge of the Keshe Foundation (KF), the whole structure of the Keshe Foundation started in 2000 and about 2005. Where I met one guy and he said, "Mr. Keshe, let's make a website." And we called it keshefoundation.com. It's not there anymore, but it's on the history channels or panels, sections of the Internet, if you can find it. And we started, and it was so much excitement, putting the first website out and monitoring, who's coming in, who's going out, who's monitoring it. And we start making booklets of everyday hits of who came in, which pages they watched. Because the brother of the guy was an Internet guy, he could do everything in the background, when he did the first page. And gradually, from that time, we come to where we are today. And, two men starting it, in more or less, kitchen table. (:18). And then building it up to become now one of the largest, most powerful scientific organizations in the world.

The power of knowledge comes as us, as Knowledge Seekers (KS). And the past 500 sessions, step by step, has brought more and more Knowledge Seekers. From the man on the street, woman in the kitchen cooking, people on the sleep, in bed listening, to the ministers and world leaders, step by step, we have walked ourselves to where we are.

In a coming time, in a very, very short time, Keshe Foundation will come out of obscurity in the West, not anywhere else in the world. We've stood the challenge of the kings, we've stood the challenge of governments, we've stood the challenges of every way to stop this technology (T) to come out. But you can never fight the forces of the Creator. Even the man thinks he won the battle, but in fact that battle was their battle which they lost, deeper.

Today, as Rick said, 500 sessions of the Knowledge Seekers, plus many we did before that, before we start calling it Knowledge Seekers, and all the teachings, more or less started around the 1970's in England. I start teaching, explaining to my fellow students, same class, and then to the professors, and then to the militaries and the rest. It has brought us to a point of maturity. In a way, the more we teach, the more is revealed, the more we understand deeper. I remember in the summer of 1979, (:20). when I went to Queen Mary College, I sat in front of my professor, Professor Leslie, one of the brightest man in the nuclear industry. He said, "I don't know what to do with you, you come in, I took you, but I'm responsible to see you through, but you are a different character, you're different knowledge and you can cause us a lot of problem, but you will bring a lot of insight for us to see what we are missing." And that build up, where we are today.

In summer of 2003, 2004, setting and signing agreement with the minister of defense of England I realized how powerful the technology has come. The British government refused to sign a non-disclosure with the ministry of defense of England, but with the minister direct, which means I was answerable to the Parliament, I was answerable to the Cabinet of British Government. Then I realized how strange things have turned up.

Some of you know the history of the Keshe Foundation. But, when in 2000 I stopped the work, the business, and concentrated on the development of the technology, to build the first gravitational system, it took me some time, I bought the centrifuge, it didn't work, because I didn't have the right nuclear material, and I knew my target was to create the first nuclear base reactor. I went back to British Nuclear Fuel, where they know who I am, I worked with them before, and I said, "can I have some nuclear material, for me to be able to test the system?" (:22). In summer of 2004, I received a call that, "you better come to the, what we call, "Military Museum" in Trafford, and we shall meet there. We discuss your request." I thought, what has this got to do with military and museum?

I went to the Military Museum, it's not very far from Manchester United, football ground. I lived in Manchester for 20 - 30 years, so I knew where I go. I walked into this place, I said, "I've been told to come here for a meeting." They showed me up to a office level, and to a room. The room wasn't more than three by four (meters). A round table in the middle, and about 4 or 5 guys sitting around. I walked into the room. And I said, "hello, I come here, I was told, I requested for some materials." The guy stood up, and he said, "hello, Mr. Keshe. We knew you'd come back. Welcome back." I said, "can you explain?" He said, "from your university time, we kept an eye on you. We knew you have brought a breakthrough. But it's nice to see you back." And he introduced what everyone around the table, from which ministry, ministry of Defense, Military, and the rest were on the table. The guy said, "I'm represented to sign on behalf of the British government to

this technology.” And they brought the papers out. It was already drawn that I'm signing on behalf of the Minister, and Ministry of Defense was not to be known. (:24). And that's the time where the troubles of the Keshe Foundation in everything in that room started. The technology was marked for more killing. The technology was marked for defense technology.

I talked in a number of occasions. They tried to impress me. They said, "the minister has invited you to the Farnborough Air Show for you to see the power of the technology you bring." As you know, there are two air shows a year, every two years. One in Farnborough, one in France, where most of the military hardware is sold to governments. I went to Farnborough. And the other part of the problem of the Keshe Foundation, exactly around this time, if you check Farnborough Fair, it's about this time. The first 3 or 4 days is closed to public. The last two days, is open to public to see the shows, the air shows, and the military hardware they want to show. I was invited there the first day. I went there with my, what used to be my wife. And I walked, literally, along the runway, watching different "Phantoms" (jets) "F this and F that," flying. As I was walking, waiting to meet with the appropriate people of the Ministry of Defense of United Kingdom, because this section is not public, I met many ministers, many cars and entourage and the rest of it.

I walked up to the top of this little hill. There was a big blue building, huge. And I walked in there. (:26). And nobody was talking to me anywhere. I was just like, "playing on my own," but everybody else was there. And I walked into this building. I saw Lockheed Martin banner by the door. So I knew Lockheed Martin is part of the American Defense technology, Space technology, and everything else. And I went to the information desk and said, "can I speak to someone about a new technology?" The lady said, "can you wait for a minute?" She went in, and a short fellow, very short fellow, maybe 150 centimeters, about 155, came to me and says, "can you come back at 12 o'clock? The person you want to speak to is not here." Me, walking around, wasting time because nobody from the Ministry of Defense was there to see me. I was a "lonely child" walking everywhere, seeing how ambassadors come with their entourage ?? and watching the flights, and walking around different exhibition park, missiles, weapon technology, all sorts of things was in show.

I came back 12 o'clock, trying to be precise. I walked into the building again, but there was nobody in it. I was the only Soul in this huge exhibition center. I hung around. Nobody was there. I heard a massive noise coming. I went to the window. It was a F-18 getting tested to be shown how it goes up vertical, and the noise it makes to go up itself vertical. While I was watching it, I had a tap on my shoulder. Two guys were behind me. (:28). They said, "would you mind coming outside?" I said, "what's wrong?" He pulled the badge out. He said, he is that MI-6 we want to talk with you. "On this side of the window, you're in American territory. On the other side of the window, it's a British subject." The other guy said, again, he's from Secret Service. and they asked me to move out. Now I knew why the place was empty. "They were catching a spy."

I walked out through the revolving door outside on the balcony. And the guy told me, "Mr. Keshe, you're here to serve secrets." I said, "what?" I started shouting, they started shouting. And outside the road, it was full of black cars. You see it "in the movies." They captured a huge spy, so everything was cleared to be in public. I put my phone out, I called the guy who assigned the contract with me, the Minister of Defense, (I said), "you brought me here to trap me." He said, "no, it's a mistake." I said, "I've got two MI5, MI6 officers in front of me, and they want to arrest me for selling secrets of British government. This is my technology and not yours." He said, "there is a mistake, just stay there, stay put, don't move." The phone rang with the other two guys. There was going a lot of shouting and howling. Me losing totally my head, that I knew, if they take you in as a spy, you have years in prison. The guy telling me, "there is a mistake." The other guy shouting at me, "don't move." The guns were pulled, more or less ready, if I do anything. And the phone call in my hand said, "Mr. Keshe, just today we're talking to the head of MI5, MI6. They're on the line. There's a mistake. It's totally a mistake." Then everything calmed down a few minutes. (:30). MI6 officer gave me the phone, says, speak to the lady. The lady said, "Mr. Keshe, there has been a huge mistake. We apologize. We made a mistake. Don't do anything. And don't get angry." And I said to them, "this is finished. British will never going to get this." They said to me, "you can talk to Lockheed Martin. They negotiated somewhere with the Americans. He's not talking to us anymore. You better have him."

I went back to that room. < break in audio > They wouldn't let me go in while I was standing outside. At that time with my partner, she arrived with a briefcase with the documents in it. The short fellow appeared again. He said, "who is?" Head of missile strike of Lockheed Martin. They want to negotiate. I said, "I didn't come here for this." He said, "Mr. Keshe, go out, go home, in 48 hours we call you from New York and Washington, and we come to an agreement." I said, "no way, no way." All those black cars and everything disappeared, as nothing was happening. And, the guy said, "please go back home, we call you in 48 hours, and we sort this out, we buy your technology, we are here to assist, my technology is not for weapons."

On the way back home, walking along the runway to leave Farnborough, my ex-wife, not knowing she was an agent of Belgium's, she said, "I've got to speak to the Belgians, on the way up I've seen them." On the way she already spoken to them. And, come back, and I sat in a cafe, by the runway, I said, (:32). "I'm not going anywhere, I'm packing my technology, They want to use it to kill more." She walked back to the Belgians, being their agent, being, working with them. And she said, "Let's go back, they want to talk to you." I walked back, at that time totally angry with the British and what happened. And the Americans on top of it. I walked into a hall where the Belgians were selling their weapon technology. The hall had two sections, the left side and the right side, but looking at each other. They said, "you wait here." Another guy came, after half an hour, sat on the other side. Belgium ambassador to United Kingdom was flown in to negotiate. We agreed to go to Belgium, and establish the first tests. We go in September. And we went in September to Belgium, we used to have a home there, so to us was not going somewhere strange, we just moved from the British home to the Belgium home. And after going to Belgium, they said, "now the technology has to be assessed."

One of the top nuclear scientists in Belgium was appointed, to oversee this assessment till March, every week, every couple of weeks, questions came, you have to answer this for us to assess. They wanted to know the intricacy of the technology. And in March, after the Iranian New Year, I called the professor. I said, "what happened to the report it was supposed to be out (by now)." He said, "the actual report is going to the Ministry of Defense, Belgian government. But I can give you a report, just to say, as the paper you've seen on the Internet, the technology is feasible."

I met one of the top Belgian professors in nuclear weapon, called Dr. Deer, a lady brought in, especially from America, (:34). to assess the correctness of the technology. And then that, after that letter, within two, three days, Belgium signed a company to build the system. Because in their assessment, theoretically it's correct. I spent four months with a company a lot of you know, going through intricacy of mechanical system. And after four months, they said, "yes, technology is correct. System can be built, which can fly, and can create energy."

Then they said, "there's somebody important is coming to the company to see." I said, "can I come?" They said, "no"." I said, "how come me, as an owner of technology, cannot be when this guy comes." It touched me. So I went and parked my car outside to see who it is. Here it comes. Today, King Philip, the king of Belgium, at that time prince, came to see the technology. And from that day, my problem started, and we had to escape Belgium and the rest of it. Again, the target was military. And then I found out what we call, "Red Circle" was part of that organization later on. Trap after trap trying to get hold of the information. Getting poisoned, getting shot at. And the strange thing is, all the assassination attempts was known by my partner. She was pre-informed. The day I got bombed in the car, suddenly she had a headache and she couldn't come. The day Fabio was assassinated, suddenly she had to be home. She couldn't be there. We knew all why. (:36). This brought us to Italy. This brought us to work and not stop.

You Knowledge Seekers came more ?? a few of, hunger for knowledge. And me being a fool taught you more. And in that process, and in a different direction, we got pulled to China. We went to China to escape the hands of the Belgians who were trying to get me back in, to assassinate, or to get the technology. Chinese government pulled us back in and held us during the court session. That if anything goes wrong, we are in China. And as we know what happened, the fake courts and the rest of it. And this gave us a ground to work with the most advanced nation in the world in its own way, most populous nation in the world. And that brought us to today. 500 teachings down the line. We have signed one of the most powerful agreements with a nation, where we deliver everything to change the course of humanity.

It's not that we are unknown. We are well known. And we are well known for what we do. And we came to know this, which is a way, a proud point for all of us Knowledge Seekers. Today, this weekend, is the BRICS conference in South Africa. The last BRICS conference was in Brazil, when we had the first Brazilian conference. I was asked to stay in the same hotel as the prime minister of India, but everybody else was cleared of that

hotel. We were the only outside organization inside with the rest. (:38). And we were told, we were cleared by the Chinese and the others to stay. Keshe Foundation is trusted. Then I knew we were part of the "international game," where in the morning, the whole of Keshe Foundation team packed their suitcases, was in the corridor, ready to leave Brazil. We were told to stay. And we were put back in our rooms again till the end.

We met with the officials of governments, some in secret, some with members of the Keshe Foundation to lay out what is there, but in general, (it) was to understood. And the interesting part was, a known Foundation for its work, was welcomed by BRICS, and cleared to be where the presidents and the leaders of the world come and go for dinner and negotiations. You can ask this from the members of the Keshe Foundation who've been there. And we sat across the table with different governments.

So we are not obscured. We are not dreamers. And today, the 500th teaching, 10 years down the line, we have jumped what it would have taken decades or centuries for a knowledge to be spread. Now we understand why. And we understand we are correct. We are more than correct, but we have to stay correct. Not to get "big headed," now that we have received the full support of Chinese government, and all the rest which goes with it.

Yesterday, my communication with the American ambassador, I invited the whole of American structure to the 11th of November meeting, officially, with all their scientists, if they want to. And in that letter I wrote, the invitation is very simple. (:40). CIBRIU has been set up. You want to be the last person in the queue? Or in a meeting, we rub shoulder with each other, and we extendedly meet other ambassadors of the CIBRIU, that we can set up the technology in exchange for peace. And Iran will be recognized as a space provider technology, where CIBRIU is China, Iran, Russia, Brazil, India, and United States. So the official invitation to the American president, to the American government, has been made yesterday. And American ambassador in Brussels years ago told me, "in the next meeting, we'll be there. We promise you." We want to see if they keep their promise.

And we see in the 10 years what we jumped, we can bring the change. To you, it's a few minutes of history you listen to. This is 20 years of my life, withstanding poisoning, assassination by bombing, high speed chase and everything else. And the strange thing is, when I sit back and look, what the change will bring, I say, "the life of a man was worth it to bring change to so many." Welcome you back to the Keshe Foundation. One day I might tell you some more secrets, or history of the Keshe Foundation. Where I drew the first UFO, and I explained how it works. And a friend of mine said, "why don't you make it?" Now, we don't need to make it, because it's made by nations. (:42). And it'll be shown by nations.

<< Audio Breaks >>

K- Hello, can we hear me?

R: Yes, we couldn't hear you for a minute there. We hear you, we did hear you, but you had an echo. ....

K- Okay, we're okay. Sorry about that. A lot of people don't like to hear the truth.

R: Maybe. Thank you.

K- Thank you very much.

Anyway, now on the 500th anniversary, you understand a little bit more, what we've gone through. And, even in the past week, I received a message. The way we lost millions, in the past two years, was set up again, (:44). by those who were there to stop us. But losing that brought us to a bigger position, beyond our imagination.

But, it comes back to the teaching. We listened to the Intro, we listened to the whole cycle of life. Interesting enough is, as a Soul, as a part of the structure of a plasma, how do we interact with the Soul of a planet? How do we interact with the Soul of a galaxy and a universe? And is there a difference between these things?

In the Keshe Foundation website today, later on, you will see a new session set up. This is what we call, "interactive Soul." The reason for this is that, in this session we try for you to test yourself in what we do with you from outside. We've done this test, we know we have some data's, but now we want to see, collectively, (if) we can reach all of you to the same level. In a way, Keshe Foundation is back on what we call, practical ground.

You came and you built the reactors and MaGravs, now you bring the "play of the Soul." Those of you who signed for this, it's two ... two sessions. One first week and one the week after. There is a reason we done it this way. (:46). Those of you who come in and join with the interactive session, please buy yourself a pH tester. It's very simple, you go to a chemist, you went, you tell them, "I want to test my pH." They give you something to test. And then the second week, we want to test your sugar level. If you're diabetic, join us in that session. If you're not diabetic, but it's good to see, it shows that we give you the data, what is the chances of what diseases you might get, or what position you have through the Soul.

This interactive session is a cornerstone of feeding man in space. Where we want to know you confirm the ?? disease. And this will start the next cycle of the space technology development. Those of you who signed in for the "signature of your Soul," as of today, we don't accept anymore. And now, the first set of these tests will be done in the meeting of Monday in Manchester. And then the rest of you will be informed. When is your time to get the "signature of your Soul."

It's important for us to not dilute our system and have a picture directly, people we see in front of, new technology, never seen before, will be brought into Manchester, and we carry on with the system to see the operation of the Soul and how we control. And then we do a session again later on with the same people and see what is going to change and the effect on the new technology. (:48).

I ask you as many as you can join the, what we call, the "new trial," the new set. In a way, it might show you a lot of things. In a way, it brings the knowledge to the next step. This interactive test, which we'll carry out next Friday, not this Friday, which is the sessions on now, but the following Friday on the 8th of September, it'll be one of the most important confirmation of the technologies. The more of you join us, the more we can cover the whole structure of the next step in the space technology. In a way, it closes one chapter, but opens another.

What is to be do? What does this mean? What this data will bring us? Allows us, in our work, to set up the next step, to structure the next stage of the space development. In a way, what you tell us interactively, with you testing yourself, allows us, through the systems to be developed now, to do a lot of good things for humanity. To bring a new dimension in the backbone works of the Keshe Foundation. It allows us to see where we need to strengthen, and where we have to reduce the tension for the next step in colonization in space.

As I said, (:50). Chinese government is the first government who has committed themselves to colonization by 2030 on the Moon. Their colonization will not be in the "monkey suit," as I said before, or (it will) be conditioned like where we are today. We congratulate the Indians managing to land after 50, 60 years of the Americans, but this does not show being behind in technology. It's just being too busy making another 1.4 billion be added to us. Indians are busy with something else than going somewhere to party. We saw the party yesterday and it's beautiful to see, but was most probably one of the last flights we see man will take with a "firework."

This morning I was a bit late and as Rick said, "you never been late since the time, you're late by one minute." I said, "I was talking about the space development." I was talking to our Knowledge Seeker, where we develop the next stage of landing, accurate landing on the Moon, or any space in the world. The new design, the new structure of the technology, where it took them from the 14th of August to get to the Moon and now they landed, congratulations to Indians, but the next step, in next 12 months, 24 months, it will be 14 seconds. Where going to the Moon in next 5 years, will be the way we go, "for a walk in the park."

In next 10 years, commercialization of the space technology will be like the way our children at the age of 1 and 2 are savvy to the laptops, (:52). and iPad, and you see them at the age of 1 and 1/2 playing computer games on the back seat while the mom is driving.

Technology evolution is so rapid. And technology development is so rapid that in the coming months, in the coming year, two years maximum, in collaboration with the Chinese government, Iranian government, and most probably Brazilian government, we open the space technology in a very rapid way. The rapidity of it is not building a swimming pools and jumping in it and see how it is ???. The rapidness of it is the same environment as we live in. So we just move in home. The simplicity of the technology

that every nation can reach, the development. We don't need have a hidden budget, hidden secrets, and organizations to test flight.

In these test flights we have to be able to control everything for your transmutation, for your change from the matter state of the Earth to the matter state condition of the Moon. I'm sure many of you will do that many of us does, when it goes to Amazon for example. We go with a "tie and a suit" and everything else, and as we stay longer things goes away and we start living and eating as the natives do. When we go on the Moon we don't want to be in the spacesuits now but now have a freedom of the Earth environment. We want to see how it is on the other side of the "dome." And the transmutation coming to operation. With a man, ?? lung will die crossing the bridge. (:54). With a man, understanding of the transmutation of Soul to dimension of physicality of the Moon will survive.

We change according to the environment. In these tests, we lose many. It will not be sweet time. In these tests, for the knowledge to be transferred and understood, we will lose many physicality's, but we free many Souls. In a way, the actual "wild west" of the space technology has started. We have to understand how you transmute and how you come back. How much of it we can assist you. And how much of it you learn to use your Soul. This is why the interactive sessions we put in is important. 3, 4, 500 people. The more we test, the more we understand combinations.

In these processes, I will tell some of you, because I know what I'm looking for, when we come to the individual positions, where your bloodline comes from. From which galaxy, from which star. I come from that dimension. I understand the technology. Many of you will be surprised. You are not from this planet. Your origin doesn't come from here, as you were travelers of the space. And there's a fingerprint on it. We tried to prove this to the Chinese military past few weeks. And in a way, trying to prove the confirmation, I showed them another way how to understand with the energy levels. You can talk about the energy source, (:56). origin of the planet, and the rest of it. But they need to be educated. They need to understand what every data means.

In a way, we open the history of the universe to man from now on. When we asked you to join in for your "fingerprint of your Soul," it's because we are going to the next phase of "interactive sessions." Where in that interaction, we'll tell you exactly where your origin comes from. United Nations charges you so much to tell you which way your ancestors escaped out of Africa, and where they came in from. In a coming time, we can tell you the origin of your life, if you're the "Passengers of the Universe," it's like day and night. Because the energy comes from the universe. Energy comes from the fields of the universe. And as was in the Intro, you see when you go to a planet, if it has got the fingerprint of the Earth. It's the same. See the fingerprint of the birth from where the bloodline of the man on this planet looking like a man comes from.

As I said, we're entering a beautiful phase. We are entering to recognize and confirm that we are part of the Universal Community as much as they are with us. And we were so

ignorant to understand it. Now we see how, to what extent, and how long they've been with us. (:58). What we learned from and what we taught.

The next sessions of the next three formats of the Keshe Foundation, these interactive sessions, will open a new knowledge, new understanding for many of you as Knowledge Seekers. We use those who came in with a fingerprint of the Souls, who will go, start going through the sessions in next week or two, as a reference point as their Soul brought them to this position. And then we "mark the bench." And we go through as many as you who come into the sessions of interactive sessions.

The interactive sessions will bring you and us a knowledge, will take the space agencies 10, 20 years to gather. We know what we are doing, we know where we are. And this allows us to use your fingerprint to make a system for us to take you back home where you came from. I can search the whole of the Universe for a star, if there is a life. You are the sample of that star and with us. Now you understand how we will map for man, as you call it, the GPS. Because you have already come from a position and in a way, universally GPS you.

Now you understand, how simply with you sharing knowledge with us, we are opening man to the space in a beautiful way. As we could make materials, now we make the fields of the universe. (1:00). And as you have the connection to, we latch on, we copy of your fields and we take you back home. As we go home with you, we learn more about works of the universe.

Today's teaching is teaching of understanding the history of the Keshe Foundation and the history of the man will go. But in a way is a break point for us. In the sessions of Manchester meeting, you will see new systems which we've brought in. These systems to our team is for another purpose, but to me is for another purpose. And this is why we chose a few, that we have a full understanding of. If you remember when we did the first trainings in Trani and in Barileta, was very few of you. And in that process we learned a lot, we brought a lot, and we added to the totality of the knowledge by different people in different way. Even they left, but they took the Soul of the knowledge with them and that still works for us, and it's still delivering for us.

Man should understand where and how his Soul goes after leaving the physicality. Or man can test his Soul and see if he likes where he's going and what is he prepared to do to bring that change for it. The elevation of the Soul of the Man (STM). In a way you go to China and stay there a few days and then you decide, (1:02). "do I like to live in China or I come back." Now the development of the technology and what we tell you, is what we call, interactive sessions, allows you to find where your Soul in one level has found itself, and where it'll be finding itself. For the first time men will be given a chance to evaluate its conduct. And you have time till you change the physicality, or by time, to elevate the Soul without the dimension of physicality.

In a way, the "heaven and hell" is in your hand. It is the joy to be, or regret where you're going, and you have no say to it. The elevation of the STM, the position that Soul will

find in the universe, becomes the responsibility of the man. And these trials are the beginning of that course. How can I elevate myself? How can I bring myself to be in a position where I'm comfortable to be for the rest of the existence in the dimension of Creation?

Now you understand. step by step. Every work we do is well planned in advance to bring that position. We have to establish the world peace. Most of you Knowledge Seekers who join in the fingerprint are a peace loving people. We got to know you over years, and we know how you feel and that's why we use the benchmark, zero, peaceful, men of peace, those who work and look for world peace. And we build on this. That's why we open this channel.

Next step for us is to, (1:04). in a way for you to see how you change, in the, what we call, interactive sessions. And then you see how you manage to understand to move from dimension of material state to state of energy and how to convert back to. It won't happen in one session or two, you have to practice it yourself. In a way, the interactive sessions are, as we set it up, we'll start teaching you the conversion of come, what we call, transmutation. You will understand how, you'll understand the reason why, but it's the way, step by step. As the Armenians say, "gamas, gamas", slowly, slowly, we will do it, we'll get there. But you have to understand, otherwise all becomes a magic, and then it has no meaning, because you look for the next magic. This way, nobody can become a magician for you. And no one can teach you what you do not know.

We teach you in this process, how to tap into the Knowledge of the Universe. And never doubt in what you receive, and what you have to do. You tap into the knowledge of the languages, as easy as a child speaking 10 - 20 languages for you, is not a language. It's just the way you mutated to be able to live on the Moon, understand the culture, the environment you have to live in. Now you understand how to change in the position, not only on Earth, how you communicate with another, what we call, "body of information," life, in the universe, and gather their information, and give the information about us, how we live. (1:06).

Interesting point for many of you, was and completed in the testing as we said, with production of materials with the Chinese military in past few weeks. One of the basic things we see again within the structure is, Hydrogen. Which means again through the same tests, we can gather the field strength of it.

Interesting point for many of you will be in the process of these interactive tests, that as I was listening to beautiful talk yesterday with the Indian space people, we got to the South Pole, we found there's water can be there and there could be life. There is water all over the universe. But when you bring the water of the Moon back to Earth, if you find it, does not have the same fingerprint of the water on this planet. You will have common denominators, but it's not the same water.

Go to the history of what we call, the "beating water," homeopathy. And then, if you understand, people who are familiar with this, I've written a paper about the truth about

homeopathy. You will understand, different beating gives different strength and different dimension to the water. One behaves like a zinc, and one is antibiotic. So, man will see the water, but man has to test the water, to show the fingerprint of the Moon, not the water from Earth.

Water is one of the most abundant, what we call, liquid in the universe, (1:08). but not all the waters are the same. The salinity, the heaviness, the interactions of all creates the what we call, condition of life. And scientists soon will understand. They are too busy finding water, they are missing the principle of the creation of that water, and what that water means, and what kind of life it supports. We have to look in the energy levels of the water, not just that we found the water. And that energy level, that combination of interaction of the fields between the Hydrogen and Oxygen, or another element, which manifests itself as a liquid, gives us an indication of life, gives us an indication of existence, gives us indication of the fields which we can survive.

It's very interesting and many of you, I'm sure, you have never thought about it. Many of you, today, you buy bottled water, coming from Nepal. Bottled water coming from South Africa. Bottled water coming from South America, and you're in Europe or in America, and you drink it. You, if it's the water from the origin where they say it is, you start changing behavior in yourself. And if you would have drank the water from down the road, or from your tap. This new bottling water has brought a new dimension in the life of (the mixing) of the emotion, intelligence of the man. And man is not aware of it.

In the coming time, man gradually will start looking at it, and understand it. (1:10). People who continuously drink water from sources of a given position will start creating certain characteristics, like you're Chinese. But now this time, it touches your emotion and physicality in a different way. Now you understand. As I always say, "whoever's got a mustache, is not your uncle." Just because it's a water, it doesn't mean it's water. It's the essence of the creation. It's the essence of the fields which affects you, creates emotion in you, and with it creates a new image of you.

In the coming time, I'll teach more about this. In the coming time, we'll see more about this. And in the coming time, we'll see how this beautiful adventure we see with the Indians will bring a new light. Don't get excited that they found water. Be excited what kind of life that water supports. It will not support the life, the same as us on this planet, it's slightly different. You start living on the Moon and drink from that water if you get a hold of it. If you need water to survive, then you see you might become more Indian looking, or more Chinese looking, or nothing from this planet, because the fields of it affects you.

This goes back to my teaching, which I said, when they split India to Pakistan, the Muslims, and the Hindus, we see the two character of the same race for thousands of years together. Aggressive, aggression in the face of the Pakistanis, peacefulness, and in a way, sanity in the face of Hindus. They are the same blood. They came from. (1:12). They just drank different blood.

Now you understand how important this will become in the science technology of tomorrow. In the "interactive sessions" we put, is the opening of the knowledge to future scientists who interact with us, as a human race, and us interacting with them, man who came from the Earth.

Thank you very much for being with us for the past 500 sessions. And I hope you learn a little bit more about what is to come in the world of science. And please join as many as you can in the interactive sessions, because it's a database for the first time ever be gathered. And it's a database will give us a lot of information about a lot of you. And allows us to set the course to make it easy for you in the future for your transmutation. Thank you very much, Rick. If you can go to a break and we come back.

>> **BREAK** >> 500 KSW August 24, 2023 (1:20).

K- Yes. Just referring back to what you just shown about the new center. Today, standing here, scientifically, even the systems you see, which is unimaginable by many people, which now is set up. These systems are already obsolete. Through the test development in the past 12 months, since they've been built, technology has taken a leaping jump over a lot of other things. And in a way without you knowing, in the last session of the 4 sessions we had with you last time, last month, we brought in a new system, which replaces even these systems. And many of you felt different in the last session, because we tested the validity of the new technology in a much more advanced, in a way maybe it's 20 - 30 years of research jumped in less than a year.

And the systems which you will see to be brought in on Monday in Manchester is the edge of the science of man till today. And you will see how we'll make a fingerprint of your Soul. And then during the sessions many of you will go through the confirmation of transmutation. These systems even as you see it looks so futuristic, (1:22). they have lost them their futuristic characteristics or work with what has been developed. We tested systems in China very heavily in past four weeks, six weeks.

I thank the Chinese Keshe Foundation team in the background, and I thank the Chinese officials without them knowing, brought us a vast knowledge of technology. I'm saying

the Chinese military, in a way they work with us, in a way they understand our technology. China has chosen one of the top scientists, the man of vision to work with me. And this man will open huge doors for the humanity. He thinks he's... he has the audacity to push, but he finds out in pushing, it brings new dimensions for us. I open technology to people who I trust and we have built the trust with this high ranking military officer and this will open advanced knowledge and technology for China.

The same as we done with the others. When we trust we teach unconditionally. And what you see the breakthrough will come in science and technology will bring changes in specially in next six months, which whatever we done in past 20 years will be overshadowed by this rapid development.

Those of you who come to Manchester will feel what I tell you today. In less than 4 or 5 days you'll be on the receiving end of one of the most advanced space technologies ever created by man. (1:24). And you'll understand how this space unit, as you see it to be so advanced, has become what we call, "museum piece" by its own work. What it taught us, what it brought us, and what we learned from these, and our team understood for the development of next step. Those of you who joined us in the last session of the four sessions and we brought in a special system in the background brought us a lot of knowledge, brought us a lot of what we call, jumping technology to be confirmed.

And those of you who will join us in the interactives will feel the difference this time. Amazingly how this system will be and how amazing the whole changes will be. Allows you for the first time to in a way, know about your energies, your Soul, and how you can start the process of transmutation.

Any question?

Q: ... Hello Mr. Keshe, hello Knowledge Seekers. I just have some thoughts which I want to present right now. And it goes like this. Because it's possible for me to let all people worldwide calm down and turn all old colors into new ones, I got the idea to build in all so called, democratic countries our own political party called "All Men One," thanks to Ferd Amini for the name, (1:26). where "All" in German means "universe" in English, "Men" for mankind and "One" for one race. So I can give once again energy to all human minds to choose only one at the next election. But our first rule is that we do not lie and all the other peaceful things we represent with the Keshe Foundation. So that we displace step by step all the other oppressive political parties. For the party of Ivory Coast and Nigeria already have two perfect candidates for presidency. During the next weeks, .. I will inform the four biggest German health insurance companies about our headset devices so that they can finance the orders of local hospitals and ?? infirmaries, which is much cheaper for them to cure the roots and not to treat the symptoms with expensive pills. Would be nice if someone helps me with an example device, so that we do it together and they can see it, the results "live." Even our latest results with growing new teeth, would be great to show. After that we can continue with other countries, who have health insurance like Germany.

K- Thank you very much. In a way, it's the job of you Knowledge Seekers, to take the technology now to your nations. It does not matter where and when. As I said, we have asked our Chinese counterpart that sooner or later, China in committing his nation has to announce a collaboration too. And one way or another in next few weeks you will hear that coming from China. Once that happens, the doors of the Knowledge Seekers will open up. (1:28).

I'm back in Europe for Manchester conference and more or less rapidly we retrieve back to Beijing to complete the cycle of technology. This should give you as Knowledge Seekers to start making the ground, and if you put us in touch with your governments, we can show the collaboration directly with the Chinese in different levels and how interactive it will become.

Something interesting happened with our team in Iran without them knowing what we know happening, showed another what we call, direct interactions between Iran and China and how they're monitoring the development to technologies in two nations. And we should see this more with the other governments. And doesn't become a "leak" of the information, but it becomes a "leap" of information with other nations.

If you take such a step to introduce the technology to different organizations with results, we back you. Our scientific side will back you, and we have agreement with the Chinese that outside China we have a freedom in collaboration with China to do a lot of things. So we can bring more of you in.

The sessions of the 11th of November we stay very calm, because there's no use trying to do things when there is nobody home. August is a time of holiday for most of the ambassadors. They return usually between 5th and the 10th of September, back to their position. And, in that process, (1:30). from early September, we come back to you Knowledge Seekers, to start the rapid invitation of your ambassadors, not only in England, but across Europe. If you are German, you send the invitation to all the German embassies, right across the world, not just to the ambassador in London. This way, we stop the pushes we've seen from the Belgians and the German groups, which they think they can do what they like. We saw that in the opening of the exhibition in Linz.

We ask you, we give you the letters, those we trust, to make the invitation to your ambassadors and your government, yourselves. Germans are responsible for all the embassies across the planet for the invitation. Americans are responsible the same, the same with the British, the Nigerians, Australians, and the rest. You invite all your ambassadors. In a way, nobody can block the system. But we let the ambassadors have their holidays. And then we, you as Knowledge Seekers, we invite the world to the world peace conference.

We will show technologies on the 11th of November to world ambassadors, which will shake the backbone of the knowledge and technology of today. Everything is getting set up. And the most interesting part will be that the ambassadors will feel, will be part of, will see everything. That no doubt it will be in it. We saw that with the Chinese military.

The officers had to explain to the scientists, (1:32). "it cannot be nothing because our clothes is covered with this and that, and we feel this and that." So, technology will be shown in the way, you will see what we gave as MaGravs in Rome, will be MaGravs, but with their effects, that you as Knowledge Seekers up to now could not show.

So take a rest, like we are, because we know the system. And don't forget, 11th of November is one of the busiest days on the calendar of the ambassadors in London. There are a lot of parties and a lot of meetings. And so we create that condition, with you as Knowledge Seekers to support. Get in touch with insurance companies. Get in touch with whoever you think will bring the change. As I said, we are "under the door and the business has started."

In a way, if comes to the national levels, we bring our heavy weapon, the Chinese government, on the table. Because we have signed a joint collaboration worldwide with the Chinese government. Not only within China. If need be, we can ask for the Chinese financial support to set up things in nations in collaboration. We've chosen the right partner to go where we are going. And even if your government say we don't have the finances, we look into the structure. We have to make a proposal to our Chinese officials. And if agreed, it will be financed. So, if they have a problem with financing it, (1:34). and that's the usual way, you just tell them, "finances could be organized." And it's our job, through our structure in China, to set up the finances for the German government.

This is part of the "Silk Road," but this time the Silk is beautiful, and it'll bring peace. And it's not just a road, it's a road to peace. And we have received our collaboration from the Chinese central government. We have signed ourselves to it. As much as they've signed themselves to it. So, get in touch with your insurance companies, get in touch with who you think, doesn't matter Nigeria, Ivory Coast, Beijing, Washington. We are there, with the help of one of the most powerful nations, to bring it about to happen.

Any other question?

Q: (auto translator from German) ... Good morning, on August 20th, 2023. That would be 4 days ago, let's say. In the Hungarian town of Lenti, the Windy Weather App showed an average radiation exposure of 866,754. The average radiation exposure in Chernobyl is 7,500. Since my Geiger counter also constantly displayed an alarm, I can rule out a technical defect in the weather app. (1:36). On 8/22/23, that would be two days later, the measuring station was switched off, and one could not read... And one could read that the data had not been renewed for two days. Can you please tell us something about this process? Thank you.

K- I know nothing. I cannot make a comment on something we don't know. But if there are more data's across Europe, then we have to look at something.

We know there is a problems in Ukraine. And IAEA is doing their best to cover (up). But the process is not one way or another. There are a lot of testing going on in this... Ukraine now is a testing ground for many, many weapons. Very a lot of old weapons now have

been used. Whatever was left after the, what you call, opening of the Eastern Bloc. The end of, or opening of, the European Common Market. A lot of weapons were kept. They cannot do anything with it. And now it's been tested in Ukraine. We know nuclear shell, all shell radioactive material has been used.

But there's a huge danger with two of the main reactors in Ukraine. (1:38). But you got to realize the present situation has put a huge pressure on the Western European nuclear power stations. Fuel has gone up, so governments cannot afford paying for these fuels. And they have ramped up their nuclear power stations to their maximum capacity. And these reactors are not set up to react like this. And the fuel rods will show fatigue. I expect nuclear damage report in Western Europe in the next 3 to 5 years. Because the fuel is so high, the prices, nuclear power used to be used for emergency push ups. Whenever there was a high peak, nuclear power stations can be brought in and out and kept back up. Now they're working full time. It's bound to fail.

And the nuclear, especially the power stations in France, are under huge pressure. And we've seen them closing, many of them, for repair. They don't tell you why. But as nuclear physicists, I understand why. This is one of the critical failures of the system. Rods are good as long as they're operated in a cycle. That its pallets gets a rest time. When you put it under too much pressure you get accidents. I've been waiting for a nuclear accident in France, the past ?? two years. Maybe we'll see, I hope we won't see much, but we will see failures coming up. Because cannot take it and we will see radiation increases, releases and the rest of it.

But Ukraine nuclear power are under huge pressure, (1:40). especially with a shortage of moderators, shortage of replacing materials, shortage of cooling systems. Everything has brought the condition of a disaster closer. I'll not be surprised if they close more and more radiation centers. It's not, ?? recall, you don't need to be a genius to understand how it works. But primarily European nuclear power stations are under huge, huge stress. They were not built for this job, this way. Such a rapid continuous (loads). It needs time, it needs lapse time, it needs fields to build up, it needs field to, what you call, change in concentration.

Then this is what you call, a disaster in waiting. And it can be any time in next 3 to 5 years, if they keep relentlessly using their power stations. The best way is to buy two detectors, if you are worried, and rely on them. If the two are near each other, you know you are in a disaster zone, or you are in the radiation field. You got to understand governments cannot afford panic move. With a fire, they can see, they can move in the boundaries, as we've seen in Canada. With the radiation, is a panic movement of population, and government cannot afford. So they keep silent. (1:42).

But especially you people in Germany, and what you call, your Eastern front, have to keep an eye on the situation, what's happening in Ukraine. Especially with what we hear. If it's true and confirmed that the head of ?? Wagner ?? has died yesterday, in a plane crash with a missile, this will bring a mayhem into Ukraine. Now you have to bring soldiers under control, which they have no leader, and they don't want to be led by

Moscow. The worst thing could happen, but as the head of Wagner and the financier of Wagner both have died in one car crash, in an airplane crash with a missile. If it's true, then we're sitting for huge problems with what I call, the rebels, which have no control, because they don't want to relent to Moscow. And the Moscow does not have the finances to pay them. We have to wait and see, but don't rely on one system, buy two detectors and see if the two report the same, and if it is, cover yourself.

Any other question?

Q: ... What does the physical energy and power and light mean, under the Keshe Universal Plasma Insurance Policy? (1:44).

K- We provide you systems that meets your demand, energy demand. This system soon, next maybe year, will be completely supplied through China. These steps we'll take. But the technology has moved up so advanced that we... We have a big problem in Keshe Foundation. The technological leap makes our own latest technology obsolete. And we are facing this for past 3 years, 4 years. It's just, we release the technology and within months, with the development, we make our own system obsolete. And we stop somewhere and say, "okay, we have to go by ?? time." We start going, we jump so much.

As I said to the American ambassador and Mr. Biden in the communication of yesterday, we have moved enough technology and facilities into the mainland China, that if anything happens to me, Chinese will be given an address where they can pick up and follow with the technology. The situation like Wagner and scientists like me is very common. But in a way we have warned the American administration. If any "clandestine thoughts" goes into their head, I deliberately moved facilities into a safe position, coming from 3 different countries, that the Chinese military, space and other parts, will be given a coded place, (1:46). and they can pick up everything and carry on with the technology, in a very rapid way.

So, the Insurance ?? Policies means, you tap on to as much energy as you like, especially with the new development, as you need. And our system is not building energy. Our system, the way we structured it and the ways it's structured, will take energy from the universal fields. So, we are not burning fuel, we're just connecting you, we're like a transformer, we're like a substation. We connect your need to our need, our need is connected to what is available in the universe.

Most of my team do not even understand how I set things up and how these things going to be. And these, what we call, trials, starting from this session on, in the second session of other sessions, will bring you the power production. In a way, we ask you through the same method as "interactive," to see with a specific way we set you up, to see if your meters in your house stops, taking energy, but you have all the energy in the house.

We said this up months ago, we told you this is what comes as part of the policy. But at that time we could not explain to you. You will, in due course, receive a small unit that, that unit gives you the full policy, power, health, food and energy. (1:48). And we supply

from the Center. This is how the new Headset Units you will see especially, even the units you will see in the meeting of Monday for next week are already obsolete. But because they were produced we could not take them out.

But the new cycle will be much more advanced and it'll be amazing what it is and how it is. And you literally tap into the unit to your house and you take as much energy as you like. There is no meter because I haven't seen a meter from God put on anywhere how much energy comes to Earth. So you interactively from us convert energy to yours and you will find out a lot of your systems needs to be changed to AC, much more convenient for us to transfer energy. And gradually we'll reach you to do the conversion to AC for power at your end, if you need.

And those of you who take these policies up, signing to it, we'll increase the price of these policies very soon. Because we realized we have a small, what you call it, connection to it, because now we have a partner, they want to share of this structure as well. So whoever signs beforehand will stick to what, but I reckon the prices will double easily, once we sign in and complete our work with Chinese.

But in a way, it's a, let's say if you receive a box and that box you put in the house, and from that box, then we introduce you to the. What I tell you is not something we just talk about. Go back on the patent. These are all in the patent we released 15 years ago. (1:50). More, 20, 18 years ago. So now it's coming to reality. You, when you see these units in the house, you'll find that you don't need to know why they're working. The way we transfer energy to you, to your system, you download that energy system to your refrigerator. There is no wires. You download that energy directly into your, what you call, the cooker and the rest of it. This is how it's going to work.

I was yesterday talking with our team. The system has six antennas connected, connected, connected. This way we transfer energy to you, you take as much as you need. And there is no earthquake, there is no storm which can disconnect you and the rest of it. And then maybe a year you'll understand and you'll see that one of the most powerful systems which in a way based on the work of the universe has been copied by man, but in a much more comprehensive way.

So when you sign into it and we give you the date to start, you don't need to worry how much the electricity (costs), if it's an air conditioner or is you need heating for winter. We get it, what we call, through our system and you are the receiver from other end from our system to your system according to your need.

Any other question? (1:52).

Q: ... Hello Mr. Keshe, you said in the 458th Knowledge Seekers Workshop, "our body carries the DNA and our Soul carries the RNA." I would call it of the Soul, which is the memory bank of every noise, sounds, us, our ancestors, and those who have come through the cosmos, and those who we have, those who have come through the cosmos have heard. It's just that we have to be able, and get the knowledge how to tap into it. So,

can you explain the RNA, the essence of RNA, and how to tap into, and how to tap into it to get the knowledge, or the memory bank. Thank you very much.

K- Can I be a bit direct? Most of those who join us in the sessions in Manchester will start this process with themselves. And we let them go and back in November we see how much they developed. Those of you who will come to Manchester meeting, will leave the Manchester meeting, Soul wise, totally different. And that will translate to your physical life and physical dimension, with it.

You need to understand the difference between the strength of the fields of your Soul, and the strength of the fields of your physicality, and the difference between the two emotions. (1:54). And then it's very easy to do. Step by step we have to open this. As I always said, they were mentioned earlier, if we release all the knowledge in "one go" and show you this and that, we become a magician. And my work has always been that, the more people carry with me to understand the knowledge, the less it becomes magic and it becomes part of life.

And so, we need to understand by few and by more and then, gradually, because more and more understand, they change. And we have to change. We have to educate people at a ground level and people at the top, at the same time. And somewhere, the two will come to operate.

When I released the knowledge, the "Key," in 2012, many of you old Knowledge Seekers, we lost a lot of Knowledge Seekers, that I betrayed the humanity, the Knowledge Seekers, and I gave the knowledge to the governments and not to the people. And that was an uprising against me by many, many Knowledge Seekers. Then, when in 2016, 17, we released the, what you call it, the Key to public, because the officials of Singapore released it to an outside Knowledge Seeker, what you call it, scientist. Then some of the Knowledge Seekers came back. Now we have it (you've had the Key), for past 7 years, you've done nothing with it. (1:56).

As I wrote to the American ambassador yesterday, under the Biden administration. When I gave you the Key on the 15th of November 2012, you "shelved it." When I gave the Key to the Chinese, they opened it up. And for some times they looked at it, for some times they started testing part of it, but they didn't shelve it. And that's when I tell you, we have our cooperation with China, because Chinese structure has worked on the Key, the knowledge of the Key step by step, step by step.

Chinese are very cautious. Americans shelved it. European went to destroy it. Chinese brought their scientists and different organizations to look after it, to see if it's true. We were appointed one person, which is our interface between other ways, and the government from the day one, we entered China. And he took us, he's a beautiful man, into... as he doesn't know anything, "blah, blah," to test us, to see where we stand. And the same man now sits in our negotiations with the government and the rest. He hasn't left us. He was appointed to see this technology through.

Americans shelved it, ignored it and everything else with it. In my communication with the Americans I wrote, the beauty of it is, that you've been on the receiving end of the trials and tests, and you know what I'm talking about. We wanted to test how we can capture, we use your drone. (1:58). We wanted to see if we can reach you on the seas. We gave you the "Donald Duck." And we wanted to tell you have no power in respect to energy development technology. You had Iraq and Erbil (after they attempted to assassinate Mr. Keshe in Istanbul a year or so ago).

So in a way when we tell you are on a trial, on a test, "interactive," Americans have been on the receiving end of the physical test of the systems. So we have to push with the technology, with those who understand and now we have reached that "breakpoint." And it'll be amazing what will come out in next few years out of the this technology for many of you.

As I said to our Chinese friends, they were looking for something they said, if we can give us it'll solve a lot of problem. I said, "you remember the test we did, you did it was analyzed by laboratories. I've look at the data. You already had it five years but you're so hungry you ignored it." And now they understood. And this will go the same with many parts of this technology. Gradually, gradually. And is as I said, once the Chinese publicly announce the collaboration (with KF), you'll find out you Knowledge Seekers will become "gold dust." Everybody (will) wants to know.

Any other question? (2:00).

Q: .. Mr. Keshe, has Mankind reached the level of maturity yet, to have you explain to us how to communicate with the fields? Can you elevate our level of understanding, energy field communication?

K- We already do, we don't need to be educated. We just have to stop being ignorant to it. There's nothing that you need to be taught, you already know. But as long as you ignore it, you can't benefit by it. You have to go back and see how you ignored your communication and what you called, "oh, by accident." Coincidentally, we have created so many words, it's just in the English language, God knows in other languages, put together in between tens of thousands of it, to deny ourselves our own existence in the energy and field level.

And it's been... it'll be amazing, once we get to know how we find out. We've come to do that, to ourselves. And partially, mainly, the biggest, what I call, "enemy of the man," to grow this part, is the churches, the mosques and the religious people. Today people bend back and forth if they see a priest on the road or the Mullah. (2:02). In a few months time we'll stone them with our thoughts, not with the hard stone. How you abused us and separated us, ourselves from ourselves. Very soon to be called a priest will be the most shameful thing. As you call somebody a thief. To be called Ayatollah, we be the most, what we call, sins word you can hold, you can use. We don't fight with guns, with the religions. We teach that you find out the religion doesn't exist, you don't need to fight it.

And this is the biggest problem, for many of you. Your attachment to being weak, and needing someone to pray to, does not allow you to see the strength within you, that you are what they need to pray to, by your own Soul and physicality. And this is where the problem is. You are fully aware of all these fields. They denied you, they called it "Satan" and every other word, because you come to be enlightened with the knowledge of the Creation of (on) your own. You already have it, you denied it, so you have to accept it and you see the path of your own way.

Any other question?

Q: ... Hello Mr. Keshe, first of all thank you for your tireless service to humanity. Question is, if I've understood you correctly, then the reflection point of the Soul is in the middle of our head, (2:04). which you have described as a black point on the X-ray image. If this is so, then there must also be a such a reflection point of the Soul of the Physicality (STP). Could it be that the place discovered by Dr. Hanisch in the 1920's is this place? He said that in the back part of the fourth ventricle, or in the left auricle, atrium, there is a fifth chamber in which there is a perfect vacuum. This chamber is also called the hot spot and is about 4 mm. It is called the "hot spot" because a few years ago, American doctors found a spot in the upper left part of the heart, the size of a pinhead, which was much hotter than the rest of the heart. Heart specialists usually know about this mysterious spot in the heart, but they usually don't talk about it, because they have no explanation for it. Could it be that this is the reflective place, where the STP is located? Can you say something about it? Thank you.

K- I think, maybe we need to explain more. the difference between the Soul and the STP. The STM is from the collection of the fields of every cell. Because all have a common denominator. The STP is the Soul of every part, the energy of every part, collectively interacting. They are two different, it's like a Weight and Mass. (2:06).

When you speak about the hot spot of the heart, if the scientists look deep enough, that's the soul of the heart, that's where all the fields interact. You'll find the same thing with the kidney. There's a spot in the kidney, there's the same spot in the liver, there's the same spot in the intestine. Where the interaction of these fields, create the STP. Because it comes from the physical dimension of the part of the body of the man.

That's where the difference is. So, even if you consider every muscle, it has his own hot spot. And collectively, these fields are, in a way, interacting with each other through the blood flow, which again has its own hotspot. So, when we talk about the Soul, the STM, is the collective fields of every cell of the body, energy balance. When we talk about the STP, what we call, the "Spirit," is the collective interaction of the fields of every part, every, what you call, organ. And the balanced interaction with the environment, shows the physical dimension of the man. And then you understand the difference between the Soul and the STP.

In a way, you are a family with your wife and your children in your own house, (2:08). but you are a family with your parents, with your sisters and brothers and everything else,

to make that home of the parents as a home. Home of the parents is collective energy of you lot, is the Soul. And you and your brothers and your children and their children as a whole is our organs, which makes that Soul, the Spirit.

And so, when you speak about this, you have to understand the totality. And what it means to be the Spirit and what it means to be the Soul, what we call, the STP of the man. It comes from the fields, collective fields of that organ and on its own cannot do. This is why we get diseases, we get a heart problem, we get something wrong with our liver, we get something wrong, the other ones move. Because it's like a solar system, when something happens with Earth moves forward, or explodes, the others have to move to adjust for the fields of what happens on the Earth, or with Earth.

So when we get that problem we get physical diseases because things have to move. In the future, once man understand this, for example when you get people with one kidney. If you change some field strength in other part of the body, you'll find out the body will start creating the second kidney, without you doing anything. This is how in the teachings I always say, you can reconstruct the heart without doing it. You don't work on the heart. You work on what has created the condition for heart to run into problem. (2:10). Which is the fields and energy of the STP.

You have to move the operation of the lung. The biggest problem, most of the hearts run into problem, comes from the conversion capacity of the lung, in its interaction with the energy flow out of it, which is the blood circulation. And once the man of medicine understand this, you don't need a heart operation, you have to change the environment of the heart, you have to change the environment of the blood through fields. Then the heart will repair itself.

I never understand why do they do open heart surgery and changing valves. Valves can be repaired. In the coming time we'll show this. You get people having, creating a lot of water in their lung. Why? Because now this condition of the heart has changed. The lung has changed. And now this puts a condition of the two fields creating rain, which we call, water, in the lung. You change the position of the lung, you change the position of the heartbeat, and you don't produce any more water.

My daughter in law is a well known heart surgeon. And he says the problem is people which have a big problem, they snore, whatever, they can't breathe. When we do the open heart surgery, and we close the chest, then they don't have a problem. And it is because we just open to the cage of the chest to get to the heart. (2:12). We can't put it back together the way it was. So it creates a small capacity extra. The lung changes, has more room, and there is no more snoring. there is no breathing problem. So by change of, small change of cutting the bone of the chest to reach the heart and put it back together, as it looks everything is the same, we change the lung capacity and change the life, and puts less pressure on the heart.

So we have to understand how fields are connected to each other of the Soul and the STP, and how they manifest themselves as a problem in the physical life.

Any other question?

Q: ... Hello, do the Gas Electric Units still make sense, in relation to the new technology developments? Thank you.

K- Yes they do, and in a way we promote it, we put it across, because there is going to be huge changes, and these changes has to come through governments. I explained that to our counterparts in Chinese government, in past couple of weeks in the meeting, (2:14). that China controls, or influences political arena in many countries due to his financial power. And if China loses that financial power, no need for the nation they're dealing with to do anything with, because they can do it themselves, then it becomes isolated and the governments are not ready for this. It will be phased in, for sure it will be phased in. But till that phasing in, these gases and other things will create a financial backing for stability of nations. So we carry on. Yes, we do, we will not... There are so many technologies we will not put in public because the economical damage worldwide is so huge that no government is ready for it.

Us trying to show what we can do, can bring mayhem to governments. Can bring chaos to governments. China in next 3-5 years will become one of the biggest breadbaskets of the world. Replacing Ukraine for sure. And for sure will replace the American grain market. Because the Chinese will market no GMO, which most of the nations are dying for. And this will cut the arms of the control of food, for national food security, international food security of United States. (2:16). And as I said to our Chinese counterpart, if you do it too fast, you'll find out you create more problems. If it's done in the gradual steps in the next 5 or 10 years, we can see the change through.

There is a huge misunderstanding in the world of grain and agriculture and the power of United State, and why United States has gone to GMO and pushing it so much, and they are testing it in North Korea, and using Israelis as a support to do these tests. One of the biggest breadbaskets of the United States for past decade comes from deserts which the water was drained from the water reserves below. And that is coming to an end. The superiority of the supplying grain of United States has gone under 3 to 5 years. Because the bedrock of water is gone. All of you know which states I'm talking about. And then everything goes to what we call, the West coast where most of these things get grown. But West Coast gets most of his water again from the same area, then three years later, four years later we see again green lands becoming dust land.

And it gives an opportunity for the Chinese with the new technology to be able to supply. We have a huge structure in Gobi Desert in China, which we'll explore rapidly to grow maybe five season growth of the harvest. (2:18). I'll explain this later on in teachings in next few months or so. But if you understand the growth of the grain, you don't need the cycle of six months or 130 days, 160 days. You can create the same growth, give the same pleasure of eating, but reduce the cycles, very rapidly. You don't need to go through the stem growth, you don't need to go through the flowering phase in such a, what you

call, long term. Everything can be shortened. And that comes from the availability of the material in the environment of the production.

We'll bring into operation Chinese satellites to create this condition. Desert can still stay desert, but it can become a huge supplier of what you call it, nourishment. The reason for this is that, as I was talking with our Chinese counterparts, they say, nation needs to eat. Does not matter if you feed them down the line. Chinese love to eat. And we have to create that stability. But now we have to meet the two "devils" at the same time. Be able to produce and still get the man to eat.

We met this for the first time in 2006, 2007, where we took the very, very, very, very first case, to test the wellness credibility of the technology. Where we had a girl, a woman, in her 35 or so, having many epileptic attacks a day. And I managed, and she was taking about 20 tablets a day on top of the attacks. (2:20). And we managed to bring it to zero and no tablets. Actually, Belgium authorities used (this as) a case against us, making a sick woman with 20 tablets a day, with no tablets and no epileptic attacks, a crime. That was that puzzled me. One of the cases they brought to court was, a man who uses fields to stop a woman for 20 years, 30 years, taking 20 tablets a day, having seizures on the street, a crime. This is the most amazing thing I ever heard.

So this lady, in the process, stopped eating. Because the system was giving everything she needed. And it was the very first system I built. The knowledge was so perfect from the first test. And then she said, give me something to eat, I want to choose something and we had to give her a banana. So, I understand what the Chinese say, the nation needs to see something on the table, that they can share and socialize. We can feed them down the line in emergency, but we still have to provide the looking things to chew.

And this will become part of the future understanding of the technology. The advancement has to catch up with the social structure of the nation. Otherwise we have failed to fulfill. Our pride to show we can do, can bring demise to years of culture. And I understood that in the meeting. So, we're running "two horses." We develop the technology in case of emergency, we can get the same food to them without feeling hungry. (2:22). But at the same time we grow the grains, in Gobi Desert. That we can change the course, without any water. Doesn't mean we don't have... We develop this technology to create food for you on the Moon. Why can't we do it on Earth? This is why you come into these "interactive sessions" from next week.

Any other question?

Q: ... What salts do I use in each cup from the 5 Cup system? I couldn't find information about this so far in the public teachings.

K- Oh, it's in the note you receive when you buy one. Salinity is written in the instruction. Even when you buy the training boxes of the Keshe Foundation, there's a little label comes with it, how to connect, and the salinity, everything is given. It very much depends on what water you use, what's the content of your water, how much

Calcium it carries. One of the best things for you to do if you are using, making these "Gans boxes" or whatever, try to use not mineral water but the filter water, you know these waters you put through the filter and you take the Calcium out, then you get a very good natural result. And then the salinity changes according to the Calcium.

When you boil your water you see a lot of Calcium in your pot. (2:24). Let that water cool, use it for your Gans test. Because you've taken that mineral part out of it. Then it dictates what salinity you can use. Again it depends what type of salt you use. Purified salt or what you call, mine salts and some of this what they call, fake Himalayan salt. If the amount of salt is selling as a Himalayan salt, came out of Himalaya, there'll be no Himalaya left. I always wonder where do they call this coming from. They color it a little bit pinkish and they call it, Himalayan salt. But it's purified, what you call, salt from the sea and added color to. So depends what color salt you have, do you do you take salts from the sea salt? Actually you go to sea and you pick up, but then in there you have a lot of residues.

Any other question?

The average percentage is between 9 and 15 percent depending on the Calcium content in your water, on the ?? you collect ?? from.

Q: ... When the Soul elevates is the chakras or endocrine system all aligned and creates a giant star formation, (2:26). and is this, this cerebral spinal fluid charged up like the 129 Tesla system in Italy?

K- Depends what you call chakra. And depends what conditions are your chakras. It's very interesting, people talk about chakras, but they don't understand as an energy point what it means and how you can influence it, and how you can change it, with direct understanding of plasma fields. I can make your fifth chakra to be as good as your first chakra and ?? work for it. So energy points, it doesn't matter how you call it, it's you who controls it. You can interact it externally, or you can interact it internally, change them.

Any other question?

Q: ... In Crimea were found two important spaceships, which Mr. Putin recovered with the help of the ?? Palladis. Yesterday violent anomalies and strong irritations were felt.

R: That was the comment. I don't know if you have anything to say about that?

K- No. Mr. Putin is very busy rocketing people at the moment, so I don't think... (2:28).

Q: ... Congratulations on the 500th Knowledge Seekers Workshops episode, KFSSI family. So much taught, learned, discovered and accomplished, in all the time and work put in. I give credit to Mehran Keshe and Rick Crammond, for all their hard work and dedication, teaching this workshop each week. I personally have learnt so much from the plasma teachings here.

K- The worst thing is, I only come in one of them, Rick is in all of them every week. In, what you call it, Testimonial, Wednesday workshops, what you call it, Universal Council meeting. He's everywhere. He knows more than I do.

R: Well, I wouldn't say that. But I'm definitely present there.

K- I don't think you haven't missed any of them, have you?

R: No. I think we were late for one. And a couple of them had some crashes happening. But, yep, that's what I do.

K- Any other questions. By the way, did you get a bear back this year or not?

R: No, but strangely enough, I did see one yesterday, bear crossing the road where I was driving on a remote location nearby, a gravel road, and a rather large black bear. First one I've seen in quite some time, since the last one here. It just jumped across the road in front of me, (2:30). and I tooted my horn to say hello, and away it disappeared into the woods. So, I took that as a sign that the bears were around, and they seem to be still happy and shy of people, so that's good. As long as they stay out of my lower basement area, that'll be fine with me too.

K- Shall we call it the day?

Q: ... Mr. Keshe, how is it that you are so amazing?

K- I don't know. I never thought I was amazing.

Any of you want to join us in Manchester we have, as I said, still people moving, shuffling things around. You can still join us for Monday. It'll be a very exciting time. And we come back to you, as is the habit of the Keshe Foundation, after the ambassadorial holidays, to collectively work across the planet with all the world ambassadors, to invite to the meeting of the London. And as I said, maybe we re-establish and complete the 5+1 work in London conference. Looking forward to it and I'm sure we get response from different governments for it. And we'll see what the next step will be.

Thank you very much Rick. And those of you who signed for the fingerprint of the Soul, we closed that session from now, and now the time allocation will come up. And, those of you who want to be in the interactive session, (2:32). I think, should have been open by now, join us, because, in a way, it's the beginning of the understanding of how you go through transmutation. It's how you can create that condition of the transmutation. And you'll understand through the process of the work.

Thank you very much for today, and thank you very much for 500 weeks of non-stop sharing knowledge. And soon we'll go into our 11th year of teaching. And this is one thing I agreed with the Chinese, my teaching does not stop, and they have no objection, because I think they are learning more themselves, than sitting around the table and seeing test results. Thank you very much and see you on Monday, some of you, and next week in another part of sharing knowledge. Thank you very much, Rick.

**500 KSW August 24, 2023**

**END**
