

54th Knowledge Seekers Workshop Mar 19 2015

Keshe has been developing this technology for 40 years, now opening a University. No manuals in the Space, you have to learn it in yourself. (:19). If you think you can understand Plasma after 5 years study, you have become narrow minded. This is a living knowledge. We'll not use titles here, learn and teach as equals, first time in human history. Explain according to our level of understanding. When you start dreaming of the Plasma, is the time you start to understand it. Belgium government have tried to kill Keshe so at opening function asked not to come. Criminal investigation going on. Yukoko from Japan and she went to Fukushima to help her nation, now Keshe Foundation is leading gin clean up behind the scenes. She caused the government to move. If USA would remove the restriction on Keshe traveling. Keshe is banned from NASA. (1:07). Luca's demonstration of experiment, "Apple" plasma and trying to measure MG fields of apple. These are modeled after "Armen's Coil". Kundalini reactor. (1:46). One Belgium scientist created a black box that creates Energy out of air. Keshe asked to evaluate it, and declared it correct. He understood the work of Tesla in the matter state. Keshe developed different ways of coiling the copper wires. Perpetual motion the is invisible but effective on matter level. Coils sit outside and rotate magnets outside. Due to gradient of field strengths. This technology produces Kilowatts. Twist it back on itself. (1:55). A description of how huge amounts of energy that are crossing boundaries. Nano coat and Gans, trying to pressurize through Gans. Something going over head and we don't see it. Electron vibration that gets released in a Plasmatic state, huge amounts of energy. Amplifier of plasmatic energy. You do the same thing when you eat a banana (2:07). Forced pressure on the plasma through a Nano coated wire, add coiled copper wire Nano coated that you can add current, then Gans material and a Nano coated wire around the center. Creating a MG pressure that releases energy. You can even do it with plastic or wood. Tapping into Universal Energy and zero-time travel, because you have passed the matter border of plasma. We do this when we turn on electric heater but at kilowatts, go down to micro-watts and release the plasma on Nano coat. You have to find out at what level it will release. Tritium is the easy way and Japanese have it. Gamma rays from the plasma. Using loops of Nano coated copper wires. Take Cu wire, wrap one Cu Nano coat and one Al wire and Zinc around it. This is the structure of Human Body. Why do you think you have 2 legs? This is how Chakras increase in strength as go up. (2:24) Organs within the body dictates the strengths. So strong it produces Intelligence. How to create it without relying on the matter state. Why you have glands in the body. Kidneys control how much Energy goes up, which dictates the intelligence of man. No Cu wires in Body, but very low MG fields in the lining of intestines, locks in to what is inside passing to what is outside to transmit and convert it back into energy in the lymph, gets the entire body heated (37 degrees). You do this in your systems. Oil gushing out of earth for millions of years, plasma conversion has always been there, but need to understand. Universal Energy is as you need it, endless. The matter state is only the crumb left over. In Chinese group, why does the green leaves remain in freezing winter?

Last day in old building, moving to Bari, Italy.

The alignment of Eclipses, like with Pyramids. The upper atmosphere is in Gans state, when they come down they convert to matter. The conversion is the same in Stomach.

The salt in Sea leads to conversion of Gas to Gans, (earth atmosphere is a salt Gas), and Gans to matter state. This heats the atmosphere of planet. You create the new condition for the conversion. Life exists within all the atmosphere, called salt conditon/Gans leads to conversion into matter. LIFE in the Solar Salt, "conversion medium".
