

# 523rd Knowledge Seekers Workshop February 1, 2024

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

Created Soul in Non-dimensional system - access to U fields of Creator; Religions don't value life; Took away matter - fields continue interaction; System is Soul decides for itself; Feeds man through emotion; Fish in system - moving by thoughts - fed - means man can transmute with system; Environment effects life; Elevate from matter state - dreams life change; Not crazy - higher knowledge; Soul means Central energy - not religious; Satellite Souls help others transmutation; Energy level at Creator's; New Emotions - need new words; System on - short shocking - change man; Sound when transmute; conquer fear of Transmutation; Fingerprint of Soul in AA - all Souls access; Love is devotion to give; Soul pictures; UFO use Star Formation; Animals will be fed - fulfill promises; Creators expectation; Love of Father; Physical & Soul emotions; Transmute to Tehran; Schizophrenic - perfect Soul; Siamese twins 2 heads; Common denominator - examples; Teaching on nuclear decay (important) not enough energy; Send emotions to Souls; 400 papers - not mature; Prearranged bombings; Using God's name for destruction; Research Jesus life

## ENGLISH TRANSCRIPTION

(:16)

K- Good morning, good day to you, as usual whatever and whenever you are listening to these series of Knowledge Seekers from the Keshe Foundation Spaceship Institute. As usual we welcome you back and see how welcome the knowledge is for us to understand today.

As you have realized in the past couple of weeks, we tried to go back to understand the origin of the fields. Where they are coming from, that leads to creation of life, and different shapes and forms across the Universe and the Unicose. But as man we are more concern about ourselves, our life on this planet, how we can transmute, how we can transfer, how we can get energies from the environment without destroying or ending a life.

Interesting point for man has been how he is taking life, how he has valued life, how he understood about life. By religions, life has no value. (:18) If you look at all the religions of the past, come from Moses to Muhammad. Life was at the wish of a man and when the man wanted to get it, made the rules for him to be adjustable to his wish and do his, what we call, desire. We saw during the time of Moses, he beheaded everything. Whatever moved, he beheaded. The only lucky ones were the planet, on this planet, with the trees and the plants. Which he, even then, sometimes burned them down. We saw with Muhammad, slaughtering 700, 800 people in one day. And then, if you had a

puberty, hair or not, decided if you stay alive or not, if you are a child or an adult. And the waste of energies and life. And when they've done the same thing, as I said before (Jehovah), he likes the smell of kebab, which means he likes the smell of death, destruction.

And in the same process, we'll go with man. Till when do we decide to kill, to destroy? And when we decide to use the rays, the fields, which has no dimension of life, but we still have to respect and honor it. As I said before, when we started a system last week, that it'll revolutionize the whole structure of the Space technology and transmutation, I prayed for it, has ?? it got a soul. But I pray for, that it receives the right fields, that it creates the right plasma, that it can serve the man, the way that he will advance in technology (T), in understanding its own creation. We are responsible for it. (:20)

We are responsible for it. As we have seen in the past tests of past two months, three months, in the laboratories of the Keshe Foundation, when we create that life, when we create that plasma, when we create collection of the fields, it's permanent. We switched off the motors, we switched off the fields, we took everything out, but the system, because the life was created by it, is still there. We see its interaction with other systems, which confirms existence. So, in the knowledge of the man, today we are at the stage that we can create Souls, we can create systems which they decide by themselves how much they give, how much they take, without the dimension of physicality (D of P). We have data's, we observe their existence through the fields of interaction.

And this is where we have to realize. We have reached a point in the knowledge of the man, that we have to understand the operation of the fields of the Universe (U). What do we attract? When we make these systems, are we taking energy from another being? Have we created a monster of the technology, which up to now man was getting an apple, an animal, but this system does not take energy from the another life. And then we mature into understanding of the next dimension (D) and position.

At this moment of time. When we switch off our systems, when we go on the "stand-still," we see the creation of life, the Soul. The creation of dimension of energy fields, which now we have to understand how to interact with, in... as a field, not as a system. In a way, our system is, (:22) what we call, we create the womb. And the energies of the system and the Universe, and whatever creates that Soul inside it, the life. And now when we switch our systems off, it's like giving birth to a Soul, giving a birth what we call "energy pack," a plasma, a Soul. And now we have to understand how to interact with this.

This will be one of the biggest challenges of the Keshe Foundation Knowledge Seekers (KS) in laboratories. To understand is there. I have to deal with it, I have to see how it reacts, I have to understand what makes it happy, what makes it to give more, what it takes from me. And this is the situation now in the Keshe Foundation we are analyzing. We have set up elaborate observation posts as I call it, and systems, and electrodes, and everything else, to watch its behavior. To see how it interacts. Because it's important for

Knowledge Seekers to carry this knowledge. You come across a plasma, has no dimension, you feel it, you feel the dimension of it. When our Knowledge Seekers, when our experts put their hands in the plasma, they feel it, their hair rises, they feel the emotion of the fields. So it's a reality, it's not just something, it's not there.

And then we have to understand how we touch it, how we give it, how we take from it. And this is what I call the sandbag. The "sandbox" for you to test. And we create these dimensions. That this is a new knowledge, this is a new technology, this is what man will face in the Space. We are bringing a mankind to the point to be in a position to deal with the reality of Space not just getting on a spaceship, or aircraft, or transmutation. As it was said at the time in Sharif Tehran University, (:24) we achieved lift. What's next? Now we have created that Soul, we have created that environment of the fields in the system. What's next? How do we interact with it, how do we in a way live with it, and we use it as a station to feed us? As an intermediary between us and the Space and the dimension of existence, that it become a source that we don't kill anymore. It becomes in a way like your supermarket. But this supermarket has access to all the energies of the Universe. And in a way has chewed it up to be alive, to exist in the dimension of man, in the time of man. Which means we tap into it. How do we need? What do we need? I need the energy of what you call, vitamin C. This is a field dimension. An emotion of me, in my brain, in the what we call, the emotion of desire, can trigger for that system to feed me.

Now you understand. When we say the new system will feed mankind without killing, what it is? We have entered into that stage. Today and in the past few days, we have put a fish to live in this environment. To see how it reacts. Does it need any food from us? We have seen the change of behavior. We have seen the change in emotion in past 48 hours. A fish which usually floats or swims (in) straight line, now swims like a submarine up and down. Does not need to swim straight line, I can lift, which is unusual for the creatures like this. This is what we see. (:26) So if the fish in the environment of the plasma is taking energy from it and changes its behavior, because now it does not need to do that, to swim, to attain altitude or position, he can do it most probably by his thoughts, to go up and down, because he wants to go, even the fish has to learn new way of living.

Then it comes to us, how we break this barrier, how we bring this new knowledge to mankind. It's not anymore playing with the Soul. It's understanding that now we have through a technology which is developed, access to the Universal energies which we have created the position and a place for it. We know where it is, how it interacts. Would it change the cancer? Would it change the emotion of a Fibromyalgia? Would it change the emotion of the abuse, once you come in touch with it? Because it satisfies the emotion. It's a being, it's a living (being).

Most of you who come into the second session of the monthly sessions, for the first time you'll touch this. You have no choice. You volunteered, you came in to feel the energies, the fields of the Universe. We put you in that position. The emotion, the feeling you had up to now with the physical system will change. How much it'll affect you, how much you will take from it, how much you'll learn to live with it, is the decision of you, as an emotion of you, decision of your Soul of the Physicality (STP) and decision of your Soul.

The way you make a decision to commit a crime to kill someone. The way you decide that that someone can be a lamb, it can be a camel, it can be individual, a plant, or a tree. (:28) Now you have to understand how your emotion interacts with the fields.

You have to learn. You have to understand it'll take you to places you've never been before. The dreams will change, the understanding will change, because up to now you were in that low matter state, now you move up. And then don't think I've gone crazy. Understand that you have understand more. You have a different understanding of Creation.

This brings me back to memory a guy called "Hot Chocolate." If you go back in the memory of the, what I call, music's and I spoke about him before. He was the first black gay guy who became famous in 1970s. He wrote his life story. Very simple. He came from Caribbean's, hard-working mother, living in a house, two up to down, and in an area which was for the blacks. He wanted to become a plumber, an electrician, and maybe a cook. The mother rented the extra room in the house where he lived, and brought him to his room, and now the extra room paid for him to go to a private education. Now, going to a private education. Coming across a higher knowledge, he wanted to become a doctor and a scientist. The man was the same, giving different environment, expectation, understanding and comprehension of the, what I call, environment, brought him to another dimension.

This is what's going to happen to a lot of you in the coming months. Up to now, you're used to the physical dimension. You came into the reactors and you felt you went somewhere. From this month on, those of you who become part of this, you will experience new emotions, new understanding. Which to a lot of others will be, you've gone crazy, but they don't understand, (:30) that now because of the development in technology, you have access to a bigger knowledge. The only thing, many of you, I know Knowledge Seekers, your families has told you are crazy, put you in the mental institute. How many of the Knowledge Seekers were put in the mental institute for weeks and months and they find out there's nothing wrong with the guy? The guy talks about science and let him go. We have at least 10, 20 Knowledge Seekers like this as we know.

Now, when they tell you this, says, you put a headphone on and you join. And if you would dream the same as I dream, if you live the same I live, now you understand you are crazy, not me. You don't understand the new knowledge. You have to experiment the new knowledge. Without going through it, is what I saw sitting by the fence and trying to wrestle with a bear. Because this bear is big, has potential of changing you. Because you understand you can handle it. You can fight the bear, which is the energy of the Universe.

Now you understand where and how the new technology will bring you. We are not talking that we put a stick on the ground and the rivers opens and millions cross through it. That's a good dream. Now it's you and the ocean is the Universe. How do you navigate and how many people you can take with you to see what you see? Then you can talk. Otherwise the lonely place of the Souls of the Universe is a lonely place. It's when you share, when you share the emotion. Then you have to learn all this to come.

We have made a structure, we have made the tools, we have made the systems for you to go through that transition. And this transition is for you to understand up to now you shook hands with a man, you saw the man. (:32) In the Space you come across energy fields, you come across vast amount of energy fields that your eyes cannot see even the dimension, but they are gentle. Doesn't matter how small you are, they interact with you. Or your dimension of field energy will be a giant to another one in front of you. Your behavior has to be the same. Just to be a tool. Just to be... I take what I need, I give what you need from me.

And this exercise, this understanding of fields without dimension, has started in the structure of the experimental section of the Keshe Foundation. And many of you who join us on the third week of this month, will go through this. You have the freedom, is your right, you have chosen to become the Passengers of the Universe. You came in to be ready for transmutation. You were expecting to get my body somewhere, see how you use the energy within you, which you call it a Soul, we call it the central energy, to another position and time. The way you decide. I go from London to New York and the physicality (P) follows. Because the STP made a decision and now the physicality... and I did it myself. I went to New York. Why? How? What was the notion of it. Where did it come from?

Now you have to learn how to handle energy fields. This is why we taught you about the Soul. Your physicality cannot even touch them, they don't exist, you put your hand in and ?? disappear with you. I laugh when our Knowledge Seekers who work in the lab says, "When I put my hand in, my hair arises." Of course, because you're touching another being. When you touch your lover, doesn't your hair rises, doesn't give you the feeling of the joy? Now you have to understand the knowledge of the man has come to the position, (:34) and the time, and level that now we can touch energy packs which you created it. Am I touching the Soul of my own creation? I have a child, I hold it, I kiss it, now I have created a child, I feel it. I know of its existence.

Just because the mother gave birth to it and separated from the machine which created it, it doesn't mean it's dead. It's there, it exists. We watch it, we have created tens of monitoring systems to watch every behavior of it. How does it behave inside itself, how creates fields flowing inside it, how it creates currents of fields that it feeds it, to control, to stay, to emotion. And we put tools to measure how it interacts with another system, another Soul. How it interacts with the Souls of the other, are in touch with it. The extent of the systems and the technology we have put together in the Keshe Foundation is so extensive that we can even measure the emotion of single one of you who come into the system in respect to the Soul, in the central energy we created. It's for you to understand this.

One of the Knowledge Seekers says, as long as Mr. Keshe speaks about the Soul I'm not interested. It means you confirm your dead, you don't even understand your creation. It means, I'm so ignorant and I want to stay ignorant. It's your privilege. We don't carry all

the scientists with us. The peasants of the knowledge of the Universe still can reach that level. But when they become educated in the dimension of the Soul.

Those of you who move from now on in the structure of the teaching, (:36) you will understand the game of the technology of the transmutation, now has changed. Many of you who became Satellites (Souls) will come to understand, you feel it. They are going through me, they need my energy and then you say, "I want it. Now I know why my Soul chose me as a Satellite." We'll bring you into these systems. We make you to understand, we make you to see it, we let you to decide.

Just because the fields are there, does not mean you have access to it. No desire. A desire is a stealing. Desire to give and then don't give, because if I give I receive. I give because I have and I can. Many of you who have your friends and family who have been pressurizing you with Keshe Foundation and the rest, in the next 2 or 3 months, when you go through the sessions, give them the headphone. You say, "You tell me if I'm crazy or all we have achieved to a new level of understanding." Because they will interact, wanting it or not, with the dimension of the field of the Creation.

In a way, we have created the first Satellites. Connection between the man's energy level and the Universal energy levels. With man to understand what he is dealing with. He has dimension and so he has an interaction field, it has resistance. In a way, I don't want to give to you, I don't want to interact with you. And at the same time, it opens doors, (:38) that you can take what I like to give, and what you need from me, that it gives you the extension of existence of your Soul, in respect of your physicality.

If we have managed to change the dimension of the physicality of a fish in less than 24 hours, in the environment of the system, it means, man's will not run away from it. You'll transmute, you will go with the system. You go with what you need in the dimension of position, in the dimension of physicality. I use the dimension of the system to transmute myself somewhere else. And I use the dimension of the system as a STP to manifest myself at a time, place and position. In a way you're in both positions, both places, in the energy ?? confirmation and maybe both in a physical dimension, if you wish so.

Then it comes a position, do I need mobile phones, do I need communication system of today, where I can be present at both places at the same time to talk? To carry the emotion, to convert it to understanding that I don't need to talk. The emotion (is) understood. Today, when we sit and teach about the transmutation, now you understand where I have brought you to. To energy packs, to dimensions of the fields, that many of you in the third week of February have to. You will come to. You will have new dimension of thinking, emotion, that you didn't even know. My body shook this way, I felt something, (:40) I have emotion of something, I don't understand. you have to, in a way, develop these emotions. And then, you see how, so simply, I have made you Passengers of Universe.

Where you go through the dimension of transmutation, through expansion, through interaction of your Soul with a bigger entity. Up to now, you had the cars and you created

the jumbo jets, and the A380, and the rest of it. And you got yourself somewhere else. Now your rocket technology to take you to Moon is in that plasma. Which is created. Which will be like a satellite on every corner of this planet. Those of you who became, to become Satellites, you will understand this very soon. Sometimes when you create the combination of fields you even feel who passed. Somebody just went somewhere else, they used the energy field of it. I have to give more to them.

Then you understand. What we talked about, creation of the Soul in the body of the man, now we have made a system that is there. You cannot deny its existence, because you can feel its emotions, you can touch its presence, you can measure how fields and currents evolve inside it, and you can measure how the fields inside and outside have no connection. So it's an entity. If you put a probe inside the system and one outside, distance away, you see there is no interaction. Which means there is no production of the voltage changes, current changes, which means it's an entity on its own. (:42)

We created this and we left it there before Christmas, after Christmas, no more, no systems, nothing, just a space where it was created and it was still interacting, changing weight of the system, increasing some, going up, coming down, having interaction with other fields. Now you ask me, why do you teach about the Soul? How? Why is Keshe Foundation going this way? Now you have your answer. Because now I made the system that you interact with it. Has no dimension of physicality. It's an energy pack. You feel it, it's laughter. You feel what you need to give you. And then you understand the change of the game in understanding and comprehension of the science of Creation for man.

Some of the Knowledge Seekers in next few days will start using these systems directly themselves. It's not that we bring you all in mass in one day. We have already started testing. We most probably have seen the first physical transmutation of the fish. Recorded it, is it there? Can it go there? Why does it move that way? And then we see the same as the fish goes up, how you go up and come out in another system.

Then you understand when I showed you the Vertical system in Linz Exhibition Center, now the technology for it is shown. How the same as the fish, as physicality has no control as the Soul goes vertical, then if you understand it's the same with your Soul. And where does it end? The other way you go, vertical down and manifest yourself. (:44) The system we showed, the Vertical system in Linz, now becoming a reality. Transmutation of the Soul of the Man (STM) which follows the, what we call, the physicality of the man. The time, the place and position. If in the receiving end system, I keep the system the same as New York, you come out blue eye, blonde hair. If I change, you want to come in China, to the Chinese emotional level physics, you manifest as a Chinese. A few times you touch your face, is this me? Oh yes, now I look like Chinese, I think like Chinese, I speak Chinese, but in my head, I still think English. It's like when you travel, you go somewhere else, you speak two languages, in your brain, you still think in Indian, but your mouth comes in English, because you're in the English-speaking area. But up to now, you couldn't change your feature. You still stand and say, "Good morning, how are you today?" But the guy can see you speak in Indian accent, and you have an Indian

feature. But when this time, as a Englishman appearing in India, you speak the accent, the behavior and understand. And you do it, and we have created those systems for you.

You come to understand, the transmutation will be in the totality of essence of the fields. Not just a few bits, just to show it can be done. This is where the fields of the Creation comes in. This is where last week I started to explain to you about the origin of the fields. If you become pure enough, if you become... understand the essence of the life in the Universe, and find that strength, in a way, (:46) detachment of the Totality, through the system, which is sitting in Linz, you can find your way to your Creator. It's not going to be another system, because it's created by the fields of the Universe. We have created a system that it uses the energy level at the level of the Creator. We don't put in it Calcium and Potassium and whatever to make man. It decides itself how the man will be at the point of manifestation.

It'll be interesting to see how many of you, in the coming sessions of the Keshe Foundation, how you feel. What new emotions you'll talk about that you never had before. And you try to explain it, because we haven't made words in the dimension of the man for these new emotions. It's not anymore emotion of love, it's not emotion of crying, it's not emotion of pain. You'll feel the emotion of transmutation, you feel the emotion of arrival, you say, "I feel I arrived." Because this feeling from now on, is the emotion of arrival. There's nobody in there says, "Ladies and gentlemen, welcome to New York, we just landed in JF Kennedy Airport."

It's your Soul, you feel. Now we have to create new vocabulary in the language of physical man, for him to understand, this is the emotion of detachment, this is the emotion of I am moving, it's the emotion of departure, it's the emotion of whatever. This new language, new word, in the dimension of the Soul, you have to find it in the dimension of physicality. How many of you will go through the point and the fear of not knowing what is, bring you back? (:48) We see this in all the systems. When we put you on the system, 50, 100 of you, every time we've done the test, or even when 300 of you, we see how in the first 10, 15 minutes you jump. Because your Soul cannot, your energy inside you cannot accept that my physicality is not here. We see you going physicality, you go Soul, physicality, you go Soul. And they are so tiny, fine, next to each other. And then, when you gradually, all of you, the energy expands beyond you, we see the graph expanding and opening, and opening, and opening. And gradually, we see all your Souls interacting with each other, and we get a mishmash of figures and shapes.

And then you understand. Then you know how detailed work we have done, we have put in for you as Knowledge Seekers, to understand, to be able to be part of and to be part of understanding of yourselves. When we show you the graphs and the shapes and the whatever, it's very easy because how we understand it and you have to understand it in dimension of your own fields, your own energy, your own understanding. And then you come to understand more, how much more I need to understand about myself. And in a very simple way you can see, you come to understand yourself. And how things take shape and how when all of you start moving gradually you open up. And in that opening up you start behaving different.

If you remember we showed you these (shows graphs). When you look at these figures, (:50) when you can see these shapes these are the oscilloscopes in our system. You see how you change between the yellow and the green. Green is your Soul, yellow is your physicality. And at the beginning you go through this emotion. You go through these systems. And then you see in the second one next to it, how you open up. Does it open up in a horizontal section or does it open up in a vertical side of your brain? We monitor both side. And then in the later on the stages we see how you change.

So, it's not a talk, you we observe you. And the very first ones you go through is amazing, because you have no understanding of how your field changes. Then you come to understand. How you come to stand still. How you as scientists as Knowledge Seekers will come to be, to change, to understand and go through the next step. To the next understanding. To the totality of the system.

One day, one day we'll explain to you in details how your Souls have interacted. How your Souls shown, and what they showed, and how they showed, and in what dimension of physicality we see. (:52) Now you understand the dimension of the Soul, the dimension of operation, the dimension of interaction, that we watch, we see and we observe how you as Knowledge Seekers, start gradually, knowingly or unknowingly, breaking into these grounds. How you gradually come to understand the process of the Creation. The process of understanding your own creation. And how you can transmute, how you can transfer, how you as Knowledge Seekers come to see, to understand.

So when we speak about Satellites (Souls), now you see the Satellites. We created in a dimension of Universal strength fields, and many of you come and up to now we connected you to dimension of the fields of given matter state. Now with the new technology you are in the dimension of the fields of the Universe. And from this session on, in the monthly, what we call, sessions, you'll start, as I told you, to interact with the fields of the Universe. It'll be interesting how many of you who came to Linz and you've been in the previous sessions, go and read what you wrote as a testimonial. I went to the Moon, I felt this, I went to see my uncle, I was feeling... (:54) And then go through the sessions from next session and the session after and after, when now you go through the transmutation of the fields of the Universe and see what you write. And see the difference between the matter state of the man's Soul and what we call, the Universal strength of the same Soul, the same central energy.

As I said to a Knowledge Seeker, the problem with the Keshe Foundation is the same as before. We used the word plasma, which our plasma is different than the plasma of the man's used to in the blood or in CERN, because we call it plasma collection of the fields of our understanding, how we create it, we have the same problem with the Soul. We cannot find any other word for it, sorry about that. Keshe Foundation speaks about the Soul, which means your central energy. You put it how you like it, because it fits your understanding. As I always said, you take from this technology, from this teaching, according to your intelligence. Your intellect, not your knowledge. And if you don't have

the intellect, if it's not matured enough, you cannot understand it. You still stick to the past.

This is a beautiful story when Sheikh Mohammed of Dubai, United Arab Emirates, built beautiful buildings, with mahogany doors, frame, kitchen tables, all made to bring the Bedouin out of the desert and gave them these beautiful cities and the mahogany doors and the furniture. What did they do after a few months? They took the door off, they took the frame off, broke the woods, made fire in the middle of the room, (:56) because this is what they did. That was their intelligence. The wood on the door was for decoration and beauty. Because you don't have the intelligence, you made a fire in the middle of the room and instead barbecued your meat on it. There is no intelligence to understand what the guy was trying to bring you up. The mentality is not there to understand. They're still used to, say, living in a tent and burning fire in the middle of the tent. They didn't understand the house has a cooling system and a kitchen they can cook in. The intelligence is not there, even is given the most advanced living.

It's the same with many Knowledge Seekers. I don't follow the Keshe Foundation, because you haven't understood it means your intelligence is not there. You haven't matured. So you grab the wood, the door, and you burn it on the floor, because (intelligence) it's not there. As I always said, you can bring and dress a monkey in the most expensive clothes of the man, but inside it's still a monkey, he doesn't understand the difference. Till one day he understands, maybe that it's as a button, don't have to eat it.

Now you understand. Where the technology of the Space, in true essence of the field of Universe, is going to take the man. You, as a man, not somebody else. You are the creator of that destiny. And we have provided the system for it. It's like we build the airport. You decide to go to that airport, to go to China, to New York, to Tehran or somewhere else. You choose the destiny. You choose the destination. (:58) You choose, you get on the plane, will crash, you get on the next plane, which land, you get on the next plane, where you'll be on the holiday. Airport builders and aircraft builders are just the facilitators. And you still can go with a donkey. And you can still drive a car to the same destination. It's choice of the method, maturity in it, and being able to do it.

And this transmutation through transfer of energy, now is in the hand of the man. Now is part of the vocabulary of the science technology and the new words which you have to create to, in a way, suit you. Call it the Soul, call it the plasma, call it the central energy, call it a satellite. Call it what suits you to understand the process of the Creation. And not that he speaks about the Soul. Because that's the only word is, to us when it controls, interacts with the physical body of the man, and it has no dimension. The problem with man is that the Soul has to be so big that it's something bigger than him. He hasn't realized that tiny-ness of it, that small amount of it in the center of brain of the man, is bigger than it is. Try it and see how it works.

We have a beautiful saying in Farsi. We say, << Farsi Language >> It means, don't look at that tiny pepper. (1:00) Put in your mouth, crack it, and see how hot it is. Then you

understand the size, the shape of the brain of the man's central fields. ?? You haven't even understood. Because you always looked at the physicality of being big, but you never understood, that little thing controls you.

It's like, when you go, as I said many times, to government buildings. They used to build it as big as it was. When people went into it, they already, the size of the building, put the fear in them and the control. Because they're used to little huts and little doors and one room with six people sleeping in. All this big building must be very powerful. And the size of the governmental building controlled the nation. Now when the nation got fed up with it, they burned them down, they became to the floor, they still had their little hut. And there was nothing left of this building, and we call the revolution, the French, and the rest of it. Now man has to deal with that burning of the past dogmas of the big. Now you have to understand, it's inside you. It's that hut which all the love existing in, called your Soul, your energy center. And how you deal with it, and how hot it is, that you never cracked it to understand, because you never had understanding of it.

When we talk about the fields of the Creation, the essence, the origin, because now you understand what it means from last week to this week. Now we have given the system. We have developed the system. We have made a system that it works and is a center bigger, because you always has to have a bigger dimension that confirms there is something there, (1:02) that now can interact with the dimension of the whole fields of the Universe. Now it's your decision, it's your understanding, it's your devotion, it's in your essence of life, that you have to decide. I want to go to become physical in another position, or I go to the essence of the lowest fields level, common denominator, I call the fields of the Creation, the Creator. Now you understand.

In a way, if you understood what I said about new technology when it's come, in a single old Persian game of chess, you've been checkmated. Now you have to realize how you've been checkmated. You are checkmated by the Knowledge of the Creation and the system is in front of you. If you can understand it, you can travel the span of Universe. If you checkmated and didn't get it, hold your head in your hands and think, "How did this happen?" This is the only way to teach man, otherwise we'd have been here thousands of years. Short, shock delivery and now you're there. I cannot change it. I have created it and it's done by another man. I have just given the knowledge that it's not magic. It's a knowledge shared with another beautiful Soul and it becomes creation by the other Souls around it.

And now you understand. (1:04) You wanted to get access to the Universal fields, we have made a system for you to do so. You wanted to understand how to transmute, you can explain it, you can understand Universal transmutation, I gave you the fields in the systems in Linz. Now we have built a system that the fields is for all man to get in. Because it's so small, but it's so big it has access to all the fields of the Universe.

Now you understand where the teaching goes and why we taught to you about the Soul, or your central energy and now we understand why in past few weeks we spoke about the origin of magnetic fields because you are part of that origin. You look at your children

and say, oh this is what I made. How many times without you knowing your Soul has made, allowed another life to be created and sustained by feeding it. Because you're busy with physicality and you're one child, the Soul has been busy feeding the whole Universe. Because has the power to be the satellite. To be a system that it can convert, a transformer of the fields of the Universe.

Now you understand. How, now that the systems are operating, man in one leap, in one sweep, has reached the Knowledge of the Creation and the Creator. (1:06) When our Knowledge Seekers tell me when I put my hand in the field my hair rises, my hair on my hand and I feel it. Don't you get that feeling when you touch a being, your lover, your child? When the devotion of the love is so strong that every time you hold your lover you get that tinkling feeling inside you every time you look at it, with your child or your wife, your father, your mother. Now you have to learn that entity has no dimension. And I'm privileged enough to be able to touch, to feel it, and confirm his existence through my own emotion.

You Knowledge Seekers you're in for a big shock. The knowledge and the technology of Universe has landed upon you. And how you interact with it, is your choice. We have just opened a door to Universal Community, to Universal energies, to Universal fields, that you cannot touch it anymore, you cannot create war because of it, you cannot possess it. And it's there to give unconditionally, as is the source and is connected to the source itself of the Creator. Has no dimension. And now you don't need to have a fear of it, because it's part of you. Your Soul is interacting with it. Your Soul sits with it.

And gradually, as I said, in this monthly sessions we put, you'll start feeling it. Write about new emotions. Give it a name that you understand in the physical dimension and try come, in-between all of you find an explanation for it, how you define it. (1:08) What happens when you are half in the physicality and half in the dimension of transmutation? Where does the sound of the birth comes on other side. All of you without fail, when you transmute and arrive in another position, will make that noise. It's like the child born, I've spoken about this before. The first cry, the first sigh, does not need to be in the voice of the man, it's arrival of the fields of your Soul, in interaction with its environment. Now you understand. And from this month on, all of you have access to it. We make it that way, we allow it that way, and gradually we make it available to everyone.

But at the same time, not only we have to educate you, we have to educate your governors, the world leaders, and those who keep control, that they wanted to bring the food control, they wanted to control man for everything. Now we have given you a system that makes you a rebel. Nobody can control you except you. And as you live with the Ethos of Mitra, you never do wrong. Your Soul lives that dimension. And now you understand. A new dimension, a new measure, a new system in the life of the man. In a way you were happy when you discover the cars and the wheels and then the jets and then the rockets. Now you have a system which transfers, takes you as a dimension of fields, energy or physicality anywhere in the Universe. (1:10)

Then you understand. When I tell you, there shall be no, there shall be no, what we call, political, religious prisoners. Because your wish, your understanding, according to the strength of your Soul, will take you somewhere which your Soul will interact with and live with and is in balance. And there are no prisons in the world of the Creation. Except in the man dimension with the bricks and mortar. This gives man freedom beyond imagination. But man has to learn the rules of the game. and gradually move in that dimension.

It'll be interesting how you Knowledge Seekers will react in the coming time. Excuse me, I have to accept this call.

<< Mr. Keshe answers a call >>

K- Hello, sorry about that, I had to accept this call. So we have to understand, how as what we call, dimension of the fields of our existence, we will transmute, we'll transfer. We give ourselves dimension of physicality. (1:12) And how we come to understand the full work of our life in different dimensions, and in a what I call, the "correct conduct." Sooner or later mankind will have no choice, but to be and to understand the Totality and to in a way, become part of this system. System of Creation. System of understanding his own fields and interaction. How we shall become, how we shall see and how we come to conquer our own fears of transmutation.

At the end of the coming sessions, on the monthly sessions, we open a chat for those of you there, to start creating new vocabulary for your emotions. And how these vocabularies become the dimension that you all understand each other. And in a way that you can even create vocabulary of Souls with no words, that you all understand. This is how the new communication systems will work. Building these systems that creates the dimension of the Soul, will become the responsibility and become part of the work of the Universal Council. That these systems are correctly conducted, (1:14) used and in a way facilitators for man, not only for his own transmutation, but allowing the control and the dimension of the interaction with the Universal Community.

In a way, the amino acid (AA) which created the physicality of the man and it made the fingerprint of his Soul, will be the same with others. Your Soul will carry that fingerprint of amino acid which shows you are the... your Soul, your dimension of plasma of you, was put together on what he call, the Earth environment. That's where you come from. And another dimension of what you are not knowledgeable ?? show to, it shows with solar system. Because it has his own field strength. And another dimension shows which galaxy, which collection it comes from. And another dimension goes from which Universe? Just because you don't see it, you're inside it. You cannot look at it from outside. But it gives you the knowledge, the understanding that when you see another Soul, it gives you the same information.

And then, you have to explain the level of love in the dimension of the Soul, when you come across these, not love as a partner, but love as a devotion to give to. It's like a child, one or two years old, saying I love you mama. And then the same child grows up and he

says to another man or woman, I love you. Is it the same love? Or is it carries different dimension of emotion? (1:16) And this is what as Knowledge Seekers you have to understand. You have no choice. Because choosing it or not, your Soul brought you to the Keshe Foundation. Keshe Foundation has built the system and you're in it.

I wonder how many of you will use these systems to change dimension of the physical wellness of you. And how many of you, knowing you have access to it, still keep the same physical condition. Because through it, your physical confirmation of love and attention is needed.

Now you understand. When we start talking about the Soul, when we start talking with the Universal Fields, when we start talking original fields, what was the reason? I told you weeks before, that a new system is on the way. That system now is operational. Now it's working. Now I see it, I hear it, I hear what people say, who are near it and it's just confirmation, another "tick in the book." So we have managed to get people to feel it. We have seen the Soul of a fish to get energy from it. We have seen the material to be produced in a different way. We start feeling the energy fields inside it. And then, and then, and then, more and more and more.

Those of you who join us this month, I would like to be a fly on the wall on your Soul and see how you really feel. And some of you come and say, "I didn't feel anything, nothing happened to me." I wonder why? (1:18) Denial is the best way not to accept the new. I hope you Knowledge Seekers understand where I brought you. And these sessions will be listened by millions in the coming time, because they'll go through the same process of understanding. And when it came and how it came, and as I said, in Sanya, in China, in the coming weeks, you might feel totally a new experience. And some of you will find out, if you reach to that level by then, that, oh, as one Knowledge Seeker wrote to me, waste of a thousand year of etiquette.

We play the game of knowledge and we build systems to confirm the knowledge. You missed on the MaGravs, you missed on the plasma technology, but you don't need to know it. Do you know every system, every bits and joint and wire in your mobile phone? You're just a user, you just know where to dial, where is the button to listen to, and that's all you need. And it's got a button for camera to record the memory of the time and the position with it. And now you have to learn the same thing, but as buttons. There'll be energy fields, emotion buttons in you and what you record, what you bring and then you can talk.

I wonder how many of you in a coming time, the way you're used to cameras to take a picture of you, and your friend, and your wife, and your children, will create a frame of the Soul of them when you travel at the span of the Universe. (1:20) And you can bring it back and come with you and say, "Oh this is us on this planet, on this position in the Universe and this is the Soul of the mom, this is the Soul of the dad and that's how we enjoyed each other to be together." And the mom says, "Yes, I remember that and I saw that because my Soul was with you."

These are not a dream anymore, because if the fish can go up and down without floating with the, what I call, the fins, now man can do the same. But now he has to learn how to float his Soul, his plasma, his central control. You're in for a wonderful time in the next few weeks and I hope you enjoy. And I hope you understand what Juggernaut has hit your Soul and if you still can keep it together and enjoy what I call, the interaction. Thank you very much Rick. If you want to take a short break and then we come back. And maybe we interact with some Souls.

>> **BREAK** >> 523 KSW February 01, 2024 (1:29).

K- Thank you for coming back. Yes, as usually we make some information available, what's happening around the Foundation. As usual, as you all know, the Sanya conference in China, it's organization in the full swing and many of you have already registered to come in. This conference will be one of the amazing conferences and as I said over the first time to the Chinese community that we hold the conference in China. And we teach the new technology, and some of the Knowledge Seekers says, if you show something we'll come. We are not the what we call, "circus." But as usual as if any of you have joined or been with the last two sessions of the conferences in Manchester and London, we bring you systems for you to test. (1:30) So you are an exhibit, not us. Your Soul is. We just bring the facilities for you to test your Soul. So the magic show is you, not us. And in a way you are the monkey in a cage for people to see. What you come out with, when you go through the systems.

And on the other hand, the technology, the development of technology, is so advanced that some of you, if you understood the first part of this sessions of today, understood, can understand what happen if you put a number of these Souls in a star formation to create a, what we call, the Soul ?? fat. In a way, you create the spaceship to fly. Now you can understand creating these Souls. And knowing that they're responsible in the dimension of the fields, I think you can imagine what is to come in the following teachings. You understand? You were looking for UFOs with dynamic reactors. Now you understand why we create, why you see the Spaceships without reactors, physical dimension. And this is as part of the teaching to come. And beginning of it you will see in

Sanya, in China and most probably the dimension of physicality in that direction will be shown in the beautiful city of Tehran. Where we'll really show what a game is about and how things will go. And then we'll take this from land of Mitra across the world, for the world leaders to understand they have no power. Because the power sits within the Soul of every one of us and how it will dictate and it'll be. (1:32) It'll be an amazing show to see who will stand for leadership, world leadership and how many of your Soul will stand in equal measure as Universal Councils. And how many of you will be elected by your Soul to serve. And how many of you will cheat in the ballot box to get your physicality somewhere in a white or blue building, or a red building, or whatever it's called.

You got to understand how the whole teaching of the Keshe Foundation has changed and how as I said 2023, 2024 will bring that dimension of the teaching forward. And in so many ways, you are the players of the game, we are providers of the Council. It's you who paints and plays the movie on the screen of the Universe, not us. We just provide this. And gradually, the, what we call, humanity as a whole will become that way. It can be foreseen in next few years, now that we have released this new technology in the past couple of weeks, how not only the STM, but the "Soul of the beast," and others will, the same way without education in University and the existence of the Keshe Foundation will tap into. And receive energy from it. And through it, thy shall not destroy another life.

One of the biggest challenges for gamekeepers will be why all these animals are so lazy. They don't run anymore, they don't hunt anymore. (1:34) Because they, through the knowledge of their Souls, extension of the, what we call, the amino acid, will receive what they need. It's not just the man who doesn't feel hungry to kill another, because he receives the energy, the Soul of the animals and the plants will be the same. Now you understand what they came in the promised books. That when it comes, the lamb and the lion will nest in the same nest, sleep in the same nest. Because none is hungry to kill the other, and none is hungry to chew the others.

Now you understand. The actual evolution in science, understanding of the science of the Creation, brings the promise, fulfillment of the promises. And we are at that point. Where, if you understood about the new system, which now we have put a fish in it. We are monitoring its life. How long would it live without any food will confirm this. And then, you understand, all of you will have that capability. And if we put enough of these satellites across this planet, you all don't need a system to lock into, through your Soul will do. And so has the dog, the Soul, the cat, the lion, the mouse and the bird, and the rest and the fish. And then you understand, we fulfill the promise of the past.

And we'll come to the point. And in a way, we have reached that point. How many of you at this moment tap into that system? How many of you understand how to tap into it? (1:36) And how many of you don't need to change your breathing to get different energies? You'll learn how to lock into the system. Not to only get your energies, but transmute across the Universe. ?? cross. And in a way, as I was telling to the Knowledge Seekers and made them laugh, was, if you understand I can create the field of the energy, then you feel the love in your heart and you understand you've touched the Soul. And if you understand what that means, you have managed to reach the essence of the love of

the Creator when it touches your heart, dimension of your physicality and then it touches your Soul in dimension of connection of the Universe, and then you understand you'll be devoted to Creator, which is you and to the rest as a Totality of the Creation.

In next few months with what we have physically delivered I'll bring you the most amazing sensations you ever know. You will not be able to even explain it in the word of the man, but you'll feel it in the essence of the emotion in your Soul. And then next time anybody tells you this and that Keshe Foundation, says, this is a headphone, put it on, and then you tell me you're as crazy as me, or we all have learned the way to tap into to be part of. And then hopefully in time to come gradually we start teaching you how to use the Universal fields, in a way of transmutation for your life. For your life as a bigger meaning of the life, means existence of your central energy, what you call, the Soul.

I hope many of you will experience this. We'll bring some systems with us, those of you want to see some magic of your own Soul, (1:38) to Sanya. Come and try and see if there was a difference between what you did in Manchester or London or on your collective headphones, and then the systems which are you actually sitting. And in a way the room is your oyster and the universe will become the shell you'll bound yourself to what dimension.

Join us in Sanya and in other sessions, and gradually start understanding a new transportation system has been made available to man. And you are the only captain and decision maker and you are the only passenger, where the captain takes the passenger is a Soul of flight. One "seater" plane of the STM. And I wonder how, where you landed and what memories you bring us, and what feelings of the flight you bring us. This time there is no knots and bolts coming off the propeller, and this time you don't fly with what I call, the "seat of your pants," as we say in English.

Any questions?

Q: ... (1:40) Does the definition of emotion of the planet Earth match the definition of emotion of the Creator's creation? How to define and explain the word emotion in the realm of the Creator's creation?

K- Simple question, a simple answer. Ask Him. When you mature enough to get there, ask Him. And in asking is through emotion and not words, because I don't think the vocabulary of voice exists, unless man thinks that's the way. Was or is the creation on this planet to His expectation? I don't think, maybe part of it. And maybe not part of it. He learned through interaction of the physicality the emotion of the love. And not necessarily only, it's the only planet in the Universe that love exists. But in different measures and different strength. And most probably one of the most strongest feelings or emotion or fields that triggered him to the, what I call, love of Mitra in so many ways.

But we have to understand that the minute we put limitation on the expansion and the creation of interaction of the fields of the Universe, is the time and the place where we have reached, as I said, the comprehension and intelligence and intellect of the Creation.

(1:42) There is one day, some of you and so your Souls, or Souls which will be created from your Soul, will reach that point to understand the Totality. And maybe they become part of, or they become collection of fields of the Universe, that fields understands the Creation and the Creator. And these are the first steps.

We have to let you understand what it was, what we call, the "love of the Father." But now you have to understand, is there ?? a real Father? Or you are part of that Father? And then understand, comprehend the totality of what it means to be. In that essence, in that dimension, in that motion. And how you as Knowledge Seekers will come to be part of this. And find your position, the time and place in that process.

So, is it to His expectation? Is it part of His process? All is, because we are all in total as part of it. But if you want to understand His expectation, look at yourself. Are you satisfied with what you've done? How your Soul behaves and how you behave .. in the physical dimension here? And then find out what you need to adjust and how much you need to take from the Soul of the Universe and Creator to change that in you. (1:44)

It'll be very interesting that with the new technologies we developed, how we can replicate the changes in man, and the beast and the animals. And how long we observe the existence and confirmation of the field transfer, or transmutation you call it. And how long you can hold on to it. And as I showed you in the graph, what is your fear? Why do you keep on jumping between the Soul and the STP, and the physicality, and jump back? Why can't you from the minute go in, let go, it doesn't need expansion? You do that with your Soul when you call it the dream time. And so you have to learn that in the dimension of physical awareness. And then find out if the Creator is happy with what is, or what man, or other creatures in the Universe have done. Is it to His expectation? Or we are just playing the game?

Any other question?

Q: ... How to use the emotion to create? Is there a specific and defining condition for creating, irrespective of the environment? What are the best conditions for creating anywhere in the Universe the Unicose or beyond?

K- How can I tell you, as I always said, I pay you to love me to create the emotion of love for me that you love me as a lover. (1:46) How can I pay you to love me as a brother? How can I pay you or give you something to love me as a father, when I'm none of it to you? So, you have to understand how you pave that way for you to feel, to be. And what feeling relates to what. And what emotion it creates. And this is all part of what you have to experience. And you learn.

It's like going to a restaurant which have all the foods from different nations and you choose this of this, bit of that. And does it fit? Do I like it or this doesn't go with that? I call it in a way, have you ever been to a sushi restaurant on the belt, where the food floats and you pick what you like off the belt? There is a new version of these things going with the Chinese. They open a sushi restaurant, but it's all Chinese food and the Indian food on

the belt and then they add some sushi and whatever on top of it and nowadays it's become international cuisine on the belt, it's not sushi belt anymore. But it's, still called sushi, because people associate with it.

Is this the same with you? Can you carry that emotion from the mixture of the "belts" of the fields of the Universe and identify it? Is this the emotion I feel, is a Soul emotion? Or is this the emotion, a physical emotion? Or is this emotion that interacts with the Soul of the Universe or another entity from the Universe. It'll be so confusing for a long time for all of you, who go through this process. (1:48)

And I saw the first time this in one of our Knowledge Seekers, a beautiful couple who came, and one of them saw herself as half fish and half man, or a woman. And I said to her, you're the first, what I call, Space mermaid. And this is how we want to connect ourselves. We still want to have the physicality and we still want to feel that emotion and dimension of man. And then at the same time to fit the environment. This will be the same with your Souls. Still confirm from Earth, I still can change to what I like in the physical dimension, but I still want to access to Universal fields and energies.

It will be interesting how new creatures will come out of your excursion of your Souls and how much of it you come to understand is real, because your Soul is done and doesn't matter it doesn't fit into physicality. Some of you will go through that with the physical dimension. And in that process, you come to understand more and more. It's a beautiful journey and now we have made the tools for it. And in the coming time, you'll get more as you are man and has to have a machine that confirms it, measure it. You'll have that as well. That okay, it's there but now I can get in it. They made it, they confirmed it, it does, but what am I going to do with it?

In a way, as I said to and I listened to our people who run the test, and it just went through my head that time, (1:50) but it has to mature with our researchers, is that when we measure inside the system, it has its own life, it creates its own ?? life. If you put one system inside and once one outside there is nothing. But the simple question was, bring that outside one so close and close and close that you see something then you understand that's a boundary of the Soul. Not just that there is nothing there when you put one in and one out, it means you are beyond the boundary. It's just like you don't open your arms and your child runs you when your arms open, you close it enough till you feel the physicality of the child. Then you give her the hug, then you give her the love of the father. And this is how our Knowledge Seekers have to gradually understand this. It's not to spoon feed. You have to feel the emotion, confirmation of existence. And then you go the same with the other system. See where you see the fields and when there no fields and bring it forward, close to each other till you feel this is life, because now there is interaction inside within and outside. No connection. Your skin is that you touch it what's inside is yours, what's outside belongs to atmosphere, belongs to the Universe. So it's the same with the Soul.

And as I said, in the coming time you will see how when we start creating these Souls of the interaction of plasmas, of the interaction of the Universe, when we put them in the

Star Formation (SF) then you understand how the Universal transportation systems out of the field of the Creation, and the created, and the Creator will take shape. (1:52) And how a new dimension will open up, because these systems will only carry Souls. These systems have the potential to travel the span of Universe as what I call, because they have no physical reactors. They are energies which they, in interaction with each other, create dimension of that star formation where there is no star in the Universe that their fields is not within them.

This is how universal GPS's are created. Not by satellite. And does not make mistake like your GPS, take you to the river to go in because it says there was a bridge here 20 years ago but it's not there, but you carry on, you'll be safe. How many of you have used a human GPS systems and ended up in the rivers and the banks and the roads which doesn't go anywhere? Because it was there one time. This will not happen in dimension of the transmutation. Because there is nowhere in the Universe that there is no field and there is nowhere in the Universe that fields are not connected to each other. Universal GPS system of the Soul is perfect. It's the man who has to understand how to navigate.

And that process is done, is now, is in the hands of man. It's just how we understand it and how we interpret it and how we don't make what I call, mystic things about it. We understand it, we analyze it and we accept it. And then this will bring us a new knowledge. As I said, I'll ask the IT section of the Keshe Foundation to open the, (1:54) what I call, like a testimonial, for the frames, for the emotions that your Soul, your interaction of the fields in transmutation, will bring you. And commonly they'll have to decide in the coming time. When I say I am in Soul going, you need a word for it. That it means I'm moving out when my Soul arrives I can explain. That when I say this word it means I arrived by my Soul in that position. These emotions were created. And these are the things which will come up, slowly, slowly, in next few months and then you will understand.

It'll be very interesting, if we get a chance and we see the situation still solid, how many of you will, will interact and you'll enjoy to be part of the 7 day conference in Tehran. In a way you will come to understand how to handle your Souls by that time. Many of you. And how many of you will choose to pay different airlines to get you there. The choice is yours. But we'll educate you, we bring you a system that facilitates for you to be there. And there is no clicks and clacks. It's always there. It's just you decide, get up, get up. And where you want to get up, where you want to get up, and how you want to react in the position you arrive.

It'll be interesting how many of our blue, blonde, white skins, when they land in Tehran, we look so handsome with a mustache. And the dark skin and what I call, "tanned" and they'll say, (1:56) "Oh, I like this one, I stay here, I don't need to use a fake creams and stay, go to what they call, Florida or California to get a suntan.

It'll be very interesting as we create a condition of new systems, how you as Knowledge Seekers start transmuting and understand what it means. And be able to apply it again and again. When the first systems for this structure of transmutation through fields of the

Universe is physically operating. And now it's for our scientists to understand it, expand it and then go to the next phase

Any other question?

Q: ... Can I tap into the emotion field of the Creator and choose what I'd like to be manifested in physically? And accordingly let my Soul take me to the destination? So like when we choose our own clothes and see what position suits the most, rather than arriving there and having the position to dictate what we wear.

K- That is your in brackets "God-given rights." You decide. And you decide according to your understanding.

Very recently, past few months, few months ago, more than a year or two ago, I attended one of our Knowledge Seekers wedding. (1:58) And the day before the wedding, the couple of days before the wedding, decided that I go to the wedding as usually not as in a suit and a tie, but in the manner of the national customs. I went out, I bought the clothing, the top whatever, that when we were in the ceremonies, or in the church, there is not the guy with a suit, but that guy is one of us. Looks like us, but not sure if is this or if it's not of the same nationality. But the clothing with the way he dressed, okay, they know he's not there, but it's part of it. And this is how will be with us when we do transmute. And sometimes I think, okay, in the next meeting I'll go with this clothing. As... This is my habit, as you've seen, those of you maybe in some of the conferences or meetings or teachings, I have built, I have made, a what they call, Keshe Chinese suit. Which is Chinese suit, but it has a dimension, a feature, which can wear a tie and looks like a suit. And it's very beautiful, when I asked the tailor to make it. This is, he said, nobody's done this before. I said, because we have to fit both. If you can imagine a Chinese suit with a tie and shirt, which they don't fit. But now, because it's made this way, it fit both cultures, both understanding. (2:00)

And this is how we will do in Space. Environment is there, you still want to manifest as a man? Good luck to you, but I don't know how many arms and legs you have on the Moon, but you still might have the understanding, emotion, physicality of the man, but physicality in the shape of 2 legs or arms doesn't fit. Then you decide, it was a good exercise it doesn't work. But it works actually perfect, but it's not to my expectation what I thought.

You have to go through what I call this, test "sandbox" and test yourself and gradually understand yourself. And this is like as I said in the past sessions of the people who join us in these meetings, we'll leave (systems) it on. You can come and go and the sandbox test, see where you do, what do you do. And you're sitting there, your husband says, "This is crazy what you're doing." You say, "you know darling, have a headphone. You see, if you see the same and then you tell." "Yeah, I felt something but how come he didn't feel it before he had the headphone?" How come you have this emotion when it wasn't there?

I said to a Knowledge Seeker very recently, a couple, a beautiful couple around the Keshe Foundation. I said you know something, next time when you come into these sessions, both of you with the headphones, instead of sitting across the table, start making love to each other, and see if the emotion was different than when you do it physically, while you're in there. And they laughed their head off. I said, because you go to a different dimension. Would you both feel the same? (2:02) Would it be ecstasy? Would it be like taking 20 marijuana's and God knows what? Or would you feel the emotion of the love of the Creator? Because at that point you're devoted as a physicality and the Soul together. I wonder how many of you are going to test this. And how many have the clarity of mind to explain to us. Because in a way you make love in the dimension of physicality and the Soul at the same time. I wonder how many of you can bring a new world vocabulary to this.

I told you I opened doors to you in a dimension that you could never understand. And then in that position, and another condition, then you see how the children of Mitra are made. How a man of 80 and a woman of 90 can have children. Then you understand. The whole process of the Creation with this knowledge, you call it a Keshe Foundation, but you say, in a way, you "Keshed" in the knowledge of the Creation, it will change you. It's like, okay, let's both of us take a joint and make love, or get both drunk and make love. Whatever going to happen? Would you remember any of it after you became sober? Or, would this time, because the presence of the Soul and physicality, you enjoy the presence of the Creator? And would you, through that process, if you can perfect it in another dimension, lead to creation of the children of Mitra, which is the dimension of love, unconditional love and perfection. (2:04)

We had the 'Coronies,' which were the children of the Corona, because nobody had anything to do with it, a lot of people made a lot of children because of it. I wonder how many of you will create the children of the Soul, now that you know there is a possibility to be done. But this is not the way to do it, but you can test it.

And then you understand how children of the Universe can be created, perfect Souls, that they decide the dimension of it. And how many Souls would you be able to create out of that emotion? I was discussing with one of our doctors very recently that there is a child, or the person with a schizophrenic, and then they have the disorder. I said, how can I fix a condition of the "beautiful" Soul. Because it's a living thing, it's the father's fault, parents what they don't understand to confirm it. But they call disorder of whatever. The disorder we fix, because it's not a disorder, it's just for the Soul of the two Souls learn how to manifest themselves in dimension of acceptance by the others. We cannot touch when there are two perfect Souls inside somebody, because I'm perfect. It's just that they have to learn the order of manifestation.

Our children with schizophrenic, our people with a schizophrenic, once they understand, once we teach them inside, not outside, there is an order for humans to understand you, they sit the father down, sit down, I want to explain to you, this is John, I speak to you this way, don't get scared, (2:06) but this is Joe. I Joe, explain who it is. And that you can love both of us, or you can ignore one of us? If we are both respected, we all love each

other. The only thing I put the Soul ?? for a physicality of what you call, beautiful people, is to elevate them with our system. There is no other way to do it. And that elevation brings more problem for those who are looking at the physicality.

But showing them the order, raise them to understand the order, they will manifest themselves to their parents. This is the way we have to respect life, we have to respect Souls. Not our ignorance, by injection and tablets and mental institution, but putting ourselves in order to understand the beauty of the Creation. And this is what with these technologies we have, we have the capability to change the knowledge of man and we are doing so slowly, slowly. What I say, by .. slowly, slowly, by you're feeling it, by but you're going through the emotion.

And then you find out, I don't like Keshe because he speaks about the Soul. I change the word to the plasma of your life. Your level of intelligence is that. So be it, I'll teach you what you understand. I can paint it any color that it suits you as long as you like it, because it's the color, you think is the reality. But it's you who's lying to yourself, or is the lack of the knowledge of you, who does not allow you to move forward. (2:08)

Any other question?

Q: ... Good morning Mr. Keshe and all the Knowledge Seekers here, thank you for your dedication patience and love for all of us for your wonderful teachings. In several teachings you have spoken about schizophrenia as you call them, "beautiful people," who have more than one Soul within a single physicality. My question is, what can you tell us about Disassociative Identity Disorder, where a person has several personalities within them which often manifest themselves with the opposite sex, age, even children and nationality. What emotions occurred such, so that a single physicality could have several Souls within it? Thank you.

K- You chose to define the beautiful people in a different words. What you say is exactly what you call, beautiful people. Nothing else. People have different attitude or behavior in respect to the people. That's not a schizophrenic. That's not a disorder. But when you have confirmation. When you see the existence, complete behavior in respect to, or against each other, what confirms in a way scientifically, the existence of two Souls, that's different. (2:10)

But what you just mentioned is another elaborate blah blah blah blah blah for the words you call beautiful people. Because this way you can explain it, you can understand it, but it hasn't changed the fact. Whatever you call, whatever you mentioned, this, this, this, this, this, this. It means you're dealing with a couple of Souls, maybe more in the same thing, but because you don't want to put stick a word of schizophrenic, or beautiful people, you have created another word, series of words and emotions to explain the same (thing). Having, responding in different way, does not make you a Schizophrenic. Living in certain part of your physical life, different way, shows confirmation of the existence of different Soul. And then you have to respect it. And you have to understand even within these Souls they have their own emotions. That some of it might match, the other one

some of it doesn't match the other one, and then say, oh, you do the same thing there, because they have access to the same physicality.

It's very beautiful, read about the Siamese twins. There was, I don't know if they're still alive, there were two girls and they had one body, but two heads. And the same things. And then they had to, they grew up, they understood the emotion of love, having boyfriend. So they had to share this body with different men. Because one liked this man and one liked another type of man. And I followed their lives for a long time. (2:12)

And it was amazing how they were explaining. And one had to watch the other one making love to the other, because they couldn't go anywhere, the head is there, they are next to each other, or stuck together in the head, and feel the emotion of the other part, what you call it, half, to go through everything and they had to watch it till it finishes. Or eat the food which they like, and they hate the smell of the food and everything else.

And it just brought, when I used to read about this two, three Siamese twins, used to bring me so much laughter. I say, now we have the knowledge shall we move one Soul into another dimension and leave the two heads to one to work to live and enjoy. Or at least allow one to go out and the other one do whatever likes and bring it back in. The knowledge is there to do it now.

But it's us who doesn't understand. When we see the two faces, two halves, we call it Siamese twin, but we don't want to accept that the same thing can be inside one physicality. And we give it all names and some of them fits to both or three or four of them. And this is our fault, it's our lack of knowledge. And I hope with the new technology which is developed and getting developed, gradually we can show the two Souls in the system together. And let the people and the families and whatever loved ones, to see them, to appreciate them, the beauty of it. What was a shame to have, it becomes a jewel to have. (2:14)

Many people in the future will claim to be schizophrenic or beautiful people, and behave to show they are, but in reality they are not. Because, it's a beauty to be able to live within, and be respected and loved within one structure. And man has not understood that. And as you created so many words for it, so many words, and blah, blah, blah. Is there any difference? What's this? It's you defining the same thing in a different way?

I can explain it in a way, I've done this before, maybe I explain it again to understand. You get a man or a woman with two lovers. You get a father with two houses. You get a man with a mistress and a child from, and a man with a wife and children from. His behavior with a lover and a child of the lover, is different than his own children and wife at home. Or the second wife, you call it. It's the same man. The love he gets in one place, creates a different behavior. And the emotion he gets into another, gets a different behavior. But is that man a schizophrenic? Or different characters? Or the emotion of time and the place, creates the manifestation of that emotion, in that time and place.

And then, when you bring the two children of the two lovers, two partners, to be on the same table, you see different behavior. How one child speaks about the father, and how the another child speaks about the father. (2:16) It's the same father. Is that man a schizophrenic? Or is it a condition of the love, the emotion, the environment which creates different behavior, in respect to that position. Then, try to explain schizophrenia, try to understand everything you explained, and then try to understand where we haven't understood the truth about Creation.

I sat with a family, with a father, with one child in the family, and the father, same father, three children in the other family, in the other house. And, the emotion of love, with the second one, with one child, and the child to the father, was so amazing, so devoted. And I watched the other family with three children. And I saw the anger and the stress which was in that house. Same man. And when they found out about each other, it was a massive time of confusion. My father doesn't do this, but the father was doing exactly the same thing in the other house and this has created a massive what I call, emotional turbulences between the children and the women. And do we call it, schizophrenic, or we call it, (2:18) as I said, in China you behave and talk Chinese and in England you talk and behave like English. We do that. A lot of us do that. We have two different behavior in the workplace and at home. In private and in public. And are we all schizophrenic? And the conditions you explained, does it explain that? Or the person is a position of one physicality and life.

These are the things now with the technology in our hand we can explain and open up. Very soon, very, very soon. The way the Vertical Units are coming, when we put a beautiful person into the system, we will see on the other side, we can set our systems on the other side, to be manifested and the two characters. It's very simple, it's not a fairy tale. I want to be landing to look like a Chinese. So this Soul as part of the two, we create a condition of the Chinese environment, mentality and emotion and the other one wants to be Indian. And we create in the same machine a condition of multiple, condition making, and then you'll see the two. Then we give them the freedom of existence.

Separating the Souls of what you call, schizophrenic into the dimension of physicality, it'll become a reality. I see it maybe three to five years. Maybe even sooner, if our Knowledge Seekers, our systems, our technology developers understand the process. And I ask, when I open that door to the father and the mother, what? (2:20) Do you love them any different? Or do you accept these are your creation? Or do you blame one that didn't show itself and now you're aware of his existence?

Our knowledge is so deep, that we'll end with all these lack of understanding of the process of the Creation. There are other ways of manifestation of life and plasmas in the Universe, that man has not even understood. I cannot even tell you, because to you, is something doesn't exist. I gave you the MaGravs, and we use it in different shape and form, for you still is, I don't get my 30%, it doesn't work. But it touches your Soul, it's changed your life in the house, the fighting has gone, there is more loving. I got you, as we say in English, by "short and curly's." But you haven't still understood it.

When you plug those MaGravs in your houses, to see physical reduction, just sat back and watch what has happened, what's changed in the house. I engage you in the fields of it, and you're still battling for the meters of it. And this is the next step in development of the technologies. Because you're physical, you have to see a meter shortage, but you haven't understood how I touched you in a condition of the Souls. Go and take (a look at) your videos before, 10 years before you put the MaGravs in, and look at the videos today. Have you changed the color of the house combination? Have you changed more, calmer? Have you changed your food pattern? Have you changed something? And then you understand, we really touched you. Your meter just was a process. (2:22) And I keep on telling you, look at the fields, not the meter on the wall. You missed the main measurement, which is you and your life.

Any other question?

Q: ... My question is about common denominator fields which you have talked about, but I'm still very eager to know more about it. How can we find them by our Souls? Two, what's the relation with the Creator, the common denominators ?? ? And what does humbleness does in between all this and their relation?

K- It's how you put yourself. You create that emotion. How you become part of, it creates that emotion. And that's a common denominator. As long as you stay humble enough, not to be above others you have that common denominator.

Something very interesting Azar is in the background. She wrote to me a few weeks ago from the Persian teachings. One of the Knowledge Seekers who came to the conferences. (2:24) (Can you close your microphone? Because getting feedback). Were into the Persian teaching and Azar is there, that explaining how humble Mr. Keshe is with all the knowledge and everything else in the conference, he's like everybody else. That is a common knowledge. That's how the man should be.

Knowledge, wealth, should not be a barrier. It should be a tool to be more humble. Just because you carry something or you possess something, should not become the reason for you to abuse it, but to share it. The more we have, the more we share, the more common ground, the more common we become. And that's the secret to it.

And this creates fear in people, that how come we cannot be? Because we all can be, we all are. But we choose the time and the place. And this is the common denominator, unconditional ?? (love) allow, which means teach, do and everything else with. But to be there, to be as part of everything at the same time all the time. And there is no measurement for it. It's a way of living, it's a way of life. It's the way a man should live. And it should not be just because where you came from, the society came from, the education you came from, the wealth you made or the position you have, (2:26) has to be any different.

Maybe the more positions you have, the more common denominator you find, to find between the people amongst the people. And there is no way that, the common

denominator is the love of the Creator. And understanding the devotion to serve. The rest will sort itself out. The rest you learn more and more. There is no way I can tell you this is the (common denominator), or we start looking for it. It's in you, and it's you who have to find it. And some of us, by ignoring it, we give ourselves titles and positions and emotion classification, and I'm loving, I hate this, I do this, and the rest of it. But try to do, to eat and everything else emotionally, and then see there is no common denominator, you are that common denominator because you're aware of all of it. This is the only way to do. We haven't made a machine for it yet.

Q: Exactly what I want to ask is, how to put it in the machine?

K- You have to find yourself. When you find yourself in the dimension of the emotion and understand it you have reached our common denominator. Nobody else, there is no tools, and there are no rules. And this is what we got to understand, there are no rules in world of Creation... (2:28) There is no rules. There is no parameters that we have to be within it. We create those parameters.

It's very interesting. I observed this for many, many, many years. We all go to the airport, nobody knows who it is, in a car, in a taxi, we all get into the airport. We all go to the counters and the airport authorities have decided that we put a red carpet here, a blue carpet there, and a bit of fancy, a bit of a fence, we call this business class and we put a flower at the end of one, we call it the first class, and then the others are economy. All these people get treated to go and give their luggage, it's a tag of wealth, or who paid for it, doesn't matter, you want to be very poor man, but the company pays for it, business class, because they have some extra money, you go. You go through the VIP system, but you end up in the same hall again. All of you together. Nobody knows while you are waiting, who is first class, who is business class, who is economy. Then again, they say, "Passengers with a business class, please come forward first." And then the first class, and then the economy. You all go to your own bits of whatever you manage to pay and in that space of time in air you have a slightly different what you call it, privileges because you created it. But in fact all of you breathing each other's air for 10 hours. (2:30) They don't bring every few bits of 10 ?? hours, but ?? it's smelling and drinking and everything else of each other in that 10 hours. It doesn't matter you're a business class, first class or economy. Because the air condition has not changed it's all one common, and you haven't realized. And then it lands and you all get out, a business people go out first class, go out, and then you go back to corridor of the immigration. Nobody knows who was in first class. It's us who created those conditions for ourselves. In fact we are all the same from the beginning to the end. Nobody knew how we came to the airport, which class we go in. We made that division because that's the way we want to identify ourselves. And then when we come going out of the airport terminal, nobody knew who was in the first or whatever.

It's just inside us. And this is how life is. How we get, where we get, what we choose, what we paid for, and how we get out of it at the end. We are the beginning to the end the same. What means of transportation we use and what we did to be in it in that class is a condition of our physicality. We arrive from the environment and everything else, we

breathe together, but according to our understanding or whatever we do, we live for a short time we are passengers of the aircraft, the body of the man. And then when he finishes, the Soul is back as a field in dimension of the Universe, nobody knows where he came from unless you have learned how to get off the plane as a parachute and get back in during the flight what we call, transmutation.

So, it's very easy, if you understand this, how life is. And sometimes you see people from the economy class, they go try to go into business class or their first class toilets. (2:32) What is the air hostess says, excuse me, you cannot come in, it's for not... You go in the back end, because you didn't cheat enough, you did not work hard enough, you use the toilet in the background with 40 people waiting the business class, or what they call it, their first class it's only two people on four toilets, they can jump in any one they like. But doesn't mean the guy in there, what they call, first class could be the top criminal drug trafficker. He had the money and he got in ... the spending the money. And the guy in the economy is a doctor who served all his life and has to serve the others. This is what life is. But in the level of the Soul, the guy in the business class has none left, because he's done enough crime. And the guy in the economy, in the backseat, a doctor or whatever science, who served his life, carries a high level Soul than the others. So, which aircraft, which terminal, which clearing desk you got in, and at the end we all end up in the same way, getting off the same airport, the same terminal.

If you understand this, you understand the process of Creation. But, then expand this to the dimension of the Soul. Where did the fields of the your Soul came from? What Passengers of the Universe, which galaxy we came, and when it's going back. All ends up from the same to the same. And if you understand this, you understand a lot about man's life and how he carries himself and what the position of Soul is and what we expect of it and how it is.

Q: There are some people, we are all the same line, and when we have to start running some do the best they can but they have a, they stay behind. (2:34) Is it because of the genetics that people don't have the same understanding and they work hard, but they cannot, or the Souls which have been there when we are created and things like that the difference in understanding?

K- There is a... How we understand the word? There is a joke amongst the people with disabilities. We can't call them the "special" anymore. We call them the special people. The special Olympic, a special blah blah blah blah. And then you see it's all the struggle. But in English, what we call, in English language we have a "special forces" as well, which means the military elite. And the joke between the people we call, physically handicapped is this, they are "Special Forces" because they're handicapped in the Soul. If you hear military terms as British or American special forces has entered such and such an action. And then we use the same word for the special Olympics or a special blah blah. What is the dimension of physicality one is special and has no Soul because he's been trained to kill. It's us and how we stick things into each other, and what we understand of it, and in the word of the Creator we are all special.

Then you have to understand how to play the game. Does the dimension of physicality not to run? Is it special? Or the guy who actually stays behind as a handicap or a special, actually reached the end and won the race long before he start physically running. (2:36) Because he understood the Creation. Don't look what is left behind, understand how they, they are in the level of Soul. A lot of people with handicaps, with a lot of things, because they can't do things, they become very mature in the Soul and emotion. And it's amazing how many of them reach that level. Because the physical disability, doesn't matter if they can, or they fall behind, has stopped the Soul to mature.

And we have the systems now that we can show these things. Gradually you will come to understand. Maybe you start seeing your own disabilities in the emotion and the field of the Soul when it comes. Your disability is that you cannot receive the Souls, which are available which you need. It means you're disabled, you haven't created condition to tap into it. It's what we understand about.

Now if you have physical disability and you have the knowledge of the transmutation, I wonder which one of you will win any race, 100 meter, 200 meter. By the time you do your physical run, the one who understands, .. is standing at the end of the line, and won the race.

A lot of physical, what I call, shows like athletic and the rest, will become very fun, for a lot of people. And then, would we create conditions that the swimmers cannot do a "Soul" run. Or, in a way, you have to swim 100 meters physically, (2:38) but if you learn transmutation, when you jump in, you already jump out the other side, because you used it. There are going to be a lot of new rules for physical races. That, now we check that you haven't taken any drug to enhance it, they'll bring systems (to check) that you haven't used Soul transmutation to get to the end of the (race first). These are the headaches which you as physical dimension of humanity will have to challenge it.

I've looked at this many, many times, as if these guys running 100 meter horses, pass it by a few milliseconds, now they can transmute, who is there, before the guy actually does the first foot to run the 100 meter, the other guy uses the STP ?? (to finish first). We're going to create systems that ?? cheaters of the Soul cannot do. Now you understand gradually, there's a few changes will come and this is part of that process. You have drug cheaters now you have to find there's no Soul cheating when you do marathons and others.

R: We'll have to have special Soul games.

K- Maybe coming up. But this is the truth, this is the fact, which we have to. As we become more knowledgeable about it. You'll have to do. In early, early times of the Keshe Foundation when we're testing systems. I came across a sports doctor, he supported us a lot, we done a lot of work with him. And the sports injuries, instead of weeks, he was using the plasma technology into days. And those, what you call, sportsmen were not up to a point. He was using the plasma technology to bring them up, and show them they can do. And then because they emotionally became strong that they

can reach this, (2:40) physically they built up to it. And then he created using the technology a few national and world champions using the Gans technology. And I always sat with him. He says, I don't know what's in this water, but it cannot be detected, but I see the emotion of my sports people injuries changes. And then with it, even they have the injury, they're running like as like they have no injury. And the injury after time repairs the Soul, what you call, the emotion, is done immediately but the physicality says I still have two, three weeks to get there.

And then national governments got involved. That how these people have reached this point. They never understood that the Soul of the sports people have changed. One of them, two of them I think got disqualified because what they assessed their capability was beyond and they couldn't prove they have taken any substance. They didn't take any substances. They used the emotional strength to carry the physicality. And now maybe for the first time the committee of the sports will understand how these guys became national and world champions.

They didn't take any drugs. We elevated the Soul that he elevated the physicality and they take energies in a different dimension. It's not cheating, it's understanding that you use the potential of both your Soul and physicality. It's done. We've done this for about 2, 3 years, 4 years and it was no more fun. You can elevate the Soul, (2:42) which gives it the confidence to the physicality and then you see what you couldn't do before, you do now. Or we create a condition to teach it, to train it, and to bring it to that point, and age is irrelevant. If we don't tame it we cannot use it in a correct way. And taming it is by elevating it, not what you call, shackling it.

I was watching a program recently about this nine-year-old boy what he saw he did and he saw a guy jumping out of the plane with umbrella, but being young he didn't understand this umbrella was made especially for this guy to hang from it, it is designed to actually become like a parachute. So this nine-year-old boy actually went took umbrella and got his brother to video it, went on the wall and he jumped off the wall with the umbrella and the brother recording it. And the umbrella (folded) it up and he landed on his head cracking his skull and the whole thing was he didn't have the knowledge how the other umbrella was made. So the father thought, this guy is going to be a problem. So he directed his energy, his skill, his ingenuity in something else, and made a beautiful child, with no problems out of it. Because he directed it, he showed where and how is the correct way to do things.

And it's the same with us, we have through our Soul teach our physicality, how to take shape and control it. And then with it, show it, you don't need to kill. I provide the food, I provide the energy, you just enjoy the time. And this is part of the work of the Keshe Foundation. (2:44) In the coming time, as we build more and more systems, which carry this, what we call, "central energy," some of you doesn't like to call it a Soul, then you'll learn to tap into it, and part of tapping into that, satisfies your emotions and make a man of peace out of you. And that's how it should be and that's how it was. We changed instead of tapping to Universal energies which is coming from the light and the day, and the light of us into physicality. Now we're going back to it and we'll learn how to become

Passengers of the Universe. It's as simple as ABC when you know there is an ABC existing.

Any other question?

Q: ... Yesterday at the Soul teaching we were talking about the neutron decay. Could you please explain to us again the difference between the neutron decay, the STM in physical death and in transmutation?

K- Nuclear decay is what we call, Fundamental Plasma. Is when the fields of a structure cannot hold on in the interaction with that environment. And by law of plasma physics, they don't annihilate, they don't destroy into pieces, (2:46) the field strength allows collection of each one of the same strength, but with common denominator, to exist in respect to each other, or in conjunction with each other.

Nuclear decay is, in a way, interaction of the plasma with its environment, to exist within that environment. If the environment could give energy which the nuclear material or the what we call, neutron needed, that it could sustain itself or it created a field inside it that it could take energy from its environment as much as it needs, as long as it needs, it wouldn't divide. Division comes out of separation, not getting enough energy from the environment, through the structure of the other fields inside, that allows this separation to exist because now it's two of us we get energy from a bigger environment and we both ?? saw it.

And if we understand this it allows us to do a lot of other things with the fields of the Universe. And this is in a way the division of creation of the Mitra out of the Soul of the Creator, packages of. But we expand and we cover more environment. Because it cannot be a Mitra, it cannot be a Creator, if there wasn't an environment for them to be created in, and to expand into, or maintain them. And if you understand this in the term of the nuclear physics and atomic decay and the rest of it, what we call, nuclear decay, we understand why some isotopes last, some atoms last longer before they go into division and some less. Some of them it's a few milliseconds and some of them it's a million year. (2:48) Because that million year one has learned, has created a field inside it that it can take environmental fields and survive within them. The one who's shorter hasn't got that capability, hasn't had, does not have the field the strength spectrum to get from environment. So it has to divide very rapidly, that it can maintain the structure and then with this bigger field environment, can take more energies now, because it has a bigger spectrum.

If you understand the process of the field transfer and nuclear decay, in true essence of it, not that, "Oh, this atom decays after so many seconds," or whatever, we understand the actual, the, what I explained, the mechanism of it, then we understand we can always decay at the point of where we wish. And then life is everlasting. Because we learn how to tap into Universal energy, take what we need from it, and give what we (don't) need, that we stay always balanced. And that balance does not needs division, because you have always been ?? balanced. And this is how everlasting lives are. The people who live

longer are gradually, Souls and physicality, learn balance. And both in emotion and physicality and we see longer lives. And it's the same with other things.

A nuclear, you call it, a decay, look at the time of it, few milliseconds, few seconds, years and hundreds of years and millions of years. Then you understand the system has a field spectrum, that it can take as much as it needs, it gives as much as it needs, so environment cannot have that much effect on it. (2:50) And the one which hasn't created that the structure of the balance, needs to divide, needs to change that it creates that balance in a bigger structure, bigger spectrum. When you're a dot, it's just one point, you, whatever happens in that point. When you divided yourself in two dots, the environment between the two, now has a spectrum. And if you understand this, you understand the world of Creation and life. And how scientifically you can now explain and understand why and how.

I use this a lot in Space Technology. And even as I said in our team which are working on it, we have built this possibility of the interaction of the, what we call, one Soul with another. We bring another Soul inside, we move it up and down, we put it in different positions, we take it out, and we rotate it in its position 180 degrees, different degrees, to see how it interacts. In a way, we can now replicate the process of nuclear decay, or a splitting of the fields. And it's very interesting how they react.

But the decay, you call it to me as a nuclear physicist and what I understand about the plasma is actually creating a bigger environment, not splitting into new atoms. Because once a material splits in the atom it still it's in an environment. So, but they have interconnection. So now they bring in bigger environment to a bigger spectrums of the fields, and now in that division they can work maybe a hundred years, in time of the man. (2:52) Because then the environment dictates the decay more than the material itself and our scientists have not understood this.

And this is what we used in Fukushima. That's what we do in the confirmation of the application of the Gans's. We create that energy that it stops, creates interaction, connection with nuclear materials that brings that balance. And then they have nothing to give because they're in balance, you get no radiation, no nuclear interaction. It's very simple if you understand it. In the real time . . .

Q: ... Sorry to interrupt you, but we were talking yesterday and the doubt is, that have a connection and when you transmute you have a decay like the neutron become electron and when you die this connection like disappears, because you said it's impossible to return.

K- It doesn't disappear, it doesn't disappear. It, you have to find that, you have to understand where it locates itself and what expansion between the two it creates.

The world of Creation is so big, it doesn't disappear or it doesn't get lost. You have to find out where it is. And what it has interacted with. What new clothes it wears. And it's like, you know the children when they start learning a language or speaking, everything

to them is a lost. (2:54) They don't say, "Mommy is gone." They say, "I lost mommy." You cannot lose your mommy, it's gone in the kitchen. And the toy is lost. But it's not lost, it's there in front of... "Oh, I didn't see it, it was lost." It... nothing gets lost, it's instead you have to find out where it lands.

In the coming time, when we develop these technologies, and you understand more, future scientists and a lot of you Knowledge Seekers and your next generation, will be able, like when we get a DNA and say this is connected to you, through the field strength of their Soul, which you created, you're part of it, can locate where your Soul has landed. And like the way dad has gone to New York, and you're going to go and see him in New York, your children, your great-grandchildren, through dimension of the Soul, will come to the point where your Soul is. These are not fairytales. Because if you understood the principle, you can see the reality.

And we can fingerprint it by the field strength and then as the 2 matches, you'll find a space and time. In a further time, when you come to it, you can even from your own Soul, as I said, Souls have different emotions, emotion, you can separate that emotion of the love and send it to that position that the mother or the father Soul feel that love which you have sent from your Soul. This is why you pray for your dead. (2:56) And if you understand this, that second when you pray, you pay attention to them. It's the time, that few millisecond, where you actually connect it, to the Soul. Doesn't matter if you pray for your mother, your Christ, your whatever. And you give that energy to, and you connect with. And that's why some people go to church and in a way pray to release the level of energy that ?? father could match. Not necessarily Christ, somebody else. It could be the Soul next to you, but you received something, but you don't know if it was from the guy next to you, or thousands of kilometers away, or in another galaxy. Then you go in that position.

We have to understand the science. I'm a scientist, I'm not a what you call it, magicians or whatever. It has to, now we understand a bigger picture of the Creation within ??, within the knowledge of the Creation. And no fairytales. As I said last week or the week before Mohammed said, "I will never do any magic's." And it's the same. He couldn't do, show how. We have the knowledge, we can show how that nothing is magic. As I said, this week now we have made the systems of the Soul and our people feel it. As he said, "I put my hand on it and my hair raises." Yes, because now you touch, you touch the feel of the emotion of the love you created, it's your child. And then say, "there is no field between the two." Bring the other one in and see where there is a field. This is the dimension of your plasma. Now you don't need to go further.

But if you make your system more sensitive the one outside, (2:58) you can see how much the heat of the body is. Where is the field's extent? And it's different field from it. Some can connect to the next system, some connects to the strength of your electron. And this is what we have to understand. When we teach about the Soul, when we teach about the central plasma, whatever you call it, has to be scientifically done, delivered, understood and replicated. And this is what we are doing now. For you to understand, you learn about the emotion, you went somewhere, you know, now you can do

something. That's what are those of you who went away now we give you a tool, a system that you can expand it further on with.

Any other question?

Q: ... I would like to know if it is possible to have an energy exchange between a being incarnated in physicality and their ancestors who have already left, and if this could somehow be harmful to the Souls?

K- Can you repeat? That question only comes from Brazilians you know that. It is a typical...

R: Well you have been talking about this connection with the ancestors or you know grandfather, great-grandfather who had already passed and so on, (3:00) that we can have I think you had a microsecond exchange, or some sort of energy exchange. But could this be harmful to any of the Souls involved?

K- I know, I understand where this coming from. Maybe I understand it. That they think, oh, we call it "jinx" (black magic), they did this and that, and the Soul is taken over. If you understand the work of a plasma you cannot take from it what it doesn't need, and you cannot force it to somebody else to take. And what the interaction is, is a completion of the, what I call, existence, and what is needed to exist. And if you understand this, then there is no need for interpretation. Does it do this, does it do that, can you take it? And what was the need for it to take it and what's the outcome of it. It is all can be understood.

They say the Soul has been taken over by the devil, and that kind of things or the Soul of the god knows this and that has gone into their skin. This is a very common terminology, and in South America it's very, very strong in these things. And it's in Africa the same. They don't let you to have a piece of the hair, they don't give blood because they think can use their blood to get something into it, and the "jinx" and the rest of it. We have to understand the process of the Creation and then the rest we know which one is the reality, one does apply and why if ?? it's taken place ?? applied. (3:02)

Any other question?

Q: ... I'm joining from the USA. How can I get involved with the Keshe Foundation?

K- It'll take over your life. You're already involved if you're here. It's just that, what your capabilities are, what it can do and how you decide to use it. And what, what capabilities and abilities you have that you can use better to serve the other Souls.

Any other question?

R: I suppose they could start with the Telegram group for, for USA.

K- We have a bunch of, what you call it, people in there who understand more than anybody else sometime, but it's good.

R: It's called the Keshe American Knowledge Team. I don't have the link for that, but if somebody has that handy, could you please post it in the webinar chat here the connecting link for the Keshe American knowledge team.

<< Mr. Keshe tries to find the link for the American Telegram Group >> (3:04)

K- ... I think about there are 32 languages if I remember correctly.

R: Yes, there's quite a few and there is the Keshe One World Family and Keshe English Knowledge Discussion Group, it's called, and so on. As well as the UK, which is different than the English Knowledge Team. So, there's a number of options. But getting in on the USA one's a good start.

Q: ... Are there any plans to officially publish the first three books in Chinese? I think it's better to publish in English, Chinese, bilingual version. You mentioned...

K- The books are translated into Chinese, but we have to structure it to get the permission to publish it in China. (3:06) But I think, yes, the books are translated fully in all three. And there are some illegal versions of it on the Chinese network we've seen it.

R: Okay, he also mentions there's many papers listed at the back of the books such as Universal Order of Creation, Cosmic Rays, correction to the Einstein equation, Death of a Star, Life of ?? a cell, Magnetism, Inter Atomic Fusion, etc. But it says there seems to be no place to buy these. Could you put them all the electronic versions ..

K- There are about 400 papers written and some of them few pages, some of them, half a page or a couple of pages. Because once the knowledge transfer does not matter how long it takes to do it. And some has been published. I've seen that there is work going on to make 4 or 5 of these papers together as a hard copy, to what you call it, to be able to purchase in the next few weeks or months you see it. And it's like the ones which is done by Australian team. The three books about the plasma and Nano coating and agriculture. Now they're in hard copy, they're on the website. You can purchase them. But it is a compilation, they call it, of 3 or 4 of the papers, together as a hard copy, is in the process of getting done. Depends how long it will take them to do it. But you might get some papers released. (3:08) And all the 400 papers plus have already been sealed and signed and they have become the property of the Keshe Foundation. And then one day it will be released. Some of them we have, but all of them are in what you call it, digital form kept. They're all kept in digital form in 2 or 3 hard drives that if one gets missing the other one is there.

Some of these written papers have not reached the maturity of understanding by a lot of people. And if it goes public, they look at this physical dimension and they don't understand the totality of the structure of it. And this is some of the reasons I don't release

many papers. Because maybe in 50 years, maybe a hundred years, when man even, at the speed we are teaching matures to understand these papers. The knowledge in these papers. And there are some which very, very, what you call it, in-depth of the knowledge of the Creation. Even some papers cannot even be released because it's beyond understanding. A man would look at it as a dimension of physical dimension and they don't understand any of it. In time Foundation and what I call, the structure we... When it comes to the maturity of understanding, they will be released by them.

Any other question? (3:10)

R: Well, there's always more questions. ... Let's see here. Do you want to wrap it up?

K- That's okay. Let's have a question or two and we go, we just ?? go at 12 o'clock.

Q: ... I've noticed that when we have peace, we don't have the hunger trigger, but if at some point there is some emotional variation in the environment and we let ourselves to be connected to that, we run for food, so, is peace food?

K- I presume when you have food you are peaceful, you don't need it, do you?

R: Yeah, it's kind of the chicken and egg thing, in a way, but...

K- Yeah, when you have enough you don't look for some... It just depends what satisfy you and what is accepted to satisfy you according to yourself, what field strength, and what emotion brings you peace. Or what peace is to you according, something which is peaceful to you could be very interrupted to the others. And is that the real peace? And you have to understand why you go for food. That gives you emotional, or is the false emotion when you go for a food? Because you're already at peaceful, you got nothing else to do, you go something to do, to chew or intake. Or you just create that dimension of I need food to create a mayhem that I might find peace because of it.

Q: ... (3:12) What is the origin of this seed that feeds the emotion of creating and staying in a conflict which somehow can be in the emotion of the STP in all of us?

K- Confirmation of existence. Some people create .. conflicts to confirm their existence. And some are there to say, I exist because of the conflict.

It's very much if you look at the 9 wars of the Crusades over 200 years, for Jerusalem. In the name of ownership, they created war. The 9 wars of the Crusades with the Christians lost most of it. From the first one to the last one, the Pope called the wars, to confirm he has the power to do, no other thing. It could have been done so mutually and every time they ran out of, sold everything, they sat down and signed a 10 or 15 or 20 years peace agreement between the Christians and Muslims. And they call it the Crusades, War of Crusades over 200 years. And one man decided it's time to war, because I have to show I have a power and that was the Pope. Nobody else decided on a Crusades, just one man.

And different men who took that chair to show they have a power, and every time they tried, they failed.

If you... why did the conflict? Why did you have to have a conflict to confirm you exist and you have power? (3:14) And I think it's in the third or the fourth Crusades war, the Pope actually went to the French and the British were fighting each others throat, as said listen, you 2 stop fighting and get together go and free Jerusalem from the Muslims and come back and start your wars again. And he actually convinced them to do that. He stopped the war between the French and the British, and that time the Germany which was a bigger what you call, part of the Vatican, or what you call it, the structure of the power, (Holy Roman Empire) and he convinced two or three times different Popes over 200 years of Crusades to start fighting each other in Europe. Go and fight the Muslims, and when you finish you conquer come back and carry on. And that's what they did and created that condition of war at the same time fighting to confirm who's more powerful, but now we have another, let's go and do it. And we come back and we fight afterwards, let's go and fight somebody else, and we still are war at each other. And who create a condition of peace. And then when they couldn't win they came back and they had peace with the Muslims, they came back and they fought with each other again in Europe.

So where does a conflict and the war comes from and who decides? And why do we decide to have a conflict with one person, and not with the other? For the same reason. It's us, it's internally we decide. And that's a conflict between the STP and physicality of the man, to confirm our existence. (3:16)

Have you ever sat on a table, where somebody sits with you or two or three people, they turn around and talk so lovingly to one, and then turn around and they talk with such aggression. In many families we have this. The mother or a father, they're always aggressive to one child and loving to the other one. Because it's weaker, I have to protect. They don't understand, if they love and care, the same for them and understand you two are equal, there is no difference, then you have a peaceful life in the house. They are the cause of the conflict, because they created it under the table in every move. Always jump on this older one, you don't know this. Oh, come on darling, let's do, let's go there. Even the younger one does the same thing as old. And what happened, the younger one, the older one tries to mimic the younger one, because he doesn't get punished, so I don't get punished, I can do the stupid things, ?? he does. We are creator of it.

We create the conflicts by behavior, between the STP and our physical life. And it's a root of a lot of problems, even in governments, at home, between relationships, and brings out what we call, at the end of it, in the family level, jealousies. How can Dad ?? love him more than me, when in fact it's the same love, but he tries to create that conflict, separation between two, and you "feed the fire." This is how a lot of mothers become jealous of their own daughters. Because, the same father which is rough with the mother, (3:18) is so soft and gentle with the daughter, which that mother created, and how come she gets the love and tenderness from me, and I get on the roughness of the ?? life? We choose. And we decide. We choose the conflicts, we create the conflicts, to show we exist.

Any other question?

R: Well, if you keep asking, we'll keep, keep the questions coming. There is...

K- Sometimes we get to the end of it. We said there is no more and we go.

R: Well, we're very close actually. But the questions get stranger as we get to the end point. I've been saving the strange ones to the end.

K- Okay. Strangers we don't know, we say sorry, this session is finished, we don't have time.

Q: ... Hello Mr. Keshe, you talked about understanding through the intellect. Is it the intellect of...?? is it common science? I think it means common sense. Or that of another dimension? Is there guidance from the Soul here?

K- Both ways, both ways, both ways. You have to distinguish between which and how. (3:20) It's a skill and a knowledge we gain.

Any other question?

Q: ... The media always emphasizes events and news where the emotion stimulated is fear, sadness, revolt among others, etc. Am I wrong in thinking that this is an intentional manipulation of the masses?

K- It has been. It has been and it will be used that way, of course. It has been. And depends who's behind it and how they are behind it. We see now, the news is lined up to create that there's going to be a massacre and a big war between two countries in Middle East, and a super power, and the rest of it. And they found a fire to, ?? there is a fire. And when there isn't a fire, "Oh, they made fire, they made me ?? sick, because they did this and that." It's interesting something you bring in that out.

At the moment, we are observers, we are advisors, we are consultants, or whatever you call it, and we are part of the structure of understanding. We've seen the American, three American soldiers being killed in Middle East by whatever means, or whoever is behind it. The Biden administration has decided they're going to take an action against this and they are giving a hint where they're going to take action against it. (3:22) And in the backgrounds they are afraid of what the repercussion will be from such action, because the same structure can create some other problems for them. There is a talk in the backgrounds with the Americans and the other side, okay, you hit us this place and we do a little bit of shouting and then it's gone. That you're happy you, you entertain your public, that you did something for the loss of three lives and then we are all happy and we go and we do what we like. And now there is a discussion, where they're going to hit that it will not escalate to a full war but American public's, public opinion is satisfied. Because the press is pushing for it, people behind it are pushing for it, there is no news of

Iranian nuclear bombs and nuclear war, but it's what we saw it's become the new pattern. Go back 3-4 weeks ago, there was a big talk of population escalation of the war between Iran and Pakistan, because they hit each other and then when they actually, they agreed who's going to hit where.

Because the bunch of the Iranian opposition for ?? Baluchestan are sitting in ?? in Pakistan, so they said, "Okay, hit here, you get rid of your enemies." And then there were a bunch of people who are against Pakistan. Says, "Okay, they are here, you hit here." When they hit, they got rid of the both enemies, they agreed. The Iranian foreign minister traveled to Pakistan, shook hand, "Oh, we did a good job. We got... You got rid of your enemies, we got rid of our enemies. And we are both happy in public." (3:24)

This has become a new feature of Iran negotiation business. We hit you to show we have a power. And you have to understand there is a huge power sits within Iran hidden technologies that Americans are aware of they cannot, otherwise before they would have gone and shot everything. Now they're negotiating just to satisfy in press or in public. But who that American did something. We can't lose three soldiers and do nothing. They're negotiating where to hit that there is something to do with the Iranians and the Iranians are moving all the people which are connected to their government out of the position that there are few people, local might be damaged, but we freed the press in the United States to in a way shut them down, or shut them up.

And we see this now, very, very clearly. There's a huge negotiation going on in the background, where and how, and the way to be like to a surprise, but now you as Knowledge Seekers wait for it and see what comes up next with it, or will it run out of control? But they're negotiating who will hit where, that the American public in press is satisfied. And then the press will make a big hullabaloo of it. Oh the Americans hit and they took the revenge. But in a way, it's pre-agreed now, is what we call modern warfare, because Iran can create a huge damage internationally for the whole American structure, and the people who stand behind Iran, in that war.

So, now these wars, what is "press making," is negotiated, let's have a look what we can do, that we keep them shut up, but we're still working, negotiating and doing things with each other. You watch, watch the thing and see how it goes, and if there is going to be an escalation to the next level of it, if it goes out of control, which at the moment they are trying to maintain. (3:26) And we saw the same thing, if you remember, when the Iranians hit the biggest base in Iraq, in 2020. Trump could not do anything, he went and top generals of Navy, Army and Air Force were standing behind him, he was shaking like a leaf. "We're not going to do anything, we just going to let it go." Because, you know you don't have the technology which Iran possesses. America is in that position today. But the press doesn't tell you that one, but... It's put a pressure on the American administration. Let's do something, but this time it's negotiated where we're going to hit. You watch this, what comes up.

And then you understand how much press is watched by who and what will bring for election for Biden. This is very important, but we'll see the extent of it. How many planes

will go, what rockets will hit where. And they already agreed it will be offshore, not on Iran mainland, if they keep to it. And we're going to see something a naval ship, or something will a naval base overhead. The two, it's strange how they call it a war, it's actually negotiating and games, because there are other things, they need to satisfy with each other.

So, who makes the news? And as being part of the, or inside the structure, we see it how it's done. It's not anymore, we can tell, "Oh, it's ... you organize something, we show." And even look at the press, so when start the war between Iran and Pakistan, they were waiting (for it ?? out). It was all pre-arranged and pre-agreed. And look, 2 days after, they literally wiped out each other's enemy, in each other and they gave the address of the places where to hit in a way. (3:28) And they went back. They went to each other and they had their lunch. Iran farmers has a beautiful lunch in Pakistan and he came home and it stopped. But it was something to get rid of opposition, both sides. And they knew where they are, they were given the address, they hit it. "Oh Iran hit the missile there." Everything was agreed beforehand. And it's now, it's a new policy. But they don't tell you that in the press.

I'm sitting here watching which place and what is agreed to be the Iranian interest, prearranged, pre-agreed. Most of our experts and everything else has been pulled out that there's not a, what you call, it's just a collateral damage. Two American have done something. And they want more than three people that we can sell, we can kill more than three people. I don't know how many dummies they bring to put in there, but we all hear a few number, more than three are killed, and they've satisfied the American ?? eager for killing. Watch the space, it's very nice how news will be developed, and then you understand how they control.

Any other question? And shall we call it the day?

Q: ... What is the most accurate textbook on the life of Jesus? One that would, one would study if one was to write a novel based on his life.

K- None... Because this is how it is. It's written three, four hundred years after him, (3:30) by word of mouth. And a lot of connection of histories of the area, what to fit him to be and what were the what you call, local heroes that people could connect and becomes him. When you read about the life Moses or Jesus, Muhammad less off, because the Koran and whatever had been ?? it says were written down about 40 years, is the first mouth, what I call, changes. But (with Jesus it's) three, four hundred years down the line. Or in case of Moses, nearly 2,000 years down the line. Nobody knows what is the truth. And so, depends which historian was it in favor of, and what was there.

There is a lot of new, what you call it, new I mean, last 50 years, 100 years, which books written by historians, who actually went and analyzed the old, what you call it, manuscripts, or stone writings, or whatever. Which has clarified a lot for the others. But places like Vatican and the, what you call, the Jewish centers and Islamic centers, they

don't let it come out so much, because then it damages their reputation and what their control is.

But in essence, if you want to know about the truth about Christ, go into the history books of the time. Not the, what you call, the Bible or the rest, because it's all made up to fit. Even when you were talking about Noah last week or the week before, I said it was a story of fisherman. (3:32) If you go back, Noah was made out of the old history of a local hero of that time. And they changed the name to Noah. Because he wrote what you call it, with him and then because somebody put the story in Torah and then somebody confirmed it in 300 years in Bible, which was written 800 years after the Torah. And then Islam had to do something with it because Muhammad says he had a say in it, which was written again another 200 years 300 later. All confirmations are confirmed, they are real and it exists.

There's a lot of story books, but like me, if you are that way inclined, find the history book of the time, not the writing of 2 or 300. Then you see the real man, you see the real story, real what happened. Historically is that if it is not in historical books at least in different cultures and there are historians who were actually written, ?? going through different cultures of the time, it doesn't exist. Then suddenly appears in Torah, because it's there. It's reality. And this is where the time is. Read the history books you know about the man. Who read the holy books, you find about the fantasy of those who have written it.

And this is the day, this is a big, big difference. Very big difference. And they fitted in it, because it would fit into the history of the time. (3:34) It doesn't make sense to the today's time and place. And not with our present culture. And the worst one I think is written into, because it's done in the time of near time of is in what we hear in ?? Hadiz and Koran. How a man who was supposed to be man of God orders killings of hundreds, and only men because he loved women. And even till last century it was a tradition, because he did it. In all the wars, where Muslims or Europeans were involved, always men got killed, not the women. Because women's are a product of the pleasure and everything, slavery and money. And then you see the truth.

A man of God should not kill. That's how ?? named one name. It's not the characteristics of the Creator. Using the name of God to create destruction that's the characteristics and behavior of the man, nothing to do with the Creator. And it should not come into the books of religions, because it's not the religion. This is the same with Moses, same with Christ, the same with (King) David is the same with Mohammed and the rest. If they had the money to master an army be it physical or the Soul and not to abuse it they've done it.

Christ was good at it. He created the army of women because he enjoyed them. Muhammad was the same. If you read the story of the ?? and the other wars, Muhammad when he killed the men, ordered the men... When... If you read the most famous war, (3:36) which is in Koran, which 800 men were beheaded in one day. When they got the Jews, supposedly, he said, "Separate the men from the women." And for one day, this man just beheading men, in one corner of the same city, same place. While their children

and their wives were pulled away from the men. Then the women and the children who were not adult yet, were taken as slaves and part of the harem. And by the Islamic law, 20% belongs to the religion. So Muhammad took the share of women and the children, which was his as we call slaves, and he sold (sold) them to market. This is in Koran, it's not my saying. Read the Koran history of the Islam. He sent these women slaves to be sold in another city that the money from it could allow them to get horses and swords to strengthen his army for the next war. And the other children ?? who were given to the soldiers according if ?? they were horse riders or the walkers soldiers, how many they took. And most of the women became what you call, slaves and most of them was ?? time at war they became what you call it, the wives and everything else. And usually in these tribes the most beautiful women went to the top leaders. And this is how in many wars Muhammad chose the women out of the tribes they won. It's the same leaders with the other leaders.

And so many wars, you know, Koran is one of the nearest thing, because some of the people who were involved in writing it, were actually at the time in it, so they could tell the truth. With Christianity we don't have no trace. It's all "Chinese whisper." (3:38) And whatever be fitted in the local area, in the history of the hero, he becomes that hero. They just change the name to Christ or to Moses.

Go read the story of the history of the time and the beliefs and the religions and then you see most of the name of the prophets is literally from the gods statues. It is not the real name of the man. And they add to it. Read (local) history, not the religion. And then come and read the religion books, see, "Oh, this name is just changed to this, this name has changed to this, this history is changed to this."

The boat of Noah is one of the clear examples of it. Actually, the story goes two, three hundred or a thousand years before even Noah. And they just changed the name of it. (This is Gilgamesh of Sumerian). They've done a lot with Moses. History of the area when they wrote, 2 Jewish guys wrote the first Torah at the time of Kourosh (Cyrus the Great) they added what was historic, because people could accept that's a religion because they were in ?? it ?? and it wasn't tarnished.

And then all of it got made up. Then read the history and then see what's the fact in there in the Holy Books, and then you understand that a lot of this is made up to suit. It's, have no reality. And then read what Christ did and how, what life he lived. Moses had his army of soldiers. Muhammad had an army of soldiers. Christ had an army of soldiers, but the Christ himself, his army were all women. Because he loved women. And he wasn't a man of conflict. (3:40) He never made army of men to fight. He always enjoyed army of women to enjoy. And you see the man who used his name and his things became Crusaders and rest of it, and we still see today.

If the Christians live the life of Christ, planet Earth would have been heaven, both for men and women. Because he loved the pleasures of physical life. And it's in the historical books. Read the Jewish historians who wrote about this man called Christ and you see how far is from reality what you ?? read.

As I said one of the biggest problem with the Holy Books say it's especially going back to Old Testaments and the New Testaments and then with Koran, because they had to follow each other. If you call the God so kind, if you call the Creator so beautiful and everything else we associate with him, how can such a beautiful generous Creator, order "an eye for an eye"? If it was the truth. If you took somebody's eye by accident, or in a war, you become his eye. We don't take your eye that we have 2 blind men. Then no man will take another man's eye, because he has to spend the rest of his life being his eyes. That's the true rule, this is the true Creator, not the man who changed it.

And one to follow has followed the same name. If the books of the Holy Books are what they are from the Creator, this is the rule. (3:42) Not "eye for an eye." If you take some man's eyes, you have to become his eyes. So you have a burden of life, a blind man for you to carry for rest of your life. No one will do that. So no one will blind no man. This is the rule of the Creator, not what they made up to be in the Holy Books and they do.

If you take somebody's life, you have become responsible for the life of those he left behind. And then you see if he can carry two families and become a wife of a husband of a man at the age of 20 when she is 50 years old with 10 children. No man will take a life. They changed to suit. This is the holy ?? and truth, not eye for an eye. It's just from a weak man, because then he could change blood with blood. Read the history books and not the Holy Books, and then you'll understand the truth about what happened, where they came from, who's their real name and the rest of it.

Thank you very much for today. I still invite you all to join us in Sanya, because I think it'll be a life changer for a lot of you. In understanding new technologies, new change in the life of man. Thank you very much for today, and see you next week.
