

# 501st Knowledge Seekers Workshop August 31, 2023

(Transcription, Proofing done)

(Auto transcription by Elias)

From Manchester ready for flight; 2 visitors not from Earth; Man is amalgamation of recycled fields of U - nothing special; Sperm requires matching strength - not strongest; Learn to accept pain of first breath - transmutation; Experience knowledge of all being on planet fed into Mother systems - equal access to all; Visitors to Earth amalgamate - can't recognize; Fingerprint of energy added to system; M fields of U always recycled - humans; Field strength of element have to be part of Soul of Planet - part of body; Wait for China to announce collaboration; Ether made up concept; Feel Souls

## ENGLISH TRANSCRIPTION

(:10).

K- Yes, thank you very much. Good morning, good day to you as usual. wherever and whenever you listen to this series of Knowledge Seekers from the Keshe Foundation, the Spaceship Institute, we welcome you back. Today is a rather different way of teaching. Today we are in Manchester as part of the cycle of the teaching and what we call, the starting of the Spaceship Institute programs for Space. And today we have 19, 20 rebels with us, I call them. They're all sitting around the table, they wanted to be part of the teaching. So, you might hear a lot of coughing and sneezing and the rest, it's just comes from the background noise. Later on, in the second part of the teaching as usual, they might would like to come in, and to, if you want to ask them any questions, or to ask any question from us.

Today's teaching is very simple, it goes back to the origin of what we said, how we come, where we come from and where we land. (:12). Many things, especially till we don't put it on the table, does not show itself. And people cannot understand and realize what is to be. In the teaching of this past few days, here in Manchester, a few small points has risen and it's very interesting for people to start trusting in themselves, trusting in what their Soul will do if they are ready to go, or they are still attached.

And, in so many ways, the life of the Man is a progressive development of the amalgamation of the Fields of the Creator. We are nothing special and we never become special, because we are totally connection, accidents of the Universe. Even when our parents meet each other and fall in love and create the human body, it's just a pure accident. How, what, it will happen, the way it happens. How life takes place.

The present science and technology of the medicine tells us, the strongest sperm will manage to break into the egg and the life is created. This is again another fallacy in the science of the man and the creation of the man. In fact, we know from the Plasma Technology, the seed which is going to be the creator of the man, in the womb of the

mother, is already pre-decided from the first second of the interaction. It's not the strongest, because this is the way Man always look at, the strongest. In fact, the one which matches the egg and the sperm, they pull together. This is one of the reasons why many people cannot have children, because they cannot create the matching fields. (:14).

We talk about the matter-state, but in fact, the interaction of the egg and the sperm is the creation of the Soul. So the two have to fit too, the two have to be connected with. In the present science they tell us the strongest egg can get and we see all the movies fighting to get there to penetrate the egg. Such a thing is a fallacy. When you know the two plasmas, when they match, now we have managed to create plasma of the magnetic (M) field of any entity, be it plastic, be it wood, with metal, with iron or copper. So now we understand the truth about the creation.

In a way, the minute the sperm takes motion, is already, if it fits the strength field of the egg, it'll be attracted to it. And the rest of it is fallacy. Because it cannot be, the two have to match to create the what we call the 'twinity', the twin cells. And this is the way it works. And if you have two or three of them matching, then you have the twins and triplets. If you have them creating in one dimension (D) of the physical life, dimensions of different matter-state of the strengths, then you'll have triplets. If you manage to create different Souls, but one Soul of Physicality (STP), we call it the schizophrenic, we call it "beautiful people."

Now we understand, through the process of the creation. This is how we go through, this is what we see. It's interesting that a lot of people, this has come up in the teaching of process of the yesterday especially, and I was explaining this morning before the teaching. (:16). We are told, we are seen, we are, we expect the life to be a smooth life. It's not that way. We have to go through transition. We have to go through the process of understanding what it means to be born in the real condition.

As I was explaining earlier on to the Knowledge Seekers (KS) here, when you go through the birth, when you come to take the first breath in this, on this planet, we go through a pain, and that pain is what makes a child to cry. The first breath, to convert, to divert, to change. Yesterday we had this with one of the Knowledge Seekers, who managed very rapidly to depart in the dimension of the Soul, and then we had to ask to breathe, exactly the same position of taking the first breath when you are born.

Many of you, when you go through this transition, when you arrive back to be a human body, you come back from transmutation, you have to take that first breath. And most of the time, we see the people who go through this process, they cry, because it's a conversion of the first pain. It's a conversion of matter state and the plasma state and transmutation.

So, in a way, we start seeing, gradually, the process of the transmutation. People who pretend they've been, and the people who actually go, it's very simple to see. We don't teach these things, because then people learn to, what we call, "play it." But in a way, it's part of the process of birth. Every time we come back in a transmutation to the dimension

of the life of the physical dimension, we go through it. We have to take the first breath. As I explained in the teaching yesterday, when you go to the Moon, there is no air to breathe. You have to find. (:18). Your body has to adjust in a way, to take energy from the environment to feed the Soul, to bring that dimension into operation.

In these tests, in these programs, like past week and past few days, and coming up, more and more of this structure will reveal itself. It is for the Knowledge Seekers to understand, and for Knowledge Seekers to set what we call, the pattern for it. And then we'll see more. We expect, in a way, to see the transition between the body of the man and the Soul of the Man (STM). It becomes as normal as ABC. In the teaching of past days, we have explained and Knowledge Seekers gradually come to understand, they don't need a tool. We just here, as I said, we start opening schools where people learn how to go through transmutation to physicality (P) and the rest of it.

In that process we start seeing how things work, how we need to adjust. Amongst us in the meetings are many different characters, there are many different Souls, there are many different strengths. In the coming time, we have to be able to tune a system that it meets the demand of every individual, every Soul. That there is no exclusivity, that certain people are left behind, and they cannot be seen, or they cannot be operated with, or be able to transmute. This is a development of the technology (T). And in the upcoming time, gradually, and by progressive understanding, we take the fingerprint of these Souls. And we can match the fingerprint of the Soul with what we call, the system. That it makes it possible for everyone to be able to transmute.

This is the reason why in the past, in the past teachings I explained, those are not, who are not from this planet, (:20). they will not tune into the system of the planetary system, as we have it, confirmation of the Earth. We have to design systems which match their Soul. Otherwise they would have been able to do it themselves. In a way, if you are from planet Zeus, we have to find the fingerprint of the Soul of the system of the planet Zeus, and make it, arrange it, develop it, and deliver it, that the citizens of planet Zeus can go back home. This is part of the development of the technology, this is what we expect to see and what we are working on.

In a way, we can do the same, in the next few weeks and months, new technologies will emerge, new systems will emerge, which facilitate different speed of transmutation, different speeds of transportation. These all depends on actual how the Knowledge Seekers and the world accepts, the evolution in science. Evolution in understanding the totality of the knowledge of the man.

In the next few days, and in the coming weeks, Keshe Foundation (KF) will release new technologies, which makes it possible for all of you, at the same time, to be fed, at the same time, to receive energy, at the same time, to transmute. These systems are under development, these systems are getting actually manufactured to deliver, a full planetary system, transmutation, within the body of the man.

The next step after this development is to create structures without embodiment. What it means? Up to now you've seen MaGravs, you've seen systems which is made by man and carries matter state energy. In the next few months you will see systems which have no structure. It means it has no dimension of physicality. You don't see the MaGrav but you see the energies of it, the plasma of it. (:22). And gradually, we do without matter state conditions.

We'll create the systems in a way, now the Knowledge Seekers gradually can see, they can travel themselves how to create this situation. And the point of need does not matter if they're in the body of the man, or in the body of another direction and dimensions in the universe (U). It's the knowledge of the Soul. It's the knowledge of understanding the physicality in conjunction with what we call, dimension of the field flow of the universe.

In the coming time, in the coming months and years, many of you Knowledge Seekers, knowingly or unknowingly, will take into Space. In a way, you don't have any wishes, you don't have any desire. You think about it and you achieve it. It becomes a second nature, in understanding that you can live in both dimensions, and both of these reality's. One in the dimension of matter state, and one in the dimension of energy state. And in a way, the MaGrav systems we introduce, is that system. You want current from it, you're happy with a few volts. Or you can use them to reach to the point of the understanding, of the use of the energy of the universe.

In so many ways, in the next coming few months and years, the evolution of the science and technology with the what we see now, we start promoting and delivering, to bring a new dimension, a new understanding. In so many direct and indirect ways, we are accommodating these through one system, what we call, the "mother" system, maybe you call it, what the whole process of the structure, that you all can be connected through the same. (:24). Knowledge will become equal as everybody will have access to it, food, medicine and everything else. This is why we brought you in to Linz, to update, upgrade and gather this information into one center. You walk on the street, you see pictures, you see buildings, you see people. And then, years later, months later, or sometime in the future, you come back and say, "I've seen this building." Because it's in your memory, you've seen it. You remember the face, "I've seen this face before."

Now, this is the structure we're setting up. Everything every man learns, everything every creature learns, sees, goes into that central system, that we all have access to it. And the knowledge becomes free, knowledge become part of the emotion of the man, at the time, and the place and the position.

The beauty of the new technology, puts fear on governments. But we have to understand, there is no one to govern us a few meters above this planet. So we were equal, and sooner or later the governments and those who want to govern, they realize they are no different than the others. And this brings us back to the point of what we call, equality, equality of the man with the rest of the Universal Community.

In the process of past few days amongst the people in this room, we've seen two people from not this planet. They are not from here. They have an origin, and ancestry from outside this system. And it's very clear who they are and how they operate, without them knowing. In the body of the man, they are man. In the body of the Universal Community, they are still connected to the point of birth. It's very hard for Knowledge Seekers to realize this. But in the upcoming time, Knowledge Seekers who are in this room, they'll recognize who they are, (:26). what they are, and where, and how they can go back home.

But you'll find out Earth is a beautiful place. Many of them opt (take option) to stay in the dimension of physicality, but know the roots, know where they come from. We had this situation in the Rome conference, as I explained before. And this is the way we start recognizing. As we see, there is no prejudices. There is no racism. Doesn't matter who they are and what they are. And this has to become the pattern of their life from the Knowledge Seekers. Does not matter where you go. It does not matter where you sit, does not matter who and where you are from, or where they are from, it's equality in knowledge. Equality knowing we all have the same, and knowing we all come from the same source. What are we fighting for?

This brings a lot of changes, this brings a lot of understanding for the world leaders. My work, and most of the Keshe Foundation work, from today on, from this regard, is to bring our world leaders to understand the equality of the man. And this process will start in London conference. As I said, some of the things we're going to do in London, it's already been explained to the Knowledge Seekers. But gradually we bring it up to the world leaders. It's the responsibility of the Knowledge Seekers to make sure your ambassadors are present in London conference. Or, if we wish we can, we have the capability and understanding to bring the world leaders to answer to the world in a conference or outside.

The beauty of the change is, that is within us. It's not individually one person. We don't have gurus, prophets, and we don't have those who lead us and we have to follow. It's the dimension and accommodation of the Soul according to their strength. And this will be a very harsh things for a lot of people. (:28). We always been subordinate, we always followed to have a leader. Where we find out the only person, the only things we ever lead to, is the dimensional direction of the, what we call, the Creator. We are part of, and it's part of us, we create the Creator. And we are the created of the Creation.

In this process, many of you will come to understand, how the life on this planet will go. How life on this planet will change. How man will become independent of this planetary system. How man become independent of physicality. Unless you choose to taste it, unless you choose to test it. Unless you decide to understand it, and then add to the knowledge of the universe.

Today we learn something and we teach it. In the upcoming time, we'll learn about the universe, the culture, the structure of interaction of the fields. And whatever we learn, will become part of the universal knowledge. It is not anymore me, I patent it, I hold it,

and it's mine. In moving into the dimension of transmutation, this is what will happen. Your knowledge, through the dimension of the Soul, becomes the universal knowledge. And everyone has access to it. Now you understand why we don't believe in patents. Because as I always say, the Creator never opened a patent office. How does the man do?

Now you understand, whatever you do, whatever you gather in the knowledge, in the dimension of physicality or the Soul, now you understand, become part of the Totality. And then, as I said, you remember the building. They know who brought that knowledge in. You can go to the STM who added the knowledge, to understand what he's seen, what he's done. (:30). And then it goes back, do you want to do something wrong? Do you want to leave a wrong fingerprint, in the dimension of Totality of the Soul of the Creation?

Then this brings back us to the same point, as what we call the "Ethos of Mitra." We do good, we act good and we think good. Because, this is how we'll create a perfect Soul for the rest to ?? evolve, to live with it. Understanding this, brings us to a new dimension, new understanding. How do we educate the other 8 billion, the ants, the dogs, the cats, and the other citizens of the universe, to be perfect? As you can hear, we have some people making a lot of noises in the background, but we get used to it, it's part of being there. They can't stop talking. It's very interesting when you talk. "We can hear you, you are not very far from me."

Understanding this, is part of the teaching. We do not go in the depth teaching today. Maybe at the beginning you understood, I opened up the secret of the Creation. And then, if you understand it, you can open up the rest.

Part of understanding the work of the Creation, is understanding the motion of the fields. And then, understanding the separation between matter state and the energy. What we call, "magnetic fields in motion." And this is the job of you Knowledge Seekers from now on, to understand this, and to comprehend it. And then you find out your MaGravs will give you megawatts. And your Soul will feed you in a very easy way. You do not need to create. I have somebody here laughing very deep, knowing exactly what I'm talking about. (:32).

In this process, we see how things are done, how things are developed. And one of the things that you come to understand, is does the man need the structure of physicality to show his love, to show his affection? Does the man need dimension of physicality to create energy for his, what we call, Souls be fed to survive the span of the universe? The answer to all of it is, "no." But man is too physical, and in that dimension of physicality, man needs to confirm his existence. And this is 99% of the problem with the humanity, continuously confirming we exist. We have not accepted that we have existed and we exist for eternity, if we understand that we are part of the structure. We've been here from the beginning. We are part of the structure of the Creator. And we go back to Creator. As I always said, "what are we fighting for?"

In so many ways, if you understand the motion of the fields, even when we talk about the egg and the sperm, that they are fields of plasma, even those that are regurgitated fields of the universe in past billions of years. But we still would like to see we are individuals. We still would like to think we are unique. But in a way, in fact, we are regurgitated fields of the universe, uniquely at this point of time here. And soon, we'll become another regurgitated body in a few million years, or whatever, of the body of another part of (another) entity in the universe.

What has been the problem with the man is that man has not understood. (:34). He has taken a frame of the physical life, existence on the Earth has to be the only existence where he does not understand he is part of a cycle. He is pieces, a part of, what it is bigger than him. And then he is too, what we call, feeble and arrogant to think that's it. As I said from the beginning, this is my beginning, this is my end. I was born and I die. But does not understand I was born from the regurgitated powers and fields of the past. And then, when I die, I become another part in pieces of the others in the future.

In the teaching of the past, I always explained, what do you think about your Soul, where you never knew. Now it becomes a star. It becomes a planet. It becomes the source of life. So you understand. You are regurgitated fields, gathered here. And now you split to regurgitate for other children to be born of you in the interaction with the fields of other fields of the plasma of the universe with each other.

In a way, when you become a star, your field does not go only to your own planet, or what you create as life. Part of it is become part of the universal energy, part of it becomes you, part of the universal Cosmic Rays. And you do not know where this field, in conjunction with other fields, feeds another life. Now you understand, the Totality of the Creation and the Creator is all one. There's no difference. What you call, a Cosmic Ray, is the ray from another Soul, which has radiated from the existence of the regurgitated fields of the past, and in the future it'll become another cycle.

If man understands this point, man will not fight for one second. Man become to understand, he is just a progressive development, a mixture of the fields of the universe, (:36). and is a temporary condition, to be in the matter state, mixture of matter state, to be itself. The teaching is very simple, once you understand it. The teaching become very difficult, where you always look for matter state confirmation of existence.

In the coming time, in a very near future, man will see himself, he can identify his greed, he can identify his fears within itself, and gradually we bring systems to show that what is fear, what you're afraid of and what it needs to be done by yourself for your understanding to overcome these fears.

In a way, you become equal. man who has no fear, is a man who's strong enough to understand the totality. When you're afraid of learning, you create dilemmas. When you're afraid of somebody else, you create another dilemmas. When you understand, your level of understanding is equal to the others, and what we have is equal to the others, there are no fears. It takes time to achieve this, but on the other hand it doesn't take that

much to do, because all men have the same fear and nothing else. And the biggest fear of the man in most of the cases is wealth and death. And as you understand wealth has no meaning, and death has no existence in the dimension of Creation, man will become man of peace.

To what extent we can teach this, to what extent we can bring this for man to feel, it depends on man understanding of his own creation. One day, in the upcoming time, some of you and many of you, as you become the Passengers of Universe, you come, you come back and then you teach the rest of us, (:38). that there is no difference. Some of you will elevate to the position to reach the Totality, the Center to what we call position of the Creation, the center of Creation. And then at that point you'll understand the total Souls that you have ever created or been created out of will come together to become one universal knowledge to be shared amongst the others. This point is not exclusivity, but it's the totality at one point or another we all go back to this point. We all go back to the Creator. We go back to where is the whole thing started from.

In a way, I'm the beginning, I'm the end. It's understanding of Totality, it's understanding of the Creation and it's understanding of the created. And once we understand this, land, wealth, and no life on anywhere in the Universe will have any value as we know we are part of it and it's part of us. Always go back, understand how you are created and did you need anything in the womb of the mother? Did you have a jacket, or did you have a coin? Or were you wealth in the womb of the mother? And understand in the universe you're that baby in the universe, you're that infant in that embryo which is in the womb of the mother. Universe provides everything for a Soul to exist. You do not need to wear the frock of the man, the Rolls Royce car of the man, and the jumbo jets, and the guns and bullets to confirm you exist, or you have the power.

We don't see twins or triplets in the womb of the mother fighting. They all accommodate as they are Souls. They don't worry about who's wearing what, and which one has what. (:40). So why is the man fighting for? If you understand, the destination of the creation is all one point and one place. And this is what is part of the Keshe Foundation teaching. World peace is actually the world which is you, and you have to be peaceful with yourself. This is the totality. We aim governments, we aim societies, but in fact it's you. It's you who's the society, and it's you which is a governor of your own Soul. This is the whole aim, is not to bring, is not to change, is to understand, to comprehend, and take the next step for a change.

In the coming time, the more we learn, the more we become detached, The more we understand the process of the Creation, the more we become part of. And then we find out one point. We are the beginning and we are the end. We are amalgamation of the totality and nothing will change. Does not matter what the man does. In the process, the systems we develop, the machinery we show you, it's just to facilitate for you to understand how simple life has been, and how complicated we made it to confirm our own existence.

In the teaching of the, what we call, London and then Beijing, we open a new dimension for the world leaders to understand they have no power. For the world leaders to understand they're answerable to Totality of us, as the Soul of this planet and not for them to be as part of one. We don't exist and we don't enter, we stay equal the same and we teach the same. We pass the knowledge and it's for the Man to understand the Totality.

I bring the teaching of today to early close, as we have the Knowledge Seekers with us today. And then you can ask any question you like. If that's okay with you Rick, and we go back to answering questions.

R: Sure of course, you want to take a break first then and...

K- Yes, we never change the tradition.

<< **BREAK** >> 501 KSW Aug 31, 2023 (:48).

K- I just put a "cat amongst the pigeons," as we call it in English. As we are a scientific structure, and we see data, we look at the graphs, we look at actually what is physically there. And I explained to our Knowledge Seekers here, is 19 of them today. And that two of them are not from the origin of this planet. They are passengers through our ancestors or whatever. And they're asking me, "is it one male and one female?" I'm not going to tell you that. It'll come even in everything, even like those across the roads in the back. You've seen a lot of them on Saturday.

In so many ways, we are a mixture of races. And if we up to now fought for the color of the skin, or the culture, now we have to understand how we are going to handle these twos in here. They have well fitted into our structure, they look like us, they live like us, they make love like us, and then we do not know. (You have to leave that door open. Because, there's a couple of people coming back in).

So, are we going to see each other? And the interesting thing is, in the process of the week, it's amazing how these two, now we know who they are, behave totally different. It's like, you heard all the story, (:50). the Indian guy calls home mom, after being a week in London. He says, "nobody knows I'm from India, I speak such a good English." So, even though they pretend, or they don't pretend, they're actually amalgamated across us. Now I see them for the first time in these meetings, or second time, or the third time, it's very interesting, now we have a data. We have physical data and I'll mark it one day for Knowledge Seekers to understand, that we have already passengers of the universe in this room. If you put out, then it becomes "headhunting" (looking for corporate executives).

So you got to understand and the best thing is, guess who is it? You'll never find out. They have gathered the culture of man, mentality of the man, life of the man, and they actually, when they call home, says, "mom, they don't know me at all. I've managed to well amalgamate." This is the story of man. And it was wonderful. I was hoping that I get one of you here, because I know the other one for a long time. The second one was not a surprise, but it was a beautiful gift. And we see it, we understand it, and this is not the first time I've done this.

If you, as I explained in the, these past few days here, if you were in the Rome conference, I explained the same. There is somebody from outside, from us, and a foolish lady got up and says, "it's me." The rule is, the "golden rule" is, you never reveal yourself. (:52). And the beauty of it is, once you start traveling in what we call, transmutation, you know them immediately. I put the team here in a more or less locked circle yesterday, to see how these two actually operate. And it was amazing. Everybody was looking at them, if they flew, or what they not flew. These two are rock. They will not reveal who they are. But you can see them. They create a different field dimension.

And in a way, for not to disturb, we did not take anything, data, back on it. It's interesting, now these people in this room thinking, who is it? Am I the one? You only know when you go through the dimension of transmutation. You only know when you go to the dimension of getting ready to go to the dimension of the energy. And then you understand your energy is already locked to a destination, then you decide.

But many of you, even lived mixed amongst the men, you still carry a fingerprint. And your children will carry that fingerprint with them. In a way, we call it, mixed race marriage. Now we have mixed "universal marriages." Because some of this structure have married into man. They have managed to do. Those who cannot or have not done, have found a different dimension of life. We know them in the teachings in the past. I referred to them. And in the future, we'll see more of them.

Are there any questions? (:54).

By the way, they are not aliens. They feel, they bleed like us. They love like us, and they have managed to fit perfectly in our structure.

Q: ... Thank you very much for the teaching. I wanted to ask, when you say, "they are from another dimension of life", what you mean by dimension of life?

K- We all... What we explained dimension in the Keshe Foundation, is the origin of the source of the planet. We are a Earth dimension, because we are created out of the field interaction of the Soul of this planet.

It is very interesting in... I don't have my pad, but I explain it in a very simple way. When we carried out the test, we did not need, I explained this before, to drill a hole, to find out what's in the ground. By creating a field atmosphere we wanted, we could tell what is in that ground, from outside. This will become a new evolution is in what we call a lot of mining and other things. But it's the same. You cannot have these matters in that point, if they don't have a connection with the Soul of the planet. If they don't carry the essence of what exists inside, the field strength of this planet.

In a Periodic Table, we say we have how many elements? 200 and something. Whatever we have, it's actually 200,000 of it. But this planet does not hold it. We don't have the strength of it. So, it's not part of us. (:56). Whatever the Soul of this planet holds, doesn't matter what material is, it's in the body of the man. From Uranium, Plutonium to Hydrogen, is part of our physicality, actually works. The body of the man, the STM, has learned a way to use it for its advantage, to extend life.

In the future time, as I always say, I'll show you how body has learned to use radiation from the cosmos to extend the life of the man on this planet. Without it, we'll die. It's like a disinfectant, but we're not used to it. We don't understand it, because we never knew it exists. Many of the materials in our body is done to extend life and it's used as a, what I call, disinfectant. In a way putting out germs or fields, which (if) we don't (neutralize), we can (bring) danger to life. Whatever, whatever is on this Soul of this planet is in the body of the man. ( .. Are you recording what ??? )

Q: I tried to offer you my iPad.

K- It's okay, thank you very much.

So, we have to understand this is part of us. And I'll be very interested now that gradually we learn how to go out of, or not to go out, to extend our Soul. And if this gentleman extends his Soul, and this gentleman managed to extend his Soul, (:58). and this gentleman managed to extend his Soul, and then this lady, and all of you, look to the left. Look, she's not from here. Because at the Soul level, you recognize each other. This is how you recognize each other in the space. Who's from where? And two of you in this room have a beautiful Soul, or with two ?? source, and you shine totally differently.

Your Soul, your structure, even though has a cover of human race on it, it's actually what I call, "GMO" of the Soul. You have adapted. But if you know it, you see it a different way. And this is part of us, because do I feel safe? Or you have chosen, or your ancestors,

or the way originally you came here, they felt safe. Man will not eat us, so we become like a man. Man will not kill us.

We know in the process of life of this planet, very few, one or two of these people have brought knowledge with them. But they never revealed the knowledge, because man was not ready for that knowledge. And it's in inscriptions, it's in books, where we can tell you who these people are. Tesla was one of them, definitely. But it's a process of understanding. It's not anymore us from this planet. (1:00). It's us from this universe. If you have managed to live amongst each other, peacefully on this planet, we can live peacefully in the universe. And these people will be the key for taking man in a peaceful way to space. So, when we say the origin, it is connected to the Soul of this planet. It has a fingerprint.

Any other questions?

Nobody else asking? Oh, we have Azar as usual. If she's on the panelist, she puts her hand out, she's here, she puts her hand out.

Q: Mr. Keshe, if for example, when we go out, our Soul goes out, like I am blue, because I'm from this planet, the other people are not blue, because they're not from planet, they got different color. (MK) Yeah.

K- Yeah.

Q: That's it, that's right, yes?

K- yes, it's more or less understanding field strength.

Q: And also, imagine the whole, we teach the whole humanity how to transmute, so it means we can go to different places. Now, how do I make sure if I'm sleeping in my bed, my neighbor doesn't come into my bed and look I'm naked in my bed?

K- This is the only thing Azar thinks about, who gets in her bed? But, the understanding is, nobody gets in nobody's bed.

You got to understand the work of the plasma. Only two which both accept, interact. You get two magnets, you get three magnets. And try to connect the head of the magnets together. Only two fit, the third one is up or down, (1:02). does not fit. It's very simple, it's as simple as ABC. And secondly, you have to have the strength to do. You cannot bring a copper next to a steel and try to put them together. We create that distance. And don't worry, nobody will get into bed with you, you already have a husband.

Anybody else? Any other question?

Q: Well, can I explain the dream that brought me here, and the experience that I had here?

K- Yes.

Q: My name is Nick Vlahos from Sydney, Australia. I've been roughly, listening to the public teachings, One Planet, One Nation, One Race, and some of Rick's teachings for past 6 years. Now, what brought me to this seminar, it was actually a dream I had, and when I wake up, I had dreamt that I went to a planet, I'm not sure which planet it was. But the difference with this dream is that, there was a physicality to it, it was a density to where I was, like, I was truly there, without a doubt. And from that moment I realized, it's like my Soul was telling me, "Please", because I heard about the "25 plus 200" seminar that was coming up. And this was around May or June this year. And then I realized, it's like my Soul was telling me, "Please, you know the savings that you've saved, please do this for me." Because it's like, I've done this, some things for you, please do this for me. It was like, I realized then, like, it was like there's a man inside me or something, something like that. And that was my realization to it. (1:04). So I put the money down and I came here this week. Now, what happened on Monday, we all came here and it was nice to put a picture on some of the faces that I used to hear in the teachings, like Azar and a few other people that were here, like people like me who talking now.

So what happened we had some of the Head Units here, and we were told by Mr. Keshe at about two o'clock, the control room will turn them on. So I was really drawn to, I was waiting for someone else to put their headsets on before I do, in case I do a mistake and you know, I didn't want to be like a bit silly, but I was drawn to the Head Unit. So exactly about ten past two I put it on and then I grabbed the two hand pieces that are with it. Now as I was doing I seen Mr. Keshe say, come to my unit said, this number and ran the control and please give me the graphs for it. I was on roughly about half an hour, Mr. Keshe said, all right take your hands off the hand pieces, and then go for another 20 minutes. After that, he told me to stop and then told the control room, send the graphs that are in it, of my Soul and my STP. And what I noticed, and what Mr. Keshe said that, I was really, really physical, that's why I held on to the two pads for that long, and he showed me in the graphs and he was very surprised, you know. It's a little bit different graph he sent, he was surprised how physical I was, and holding on to the physicality, not letting the Soul go. But he said, "then look at this, when I told you to take the hand, your hands off the two pads. Mr. Keshe said, "look at the graph now." (1:06). And I noticed that the graph were more even, my Soul and my STP almost into a line. And he also told me that there's something, you might have a sickness, or the graph shows that you might have a sickness in you or it might be a big fear, but we have to delve more into it, and I have to look more into it.

But what happened the next day is what really surprised me. We all had our turns on the Units and we started talking. Now I first noticed a silhouette behind Azar. It was like a lady, or behind Azar. There's no one else in the room but it was a silhouette, a white silhouette behind Azar. And it was coming in and out. I couldn't see it properly and I had to adjust my eyes to try to keep it there. Then straight after that I seen another silhouette but much more clearer behind Galib, another Knowledge Seeker that's here. And I actually seen the silhouette, the person that was behind Galib, he was very surprised that I

seen him. And he actually had a, he's quite a big guy, and actually had a upside down, ?? moustache, a long one. And when he seen me, he sort of went down ways into the floor.

But there was another Knowledge Seeker here, Catherine, a Chinese Knowledge Seeker. She had been on the headsets for about one hour. And Mr. Keshe was saying, "look at her face, she's definitely somewhere." Because she had a big smile on her face and she was doing, you can tell in her face she was somewhere in a happy place, somewhere. Then Mr. Keshe told her to please explain where she's been and this and that. And she said, "I was actually on the Moon with my family, this and that." And then when she talked about her mom, that's when I seen a lady just appear behind, from behind her. And this lady was different from the others, she was almost, (1:08). it's like she was almost there, but just her face was blackened out. And I was thinking to myself, how did this happen? It must be the, maybe something to do with the headset the other day, and the fields that these units actually bring, do something to the plasma of this air that made me see that. Now this lady that appeared, she went behind Catherine again and then she reappeared to me. And, I didn't hear a voice in my head, but it's like I had a feeling, that she wanted me to acknowledge her, and then when I said to my head, "Yes I can see you", she disappeared and I really, I'm really happy that I came here and witnessed that. And something so clear and so almost, it's almost like a pure person came into the room. And I thank my Soul and Mr. Keshe and all the Knowledge Seekers for giving me this chance. Thank you. Nick Vlahos from Sydney, Australia.

K- Thank you very much. Is there anybody else who wants to say anything?

Q: How about China opening up publicly and acknowledging the KF? I am Mark for US, what about China opening up publicly and acknowledging I know they're in the midst of testing, and confirming and looking at it this way and that way and upside down and backwards and forwards. But we're waiting for them to actually come out in the public domain and say there is a new science and a new technology on the planet. Is this in the card?

K- You can see how American he is. It has to be on the CNN to be confirmed. (1:10). A lot of things happens without the CNN knowing, and they cannot confirm it. But this is the job for them, not for us. We have a freedom to review, to explain, but Chinese are very reserved. They do it their way.

Q: But the Americans are waiting to start working with the Chinese.

K- The Americans cannot work with Chinese. It's impossibility at the moment. Because, on the economical side, America thinks it has won a big battle. Bringing back a lot of work back to US. They closed a lot of factories in China, or they encouraged with taxation, to go back to US. But in fact, that was the biggest mistake they ever made. You'll come to understand the reason very soon. Because, they cannot export, they do not export what they make, more or less, out of US. It'll be a bigger financial disaster in the next 5 to 10 years for Americans. You'll come to understand, very, very soon.

Because, the point is, it's not what you manufacture anymore, or what you produce. From now on, the science will take over. How much you can put in. And the structure with us, part of our work with the Chinese is very simple. America attracted ?? brain (brain drain of poorer countries) by paying a lot of money. "American dream". You'll become rich if you come to America. In our work with Chinese is, we make China, the center of the space technology and the space knowledge. (1:12). Game has changed.

In a way, it took time to explain to the Chinese that you cannot just manufacture, you have to bring the talent to be part of. And in next few months you will see the Keshe Foundation will literally go out to bring the experts of the Keshe Foundation. We know who you are. 10, 20 years we've been watching. We know who you are, who the people sit with, plus the international scientists into China.

You want to be with the next generation of science development, you come to China. We'll shift it. Whatever American took, was the superiority to create war. Whoever joins us in China, with the development of new space technology is for peace. We leave it to the scientists. Where they go, people with the knowledge where they sit. Do you want to go to United States and create weapon technology to kill? Or would you like to move into China, where is the land of peace of knowledge for space technology.

We are advisors, and we advise thoroughly, we just don't go there, we have new technology. We look at all aspects of it. My job has been, not just showing technology, but showing what technology can bring to China, what can bring into the, what you call it, North China Sea, be it Vietnam, be it the rest of it. So, when you say, "what's going to happen?" In a way, in the next year, two years, in next six months, Keshe Foundation will drive heavily, to absorb international scientists into Keshe Foundation research and development in China. (1:14).

We make a very clear line. We don't fight. If you're a scientist, you have a technology, using our technology or yours. In China we give you room, to join with us, to work with us, but for peaceful application. It's a very clear line we drew and Chinese government leadership understood. And this is the way we're going to go. We are not bringing you more scientists who can make a better weapons. We're bringing more scientists to create more peace.

And it's a change of game. Because, when you speak, when you I eat and sit with Chinese high ranking generals and the government officials. None of them ever talk about superiority of China. Says, "how we can bring peace, that we can live without this?" The biggest problem with Taiwan, with China is, American are using it to create a new war, to say they are superior. Chinese want to bring the balance, that the Taiwanese will become part of China in a peaceful way, without interference of America.

Americans, sorry to say, a lot of you come from America, you carry a little bit, or mainly, British blood. You are in England. English mentality, foreign policy, is "divide and rule." And this has become ingrained in constitution of United States. The policy in China is Taoism. Bring in to all be one. We were talking about it yesterday. We have a food, and

we put it in the middle, and we all shared. (1:16). And I explained what happened with a German minister who came to China before Corona, and they set a table, a round table with swings. And they gave a menu to the minister and two of his entourage. With the Chinese ministers, they called, six of them sitting around the table. They all ordered what they thought the Chinese would easily put in the middle, and everybody eats from it. When they put the food on the table, the German minister put it in front of him and started eating his plate. They are not used to sharing.

There is a big difference between the Japanese chopstick and the Chinese chopstick. Japanese have a little box. They eat it themselves. They don't share. Chinese have a longer stick. They put it in the middle. Everybody shares it. The Koreans have a flat stick. Chinese chopstick is round. If you look, the culture of how you feed yourself is how you think. So it's part of the structure, part of understanding.

Normally, most of you, when you go to a country, you look at how the walls are. I have a beautiful advantage, I don't speak Chinese. I know, after six or seven years in China, I only know about five or six words. And most of it they don't like. One of them is ?? "bing shwei", which means cold water. And the Chinese like warm water, so I'm marked out.

And it's because I don't speak the language. When I (sit) in the meeting, it has to be translated. I watch the Soul of the people. (1:18). I watch the behavior. And I know what the thing is long before they decide. How they come in, how they shake hands, how they sit, where they sit you. China Oil Corporation has a beautiful policy. The door is always, comes with a table going along to the door. Their officials always sit on the door side that if it's too dangerous, they can run out. They put the other's side, far away from the door. And this explains a lot. When you go into a Russian cabinet room with a minister, the door is right in the rectangular, furthest possible from the table of the minister. And then it's a T-shape. He always sits on the top. And then the rest have to answer. And then you see them, when they walk from that door to sit in their chair, how they change in character. I had the pleasure of this with the minister of oil of one of the Russian satellite countries. He said, "Mehran, come and sit next to me and understand the power of my seat."

You don't have this. In understanding a culture, understanding your Soul, you understand the interactions. And physical interaction is a reflection of the Soul, it explains a lot to you.

Any other question?

Rick, it's your side. I have no questions here. The chicken is done. (1:20).

Q: ... Mr. Keshe, my question is, the Souls that come from another planet, is it to learn, or to resolve a karmic lesson that they come to Earth and are some aware of who they are?

K- Can you repeat that again, please?

Q: My question is, the Souls that come from another planet, is it to learn, or is it to resolve a karmic lesson that they come to Earth or...

K- Most of them are homeless, they are refugees. In a way they lost their, what you call, (planet) or they came and it was too good and they stayed. I've spoken about this before. We let them explain to us when we put our prejudices apart, how to be, and how it is.

The city of Manchester where we are, I was explaining to the Knowledge Seekers here, is actually a slave city, is known inside England. Manchester has been the slave center of the whole British Empire. Where we, the slaves were used, taken from George Island, originally in Gambia, into America, and then, cottons they produced, brought back to Liverpool, up the canals, they built the canals with the slaves, to come to Manchester, (1:22). because there were rivers around here, and the water was flowing all the time. They built the mills, and they put the children of 5 years, 7 years, 10 years old into the mills, just enough food to eat a day to run the mill. And the slavery carried on. And they used the same slaves to push the Finnish cotton back into British empire. So the whole slavery was set around running this city, and it was part of it. Manchester is one of the most slave centers of the world. We don't know so much of, because we always see as part of the picture. Most of the slaves went to America. Grow the cotton was to run the factories in Manchester. Without them, these factories were closed. And they are not very far from us. And when you walk out of this place, maybe less than 200 yards, you see the mills.

In a fortunate or unfortunate way, we have the usual "last supper" in one of these old mills in the basement of it. And sometimes you hear the noise of it. You feel the Souls in it. It's very, very indicative, or in so many ways, very amazing. We have two people here from Nuremberg, Germans from Nuremberg. Every time I go to Nuremberg, a city I don't like to go to, I feel the marching of German soldiers. It gives you that feeling. Parts of Belgium gives you that feeling. You feel the Soul of the people. You feel the pain. You feel the same in Linz. In Linz, part of Linz, you actually feel the Soul, the emotion of the people in the city. (1:24). And this is part of our life. We are part of it. It affects us and brings us back. And then are we still aliens to ourselves, which we are. Most of us are. If you go through places like Nuremberg just as a tourist to see and you don't feel it. If you go to Linz and you don't feel it, it means you're still in the matter of state of matter state. You came to see. You have to feel. And then you move with the nation.

Any other question?

The problem with me is I've traveled to too many places around the world.

Q: ... Does the mixed race Soul work on the same principle as genetics, where it's 50/50, equally from the mother and the father?

K- Not really. It depends. It takes the best. That's the beauty with the Souls. It takes the best. We don't find defunct Souls. We don't find the Souls, one leg missing, or one arm

missing. They take the best. And in a way, everything stays in, because we don't know which part might need it and what's connected to what.

No more questions?

Q: Is there anybody from South Africa in Manchester, (1:26). that could come home to teach more of us here?

K- No, not as far as I know.

Q: Good morning Mr. Keshe, I have a question. What is aether energy in plasma technology? And is the aetheric body energy, is the field of the STP in the physical body, or the fields of the human Spirit?

K- Can you, can somebody tell us what this thing is?

R: Aether you mean?

K- Yep. Go to your friend, Wikipedia.

R: ... Okay we'll get the so called official version. ...

K- You are the official reader of the official thing

R: It's not giving me. It just says organic compounds .. ether, ethernet ... (1:28).

Okay, here we go. So, in physics for example. Well, there's a number of different definitions for aether, but according to ancient and medieval science, aether is also known as the 5th element or quintessence. It's the material that fills the region of the universe, beyond the terrestrial sphere. The concept of aether was used in several theories, to explain several natural phenomena, such as the propagation of light and gravity.

K- The question to ask is, does such a thing exist? Or we made it up and the rest accepted? If you look at, or go for some scientific papers speaking about aether. They say, "it's what we are made of, or what is part of our structure of life." But nobody can tell us what it is. It's a made up thing, does not exist. In a way, I call the aether, when it came to a discussion some time ago, is the field of the universe. Do you want to call it the human, or part of it, you want to add to be, what you want to explain to, but you cannot find answer for, or try to create a, what we call, fabrication.

But aether, as we call it, environment or the material, whatever, (1:30). it's easier when you put it as part of the magnetic field of the universe. So, it's all the same. It does not exist, or we call it, a cat or a dog. It's a collection of the fields. And, nobody has ever actually confirmed its existence. But we call it something which is there, we can't say what it is, and then we call it this, because then nobody will ask the question.

Any other question?

And secondly, whatever you call it, is part of us, it's part of the magnetic field of the universe. ...

R: Sorry, you broke up there, is part of the magnetic field of...

K- Of the Universe.

R: Of the U. ... One sentence is kind of interesting here, is a theory that was originally put out by this Bernoulli. In his theory, all space is permeated by aether, containing excessively small whirlpools. So, in other words, it's all magnetic whirlpools. And that's essentially what you were talking about in your book, and so on, that the fields of the universe, you know, can be exceptionally small whirlpools, and then larger magnetic fields, and all interacting and so on.

Q: << Speaking in Italian >> (1:32). ....

Q: Okay (1:34). Mr. Keshe, Giancarlo is asking you, you just spoke about that you were listening, you were feeling in Linz and in Nuremberg, you were feeling this Soul. And his question is, the Soul you were feeling and listening, they're are STP or they're are Souls ... He just wanted to know if you can go deeper on what you felt, which type of Soul did you felt? STP or STM, or both?

K- Thank you very much. It's usually the STM, the emotion of the Soul. It's not the physicality that you can hear or see things. You feel the emotion of the environment. You feel the same thing when I went to Vatican, here in Italy. That you feel the emotion, that how it feels and how it is. It's usually the feeling of those who lost life, and still connected in a dimension to the place. You usually feel the injustice, that the Soul is not at peace. And there is a specific place in Belgium, (1:36). wherever I go, I hear marching soldiers. The way, nowhere else happens, except in this place in Belgium. Wherever I go I hear marching soldiers. You can hear them. And for a long time I was trying to understand why, and I haven't found out why I hear marching. You can actually hear the marching of the soldiers on the road. One day I'll find out and then I'll let you know.

Any other question?

Q: ... Regarding these Souls, how can we bring peace to them?

K- Oh, you always make it available. You don't make a peace. You don't bring them peace. It is for them to take if they are. This is what I always said many times before. We are not there to force to take them. We make it available for them to take if they want.

Any other question?

Q: ... After watching the 500th Knowledge Seekers Workshop, especially when it was discussed how conventional medicine, especially in open surgery, is lagging behind in

repairing or transplanting organs. (1:38). Whereas, according to Mr. Keshe, it is already perfectly possible to create physiological conditions and environments, so that the body itself can repair all of our organs naturally, and much more safely. I would like to take the opportunity to ask Mr. Keshe the following question. ... I use the 8 essential amino acids daily, so I'd like to know if instead of mineral water I could dissolve them in Gans water from the Cup of Life 1 or 2, which would be more beneficial to our health?

K- If you use any of the, what you call, amino acids, you just need to put them in a Gans water once, and just use the Gans water. You don't need to every time to put them in the Gans water. And then you have to understand, you cannot take a cup full of it or whatever, a few drops of it will do the same. You have to understand the propagation of the field strength. And if you use a Gans water, use a few drops of the Gans itself. Usually the amino acids connect to the CO<sub>2</sub>, Zn, and CuO. Try not to use the CuO unless on a specific ways. But if you use this, you make the, what you call, the mixture once, and you take a few drops, one or two drops. Usually it'll be as effective as everything else. And usually take it on the tongue. (1:40). And you'll find out it does work. You'll find it's too much to take the amino acids, which you mixed with the Gans's in a cup full.

Any other question?

Q: ... Are they first generation travelers of the universe? And do they realize who they are?

K- It's a continuous "refugee center," as I call it. They always come and they always go. You know we had the Iranian refugees in the eighties and then we had the others and they're still coming in different names. It's the same with the passengers of the universe. Some of them are not refugees, some of them are travelers. And they come and go.

It will be very interesting in a coming time, how they explain to us, they arrived here, how some of them come and go, and they take us back. In a way, it's a very good thing, because it's just like, you know, you have the Jamaicans, a lot of them in London. They come and then they tell you how beautiful the place is, and say, oh, next holiday I'm going to Jamaica. It'll be the same with all of us. This is where we go. They explain to us. They show us, actually, the beauty of their place. Those of who are "tourists," I call them. And then we go back to see. (1:42). It's the nature of the man and the nature of the Soul, to travel, to be in dimension and motion. But man at the moment travels the village of the Earth to see new things. Now we learn the new things.

Any other question? We're nearly running into two hours.

Q: ... So is service to the Creation one way to create the Inertia within, to elevate the Soul? And could you become like a second Sun, to be a feeder to others?"

K- Can you repeat?

Q: So is service to the Creation one way to create the Inertia within, to elevate the Soul. And could you become like a second Sun, to be a feeder to others?

K- In a way, yes. It's easily done, if you know the way. Easily done. It's a difference between a ?? mercenary (missionary) and charity worker, I always said. If you, when you are a missionary, you steal from the others, to go somewhere to change something else, the way you want. But, when you are there as a "charity worker," it doesn't matter what it is, you do it because, comes out of the sense of obligation to change somebody's life. And this is how the Soul works. And that's why actually we call ourselves a foundation. (1:44).

There is something else, I was explaining this to one of Knowledge Seekers very recent. And something was brought up here. Years ago I wrote to an international organization which was claiming peace. I said, if you want to claim peace, has to have the color of the planet Earth, which is blue, because they have a stupid structure in their system, and the... it has to be in writing of gold, where blue represents the man from the Earth, and then, the gold is the greed of the man. When you can bring the two together, to work in perfection, then you'll find out, you'll find a man of peace. And it's carried by the flag of the organization. And it's how it should be.

We don't carry a flag on our Souls. But we carry the color of our greed. And where we come from, in the color of blue of the STM, as you call it. So, if you work, you understand, as somebody who wants to elevate, the elevation of what you give, as a man from this planet, as a color, they know who has given, and how it's been given, and if I want to take it.

This is what we say, you have to perfect the man, to live by the Ethos of Mitra, because then, What you give has no taint on it, there is no death, what you call, killing, and there's nothing else to it. One day man will understand these teachings.

Any other question? (1:46).

Q: ... How can we feed with our thumbs? Is there something about feeding with thumbs?

K- I think the babies usually feed themselves with a thumb, don't they?

R: That's what I was going to say, that at least gets your salivation going, and that would be one way to create water perhaps. Stick your thumb in your mouth.

K- I don't know, yeah. Maybe.

Do you have any other question? Or shall we call it the day.

Q: ... In spiritual terms the aetheric body is used. Aetheric body and energy is the field of STP in the physical body. Oh he is asking. Is the aetheric body energy, is it the field of the STP in the physical body, or the fields of the human Spirit?

K- We haven't, we don't understand what aetheric is, to say what it is. Does it exist, and if it doesn't, it doesn't come into, how can we place it? (1:48).

R: Yeah, it's difficult without some defining and it's a... it's kind of a... it's a word that different people use differently, so we'd have to get into that in more detail.

K- Yeah. You have no more questions?

Q: ... Is the August session finished? They say they paid for the ticket for the August session. Can they join the 8th of September?

K- August session will be next Wednesday and the following Wednesday. It will be set, we wanted to do the conference first before we do it. Next Wednesday and the following Wednesday, people who registered will be given time to be on live with it, for the fingerprint of the Soul. And then on a Friday 8th and Friday 15th, we go through what I call, the two sessions for September. We didn't want to complete the session till we do the conference first, and now that we do the fingerprint of the Soul afterwards. It was something we had to learn with our systems, that it gives us a more clear understanding of the fingerprint. Because then in the picture we can analyze the fingerprints exactly what it needs.

R: Okay, how about one last question from Jalal here in the...

K- Two questions you mean?

R: Okay, sorry. Jalal, would you like to go ahead?

Q: Thank you Rick. Hi Mr. Keshe. Good day.

K- Hi Jalal, good day to you. Can we have the second question first? (1:50).

Q: Okay. I have no question Mr. Keshe. As always I would like to ask the Knowledge Seekers, which is near you. We didn't hear what they are, what they experienced, what they done, what happened? So...

K- Can I answer you Jalal? You have enough spies in this room that they'll report to you, don't worry.

You, you have put enough roots everywhere to find out what it is.

Q: Okay, then I will not...

K- Thank you very much.

If there are no questions, we bring the sessions, it's nearly two hours, to an end.

R: Yes, that sounds good.

K- Thank you very much. But please listen to the first 5 or 10 minutes of the teaching of today. If you understand it, I gave you the key to become traveler of the space. But again, it needs the wisdom to understand it.

Thank you very much, and see you next time.

R: Ok, very good. Thank you Mr. Keshe.

Q: KS who is near Mr. Keshe, make it worth it. take care of ???. Thank you.

R: I think he's got a good batch there, so I'm sure...

K- The phone was on silence, they answered. Do you want to answer him again? Nope. They said, we'll try hard Jalal. That's from Ekmar.

Thank you very much. See you next time. (1:52).

Q: ... We are sending to you all who are participating in these experiences in Manchester, the most wonderful fields from our wishes and love. Take care and enjoy. Thank you all.

R: I think we all have those feelings as well.

K- See you next week.
