

518th Knowledge Seekers Workshop December 28, 2023

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

22nd Flight session good result - new beginning; Soul missing knowledge in man; Creator creates with M fields; True history Man's culture; Still Pagans - worshipping statues Cross around neck - flags; Not advance knowledge of Soul; Names connected to Creator; Lot about Islam - true birthplace Mohammad Jordan - 200 moved to Mecca - start 9 year old marriages; Messengers pick STM open tent - Moses - Christ; STM takes over P not aware; Not abuse others in Space; Handle changes new P; Friday's use teachings; Reaching critical mass for transmutation; Satellite Souls; 2024 forefathers Souls decided time to bring change - everything ready - mature man; Age of Souls; True history - end religions; Friday 100 Souls left P - flat line - again on 12th Jan; Travel U with UBESUS also transmute; Elements created by low level; Handle radiation; Mitra; Mecca moved; 2012 KF not allowed to publish; Iranian MaGravs; How session changes you; Americans blocked publication London - still working - keep quiet; China conference; Pedophilia wrong; Persian culture worship women

ENGLISH TRANSCRIPTION

(:09)

K- Yes, thank you very much. Good morning, good day to you, as usual, wherever and whenever you listen to this series of Knowledge Seekers of the Keshe Foundation Spaceship Institute. As usual, we welcome you back and I hope for those of you who believe in the path of Christ, had a wonderful Christmas. And I'm sure, in the next few days you'll celebrate the Christian New Year. (:10) And then we go back to normal, till another one arrives somewhere. Most probably we come to the Chinese New Year in 9th of February, and then we come to Iranian New Year, in 21st of March, and then more New Years, and forever New Years, we are good in celebrating. I hope you enjoy it, in whichever, wherever you are.

The process of the teaching of the past few weeks, has brought us into a very nice position, and, as all of you know, our teaching does not end up with Thursday sessions, we do a lot of research, a lot of work in the background, which you as Knowledge Seekers (KS) come in, and we'll see that life carries on with the same manner, the same way, for all of us. << audio cut >> ...

Last week's teaching was one of the, what I call, very fundamental, opening your eyes into how you're connected to the Creator, and how you are part of the Creation, and you end up creating something, somewhere. In a way, the image you want to create, (:12) when you land somewhere in the dimension (D) of your, what I call, Soul, has already, is a dimension of another Soul, which has landed to be part of the fields of your creation, which is your Creator. If we understand this, if you understand the potential and the

gravity of the knowledge passed on last week. A lot of you will come to understand, the new beginning has started, for so many Souls, for so many of those who become aware of this change, of this progress, of this new way of living, this new way of considering to be part of and to be in, and to be part of Totality.

Why does Keshe Foundation follows this path? Why Keshe Foundation works on this way of new dimension, as a scientific organization, what has our work and our life has to do with the Soul? Why do we have to take this path that we try to, what I call, connect to, to be part of? And, how we collaborate the knowledge's of the past, the present, and what will be part of the knowledge of the future. (:14)

One of the most interesting things for man is to go back, to understand what was in the past, what is in the front, and where we are today. The knowledge of the Soul has been the part which we never understood. We understand the physicality (P), we made medicines for it, we made tools for it, we move it around, we get a donkey on it, and we get on a donkey and everything other ways, we move it. And as I said from the very, very, very first teachings, the Soul of the Man (STM) has been leeches on by the physicality of the man. And now that we come down the training, some 500 and odd teachings, now we understand the leeching is still on, unless we try to change it. And the leech is not actually the physicality of the man. The leech is the magnetic (M) field environment, which dictates the manifestation of the, what we call, the physicality.

In a way, you put the Soul anywhere, and in respect, and in interaction, with its environment, it manifests itself in physicality of, literally, what it'll be. It's like a dough. How you heat it, how you warm it, how you manifest it, will turn up to what it be and what the environment puts in that dough. It becomes a bread, it becomes a cake, it's something else and whatever else. But in fact, in essence, it's still the same flour, the same dough, the Rays of the Creation of the Creator. (:16) Once we understand this, man then decides which way to travel, which way to move.

We chose to ignore. Religions brought this to us, to ignore. Our weaknesses in respect to our environment brought us to accept and make of things, without actually going within. We saw fire, we copied, we saw wind, we copied, we saw bird, we copied it. But, we never copied the dimension of the Creation. We never copied what our Creator created. We structure ourselves in copying matter state. But, we never structure to understand, to copy the magnetic field strength, which creates the matter, the essence of the fields of the Universe. Then, a structure like Keshe Foundation becomes ?? nomad, because we are in both side, we teach both, and we understand which way you want to go. And, as I always say, in Farsi we say, if you don't want to be standing out, become part of the crowd.

So, as becoming part of the crowd, we taught you about the Gans's and everything else, which we said, to bring you to the point of understanding of your Soul. But still, you have to understand what this Soul does, when it goes back. If you go back to the history of man, history of the understanding of the man, it's culture. Going back to the time before any religion started, people created themselves gods, (:18) because they saw they need a strength, they saw they need a power, they saw they had to be connected to something

bigger. They never understood that they are that bigger part. Then, when they became more physical, they built the statues, goddesses. And became more physical. We still are in that dilemma of physicality, worshipping statues, and we are fooling ourselves, because we are modernized, we are educated. Up to now statues we worship were on stones, in the temples, and in god knows places.

But, with Christianity we became one step more mature. We carry the statue around our neck. There's no difference, we are still pagans. Look at the cross, you celebrate the Christmas, and have you changed anything from the time of pagans? Not really. You managed to break down the temples and the statues, and you brought it around your neck. And to show you, you are more powerful, and you are more understand the situation around you, you put a statue of a man on top of it, which the Romans wanted you to do.

So, in a way, in one shape or another, we still carrying on with a worshipping of physicality and statue in the writing, we carry around our neck as a "Allah and a Moon," we carry it as a cross, the Jews put a star, and we worship different things in different dimensions. We haven't come to the point to put these things away. (:20) And we celebrate it. The sign of Mecca, which means the Moon, is become a symbol of Islam. That's why Muslims have the Moon. Mecca in the traditional name of the, what we call, the peninsula of Saudi Arabia means Moon. And, when they chose to become the capital, they become the sign of the Moon. And that's the sign of Islam, which means the city of Mecca.

Now, you carry the cross with you, you celebrate it with you. And you put a man who, later on, in three months time, you put it on it, you call it the ?? Cross, and you put it in new temples, new house of statues, you call it the churches. You walk in the church, you still see him hanging there. You haven't changed from paganism. You just made it more glorified that we all carry around our neck. And the Jews do the same, with the "Star of David" and the rest of it. And it's always been there.

With the teaching of the Keshe Foundation, by understanding the structure of the Soul, you understand you are detached from these things. You are connected to the Creator, you are connected to the, what you call, the light of the STM. And this will bring you more knowledge, this brings you more understanding, this brings you to understand, not to be afraid of a building, of a what I call, "stadium," or whatever else we put the man. (:22) The actual field of the play of the Soul is the Universe (U). The field of the play of the man in dimension of physicality, for it to be itself, is only Earth.

In our teachings, in the process which comes to understanding the process, we become more and more, we bring it in to the name of some subconscious understanding, even we put it on our flags, it's another way of worship. And we don't let it go, because we never understood what the Soul is. It's us within us. If you look at different flags with the different emblems in the center of it, it's another way of worshipping, it's another way of paganism, it's another way of statues we put on. If you study how deep rooted this worshipping statues comes onto, you'll be amazed.

Years ago I studied the flag of Iran. Why the Muslims, when they came into power, they brought us the Moon and then when they got Ayatollahs, they got all sorts of curvatures of the Moon, they put it in of the flag. What does this mean? It's another worshipping a statue. The old flag of Iran, we had a lion with a sword in the hand and the Sun. Which was the totality of another way of worshipping God. When we say Shah, and then "Shah of Shah" means the, to you "King of the King," but "Shah" word comes from the ?? word in the time when the Man understood the power of the Creator, (:24) God means Shah. What we call it the Shah, mean God of the Gods. The word Shah comes in a deep rooted, what we call, culture, which means the Sun, rise of the Sun with warrior-ship. Because it comes from the word, which means the Sun rises from the East, with a war and warring attitude. So they chose a lion with the sword. But it comes with the rise of the Sun, they put the Sun on top of the lion. And nobody ever understood. Where actually the word "Shah" means God. "God of the Gods." And subconsciously, we don't understand it now, but during the time of the past, it meant God of the Gods. You change it to Kings, and then you put different things on it.

So, you see, subconsciously, the Creator and the power of Creation, has brought us this. In the old, ancient time, the Gods were two Gods. Gods which rises from the Sun side, from the East, and a God which sets on the (??) East side. The rise of the Sun on the West side, always was a fighting God, had to fight and just come to create. And then, because it came with the rise of the Sun, They made the lion as to be that fighting, which always been the lion was the powerful one, with all the wars, with the sword, which was the man's fighting, and then they put the Sun on top of it, (:26) which came to be the second Shah, which is the God of the Gods. One is the God of light, and one is the God of fight and power. And subconsciously we became that way. Look at the other nations flag. We have continuously followed the same way. Muslims came with the Moon. Again, paganism, we still worship Mecca. Mean, from South of the peninsula. Mecca, the city of Mecca, didn't exist the way we know today. It's a stone we see, it's a culture we came from the South Peninsula, and it became part of the stone, people worship in another direction.

So, it has never changed. We went from the flag, we went from the places we worshipped, and everything else, we always relied on our environment. But, we believed in something above us, the God. And then, everybody changed the name in a different way to fit, to suit. Because man never understood his Soul is the Creator, is connected to the Creator.

When you look at the name of Islam. Again, means, all languages of Middle East, means the Creator. Islam means, has come from the Creator. Muhammad chose it deliberately, because at the time, people understood, this is the religion of the Creator, that's why they turned to it. Go back to the root of the names. (:28) Why you call it Shalom? It's the gain the same. Why you call it Jerusalem? This all comes from the same name, the God, the Creator. Where the God of East versus the God of West. The God of West goes with Shalom, which means the Peaceful One. When you sit on the West. Jerusalem sits on the West side of the whole, before the, what we call, the sea. And it was where the peace lands. Land of Peace, land, where the direction of peace is. So, we don't understand,

we've forgotten about the root of our language, and those who understood have abused it, or used it, to nominate us.

All the words, we talk, is all connected, especially in the Middle East and Christianity, Judaism, Islam, is all come around the time when our ancestors understood the Creator. And we lost that track. They didn't worship statues, they didn't put a cross up. People used it, where understood it, to put it on. The same, when we go, we talk about ?? Salima, Salima is the same. It comes from the same basic word, which means, "The one who possesses peace through God." When we say "Salam," it's the same, it means peace. It means, what it came from the language of the past, three, four, five thousand years ago, but now it was just a word, because we forgot the culture. And those who understand it, abused it. And the teaching of Keshe Foundation is to bring these into light. (:30) That you understand, you are the light. Doesn't matter, you live in the East, you live in the West. You rise from one side and you go to the other side.

So, the teaching of the Keshe Foundation, it brings about the teaching of the past, understanding of the past, the culture, and the present time. And the freedom of man from dimension of physicality (D of P). Go and find, now we have the freedom of the Internet, about the culture of your language, what the words mean, and how we come to here. And how our rulers and the priests, and others have abused even them themselves, not understanding, but knowing that it controls the physicality to control the STM, then it can be done.

Man will never find his freedom. The freedom of his Soul, the freedom is connection to his Creator. Understanding the history of the man, as I said before, everything else could be faked. We made a fake Bible to suit the Romans, we made part of the Koran the same, if we go down into the detail of the Koran, we find out how much of it is made up, doesn't match, it doesn't work. And the same, worse is with the Jews, and the worse lot, the Bahá'ís, and the Buddhists, all faked it up. All made fake bigger, because they had to match the others. (:32)

Now that you know the dimension of your Soul, nobody can fake it. Because it's for you, you can travel the strength, the fields of the Universe. And, this is where you have to choose. We create the tools, we bring the dimensions for you, to understand how you manage to travel the body of the man in aircrafts, a car and a donkey. Now how you can travel the STM, on the field strength of itself, with no donkey, no aircraft. Because, it possesses the strength field of the travel speed of the Soul of the Creator (STC). It's you who decide, where to manifest it, where to slow it down, where to change certain parameters, to give it manifestation, and pack it up and go and somewhere else open tents in another way. Then, a lot of things comes clear.

When we tell you we've been here thousands of years, it's the same. We picked a STM, we open a tent, it comes the time of the Moses. We pack the tent up, we travel around, we turn up again, in another dimension of physicality, we call it time of Christ, and then Mohammed and the rest. But it's the same nomad, it's the same Soul.

Then you understand what journey your Soul has to do, to take, and where to go. And, when you are knowledgeable in the Soul, and then, when it comes to time of you becoming the Creator, you don't let these abuses in the time where the STM was abused, (:34) in the physicality of the man. Sometimes, we go even crazier than crazy, we do it, we stick it on our head, to remember that how stupid we are. We call it the turbans. If you see some of the Jews, they have a little black block in front of their forehead. Instead of banging into the wall of the Great Wall, they put it in there and they bang it, it bangs on their forehead, around the day and night. Then, we ring it as a bell in the temples of Tibet, and we do everything else with it, or bang our head 17 times a day on the floor, in the name of Islam. To make sure that Soul is engaged, and we can use the physicality, in whatever name we did.

And as I said, many people don't like it, because they can't rob you, the guy can't have a "cushy life," given tens of thousands as a priest, and Mullahs, and the Rabbis, and the rest. Even though they can't even read the books of the God, which they created themselves. Then you understand, as there are no books in the dimension of the STM, no one can cheat, and no one can become a Rabbi, and Ayatollahs. We work with all, we work with both dimensions, because we are aware of their weaknesses, and aware of the strength of the STM.

In the process of the Creation, man has to understand this, that not only not to be abused on Earth, (:36) then when it becomes the travel of the Space, he doesn't allow his Soul to become abuser of the others. And the second is more important than the first, because here, on the physical dimension, you're abused, ?? of abuse.

Going through this process of understanding, going through this process of, what I call, completion of the process. We gradually brings you to the point that, you will see, you will understand, that the others will see your Soul. And when you come back to the dimension of physicality, then you ?? leave behind that one. It's so much when you're hypnotized, you do things where you don't believe it can be done, when they show you the video of what you've done, you say, "This is not me, I didn't do this." Or when we allow the STM to take over, and then we video it, and then we say, "No, I could not do that."

As I said to you, I did that deliberately in a few cases where we were involved in. Getting a woman who has more or less no brain, with the Soul part was not touched to walk, and when she sat on the bed since we showed the video, she said, "I cannot walk." I said, "This is your video walking." Because we walk the Soul, not the physicality, (:38) and the Soul takes over the dimension of physicality. We showed that with Naomi in the hospital, as I said before.

So, we know how to get the STM to change the physicality. And as I said, we are not magicians, we never show magic, we explain what we do, then you understand. And in that process, it's for you to understand the strength of your Soul. And once you understand that the strength goes back to the Ethos of Mitra, think good with it, talk good with it, and act good with it. Because, even the Souls think and talk and do things.

The Soul has a Soul, Soul has a structure, and this is how you communicate. And, in that process, you show the manifestation of your beauty. Our job as teachers is for you, for us, to both understand the value of the knowledge of the Creation. For all of us to understand the dimension of the Creation, in both dimensions of the physicality, be it on this planet, on the Moon, another position in the Universe, but the same Soul. Just because you wear a clothes of a monkey, does not make you a monkey, does it? Because inside is you. (:40) When you go to another dimension and your physicality change, the Soul is still your Soul, irrespective of dimension, position.

And this is why we brought in the transmutation. Which means, up to now, you transferred, you traveled, now you transmute. You travel in the body of the man, you transfer the body of the man from one place to another, in another box or whatever. Now you learn to transmute, which means travel with the strength of the energies of the Universe with your energy and not your physicality.

Then it comes to a point. How would I accept the change? How would I not be frightened of what I see? Denying my own existence, when I'm in Mon in the strength I appear, for what I've done, what I control, I end up to be a stone. And somebody takes a picture, you were not there, you transmuted, you're a stone. That stone is you. Now you understand the teaching says, "Even a stone has a Soul." Because, it's you who has changed to that stone.

Now, we come to another point and dimension of understanding. Now that you have this knowledge, what are you going to do with it? (:42) Now that you establish the connection to other Souls, what are you going to do with it? Are you going to practice it, strengthen it, and enjoy both? As you enjoy the walk to go to the park, or you take the car to go to the park, but at the end, the same physicality ends up in the park. And the same pleasures comes you, it doesn't matter you walk to get there, or you drive to get there. What would be the dimension of the pleasures of the STM? Do we go to a Soul party, or do we go to a man's party?

These are the points that we have to face. These are the points that, especially those of you who are going through the different phases of the teaching of the Keshe Foundation, outside of Thursday's sessions, are gradually facing. And you have no choice in wanting it or not, you start feeling the changes, the dimension of the changes. And what is, and how you have to handle it. Or, how much more can you deny it, till one day comes on you, and then say, "I didn't know this is it." And the denial and the ignorance ?? comes ?? you. The truth shall not change, the existence of your Soul within you cannot change. It's how you find your way to it, (:44) which affects you, will become the point of the change for you, and the change for those who understand the work you do, and how you work around that, and how you work with it, and you understand it, and how you bring the change to your Soul, your physicality. And to what extent this dimension of physicality will change.

We are going through the phases of the teaching on Thursdays, that we see a large number of Knowledge Seekers are reaching that point. And this is why what I call, I put this, "consolidation talks." For them to understand there's nothing wrong. And what they've been through, what they go through, is part of the process to gain confidence to go to the next step. With the weekly and monthly teachings and what I call, the workshops, as a teaching as today, and the workshops where practically you're getting involved in what I call, on Fridays, once or twice a month, is practical. What we do, what practically we do. What we learn in the teaching, in theory, we put in practice, in what we call, "physical workshops." But this time, we don't show you how to make MaGravs, we create dimension and condition, that your Soul can travel, (:46) that your Soul can expand, that your Soul can communicate, in one thing to another. Gradually, step by step, more and more of you will come to learn that point.

We still do the test, we still making systems to become more powerful, we make systems to become more effective, that we can do a better job, but at the end, the whole process of the teaching is one way or another, to bring as many as you into understanding the Totality, that you, in the coming time, become the teachers. To teach the others how to go through this. How to teach the others to be able to travel in the dimension of the STM.

And this is part of my work, and this is part of what I've endeavored to do in past years. And now we're reaching that point. The reason we carry on with it, till we reach a "momentum mass," that more and more of you can do this. More of you can transmute and transfer and travel in both dimensions. That you don't call it a dream, because now I do it. You don't call it, "Oh darling, I was just thinking this before you say." Where you actually felt the emotion and the Soul spoke, and as you dream in your dreams and you remember some of it, is the information which he receives, (:48) you already received, and say, "Oh, I was just thinking about this." But not... It's not a dream anymore, because we talk on the Soul level, as much as physicality.

And, this is the purpose of these teachings. Does not matter, if you fall asleep in the teachings of Thursdays, or you fall asleep in the, what I call, physical workshop of the Friday. Because, it's your physicality locked out, not the STM. And then, when you travel in that dimension, has no limitation. "Oh, I fell asleep during the workshop." And, "I went there and there, I felt this." Because, sorry to say so, on Friday's workshop, we got nothing to do with your physicality. You can pack it up and take it anywhere else. You can have the headphones in the bath, you can have it while you're driving, you can have it while you're traveling, you can have it while you're climbing, and you can have it while you're asleep. Because we reach your Soul, your physicality can do whatever it likes, as long as you keep it quiet, keep the microphone shut.

Then you understand, how much we are entering, teaching you in the dimension of the energies of the Universe. You are learning about yourself. You're learning about your environment, you're learning how and the way you have to handle the environments to come. The way you bring the fields of the Universe to be part of you, (:50) to connect you with, to interact with, and how to transfer you across, you enter that position and

dimension. For your physical life, you get on a bus, you change train at a station, you go to different airports. In the dimension of physicality, you do that with your Soul.

And, if you need dimension and connections, in the physicality of the STM, we have settled with you, with what we call, the Satellite Souls, which they come into operation. Which those of you, which go through the span of the Universe, we've given you Universal Council members. Now you understand how the process was preset long before we bring you to here. When you build the bridge, you have to put a foundation in. You have to... the post in and then you have to do pillars on, before you build the bridge and you put the track on it. We've done all that. Those of you who are the Satellite Souls, you'll soon find out why you became. Instead of you, your Soul has chosen you, you run away from the physicality, when you come back to it, but you have to understand how you have structured yourself.

Those of you who became Universal Council members, gradually will come to understand the new dimension, without you knowing what is there and how, you will hear the "help call" and the, what I call, signals of the Souls in the Universe, and those who are Satellites will do it for the man on Earth.

In a way, we have built the whole foundation. (:52) The foundation of the, what we call, transmutation, where your Kings and your rulers and presidents and governments build you the roads and the plane and stations, for your physical dimension. But this time, there is no pilot, this time there is no driver, this time there is no abuser, and this time it's you who does all that. As I said to a friend of mine, "We all become a woman." Because now we can't say we are a man, because it's multitasking. They always tell us, "As a man in a physical dimension ..."

.. << audio cut >>

... ?? and the rest, same time. So, in one way or another, with these teachings, I try more and more to explain to you, more and more about yourself. About your Creator, which is your Soul. I don't tell you ... << audio cut >> ...

... do this or do that, and you don't need to do anything else. (:54)

Because now you control your own Soul, you control your own dimension, You are in charge of it, you are responsible for it, and you can't blame no one for it, because itself, finds its time, place and position, according to what you've done with it, and what you do with it, in dimension of physicality. You can still get on the plane, or you get on the transportation of the fields of the Universe, through the same journey. You like to sit 18 hours in a plane, go one place to another, or four days get to the Moon, or four seconds to the Soul, and go and see.

In totality, the time we are in, and we are in the last week of 2023, the evolution in science and transmutation will start from next year, from next week. How it's set to be is the decision that your forefather's Soul has set it to be. We are just here playing the part. We are not making a decision for it. As your forefather's Soul decided, you call it this time of 2024, this time of 1,400 and something, and 1,500 something, or 6,000 and

something. Somehow, the environment of the energies, fields of the Universe, in the coming weeks, in the coming time, reaches the point of the maturity for man to go through that evolution.

How the technology came to be ready for it, how the nations came to become ready for it, (:56) how the religious leaders came to be ready for it. Blame it all on the Soul, and not on the man. The coming time of weeks and months, is the time when maturity of the Totality of the STM, gradually starts to build up. Maybe we call it, 'the Year of Judgment'. The years of when the man will learn to release that cage from the, what I call, prison it made for its Soul. And in that process, many of you, as a human race and the rest, will mature to it.

In the process of the freedom of the man, to be able to travel the span of the Universe, to become and bring man to be part of the Universal Community, starts. In a way, when we call it Universal Community, is the interaction with the Soul of the other creatures of the Universe. You do not need in the dimension of Universal Community, to see someone's thing, in physical dimension, as a UFO, as an alien or whatever. When you travel in the dimension of Universal Community, you interact with the dimension of the Soul, with the dimension of the fields. Not with UFOs and the rest, that we became part of Universal Community.

You become part of Universal Community when you accept the existence and the process of the work of your own Soul. And anyone can become part of it, we usually, traditionally become part of it, (:58) when we put the physicality in the grave and we call it death. But now, you have that choice, that death will never come, because you can leave the old body of the man in his nineties and travel with a fresh Soul across the Universe for thousands of years. And maybe one day you come back to bring that physical old body back to Earth and be here when you are 5,000 or 10,000 Earthly time.

In the future, we'll teach you about the life and the, what I call, age of the Soul. Because, Souls do not have age, in a way, but they have a strength which shows their time of the travel or, in a way, interaction of the fields of within them, gives you a dimension of the maturity of the Soul. The Souls mature, they don't age, because time does not exist in the world of the Creation, it is man who made the time.

Then you understand, step by step, physicality has a limitation of the building, planet, time, light, where the Soul has no limitation at all. And whenever you want to put a limitation on it, you bring it to the dimension of physicality. And then, one day, how we transferred and how we transmuted, how we stayed in the deserts and god knows best places in the Universe, are explained. (1:00)

One day, I open the books, which none of you will ever go to mosque. Because you'll find out the truth about the mosques. One day, none of you will walk into no churches, as partially you know the truth about. And, one day there'll be no name of Judaism left, as every man who believed in it, will be a shame to take his dimension of physicality to that point, place and position.

Then you understand how this journey has started? And how, where we are taking you? How you are going gradually, step by step, in the dimension of travel by Soul, and leaving the physicality behind. In the test of last Friday, for a very first time, we saw digitally, we saw through equipments, and what we have, how you all left your physical life. The first time we thought was coincidence, second time was confirmation, and the third time was a fright in all of you, that you did not want to do it, because it was too, too real. And, we have gained such a knowledge, we know exactly how to bring you to that point. And then, once you learn yourself, you do it yourself. (1:02)

As those of you who joined us in that special giving, that physicality had no dimension, and you left it all behind. We invited you, most probably as Knowledge Seekers who joined last Friday, to a second session, next Friday. To go through the same, to get the confirmation of what you've been through. And, it's not that you felt anything, it is that you felt nothing, that's the whole beauty of it, the peace, the joy. And, as many of you said, you did not know where you were, but it was a peaceful place, you find peace within you and your Soul. You took the journey that a lot of people call, coming back from death, because the joy was there, you went through, but now you learn.

For those of you who went through this, we have invited you already, check your emails, to join us next Friday. We want to take you through the same journey. And if you remember in the process of the journey last week, very unusual. We asked you if you remember in the last 10 minutes or whatever, to the precise minute we saw how you left your physicality, is recorded in a digital form. And how the STM and the Soul of the Physicality (STP) has left, and there is no function in physicality. (1:04)

You seen those, you heard the noise in the movies, when it goes blip, blip, blip, blip, and it goes beep ... We have recorded that beep ..., with all of you. And the beauty of it is, that, that beep has come back. And that beep is recorded coming back. And then, you understand how easily we can bring you to the point. And it frightened many of you, going through that beep. And it is strange for us that some of you did not even felt the "beep" of your own Soul, of your own physicality. And you brought it to be in the dimension that in fact, you all beeped. And in a way, all of you went through that condition. You went through that emotion. You went through what I call, dimension that you did not want to be in. (1:06) And what is the strangest thing is how you all beeped together. And to see how you hear the beep of your physicality in the what I call, systems in the hospital. Now we have seen the beep of your Soul.

And what we want to do this weekend or next Friday, is to see how we can beep the whole lot of you. And in one go. And the interesting part is, how you, as Knowledge Seekers, we can bring you to that point. That we can allow you, together, to reach that leaping point. And for the first time I share it with you. That straight line in yellow is where you all beeped. (shows the graph of it) (1:08) The whole hundred of you. And none of you can deny it.

Now you understand how close we are getting into bringing you into that position. You don't exist in the dimension of physicality. That yellow line is your physical dimension. And we can repeat it. So, you as Knowledge Seekers are learning how to leave the physicality behind. And, those of you who said, "I felt nothing." Go deep inside, why you have to deny that to your Soul. And we have a couple of these bleeps and we know how to strengthen you to get to the bleep. This is the time when you gave the love, this is the time when you left the dimension of physicality in all the fields of the STM, became the giver. The essence of loving, which means giving, unconditionally.

So, doctors show you the bleep of your physicality, (1:10) we've shown you the bleep of your Souls. Now, you understand, how close many of you Knowledge Seekers have come close to that point. And there is no coincidences, and there is no accidents, and it took us time to give that energy to reach that point. In a way, what it's been short in this planet giving to the man, to the dimension of physicality that it kills for it, and then it dies itself, that energy shortage was given to your Soul. And the satisfaction was giving. And that's what we saw with the physical dimension.

For weeks, they run parallel and separate. And the specific way designing to give energy to the STM, we even proven where there is no Soul, that the physicality cannot survive. All this has been recorded. How, what strength, where and the way we can feed your Souls to go through that transmutation. This is part of the process when we tell you, you leave the physical side and we can transfer you to another box and you manifest, now you've seen the graph of it. Now you understand. (1:12)

<<audio cut >>

... the ?? God of the others, as we are all part of the same God, same creation and Creator.

Those of you who joined us last week, now you've seen the big lift of your time. Where that line only is created when all of you, hundred, were at the same time, in the same position. If one of you jumps, the whole graph goes. And then, as you came back conscious, none of you wanted to repeat it. Many of you wanted to leave the dimension of physicality. And we have all the data behind it.

Now you understand, everything we do is scientific, and no magic. And we have even taken your Soul, the energy of the Soul of you to another dimension, out of the system, to see how we can transmute your Soul. One day I explain this process.

Gradually, those of you who join us in the sessions to come, you build this and then you become stronger in doing it. And as I said, because you work all as one, even those who are the moderators, (1:14) their Soul become part of the same, because their work is part of, connected to the other Souls.

So, as I said, for next Friday, we have the whole hundred of you backing it. And then, the process of every third Friday, which is now been put out, we'll go into operation, till we see a continuous blip from the beginning to the end. And then you tell us, where the

energy of the Soul has gone, where your physicality has stayed behind. And then you learn the process of transmutation.

This is the key in your pocket and not mine. And it's the knowledge which sits with you and not with us. We're teachers, we are here to guide you through. And it's for you to learn how to go through that process. If one single person, in the whole hundred people in the group, would have nudged, jumped, the "flat liner" of the Soul would have gone, back to physical dimension. None did. So we got a whole lot of you going through it. And you've seen your "flat line" of your Soul.

I have two, three more of these to show you. It's not coincidental. We knew what we are going for, we knew what we got it to, and now this allows us to build perfect systems for transmutation. (1:16) Where the Soul and the physicality, and the STP of the man, goes in his own trip journey. I hope I brought you to a point today, I gave you the biggest Christmas gift. Where man for the first time sees the behavior of his Soul. and you are still here, so you all came back. And you have to have no fear of death, in the physical dimension. Rick, take us through a break and then we come back.

R: Okay, very good, thank you Mr. Keshe. Okay, I do have on the screen here, the Transmutation Preparation Sessions, which is a new page on the Keshe Foundation Store. And it mentions every third Friday of the month, from January 2024 to June of 2024. There will be full day sessions from 9 o'clock CET to 17:00 hours at CET, offered for those that would like to prepare for the transmutation. You can book individual session or the bundle of all 6 sessions for a discount.

K- What is interesting is that the last one falls on 21st of June, which is Equinox (Summer Solstice), (1:18) right in the middle of the year, by coincidence, where the pagan time celebrates the, what I call, the beginning of sunrise. On the other side, if you call it, not Equinox, the "Yalda" for the South people, as I call it. The shortest time of the light time in the Northern Hemisphere.

It falls very nicely with the whole pattern of the work. And it's the way it is, we haven't specifically chosen. We chose the third, what I call, Friday of every month, and falls on that day and that time. Carry on please.

>> BREAK >> 518 KSW December 28, 2023 (1:25).

K- Yeah, a couple of things. First of all, as during our session of teaching, today as it's going on, there's a most beautiful event is happening in China, with one of our Knowledge Seekers. The guy who I respect a lot, and has done a lot for the Keshe Foundation. He's getting married and I wish him and his new bride the best of wishes. And I'm sure in the future, Knowledge Seekers, you'll understand, how much this little guy has done such a big job for Keshe Foundation. (1:26) We are receiving the pictures of his wedding and I wish I could share it with you because it's private. And we wish him all the best in his new life, and what he's done for the Keshe Foundation China. And my best wishes to you Xiaojin and your new bride. And I'm sure you feel us with you, and I hope a wonderful life for both of you.

On the other hand, if you listen to the system just explaining about the UBESUS (Universal Body Enhancement Spaceship Units). The UBESUS are set to do both jobs. To do the transmutation and as you can see, physical flight. It depends how they are set to do, and this is what we are doing now. The physical side of the transportation of the UBESUS is already done, is with the, what I call, the authorities. Governments, who have already tested it.

And now we are testing, in a way, the transmutation side of it, which we started and the first people in June of last, in 2022, when they went in the system, they went to the Moon, they went to the oceans, and we did the first trips through the Soul at that time, now you understand. So, we have fulfilled what we promised. And these things will go to further extent, and what I call, explanation of the dual purpose of the system, like UBESUS. (1:28) You can travel with them, the span of the Universe in a system, or you can travel with them, or transmute with them, both dimensions within the same system.

And now we are going through the transmutation training, and as we explained and we showed, the knowledge is reaching the point that transmutation can be done, and a complete transmutation now is within the reach of the Keshe Foundation. What you see, what we showed, is the dimension of the, what I call, the Soul of all those who participated. That, even they say, "We didn't feel anything." We can show you exactly, if any of you jumped out, we would have seen, we saw the change. Because many of you get frightened of these conditions. And that bleep of yellow line, is nearly one and a half, two minutes. Our screen covers 4 minutes. So, it wasn't a blip, a few seconds.

And the next one is even longer than this. And the parallel system to bring the STP, the STM, the physicality of man in line, we can do for 4 minutes, 3-4 minutes as we have, or we can now extend it to hours. And these are important in the future Wellness Systems structures, that where we can bring the STM in that position, and allow for it to process itself from any diseases in the Space. (1:30) This is how we will reach the man in Space, and how we'll extend that to go beyond the levels of the Space travel.

And, hopefully, in the, what I call, the invitation we sent to all of you, who participated in last Friday, to participate in the next Friday, we try to extend this, what's it called, physical no motion, transmutation, as long as possible. We try to see if we can extend it to 6 to 10 minutes. And then, in the monthly transmutation, which are set up, again we have a limitation in number of people we can accept. There is a limit, and we start with that limit. Our limit last week was a 100, and we took the 100, we can't allow any more in.

So, if you're participating in the next 6 months transmutation, once we receive the limit, even some people sent us the funds for registration, we send the funds back. We're here to develop a structure of scientific basis. And, all has to be done in one go. We're taking people who come in for the whole session of the 6 months, because we're developing them very rapidly to become, to go through the transmutation. And then hopefully, some of you in learning, you become the teachers, the next cycle of teachers in the Keshe Foundation teaching, how to transmute Souls. And this process has started, we have managed to reach that point. (1:32) And again, we have put a limitation on the numbers of, number of people who go through this process.

And the sessions to come has a specific pattern of transmutation by small distances across the planet, the other bits, and then, in the second part of the year, when our systems comes to full, complete development, hopefully in the section, then we go for a physical transmutation. We are getting ready for it, development is getting done, and we see how you develop.

So those of you who want to join these second six sessions, I'm sure in the next two, three weeks will be complete, And if we receive any more, as many of you have seen, in the past session of the last week, we send your funds back, because we have a limit, we have a seal. And as soon as we reach it, we don't pass it, because then we can't control it.

On other hand, we still carry on with our development of the technology on the physical side. And I know many of you have received, have reported back to us, that you received the first half of your Communication Bundle. Please, those of you who received it, till we don't receive all of you, the first batch of the second part will not go out. So, when the, what we call, our people come back to work in the second week of January, once we have the confirmation from all of you, who the Units have been sent to, that you received it, and you confirmed to us, we send the second batch out. And then, by January or February, we keep on doing the transfer, (1:34) what we call, these Communication Bundles, in sets of 10, till we complete it somewhere in next 2-3 months, for the orders we received, and then we go to the next phase. And then we go through the, what we call, bringing in, those of you who are Satellites, and the rest into the process of the, what we call, communication and the rest of it.

Are there any questions?

Q: ... He says he got the email about the second session will be held on the 12th of January 2024. And he's mentioning that you were saying something about it being next week. And can you clarify this point?

K- It's the 12th of January. It's not next Friday, it's the Friday after.

K- ... Sorry, you're correct. ... my mind is ahead of time. Yeah, so, no, it is on the 12th of January, as you've seen, we have reached the point of transmutation. And now, we go through the second phase, in the... It won't be exactly the same, but it'll be a further development, to extend the time of transmutation. And then, we're trying to find a way that we don't need to have the translators to translate half way, to take so much time. And those of you who join in this session of the next, what you call it, 12th of January, and the rest, we try to communicate with you on the, what we call, the chat line, that we don't need to talk anymore. (1:36) So, when you come in, keep an eye on the chat line, that there'll be no more communication to disturb the flow of the, what we call, the fields, as we come in and we tell you something to do.

But, in general, we have reached the, what I call, threshold of transmutation. Now we can confirm it, we can follow it. And I'm sure the next cycle of the system which is getting built, make this one much, much more rapid and very, very fast. So, I hope for your next 6 months or 12 months, we can bring you in transmutation systems as we have designed and getting developed. It's a very interesting time.

Any other questions?

Q: (Iranian KS speaks) ... Mr. Keshe probably seen my video in Persian session in about Middle East. (1:38)

K- Nope.

Q: Yes, yes the video about the ring around the Sun and the question about the Plasma.

K- Yeah, what's the question today?

Q: Today, there is a lot to talk Mr. Keshe. At the moment, I respect the class and I just want to like ask Rick to show you if it's possible, it's related to the like, it's related to what you say in the classes usually. And, something happened like during my experiments in Nano coating. There is a lot to ask because in Professor ?? Parviz knows me, Azar met me in the Tehran seminar. Like, I know you from a long time ago, I will explain you later.

K - Ask your question.

Q: Anyway, there is a video, there is a video, if Rick can please like play that video, then I will ask my questions. But it is in Persian, I can translate it if it's like necessary.

<< It is showed a video where the Ohmmeter from the KS shows the number 666 .. >>
(1:40) We've seen the video the 666

K- ... We can see the video, we've seen the 666.

Q: ... Any reason is that, like, defaults setting for this number or anything?

K- I don't know, I cannot explain. I've never seen such a thing, so...

R: I tried it on my meter, my meter, and it actually did the same thing. Sometimes it depends on how you do it exactly. (1:42) It's some sort of default set of ?? to check the LEDs or something in it there. I don't know what else to say about it.

Q: Why should be like this? Sorry ..

K- I've never seen such a thing and if Rick can... If anybody can repeat it with their meter, it's something to do with the electronics of all these meters. It's some sort of between the battery and the microchip. Nothing to do with...

Q: It can be a just like coincidence.

K- It could be, but if people can try it and they all get the same, It's something to do with the way these electronics are set.

Q: Okay, but the... something is like, little bit freaky. I will explain you, I will explain you. Because, like, there is four numbers on Ohmmeters, and if we consider the zero, like, there are a lot of chances. And why is exactly 666, like, this is little bit like...

K- Oh, you have to ask the people who manufacture these things. So, that's nothing to do with our technology, nothing to do with what we do.

Q: Okay, okay, thank you very much, thank you, I got my answer. ...
Another thing, like there are a lot of things, like ... because I'm ... at the moment, I'm recording videos for ... like ... Iranian, in Persian language, for Iran Keshe Foundation. Like I started to explain the Nano coating first, like the Copper Nano coating session, and whatever like I learned from you and the system, I'm trying to just put it in.

K- Thank you very much for all your work. (1:44)

Q: No worries, that's my pleasure, that's like... always. Because I owe you more than these things, and there is a lot to say, because I was connected to your system, like you asked to come to the session with headphones. And something interesting happened, like something very interesting, because I have DVT. Do you know what is DVT?

K- No.

Q: The deep venous thrombosis, is a blood clot.

K- Yeah.

Q: In the lower, like the part of the body, usually happens in the lower of the ... part of the body. And I will explain you, I was locked down in the mental hospital, because of like ... Keshe Foundation things. I will explain you, because they were telling me, you are not existing and there are all my hallucinations and these things. And DVT happened there, in the hospital, because even the doctor of the place, he recognized that this is something going on in my leg. And he said, "It should be ?? graphed as soon as possible." But they didn't let me to go out of the place that I was locked down. Because, they afraid I escape. Anyway, there are a lot to say. I was even, I was in the process of translating your books in that time. You can ask Mr. Parviz if you want. I just borrowed a mobile phone in the like, (1:46) car that was transferring me from one place to another, like the place that I was locked down. I just paid the man, and he borrowed the phone. I called Dr. Parviz, and I said, this is the situation. They're taking me out. I don't know where to come back again and continue. And anyway, I just want to say there is good news. I don't want to take the class time. There is a good news, I did sauna yesterday, and amazingly my clots from like my hips to my ankle, they absorbed by veins, and some of them even moved. And, this is like the... they... some people call it miracle, but I was connected to your system. That's my explanation. Anyway, and there is a lot to say, I don't want to take the time of the class. We can talk later, if you let me. Please.

K- Thank you very much. Thank you. But you have to understand, these could be due to other factors, than just the sessions, but it's how you take it. How you take it up to yourself. Thank you very much anyway, for everything. And I wish you all the best.

Q: No worries. I just wanted to ask your, like, opinion about the Persian language, like, videos that they are in the process. I recorded, like it did so many amazing thing came up during the Nano process. (1:48) Because, I'd even put the Calcium, like Calcium pills, a part of inside the container of the Nano, like ?? things. And, there are some interesting things came up. I can like, send you the videos and talk about it later if you want. Thank you.

K- No problem, share it with Rick.

Q: ... Bob Lazar claims that "Element 115" is the fuel for alien spaceships. What is your idea about Element 115?

K- Who's alien and who's a spaceship? What is 115?

R: Well, it's the element they haven't really discovered, or they have discovered, but only lasts for a very short amount of time, or they've only made a few atoms of it, or something like that.

K- Exotic materials.

K- ... They call it exotic matters.

R: Hmm. It's the heaviest element so far, I guess. So far, that is.

K- I don't know. Whatever we don't have, (1:50) we can talk about it as much as we like. Because we don't have it, so we can make a speculation. But, 115 is not the heaviest of the elements in the Universe.

R: They're talking up to 250 in the stars that create elements now, apparently.

K- Yeah, this is whatever we... Look at this funny part of it. What happens when your Soul lands in one of these planetary 250? What would you come out of (as)? Will you be a stone or a dust or a gas? Or which one you decide to be?

Any other question?

At the moment there is a lot of work going on with the new elements, with creating elements with high voltages and all sorts. Creating matter at the low level, is never been done. Never been done, because man looked at the whole technology upside down. And in the future, we'll show that all elements are created at lower temperatures and very few... different direction of the science of the man, as we are pushing it today. Very, very much different.

Any other question? (1:52)

R: Well you mentioned being exposed by rays and fields and so on, and we had a bit of a discussion of that idea in the Plasma Reactor Group. So, the concept is either, how do we protect ourselves, if we were to be exposed to those more direct, more from the source fields, let's say, that our physicality may not normally be able to withstand. Can we protect ourselves in some way? Or, can we alternately become invisible to those fields and rays, so that it passes through without any harm or damage, much like we have high energy Cosmic Rays going through us all the time, apparently billions per square centimeter go through our skin and so on. And yet we're not harmed by those, but if we were at a certain other frequency, maybe we would tend to block them, or if we were of a different level.

K- There's a way, there's a way to handle, not only the radiation, but higher strength fields. And, we cannot do it in a physical dimension, as a matter of the body of the man, but once we learn how to expand the Soul, we can do so. It's like you create a net for this. When you say, whatever, so much of the Cosmic Rays goes per square meter of our body, is the structure of our body which is set to allow them through. All our tissues are set in a way that the fields go through, (1:54) there is no interaction. If you get the interaction, then you, you create the residual energies and part of it becomes our food.

One day when the knowledge of the man increases to, what I call, add it up to, if you feel, if you measure the fields which they come, the example come, from your left side, and

they go out from the right side, you will see we release different fields than the one they came in. Even though we say, "they go through us", the residue fields, some, interacts with our body. And this is how we are fed that 80%. And in the condition of nuclear, like reaction in the matter state, we learn to use our Soul and expand like a net, to absorb some, and at the same time, we know magnetic fields can be bent. So, we use our fields of the Soul, because it's dynamic, to bend it away from the physical dimension.

In a way, we've shown that in Fukushima test. If you understood the field flow and dimension of it, and how some is absorbed inside the Gans's. But in the future, you will learn how to operate these things. Because radiations are field strength, they are magnetic field, and you create that dimension that they actually become like a food to you, then actually something to harm you. (1:56) You open the span of the energy, that you absorb the energy without damage.

This is what I do when I handle nuclear material. Subconsciously or automatically, I create a field within me that allows their fields to become part of what I take, without harming me. As I said, if you were with me, with the Iranian colleagues in Tehran, the way I used to handle hundreds of radiation sources with hand, they all used to drive them crazy, but they couldn't understand. The way you can train your body to use the radioactive material as a food source, as an energy source, then is not a harm, it's addition. And you can do this with your Soul. What I teach you is what I've done, what I can be done. It's not something that is a fairy tale. And if you ever get hold of the head of the research of ?? Akbermejain research office, they tell you they used to go up the wall, how I used to handle hundreds of radiation sources just with hand, because to me it's a waste of time wearing these, because I know how to absorb the energy.

And this is the capability which all of us have. It's not exclusive, but you have to train yourself how to handle it, how to be with it. And this is one thing I learned to do from very, very young age, playing with the, what you call, X-ray machines. (1:58) In the X-ray technology, in medical technology, they make like a conical materials made of lead, that can focus the fields of the X-ray to a given position on the body, that it doesn't spread all over the body. For example, if you take an X-ray from a kidney, nowadays in the West they take a full picture, X-rays everywhere, liver, god knows intestine, everything gets radiated, for them to see just the kidney. In the time where I used to work with my father, we used to have a conical thing which fits on top of the X-ray machine, and fits directly to the kidney. Any extension, any radiation which comes from the tube, gets absorbed in these lead conical system. It actually, these cones they put on the street with the, for the traffic, the plastic one, the orange one, is more or less the same thing, with different cuts, with different shapes. They put into the head of the X-ray machine, it's got a slot. It goes in it, and you literally focus the field to the position, the rest of the body doesn't get it.

And this gave me ideas that, if the rest can be absorbed through, which be a system that we can do the same. And you train yourself to absorb it. And depends what KV you put on the X-ray machine, to intensify the fields for what objects, or what part of the body, you can play with this and learn gradually to absorb, to play with radioactive materials

without harm. And our Soul is a dynamic system, we can do it much, (2:00) much easier, if you learn how to do it.

Any other question?

Q: ... You mentioned in the previous teaching that Mitra's daughter will take over you in the future, which seems to mean that Mitra is an entity. So, can you tell us more about the entity of Mitra? For example, how she was born, what is her relationship with the Earth, life and human beings on it? Is she recorded in human literature? Thank you very much.

K- It's with all the dimensions of the work. You have both physical dimension and the Soul dimension. And everything is recorded. In session of last Friday, she was present amongst you, for a few minutes. And we have recorded it, to see how we can change the elevation. It is exactly a couple of minutes before we received, or we seen the graph we've showed you (with yellow flat line). It is the field strength which we understand. And the... (2:02) everything about it will be out in time, and you'll understand how and where and everything is. But again, to be there is both dimension of physicality and dimension of the Soul. And every time we have her, her three times in the teaching of past two years, and every time she comes in, she brings a change and we monitor it. And the two flat liners as you've seen, is precisely a couple of minutes before. It's recorded, we record everything. One day we unravel what and how and the way it ?? is.

Any other question?

Q: ... Will Mr. Keshe now tell us who the descendants of Christ in the South of France is? In the past he mentioned that the individual is a 'she' and with a popular name, if I am correct.

K- Look for it. You got to understand a lot about Christianity and Islam and everything else. And how much of it is truth, how much of it is not truth, how much of it is changed to fit, how much of it scientifically is impossible, and how much of it deliberately historians have raised it off the face of the history, to befit. (2:04) And one of the biggest controversy is not just the Vatican and the Pope, one of the biggest controversies are on the position of where Mohammed was born. And, if you read the position of where he actually, historically, comes to be born and what is in the Koran and where is now, there's a lot of things to be clarified, a lot to be clarified. Because, doesn't fit a lot of things in Koran, when you hear about the grandchildren of Muhammad, and about his children and their children. And what happened, does not fit into the reality of geography. Does not fit at all.

But they made it up and people have believed in it, and it's very hard to change it, but scientifically, the papers, the historical papers, shows Muhammad was not born at all in Mecca. Could not be. He's born in different position in Middle East. And if you put that position, a lot of things fits into Koran. There is a trip which Muhammad's supposed to have done to the, what we call, place in Jerusalem, above Jerusalem, from Mecca. It's

about 1,400, 1,600 kilometers. It's done overnight. But, if you put the real place where Muhammad is born, is only 140 kilometers, and it can be done with a horse.

Historically, one of the grand children of Muhammad, married into a family in Damascus. (2:06) Where, coming from so south, in Mecca, it was one of the impossibilities. But, if you bring it up to where it is, it's in the same region. It's a few, maybe couple of hundred kilometers. But at the moment, we don't understand historically how this history was changed. How they moved the birthplace of Muhammad 1,000 kilometers south. And there is no historical word for it. If you read about Mecca, till 200 after the Hajj, there is no indication of the city of Mecca anywhere on the map. First coins appear on about 201, 202 of Islamic religion time. And, what happened before? People were there, they were trading, there were money there. We, near the present market, we don't find any architectural data about time of Muhammad, that there was a city there, or anything.

This is what, now it's, they come because they built it so deep, and millions of them go and pilgrimage around the stone. But this position has no geological position. Historians are digging into it very heavy. But there's a piece missing, one day we cannot find the literature in Jewish articles or papers or what, stones of that time. (2:08) But, if you bring the birth of Muhammad, birthplace of Muhammad, into Jordan, where he was, actually was born, then you see everything they tell us fits. The names used, the families used, all fits. It solves 80% of the ambiguities in Koran. But we cannot talk about it, because it's forbidden.

But, the same as I explained about Christianity, and how you got your Christmas. Maybe in the future we find documents how they moved, Mecca from Jordan to Saudi Arabia. I'm doing a lot of research in this background, to find in Jewish writings, in Christian writings, how did this happen? Till then, we have to accept as it is, but a lot of things, the surnames of the families of the people who killed the family of Muhammad and the position of Muhammad, why Muhammad could have 19 wives he had, and then he forbid his followers to ?? (Marry) more than four. How? We know, we know recorded, that he had 19 wives in his life. He said loyal to ?? Khadija till he was... till she died, when he was 52, 53, because when he married her he was 24. But, after that he had numerous wives, but why he did forbid them? (2:10)

And then he explains how Koran was written into it, why so much of the Koran is about his wives. How they behaved, how they chit-chat with each other. Which is in the Holy Book, and then they twist it the way it should be. There is a lot of... Then when you put in, into structure of the Middle East, then unravels the truth about Islam. Why he chose the word of Islam? Because he was part of the culture of the time. That's why he was so much in touch with the Jews. Why his 14th wife was a Jew? He actually married a Jew, a Jewish girl, a slave. And he married a Christian girl, which is his fourth wife. His 14th wife was a Jewish. But he never had any children from any of them. Out of 14 official and altogether 19 wives, he only had...

<< audio cut >> (2:12) ...

K- ...

Yeah, he only had, out of 19 wives, 20 wives, he had 5 children, out of 2 of them. Khadija had 4 women, 4 girls, and 2 boys, the 2 boys young, died young. So, he had no son. And then, that's why his favorite daughter Fatima, who he married to his cousin Ali, became so prominent, and the two grandchildren, the grandsons. He had two sons and two daughters, Ali with Fatima. They became, because the ?? goes and the strength of the son. But he had no son himself. The fourth wife had a son. And he died, and he had no other children recorded. But is that the truth? Are there more children which are his, but never recorded?

We are looking into historical papers, stones, clay writings, of life of Muhammad, because he's precious. We have to understand the man is a prophet of God. And how it happened, the same I explained to you about Christ. My study doesn't go just because of Christianity. (2:14) It's the same with Islam. It's the same with Judaism. There is a lot of mystery and mysticism in the Bahá'í faith, and the same in Buddhism. Because when we get mystical, it gains power. When you look at the history, there is no mysticism.

And we got to understand, there's a lot of things when Koran doesn't fit where Mecca is today. And if you bring it up to where Muhammad was born in Jordan, everything fits. 95% of the ambiguities in Koran is answered, is correct, but why people are worshipping in the wrong place? But if you look at the place, the shape of the stone goes with the people in the south of Peninsula, where they ruled.

There's a historian which is doing a lot of work in the background, in unraveling these things. There are a number of them now in Europe. Some American and the British scientists are working on it, to find the truth. But the thing is, then you get the Islamic world telling you, "They are against their faith and the rest of it. These are enemies of Islam and the rest of it." You cannot deny historical papers, stones, which are from thousands of years ago. We cannot do. Unless it fits other people.

So, when we speak about the child of Christ, which went across France, and a lot of you use the name of Fatima. (2:16) Very common, it's not just Islamic. A lot of Christians in Europe, in Spain, they use that name. It's an Arabic name, it's a Middle Eastern name, it's where Christ came from.

We look at the historical papers, the documents. When you speak about ?? Dawud (David), which his father-in-law wanted to kill him, and he did everything we hear about him, in the Jewish religion. Then, you come to the point of him escaping in the Jewish literature, and hiding in a cave where there was a, what you call it, a spider, knitted the front with a bird outside, that the soldiers of the father-in-law couldn't find him to execute him, when he was in the cave. This goes back 4,000 years before, 3,000 years before Islam. And then, you see the same thing in history of Islam, But Muhammad went in the cave and it was a nest of birds and spider and it's a big revelation in the, in what you call it, in Koran. Are we living in the same area? Are we talking about the same story? How come we have it in Judaism and the same spider appears in Islam 2,000, 3,000 years later. (2:18) And if you are a very good Scottish guy, you have it in the Scottish history as well.

So it's a big mysticism in Islam that Muhammad went in a cave when there was a spider. It's a very big part of the Islamic religion. But being half Jew, knowing part of Jewish history, read about the life of Dawud, 2,000 years ago, the same spider appears. Does God have a specific spider for the Prophet? Or, this is the mystery of religion.

Don't take my word, go into the history book. History books never lie, especially when two or three historians, which are of the same time, one could be copying the other, but you see the language. And then, you understand. And a lot of other things come into light. You take out the parts which they are trying to make history out of the Koran and all this mysticism and people we give the lights for, read it from angle of the Jews, the Christians, and what the Muslims write about the same event. And somewhere between two or three, you'll find the truth.

Then, we tell you about the history, not about the man and the religion. (2:20) And this is why I call, we take, there is no magic to take out. There is no mystery to take out of the Keshe Foundation. It's a knowledge. It's not a religion, it's not a sect, it doesn't bring something for you to believe in something and ?? which ?? the magic's do.

So, you want the name there, you find out how come we have the same spider for both religions 2,000 years apart. Knowing they both come from the same region. You speak to the Jews, they tell you about the spider and the ?? . From thousands of years before Muhammad, you talk to the Muslims, this is one of the biggest events in the history of Koran. But, if you know and read the history, Muhammad didn't hide in a cave, he went in the opposite direction cave, as they were expecting him to go to. So, he wasn't hiding, he knew his enemies, were going to go that way to get him. He went the opposite, stayed in a cave, and when the time was over, he came out. So, they knitted the history of Judaism, which again was another fantasy for the Jews, from David time into Muhammad. We don't touch the person, we read the history.

And, it's the same with the Iran's Kings. (2:22) It's a lot of mysticism and so on, but as I said earlier, the word of Shah means God. Again, in the ancient time, when we call it Shah, and Shah means God of the Gods. Because, they believed in a God and the children of the God. So it was Gods and then the father of the Gods. And they put that in the name of the King, and everybody believed him, they are the God of the Gods, and they come from God. That's what the name of Shah means. And you changed it into King, because it fits into another part of the culture, when they changed the word.

Shah and Shalom come from the same Creator. Jerusalem is the same direction of the city to the East, where peace is. Now we understand the history of the religions, or mysticism of the religions of the past, then it's very easy to follow. I do a lot of research into this, to untangle the truth about what is in the background of the religions. Don't look at, don't disrespect the Prophet. Understand what is written about, the historically about the cycle of life. The rest, a lot of it is added to fit. A lot is added to fit. (2:24)

And why all the religions come using the same name base and area, not from somewhere else. Historians don't bring up any name like Ali, Hassan, and the rest, where Mecca is

today, from the time of the historian. These names belong to Jordan area, has done for centuries. Never appeared in the back end of the Red Sea, the end of the Saudi Peninsula, the bottom end. And now, it's become. There's a lot of work is going on with a lot of scientists, historians, going through the books. Going through historical books about the religions. And, anybody comes out with the truth is the enemy of Islam. It cannot be enemy when the truth is there.

If you look the original mosque, the first mosque ever built, is not built facing Mecca, today's Mecca. Is built facing the place of birth of Muhammad. Again, there's a historian, he's dug out physically, scientifically, that if you look at the first 100, 150 mosques which was built before 150, 200 years of the ?? Hijri, (2:26) which is the Islamic date, all faced towards the birth of Muhammad in Jordan. When they moved the Mecca to the South, they all built their mosques towards the South. Because, if you are a Muslim you know, the wall, facing wall which you pray, is the wall of Mecca, it's called. It's not that when you go to a mosque you face, everybody faces one direction. The mosque, the wall of the mosque, it's like a castle, built, the praying wall, it's called the wall of Mecca, to the direction of Mecca. Doesn't matter where you... if you're in the South Pole, you build it towards the North, the wall of the... where people pray towards. And all the walls of the mosques which are built, prior to moving Mecca to the present position, are facing Jordan. 120, 150 of them. Because Muhammad said to pray to that, and they built it to pray to that. Why did it suddenly change to present Mecca, 150 years after the death of Muhammad?

These are the data's we don't have. We have to dig into and scientifically find out why. But, these walls of mosque built centuries ago are there, we cannot deny it. So, and the angle of change is so much, is that you cannot say, "Oh, it's on the way of it." No way it's on the way. Even the mosques we should build in the southern point of Saudi Arabia of today, (2:28) points out to the birth of Muhammad in Jordan. Doesn't point out towards Mecca, no way. Then you understand, even the stone of Mecca is built, if you put the praying wall on it, towards Jordan. The stone which, the wall which everybody prays to, is built, when they built this mosque, originally was built to, as Muhammad said, "Pray to the place where he was born." Which again shows ?? Jordan. But the historians have to become more, the knowledge has to spread more, and then we understand more. Then we take mysticism out and we have respect for the Prophet. The true Prophet, the real messenger.

Any other question?

Q: (The same Iranian KS again) ... Hi again, Mr. Keshe. The things that I wanted to discuss today, is related to that, exactly that number (666). Because when we tried to upload the first video in the ?? apparatus service of Iran, me and Farhad and a lady from France. It was a Persian, she was a Persian lady. I cannot remember her name but it was a video of three of us, (2:30) and we decided to upload it in ?? apparatus, to like introduce what is Keshe Foundation. The first video and the only video I can like show you, I can screenshot, find it and show you like, with the dates. It was your name, Professor Mehran Tavakoli Keshe, and in Persian like. And the thing is, like the interesting thing is, it's a

video, the picture of the video, like the picture you see in the... for a start. Is a like a man, an old man, like a Zeus, with the sticker in his hand, with three like, things like a demon tail. And the ray is coming out of the, like that arrow, like three arrow things. and he's riding a white horse in the sky. And the video is starting a person who like opening a Bible and explaining that there is a sign of like 666 or like ?? in like Persian or Sanskrit language. And, one of the sign is like, he introduced to the nations by the King. And, the King of the Belgium, like introduced Mr. Keshe. Like, this is one sign. And, and, and, and. Anyway, like Mr. Keshe, you know, you know what's going on, like in the cultures and society of Iran, (2:32) like and Iraq, or like Afghanistan, or whatever, like if someone, some people, like crazy people, like fanatic people, or radical people, or people like, are very like, ?? false, like, introduced to the religion, if they just hear, like the name of the ?? Dajjal, or Antichrist or 666 or whatever anyone calls it. They can kill it easily and I was like confronted with this thing in Iran, to introduce you. Like what?

R: So, why do you bring it up in our show here now, if it brings all that stuff on? If those images and words bring all that trauma and chaos to people, why do you bring it into this workshop now? What's the purpose? What is it that you need to know about this?

Q: Like, is that with purpose? Like these things is happening with purpose. Because even a video in YouTube and some people like refer to it. They giving a flag like, and is like part of the class of the Mr. Keshe. Is like the video, like if you just type Keshe (into Google Search)

K- ... What we are trying to understand is what Rick is asking you, is why you're bringing this subject up here?

R: Yeah, it's basically dealing with trolls, and Mr. Keshe has two words to deal with. Mr. Keshe has two words to deal with trolls like that, "ignore them." Those are the two words he told me years ago, and it solved so many problems for me. And I give you that advice now, ignore them. (2:34)

Q: I do. I do. That's not the problem.

R: Then it's not a problem them.

K- ... Let me explain to you something very simple. A lot of work we do, brings a lot of changes, which a lot of people don't like. And what, especially now, scientifically developing, what we call, energy transfer, is not even in a dream of the present scientists, to do it the way so simply can be done. So, they have to make something out of you, and we don't care what they make.

As I said to someone very recently, Keshe Foundation was on magazines, newspaper, publications till 2012. Till August of 2012, there wasn't a day, there was not a journal or article about Keshe Foundation, the work we do. And since 2012, we are not allowed to publish anything. Even people who do research on our work, and even to put it as an index, into the research papers, PhD's, they're told their PhD will not pass, unless they take it off. We know hundreds of cases like this.

So, the truth will not change, the fact won't change. And we sit to work in that way. The only thing, the denial, and what they do, it delays the process of doing a lot of things good for humanity. So, let it be. They can write, the trolls, can do whatever they like. We've seen it. (2:36) We have people inside us (ex-wife) who went and how many, 3,000 entries from June of 2020 till September of 2022 has been put out by one person, 3,000. And then they gave up.

So, what did all that do? It brought more people into read what this guy says. So, we don't care. Literally to me, the more they write wrong, people one day listen, come in and find out and... it brings more people to understand than actually what is written.

We heard a case very recently, some of the Knowledge Seekers in the background know, a government literally went out to uproot Keshe Foundation, in different ways. And then they couldn't do it, and the last verdict of them, in pages of report, says everything about wrong, which is on the Internet, reported about Keshe Foundation, but we cannot find any reason for it. That's the conclusion of official research. Because even the governments now realizing, trolls can write whatever they like, can claim whatever they like, we say whatever it is, they change it the way they like. It doesn't effect, because we're not creating a sect, we're not creating a religion, we are teaching the scientific way to be able to use the environment, to the benefit of man and elevation of the man in knowledge. (2:38)

All these Kings, all these Ayatollahs they all will die. They all go, but the knowledge which will stay. History will take the name of them, they become something. But the knowledge your great grandchildren and your, God knows, a thousand generations ?? in line, learn how to use the Gans's, how they changed their pain and the rest of it. It stays as a common knowledge. And that's what the purpose is.

In fact, it's irrelevant what they write and what they do, because we are here to change the knowledge of man for centuries and thousand years to come. We, none of us have. I always, I said into one of the lectures, we talk about the Darius and Kourosh, how great men were and how peaceful was. How come the children of that king or kingdom, 2,000 years later, have become the scourge of humanity, because the Americans and Israelis decided (it) to be? So, but the love and the culture of the Iranian poetry, and the carpets and the rest of it, stays, which is the culture of the nation. Doesn't matter who said what. Our work is to bring the change in the knowledge, not in whatever they write.

It is all in the danger, this is all. What we said, for example, with Corona, and how research we did in Iran and the rest. And now we see what is coming up in the West. (2:40) Read the British papers in the first months of this year. There is a huge increase in death. And the only concern is, not that there's a huge in death, the insurance companies cannot pay the insurance covers, and they're under pressure. If you have 20,000, 28,000 extra deaths in one country, and each one has got a 100,000 insurance coverage, which is very normal coverage nowadays, then you have to understand where the insurance companies are going to find so many billions to pay. And what happened with Corona?

The financial terms are dictating. You put 28,000, multiply it by 100,000 each, you have to find 2.8 billion. Who's going to pay for it?

And then you understand when we said, that can be handled in different way as an energy, with a crisis and what's to come, will not be there. But this is the cycle of life, we have to learn. Knowledge Seekers who use the Gans's are still here. And it comes in the future, how to do with energies and transfer of energies, or viruses and the rest.

Any other questions?

Q: Mr. Keshe sorry, I want to ask, like there are a lot things, like, because I'm doing the videos for, like, teaching Nano coating, and it needs, like, someone's opinion, like, (2:42) who do you suggest in Iran or whatever? I know Yusef, I know Meysam, I know like, some people...

K- Each one, each one does their own way.

Q: Yeah, so it doesn't matter whatever, like I learn, like I can produce videos and doesn't matter, like you...

K- You have to transfer the knowledge the correct way. Consult with two or three people in Iran who do it, and how they do it, and make an opinion of it, and do it. It's not going to be wrong, it's not going to be right, but somewhere down the line people learn and do, and they will go with it. It's like people who doing in .. Brazil. They still teach how to make, but not always.

You Knowledge Seekers have not... If you put the total knowledge of Gans making at a hundred, what all of you do is not doesn't even reach one percent of what you can do with Gans's, how to produce Gans's. So, there's a lot of other ways to do and a lot of others, to add to Gans production. And maybe, even if you make a mistake, enlightened somebody to develop a new way to do it. As long as you produce material which can be, behaves like an energy packs, you call it Gans's, so it cannot be wrong.

Q: Something happened during the, like, Nano coating process, and I said. I tried to make a Calcium Gans too, (2:44) in the same container that I was doing Copper's for Nano coating. And I made a, like a simple coil with nine gauge, sorry, nine rounds (coils) of like... I heard some... One time you said like nine round is good and like is ideal around for coils, like a percentage, something from nine. Like nine, 18 or after. Is that correct?

K- It depends how you use it and what purpose.

Q: For MaGravs.

K- For MaGravs we... What do we use Rick for MaGravs? Is it 40? 40 something and 80's, I've forgotten what number of coils, numbers we use.

K- We have passed the MaGrav and Gans production long time ago. But these are all in a lot of teaching on the Keshe Foundation website. Go, if you need to do anything educational, go to the education part of the Keshe Foundation, they're all sitting in there somewhere. There is a lot of jobs done by the Philippine team and the Americans, especially John did a lot of work with the MaGravs. Go in there and you find out. The Iran team has made a huge successful MaGrav systems. ..

Q: ... Yeah, yeah. I saw it in the market, like in the online shop, and everyone is happy, (2:46) like there is a rating, everyone can put his, like, star for rating, like everything.

K- The Iranian MaGravs, you can now purchase the Iranians goods through another channel, through Amman (Jordan), that you can purchase goods. And this is all the same technology out of Amman.

R: Mehranez mentions in the chat, it was 81 coil and 144.

K- Yeah, something like that.

Q: Mr. Keshe, I just have one question and I... like I'm not going to talk more in this session. Just one question. Can I please ask in Persian, because I want to know the exact right thing.

K- Yeah

<< KS and Mr. Keshe speak in Farsi >> (2:48)

K- I just translate, he's asked the same question, the same explanation as before, there is nothing new that we can... and he wanted to ask about his thrombosis, which I said, "We do not pass any information on the health of this teaching."

Any other question?

Q: ... I attended on the Thursday session with headsets, and what I can tell is that my dreams are changed. As I feel I interact consciously on each one of my dreams. Thank you.

Q: ... If we're on this straight (yellow flat) line that you showed us from the Friday session, as in outside the body, we could heal through the Soul. Thank you very much.

R: I guess that's more of a statement than a question. So, we seem to have a couple of people that have successful results, let's say from the session. (2:50)

Q: ... Mr. Keshe said earlier, you have to go inside to find what you are denying your Soul with. For those saying they didn't feel anything in the session, what are we looking for? Our bad behaviors? How the love in our life can get .. interpreted?

K- The thing is, don't look at time in the sessions. Look at what changes in your life from that time. It's not how you feel in that 1, 2, 3, 4 hours or in the session. It's what changes in your life from there on that you can notice and then realize that is connected to the change, to the session. As one of the Knowledge Seekers was saying, it's so clear how I changed after the session, that I don't need to feel what I felt in the session. What changes brought to my life is important to me. Because we call it subconscious, we call it whatever, but that is the part that we bring in to our lives after each encounter, doesn't matter in this session, or you go to a temple, or whatever. And this is, the beauty of it is the subtleness of it. (2:52)

Years ago, when we used to do a lot of Wellness research with a lot of people, and they used to bring the... they come and say, "I apologize, I forgot to drink. I don't know what it is, but this past weeks I haven't drank enough, or don't use my breathing system anymore." And I said, "That's fantastic, can you bring them back?" "But, has anything changed?" "Oh yes, this, this, this." I said, "It's like when you're hungry, you don't need it, when your system is complete, when you don't need it, you have brought the change, the body doesn't need it, why do you want to use it?" And this is a process. What does these sessions bring you afterwards? Not what you feel in that session. Did you go anywhere? But, next week, next day, next month, has your feeling towards your partner changed? Has your feeling towards other people changed? Has your trust about yourself has changed? Do you... have you suddenly started changing the way you clothes, the way you talk, the way you feel, what is your out, or outlook for your future has changed? These are... when these things come in, it's not just, "Oh, I felt I went, I traveled, I went to there."

And this is what I keep on saying, "We listen to your stories." And when you tell us the story, it means you've taken the journey. We look at what happens after the journey. I moved into a new city. What happened after that? Did you get a job? Did you do... what happened? I traveled somewhere and I saw this... It's still the same memories. I cooked from the city I went to and the rest of it and blah, blah. We are not interested in the trip. (2:54) The interesting is what happen to you, how you change your life through your Soul afterwards. If you can record that, then something has changed in the session.

Doesn't matter if you felt something, you did feel, tinkling in my fingers, I went to see the grandpa, I always say, we listen, because you did the journey, we listen to your journey. But how did you feel when you met the grandpa? What did he tell you? As many people say, they settle and they sort out the problems they had with their mother, who died, and start a new cycle of life. That's what that session, when you saw the grandma, does. And then, you know you can access that. Next time you want to sort out a problem you had with a son which is alive in another city, you go through his Soul. ?? He picks the phone up, dad. Oh, I knew you were going to call me, because I listened to, send you my love. This is what, this is about not how you felt and... "It tingled your toes and my head went somewhere else and I tripped somewhere else." This is all good, but what changes bring to your life?

Many of you, many Knowledge Seekers, what we read, they sent us, has brought a fundamental change. They are in charge of, they are in control of, they are, they enjoy the change. And that's what the life is about. To understand another dimension in your life.

Any other questions?

Q: ... (2:56) Is it a good idea to try in the session, he calls it, sympathetic compassion and a willingness to spread it out like a stone hitting water. The, not so much the visualizing, but the extreme compassion and giving a loving spirit that somehow gets returned and multiplied. Is this something to be putting out during the session or does that really matter from your point of view?

K- It depends. We are not running a session, "Oh, we're all going to cry now, you're going to be happy next hour." No! It's you, you dictate, it's your Soul. Nothing to do with us, we just create the environment. It's like, you know, you go to a pool, to a swimming pool. We provide the pool with a nice clean water, which is cleanliness of the Universe and Creation. And you lot are the ones who are around the edge of the pool. Some of you jump in, some swim, some splash, some kick, some do frog ?? fire, what you call it, swimming, some do back roll, and the rest of it. We don't dictate to you, you just decide, "I do the front crawl, I do that back crawl. We just provided a clean pool. The Universe. And it's you who decides how. And it's you who decides how they enjoy it. And, it's you who decides how much you are frightened of it, to put a foot in it. (2:58)

I used to have a personal secretary for years, and she could not get her to put a foot in a, even baby swimming pool, it used to bring her into a shock. Just about 10 centimeter of water. She could never, if there was too much water even in the bath, she used to feel suffocated. She used to say, "I've never been ever in a pool in my life."

<< audio cut >>

K- ... The beauty of what we teach is the beauty of knowledge. And you, from the knowledge you gain, you decide how to swim in this pool. And that's all. We teach. (3:00) It's you who has to decide what part of the teaching suits you. And what part of the teaching benefits you, and to what extent.

Any other question?

Q: ... Hello Mr. Keshe, you tell us that for the conference in London, a large media company was contracted to take care of the promotion of the event, but nothing was heard in the media, at least I didn't hear. Only through our discussions with representatives of the governments, I believe that that is not possible to promote the Plasma Technology. We must advertise what has already been physically achieved, only with what could be achieved, we are not successful. Thank you.

K- It was published, it's in some 500 different, what you call it, publications. We received the list of publications. And the back end of the promotion, which we paid tens of thousands for, was blocked by the American government, into going public. And we just

took it as it was. But they have published in articles, what you call it, press releases in over 500 journals and press recordings.

And we still working on the back of what we succeeded in London. Still, the work with the, what you call, and the officials and more officials are getting involved, still carrying on. (3:02) We don't go public with these things, because we know what we call as, Rick called them 'trolls', how they go and what they do. So, it's... the work is still going on, we're still successfully at it. In the... It's something we accepted in long term with... sits with the Keshe Foundation till short term and we sort it. But it was publicized, we've seen the articles, and some of you have seen articles in some other papers, and magazines, or what I call it, the Internet journals. That job hasn't stopped yet, because now we are working towards the conference in China.

Any other question?

R: Maybe one day the Google algorithms will accept the Keshe Foundation and actually spread the links and so on more efficiently.

K- We cannot do, this cannot be done, you have to understand. the biggest financial structure has set against the Keshe Foundation. And we cannot fight, or battle with people like Fox, we carry on with our work. It is working in the way it does, and something we accepted. Fox will be foxed one day, but the knowledge will stay.

Q: ... In the recent teaching just before the London meeting, (3:04) Mr. Keshe has announced the Sanya meeting, and that the Tehran meeting in the next year would be held. My question is, is there any updates on the Sanya meeting? Thank you.

K- We're still... I have to go back to China in the new year, and solve that final phase, yes. We don't announce anymore how we travel, how we do things, because we curtail it for the things we've seen in the past. But our work is to carry this on << audio cut >>. Once I return to China, we will announce the position with Sanya and the rest. The year. There are a lot of things for Keshe Foundation to sort out, before we arrive in Tehran. We have to reach a point of transmutation ourselves, that we will deliver it in Tehran, and fully as a major, the same as what we're trying to do in, what you call it, in China.

Any other question?

K- Let me explain, let me explain. ... Keshe Foundation owns a company in Hunan, in Sanya. We registered it years and years ago. So we operate, when we operate we establish that side of the company. Still I think it's there, but, it'll be sorted when we go back and we operate through the company we own, and ...

Any other question? (3:06)

Q: ... The inside of my head started vibrating when you asked my question Rick. I appreciate this answer and I know right, what he means with it for my own life. Thank you... I definitely believe each session that I've gone through, the week or two after, I always have things, I have problems with my life, mostly in relationships, I've come to understand what happened, and get a lot of peace on the subjects. I always go into it hoping I have something undeniable and definite happened to me in the session though, which is too physical.

R: So he expects something physical in the session, but he says, there's things that get resolved after the sessions.

K- Shall we call it the day?

Q: ... Can you explain more about the 9 year old bride, and why that was okay?

K- What 9 year old bride?

R: Hmm, I think, I think you mentioned something about that in previous workshop.

K- Are you talking about the Mohammed, marrying a 9 year old?

R: Yeah, and it's part of the tradition, apparently it's...

K- ... You have to understand the culture, environment, and the things they used to be (done). (3:08) This is why part of the Islam and the Koran, which we know, doesn't fit into the history of the time and the place. One of them is this, marriage. And how girls mature and how the mentality of the area has been that a child becomes a woman after the first menstruation, she's not looked at anymore as a child. We have made that 18 year old legal line in England. They... there is the ?? position around 16. And in some European countries, still stays at 18. There is no threshold, as we say in England, you know, the night before your 18th, you don't understand, the next morning you are given the key of the house. This was a tradition, it used to be, you're mature.

In the history of the man, a child was mature when she went through the first menstruation. And it's like the world of animals. It was mature to reproduce. This is the way they looked at it at the time. This age of... that's a reality of fact, it's a physical dimension to it. And they stuck to that.

But you go back the same time in that part of the world. The mentality was that women ruled, (3:10) and they dominated everything. And, it was common in that time, 2,000 years ago, in the northern part of, or what we call, the part of the Babylon, and the ?? Baro below that, in the Arab section of it, that one woman had 9 or 10 husbands, because there were not enough women. It was very common.

Muhammad allowed a man sharing one woman with 9 men, to one man having 4 women. And this brought a change. And then there was a shortage of girls to have for. So they

went back to the point of, what we call, physical maturity. Many of the brides of Muhammad were slaves given to him. He didn't go out looking for women. They were sent, because he was the Prophet and respected, and what Muslims did, taking over so many countries with the sword, they had districts where they had to pay taxes to. Muhammad, Islam, Muslims collected taxes from villages, and exactly what the Romans did.

The two grandchildren of Muhammad, Hassan and Hussain, for them to stay quiet and don't interfere with running of the Islamic world, (3:12) they were given what we call, the Grand Chief, the head of the Islamic structure, equal to 400, that time, kilos of gold per year, to run their house affair. Sorry, 4 ton of gold. What they collected in their wars from the other tribes, and what they collected as tax. These two boys were given like, something like a million dollar, at that time, just for them to keep their entourage. Just because they were grandchildren of the Prophet. It's in historical books. They were allocated, millions in that time.

The villagers collected young girls, the most beautiful young girls, and they sent them to these leaders, Muhammad, his uncles, and the rest who were ruling, and they had the choice of freedom. And they gave these gifts as slaves, as gifts to the other slaves, or people who achieved something in wars. The reward was a woman, plus gold and properties. It's exactly what our leaders do today. And so when they got these women, (3:14) they're all children, young girls, because they were beautiful and they knew they pleased these old men.

The fourth wife of Muhammad was a slave, which he gave to his third wife. But she was so beautiful that he took the slave as a wife. But he was a... same slave, he was adopted son of him. If you read the Islamic history. They just came, every day taxes were sent, children were sent as gift to the ?? and the rest of it. Where Ali became the biggest problem for the Sunnis was because he took a woman which was slave sent for one of the leaders who won a war. And it was supposed to be his woman, or his slave. She was so beautiful. Ali took for a night. And he broke the rule. And this created huge mayhem with Muhammad. Ali being his son-in-law, being his cousin, and they take what they like.

And this created one of the biggest division in Islam, between Sunnis and Shias. One woman, one young slave, because she was so beautiful. Read the history of the Islam. And, we have all these problems, because of women, or what was collected from the war and given. And most of the time they gave young girls, very young girls, just turned to puberty as gift to these, (3:16) not just Muhammad, Abu Bakr, ?? Osman, they all had it. And they conquered all the time, so forever, every day, young girls were just coming into their possession. So, it was normal to have young bride.

You have to look at the history of the time, culture of the time. Not what 2,000 years later we are looking. It was the same with the Christians. In the same area where the, what you call, they were given gifts. This fourth wife of Muhammad, which was a slave, came from a Christian village. Christians were giving, the mayor sent him as a, you know,

thank for his brought up, and given to him. What religion they came from, didn't matter, they were gifts. So they become Muslim.

During the time of, what you call it, Judaism. In Jewish religion an uncle is allowed to marry the daughter of his sister. It's not forbidden. So, the uncle sees the child being born, and likes the child from childhood, because of the uncle-child relationship, and they fell in love with, and they had the girl when she was nine, and they married them. So you don't look at just one, some Jews are the same. In Islam it's forbidden for an uncle to marry, but the cousins can get married, (3:18) that's why Muhammad gave his cousin to his daughter, his favorite daughter, which is Fatima.

It is the same with Christianity. During the Christian's time, you just blame Muslims. You have to understand it was the culture of the time. It's like a sheep comes to maturity after one year, and ram, have a ?? go will have a child. Confirm the existence. It was the same. Women had no value. They were just a commodity of a war to capture, for the pleasure, and the rest of it.

So, the children were given as gifts. Nobody told of what we call nowadays, pedophilia and the rest of it. But, the ethic was that you don't touch a girl before matures. So, is the problem with Mohammed, with the Jews, with the Christians? It's all in the same area. They're all brought up with the same way of thinking. To them it was normal. All the cousins and uncles of followers, of people who followed Muhammad, all come from the area of Jordan. They carry the names. It's like me, Tavakoli, you know I'm from Iran, or I'm from that side. You're a Smith, you're from England, you don't get a Smith in Tehran. It's the same thing. (3:20)

Abu Bakr, Osman and Ali and, Ali was actually Allah, which is another Goddess. Another God in that time ago, and then became Ali. And it's a common word, it comes from 2,000 years ago, and he was one of the gods. By the change of words, with playing with the back and forth, they change the same meaning, but in difference ??.

So when we talk about Mohammed marrying a 9 year old, you'll see that frequently they waited till it was a nice niece, till she's nine and she was married, it was yours. Or, a boy became mature, bar mitzvah at the age of 13. The girl became mature at the time of puberty. Because, there was no sign of a boy to become a man. And then they said, "At 13 he becomes a man." So, he could be still a baby, still being in the pampers and ??, but he was 13, so he's a man. But the girl had a sign, a physical sign of menstruation. Many, many uncles, they were married till the daughter of the, what you call it, sister, matures to puberty, that they can marry. Don't blame Islam, understand the culture.

R: So, the question comes up, is it okay today in our modern world, supposedly modern world, some cultures or religions might still keep those teachings and...

K- We have changed the "goalpost," but we haven't changed the maturity, physicality of the girls. (3:22) There's a big problem, which lies underneath the boys or the girls, man or a woman. Pedophilia is wrong. But where we draw the line of the maturity, mental

maturity. I know boys of 25, they are worse than 11 years old. And they're running companies. Why didn't they mature at 18? You go into a lot of Jewish companies, boys after 13, 14 come into business, and they are, they have a beautiful brain of making a lot of money, but mentally you put them with a girl, they are less than 10 years old. Is that right to get them married?

There should be an understanding of the physical ?? What do we do in Space? This is what I question, I put somebody. How do we know when we fall with another entity in the Space, is it mature? What age could be a thousand years before they are mature? They can reproduce.

Pedophilia is wrong, doesn't matter how you shape it. And our society, today's society, understanding the probability of recognizing left and right, is 18. And we have to stick to it. And it's correct, because then they can make a decision. But we see in the Islamic countries, now they're bending the law, the girls are getting married at the age of 13, (3:24) but not getting registered, but actually live with their husband. We see, English government legally allows girls at the age of 16, to be with the men over 18. Which most probably they met in the college, or in the pub, or whatever. There are government's bending the rules. And it's how in some countries 21 now is pushed to be the point of maturity, which is more actually feasible. It's a more correct time to be 21 than 18.

So, we have to understand how collectively we understand. And we accept society that the child is safe. In Africa, they're married on the puberty. In South America and some jungles, it's still the same. Nobody carries their birth certificate. We have made rules, and in so many ways, the correct way. But, to bring the whole lot into line, is another ball game played. But, going back to the time of ?? Hans, you have to understand, they were all at it. The Christians, the Jews, the Muslims and the rest of it.

R: What did their gods think about all this?

K- Go and ask their gods.

R: .. We're right but the others are wrong ..

K- ... (3:26) Let me explain to you something, very clear... You have to understand something. You have to understand, when we talk about Muhammad marrying this 9 year old girl. Read historically what happened. Historically, he liked the girl. It was just about the time when his wife died, Khadija. It was in that time. Historically, we... Khadija didn't let Muhammad to marry again. He was... she didn't want him to, she opposed it, but he did also some things, that's a different thing. This girl was 6 when he fell in love with her, or whatever, as a child. And, when it came for him to marry her, the mother took her, the girl, amongst the women of the Muhammad. What they do with royal families of today, to check the girl is a virgin and the rest of it, medically. She was examined and whatever, that yes, she's a virgin, she's a girl, she can be a woman, she's gone through her menstruation. And then the mother took the girl to Muhammad. It was done according to the books (customs). It wasn't that he went and grabbed a 9 year old girl. No.

Read. I always say, go through the history. Don't take what it is. The girl, when she was 9 years old, when she reached her puberty, 9, 10, (3:28) she was examined by the elder women that she is mature. She's gone through her menstruation, she is... she can be wedded to a man. And the mother took the girl, because she was engaged to the, Muhammad, to him as his wife. It wasn't just "jumping on" a 9 year old girl. She actually took him, sat her next to Muhammad, and said to Muhammad and to the child, "He is your new family, and you are his new family." "He is your new family, and you are his new family." It wasn't done, "Oh, something behind the curtain." It was when Muhammad married this girl, was done according to the books of the time. What the culture accepted that time.

Many Jewish women took their own daughter to their brothers, and they said, "Now you can marry her, she's a woman." Even she was 9 years old. That's why we have so many diseases in Jewish families, at the moment. In Jewish blood there are unknown diseases, inter-family marrying again, cousin, uncle to the child and uncle to the child. And we have the same in the Islamic world, cousins marrying cousins again, their children marry their cousins. So, when you talk about these things, understand the history.

Understand, this is why I said, when you go through history, what happened physically is different than what you want to bring mysticism into it. (3:30) Today's society, we accept 18 is 18. ?? the girl has to be 18. And I believe 21 still should be the legal size than the 18, because most of our children in 18 are still children, worse than 9 year olds. And we have to go according to what it is, but we have this difference now in the Islamic world, they're coming with a 9 year old, and it's wrong to our Western society, and it's not acceptable.

Now, you go to Afghanistan today, the Mullahs are telling the people, "If you have a 12 year old, 13 year old daughter, bring it and give it us to marry them." Then you do a good thing. That's what's going on today in Afghanistan. And people are hiding their children.

What it is, years and years ago I used to be involved with United Nation and this human trafficking and child trafficking. And it was always a headache when we looked at India, when we looked at Africa, we couldn't make a head or tail of it most of the time. In India and Kashmir, they give birth to a child to be sold at age of puberty. And they go every year, people go around the village, collecting the children of girls who reach that point. And they ship them all the way from Punjab, into prostitution houses of Delhi. (3:32) And some of them which are more valued in face and look and touch, ship to Saudi Arabia. We have the same problem with African children, taken from their villages, they don't even know which village they come from, walked, most of them die, into going into Arab Nations. It's not so black and white when it comes. We have the same thing through now, what used to be Eastern Bloc. Young girls, very young girls, are shipped out into the "red districts" of Europe and the governments close their eyes. Czech Republic, and Moldavia, Romania, all these are still bedrock of young girls traffic into Europe. Don't think Europeans are so civilized. It has to be stopped, but how we stop it is, what I say, it's elevation of the STM.

Any other question?

R: We have a last question with Mehranez.

K- I think she is going to teach us something, let's see>

Q: Mehranez... (3:34) Well, as far as I know about, I found about the Prophet Muhammad. He used to, like a lot of people at the time, marry the girls from other families, to have peace between the two. Because when you marry, even somehow in Iran, in tribes, you're part of them. You can do business and nobody attacks you. So, I think in the case of ?? Aisha, which was very young, they married, but the Prophet didn't touch her until she was 18. So, and the proof is they had no children. The only children we know from Prophet is from his first wife, he was 25, she was 14, so it means there is no sexual attraction. He married and he was loyal to her until the end of her life, which was old age. He had a daughter, Fatima, who all the dynasty came from, and two boys which died earlier. So he could make child, but he didn't make child with this girl. And it was just the daughter of his close friend. And to have peace and security, they used to marry.

And also in the climate of Saudi now, before Arabic, the girls and boys get mature much younger than the other climate, which are more humid and cold. And so it means that Prophet didn't marry for pleasure or sexuality or ??. (3:36) It's just the habit of the time to marry with other tribes. And he had so much respect for the women at the time when they put the baby girl under the, in the tomb, they killed the baby child, which is a girl. At that time, Prophet kissed the hand of her daughter each time she went to see him. And he had a lot of respect for his daughter. He used to raise (stand up) when she arrived. And that put the symbol of respect of the woman, and which is what we have to learn from it. These marriages were not like having 90 children and 100 grandchildren, like at the time, which we see the ?? Arabs . ?? are wife and children situation. And thank you very much, that's all. I may be wrong, that's what I want. Thank you.

K- Thank you.

K- Yes, but they say, Muhammad kept all his 18, 16 wives in one place, in one house. That he, they always had that, what you call it, respect, that even which night he's with who, and it was kept and respected. And you got to understand, those of you who you've been brought up to look at Islam in different way.

If you have a thousand women in Jewish family, around the pray table does not count. A newborn boy counts. (3:38) In Christianity, the value of a woman was respect, but nothing else. In that time, Muhammad gave the value to women, that even in the, what you call, in the inheritance, they take one to two, compared to the boys. So, he raised the level of the respect or equality of women. That's in Koran, you can't change it.

In Torah, if you are a Jewish (?? woman) , you don't exist. You're just another production system. In Christianity, the way we have it, what you call, Christ is just a respect for the

woman as it is. And Muhammad for the first time put a value into the Islamic world, into Arab world for women. But if you cross the mountain where the Arabs were on this side, which was Iraq and the rest of it, and the other side of mountains, where the Persians, women were the rulers of the family. There's one mountain which goes right across the western side of Iran, where the Arabs were on this side of the mountain, and the Persians on the other side. It was totally different story when it came to women.

Woman ruled with an "iron fist" in the Persian culture. Their word, the last word in the house, even today, in the Iranian houses, is the woman. We respect our mother beyond. And when you say something to your daughter, he says, "Go and talk to your mom. Whatever she says." Thank you very much for today.

R: Did the women take 9 year old boys as husbands, when they dominated?

K- I don't know, I don't know. (3:40)

R: They have a different, a whole different philosophy that they...

K- In the Persian house, even today, when my sister enters, she, even as an older son of the family, we have a whole, rights to everything, you know, traditionally, but her word is the last word. Even in my marriage, it's the same. The mother, in Iranian culture, true Iranian culture, is the last word in the house. But she turns the words of the dad to become the last word. But my mom, we could never turn around to her, no way. You never said a wrong word to your mother, you never turned a face to whatever she didn't want. You did your job, you did what you wanted to do, but the respect for women in the Persian culture is deep. In a way, we worship our women. Doesn't matter if it comes in the shape of the mother, wife, or daughter. When you see Iranian men with the daughters, then you understand. We show the love of our life to our daughters, to our wives. It's a different culture. Thank you very much for today.

Q: ... In the Koran it's written "black on white," that as far as man and women, they are exactly the same, whichever does the best good, and etc. goes to the Paradise and gets a ?? from ?? her. So, there's no difference between men and women, spiritually. So, go ahead. (3:42)

K- Thank you very much. Thank you indeed.

Yeah, but if you go further in the writing of Bahá'u'lláh, bless his name, he says, "If you have enough money to educate two children you have, a boy and a girl, you educate the mother, the daughter, that she becomes a mother of the future and brings up the next generation. And the education has to be correct." It depends in which religion we look at, and how we see things. But overall, it comes out of the respect for humanity, and what we respect.

Thank you very much for today. Thank you indeed. We'll see you next week. And, all those of you who believe in the path of Christ, have a Happy New Year and enjoy it, on Monday.

518 KSW Dec 28, 2023
