

# 524th Knowledge Seekers Workshop February 8, 2024

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

Breakthrough in Cosmic Ray (CR) continuous production - endless supply; System running testing KS in this KSW - unknown; Create pure plasma environment; Proven plasma is DC - matter state switch to AC; Create wave on top DC - travel Cosmos; New Cycle open Arizona - 100 researchers - of new CR technology - financed by Markray; 3 Centers AZ - Iran - China - fields cover planet; Join research 24 hour work; Show CR in Sanya; Because Iran has achieved multiple nuclear warhead T at supersonic - no one can match - biggest fear - only for deterrent - peace to Middle East; NASA obsolete; Americans prearranged bombing for elections; All T to China one-sided - now share with world 3 Centers; Fulfill in 2024; Systems can control Soul - make P follow - Soul control P; Pocket size transmutation device; Fish absorbing energy - transmute; Zebra Fish CR can reproduce heart - use for tests; Scalar Waves - concepts; Connect systems together create environment; CR different than Cosmic radiation - bring change; CR create organs; B12 radiation source U; Fish came back - dead; KS panicked - Soul trusted; Mitra & daughter; Virus like music; Plasmatic computers - brain & Soul - transition; Put system in body as Chip - transmute; Musk copies KF T - works with Israel

## ENGLISH TRANSCRIPTION

(:21)

K- Yes. Good morning, good day to you as usual, whenever and wherever you listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute. As usual we welcome you back, (:22) and as usual as many of you been around the Keshe Foundation, February is a month when we bring in a new dimensions. Somehow, February always is a time for change and development and bigger steps which come in.

As you heard in the intro and what we've been saying for past few weeks, is that we have managed to reach a point to produce fields, magnetic (M) fields, and fields exactly the way that it's created in the Universe (U). As you heard in the Intro, we copied the donkey and we made the car with four legs, called it, a car with four wheels, and then the rocket, we even copied the birds. Now we have reached a point, we have managed to understand, partially, and replicate the production of Cosmic Rays (CR), exactly the way it's done in the Universe. We produce it in a manner that it is continuous, does not depend on a source, and in a way cannot finish. As we are at the early stages of this technology development, this will bring a lot of changes. And we have done and we are doing what we can to expand it more. And with this process, we have opened a new cycle of knowledge and technology. We are testing it every day, even some of you in this session today, (:24) without knowing it, we are doing the monitoring, we are watching what's happening, how you're interacting with us and in general, Space Technology has moved into a new dimension (D).

We know this, we work for this for nearly a year. Systems were put in position months ago, tested. Last, what we call, session with the Knowledge Seekers (KS), we put you on that system and it'll be again this system coming up. We've tested with individuals, we tested with group of three or four people, and to check, to see we are correct, how far everything is, and it proves a lot of things.

For example, we have managed to create an environment where, which is pure plasma. CERN, Russians, Americans, Chinese, spend billions of dollars to create a plasma environment, to accelerate and the rest. We have managed to create a plasma very much like Cosmos. And, in that process, where it's a natural and is done fundamentally by understanding, creation of the, what we call, Cosmic Rays. What does this mean? How do we know? How do we... How have we achieved this? In the structure we have developed, and we can change it to any size we like, from a small table top to hundreds of meters diameters, is that we measure the plasma fields within the structure, (:26) outside the structure and between structures.

As we always said to you, that now scientifically we can prove it, it's a breakthrough in the world of science, that the plasma is a DC. For example, if you have go back on the teachings of past decade, I always explain, plasma is a DC. AC comes when it comes into matter state. And, now with the technology (T), with the plasma environment, we have developed in laboratories, we measure the plasma, centimeters, half a meter, whatever, and a meter and two meters, to confirm that the plasma is DC.

So our sensors show, when we are within the system, the environment, we have a DC environment, which means it's a total plasma, there is no matter state. And this is where the Cosmic Rays come in. This is how Cosmic Rays travel the span of Universe, on a DC. In a way, it's a DC of the plasma. Once they interact, once they come in touch with another field, with another matter, then in interaction and penetration of the fields of the matter state on interaction, they create, what we call, additional wave on top of DC. So, we have to watch both DC and AC. In a way, DC we look at the cosmic, AC we look at what matter state comes into it. This will change the world of Space Technology. And it has changed. (:28) Now we can measure where the parameters of a reactor or a spaceship is, without actually physically having it. We have placed sensors outside and inside. We can measure fields, we can measure how much we are behind our system. And where is the boundary, where is the wall of the system.

For this reason, the breakthrough which the work of the Keshe Foundation to become public, has been for past 30, 40 years, is completed. As many of you know, we always share technology in a way with all of you. And, in doing what we are doing in expanding the science and technology of the Space, and understanding it. As you know, in 2013 we announced the establishment of Knowledge Seekers, that we accepted about 8 Knowledge Seekers to come to the Cinzano in Italy, and we started the first cycle, and with them, working with them, we achieved 129, and many other things that we received the approval of, confirmed a lot of technologies, and we went to the next step.

Now we have entered a new phase, as we have announced before, we have signed agreements with the Chinese government, in a very large scale. And I always have a concern to put all technology in the hand of One Nation. And we invited the Chinese to open a secondary system, what we call, scientific center, for development of technology in Sanya. And, today we announce a breakthrough, a what we call, (:30) a next step in Keshe Foundation work, that brings balance into the power of sharing knowledge, and it does not become exclusivity.

I have spoken with John in Arizona, and we have properties, we have all the structures set. Keshe Foundation announces today, the establishment of the second cycle of Knowledge Seekers to join the Keshe Foundation in United State, in Arizona. You come in for a three year research development. There is no 9 to 5 job, it's a 24 hour job. And, the latest technology which now we have achieved, will become open to operate, to test, to develop, and a center outside China, in United States, will be established. You can join us as a student, the same as the one he did in 2013, we started with you in 2014, and it'll be a combination of 90% research and 10% teaching, if that. You become researchers into the new Space Technology. The knowledge what is gained in China, and secondly we open another section, as we promised in city of Isfahan in Iran, a three point teaching centers of the Keshe Foundation will complete.

We will start this training, or this what we call, research development, sometime around June, July of this year. We only accept up to a hundred scientists as a base core to start with. Keshe Foundation website will announce the... how you can register, the fee for it to be, you pay to become a researcher, (:32) and you join us in developing the Space Technology through transmutation and transfer, and what we call, spaceship. You choose.

The latest knowledge, what is gained, will be in the hand of the, what we call, the Research Centers. This allows us to develop a parallel technologies, that is open to all man at the same time. We have 32 Knowledge Seeker languages. We ask you from each language, up to three people, you can appoint, you can pay to be, or collectively each group, or each what we call, language, pays for one Knowledge Seeker, or two or three Knowledge Seekers, and if you achieve your three, you take a second nation as your child, to look after, and support their scientists to be in the center, in Arizona. We do not need to set up things and use in Arizona, everything is in Arizona. Keshe Foundation manufacturing and Wellness Center is already established and you know the center. So, we are going directly into process of production, testing and evaluating. And we have called on American government to join us in this new Space Technology. The same as we invited the Chinese. We have invited the Iranians to join us in the same way.

In this way, we break the knowledge through, all in one go. We have reached the point, in the transmutation, and what we call, transfer, and those of you who want to still make the UFOs, to be completed, in collaboration with other Knowledge Seekers, scientists, to break through and bring the change. (:34) We stay away from being connected, but we collaborate with government. For this reason, Keshe Foundation, in its structure in United States, will bring in the support of Markray to be financed, and to be structured for

building of the Space Centers. In the next few weeks, we will support Markray to become the backers, financiers of the, what we call, our program in United State and in Iran.

We open our doors to both governments, our hands, and this is done to one reason, which I explained last week, but many of you never understood. This is in a way a handshake for peace between the nations. And we explained how things was going to go, and you saw it how it happened on Saturday, exactly to what we said. And we announced a new development in that cycle, which pushes now the nations to move this way.

So, those of you who want to be Knowledge Seekers, Researchers in the Arizona Center, you can register and we close this registration very quick, because a hundred can be reached very quickly from other Universities, scientists and Space Centers. And we would like Knowledge Seekers to be part of it, because you brought us here, you supported us to be here. The Arizona Center, which is privately owned between John and me, will become part of the operation of the Spaceship Institute, and will go to the market with Markray, to support the building of the first Space Center without fuel, (:36) in United States, and in city of Isfahan, and our signed agreement cooperation with the Chinese government.

I will choose those individuals who join me in the first phase of what we call, Arizona. Europe is too small, does not have the capability and capacity to support such a structure for its future development. But all the nations can be in. German group can, if you want to register individuals to be in, you can. If you want to appoint three Germans to be part of this development and support them for three years to live in the US and pay for their fees, all we can be done, doesn't matter which language you are from. The same with what we call, the Arab nations, with the, what, English, French and the rest.

So, we bring in the sharing of the new technology. We expect you to achieve full transmutation by the end of the year. The group which comes to United States will be backed to the hilt, to make sure, at the same time as with, what you call, Chinese and the Iranians, the three teams work together, sharing technology and knowledge, with the support of the Keshe Foundation in Austria, which the main backing of the technology development will come. In this process, we, by opening the Arizona Research Center, we break a lot of new conditions. This process, within months of his operation and showing the technology, in achieving, fueling without burning, creating Magnetic fields, will make the operation of NASA, Russian Space Agencies, and Iran, and the Chinese obsolete. It'll open a new door. (:38) We will share with all three centers, equal knowledge, and equal, what we call, technology.

It has to be said, why we did this? Why we brought this forward? As I told you last week, if you listened to the teaching, that the... what you saw happen on Saturday (American bombing of Iran), it was pre-agreed, pre-arranged, for what we call, American public, to quiet down for the elections. And as you've seen, heavy bombardment, delivery agreed away from the Iranian border, far away, but in between Syria and wherever, that does not give any indication of any, what we call, war with Iran. You have to understand, a powerful nation like America, does not do such a thing. And if you notice, hardly any

soldiers, any military, anyone who was involved, has been killed. Collateral damage, a few, what we call, civilians, were caught in this, to keep the American public silent.

You have to understand why a nation like United States, can do the same thing on the Iran border with Iraq, or other positions around Iran. But it was chosen far distance for public relations. The reason for this is very simple, that this news will break many, many and create a lot of problems for many nations, but solves a lot of problems. And this shows why we made the announcement of opening the, what we call, Arizona Center. Iran has achieved nuclear weapon technology, with multiple warheads. (:40) And nor Americans, nor the Israelis, no one in the world, can match the development of the new nuclear warheads. As you understand, Iran achieved hypersonic, which is Mach 25 plus. And the Israelis and Americans don't have such a technology. Israelis claim they have reached detection of Mach 21. You still have to match up another 4 to 6 Mach. Which means, everywhere in Middle East is vulnerable. Americans are aware of it, Israelis are aware of it. And, with sharing the knowledge, the way the Keshe Foundation does, we try to bring a control sharing of the new technology, that the wars stop.

Iran, in the coming weeks, will announce the, what we call, achievement in nuclear weapon technology. This was the biggest nightmare of the world to hear. But, as I always give you news in advance of what is to come, you will hear soon, Iran has achieved nuclear weapon. The biggest thing Americans and Israelis and the rest were trying to stop. But, the technology will not be used for warfare, it is a deterrent. And Iran with achieving hypersonic, has no nation at this moment of time to stop (them) using it. We wait for what we call, the opening of the Arizona and bringing the technology forward that all these, what we call, "childish play" of using nuclear to become obsolete and in all nations sharing it, will become available to all of us. (:42)

You will hear, as I told you, explained to you last week, places were chosen and we've seen it. Americans never hit 100 missiles to no injuries, no damage, and collateral. Now you understand how precise our information has been and how correct we were as we are aware of all the negotiations. American government and Israeli government have been informed that Iran had achieved the ultimate goal of nuclear weapon technology. But it will stay as deterrent and would not be used. We have this guarantee from Iranian government. This was the biggest unbalance in Middle East, where the Israelis, with the threat of nuclear, always tilted things toward themselves, and they had the back of the Americans. Now, with Iran becoming nuclear weapon technology balance, this brings condition of peace. And this is the reason the Americans stayed away from Iranian border, because if they would have done, they've been told it'll be used. We heard the same thing coming out of Kremlin in past few days. We will see containment of war, and soon the situation in Gaza with the pressures which are coming through, negotiation and collaboration with Iran, Qatar, and everything else, and everybody else, and Chinese in the background, an end to the Gaza situation of today, and we'll see reconstruction next two, three months.

So, in a way, as a gift, as a response to what happened in the past week, in literally being able to negotiate peace, but at the same time keeping the public in the United States

happy, Keshe Foundation responds with opening of the research center in Arizona and in Isfahan. (:44) We chose Isfahan for its closeness to what we call, Iran Nuclear Center, as Natanz is not very far, and can support the Space development in the real plasma conditions. We'll change the use of the nuclear perforation to nuclear plasma Space Technology, using the Iranian, American, and the Chinese.

For those of you who are waiting to come to Sanya, we will show this new technology in Sanya. As we have already come to an agreement with the Chinese. You will see the first, what we call, Cosmic Ray Universal System for flight, and for transmutation in Sanya. A number of you can register while you are there, to sit with a system, which connects you to Cosmic Rays and Cosmic flights and transmutation system. We are flying these systems to Sanya in, most probably, as most of you know, in the past few months, we have already shipped huge amounts of technology to China for this purpose. A similar system will be delivered to Arizona, and a similar system will be delivered to Isfahan, once we come to an agreement with the Iranian government of the position of the research center.

Those of you who will join us as a new cycle of researchers and development team in what we call, Arizona, be prepared to share the technology with your nation and your scientists. We are not bringing you to Arizona that you become silent. (:46) We bring you to Arizona to teach, while you're learning. What is developed, has to be taught. The same as we did in the Cinzano. We put the test live on, that everybody was hand ?? off (hands-on). So, what we promised, we'll fulfill at this part. And, as I said, if the Americans keep to the promise given to the Iranian government in the background that they stay away from touching Iran. And the Israelis now know they're not the only nuclear weapon technology. And there is much more powerful warheads ahead, which can wipe out the whole state of Israel in one button. We have the assurances from Iran that will not be done. And Iran, all agreements have been kept up to now.

Now you understand what the position is, and in a way, this is a reward for "correct conduct" by the American government. Join us, those of you as Knowledge Seekers who want to be part of it. A fee has been agreed in the background for the 100 scientists. You pay to join us, or as a group, as nations, you're paying to join us in Arizona. As you know, the fee in 2013 was at 20,000 euro per year. And this we'll try to keep the same after 10 years for the same. Something around 20,000 - 25,000 per year, it'll be a cost to be. Governments want to appoint, pay the same. And for building and construction of the new Space Center, we will use our, what we call, connections and the structure we have set up in Markray. The Markray becomes, (:48) in a collateral agreement which is done before scientific development, the research backers, the backers of the development of new Space Technology in United States.

We have to understand that once we start backing, technologically, development in China, in Isfahan, and in Arizona, you as Knowledge Seekers are all be involved in it. There is no sideliners. There is nobody sitting there, "I'm just a Knowledge Seeker." You all are in it, as we say in English, "to the hill". You have to be able, we do not look, if you're a plumber, if you're an engineer, if you're a doctor, you bring your expertise, I'm a

medical doctor, I want to be on the wellness side, you'll be appointed, we'll be shown how to. I'm in agriculture, I want to develop the agriculture side, you'll be appointed too. We already have started seed testing in the new systems, in Linz. So, it's part of the same.

We have developed the production of the protein within the system. We see how it's done. Now we see different, what we call, combination structure of protein, in the, what we call, the plasma system, and the conversion. We will bring in, now what we call, transmutation systems into operation, that it can be done, and we have our first two volunteers to go in the Space travel. The tests, every third week of the month, will carry on, and you have to complete, we do not look at race, religion, color, creed, nationality, language. (:50) To us in Keshe Foundation are all the same. And it's your responsibility to join us, in fulltime research work in Arizona.

We need this. In a way, if you look at it, we had to do this. That giving all technology to Chinese would have been one sided. Allowing Iran to become fully developed in that will be another one sided. This way it brings a balance, where we see and the choice of Arizona for us, is the best choice. And I thank John for all his support over the past years. And as a head of Markray, CEO, he's there to see the technology development in what we call, United States. We will work redundancy to open, to start operation of the development in United States by sometime June, July of this year. You go to the Keshe Foundation website, in next few days, the links for registration will be put in. We will ask some questions, you pay your fee, and we announce to you when you can enter United States to start the program, and how we will develop this one.

Governments in Europe and across the world will be informed of the development and opening of the center in Arizona and in Isfahan. It'll take us a few more weeks to, what we call, put all the "dots and cross all the Ts," And we start the process of the transmutation, you being part of it, you are developing it as Knowledge Seekers. (:52) In a way, we have achieved the point of research and development, that now we can share with the world and change on every aspect.

I always had a big, heavy load on my heart and my head, for past few months, since we signed the agreement with the Chinese, that this is becoming too one sided. I had a choice to go with the American military and government and become a warfare, Cold War structure, or share technology the correct way, that allows everyone to have access, where we have received the financial support of the Chinese. If the American government would like to support the Keshe Foundation, we have no problem, the same as the Iranians, and the rest of the other nation. Otherwise, we support ourselves through the structure we set up through Markray, to finance as a Space Technology Development Organization.

You will hear in next few weeks, as we develop, and our discussion with the Iranians, the Americans, and the Chinese, will bring to a conclusion, and the sharing of the technology. We would not have taken this step, if we have not achieved the creation of Cosmic Rays, that we can show to every nation. We don't play games, and those of you

who come to Sanya, for the first time you will see Cosmic Rays, what we call, plasma creation technology, without fuel.

Now it's for Knowledge Seekers and Research Centers, how to use this plasma, for what purpose, and the way it's going to be used. (:54) This is the change and a breakthrough in science, and it's not happened past few days. You were in it, in December 22nd, and in the... what we call, following tests and other tests we've done, you've all been part of it. We tested you, as we said, Keshe Foundation is built on the back of the Knowledge Seekers. And you've been there to support us, and we still rely on you to support us, that we bring that change.

As I said, Americans kept their word in the agreement, not to touch Iran in any shape or form. And as we had 72 hour notice, all the centers in what we call, Syrian border were emptied, that there is no damage except collateral and centers. And Iranians will do the same. There'll be no more attacks on the Americans, or American bases in the control of the Iranian government. Other groups who are radicals, they'll be dealt with accordingly in the future.

In a way, by Iran becoming a nuclear nation, in full capability from what we call, mining to delivery of the Space Technology, nuclear materials to Keshe Foundation in the coming months, we control everything the same in the United States and in China. European nations are too weak to be involved in this, and they are too much in debts to do things. So we consider the Europeans and Americans as one group, the Iran and what we call, Middle East as one group, and the Chinese and the Far East as one group, and the three groups through Keshe Foundation, (:56) as we do not need to get licenses and certificates to what we call, transfer technology from one nation, or one group to another, as it all owned by us, it has made it possible for us to bring this game about.

I invite you Knowledge Seekers who've been waiting for bringing peace and Technology, using what we call, the "Ultimate fields of the Universe," to join us in Arizona. In due course, Iranian Keshe Foundation will announce their work, directly, we accept scientists from Arab nations, even the Israelis to come to Iran, and the rest, to work as one team, to bring a new Space Technology forward.

In a way, we fulfill the promise in 2024. And, as it says, it is "8," and it's a time of prosperity and good luck. And in so many ways, we complete this process, with what we know and what we share. Join us in Sanya and see the first Plasma Unit and enjoy being in it. The Keshe Foundation in China, the group will announce that a hundred people during the, what we call, the course of the session of the 4 days in Sanya, will be, will have a chance to sit in the systems. You have to register for it, a time will be allocated for you to be able to join the system, to sit and two hour session is given to each person. We'll bring the system with us and we show it's power, it's technology in Sanya, where the system most probably will remain behind for establishing the Chinese Space Center. (:58) The first leg of the work starts, then with Arizona, then with Iran.

Now you understand, we have reached the point of completion, what we came here, at least the beginning of the completion, and you as Knowledge Seekers are part of it. Join us in Arizona. I'll be traveling between Iran, United States, and China on frequent basis, to make sure the technology is shared equally. Lines will be set up, that the Knowledge Seekers in China, the minute they discover something or reach a point, can share with United States Knowledge Seekers and those in Isfahan. The same with the, what we call, Arizona group. You'll work on open platform and everything reached, will be shared directly between the three centers on daily basis. Big achievements will be shared instantaneously. Tests will be done commonly between the three points, that we do not create a parity, or one nation ahead of the other. We invite the scientists from Israel to join us in Tehran. The same as we invite the scientists from Saudi and Middle East, from Indians to Pakistan and the rest. Russian will be covered by the Iranian center. And in that process, we'll bring in a balance of what we call power. That the three systems will give us the point of equality, and takes what we call, "race out of the wars."

In the process of the Arizona, (1:00) you need to understand, in the process of Tehran you need to understand, in the process of China you need to understand, there is no nationalism. You work as Keshe Foundation, you work for peace and development of technology for Space. Most of you who work in these centers will travel from one center to another, to take your expertise, to learn from the experts, and work as one. But you have a base, center, those of you are in Arizona, those of you are in Iran, those of you are in China.

China was the first nation who signed agreement with us, for the new Space Technology. So, we showed the technology first, in Sanya. You will see some amazing technologies. And the technology, which stays with Chinese government and military when we leave China. Then it's the responsibility of the Iranian and the Americans to speed up the operation of ours in their country, that they are in parallel leg with the Chinese.

Race for peace starts with the race in technology development. And, it has taken me 40 years to reach to this point. And, you Knowledge Seekers have been on the trip with me for 20 years. Those of you who want to join, what I call, first three years, and most probably you'll stay for rest of your life with these research centers, sign in and join in Arizona. We will set up a structure for your arrival and the rest. (1:02) And from the first week you arrive, first couple of weeks, you go directly into research. We transfer technology to John in Arizona and the Keshe Foundation team in US, that once you arrive, you don't waste time. We bring you up to date. And then you start your research and development.

I hope as Knowledge Seekers, we start the first process and we carry on. In talking with the other nations, we bring the others in. We set up the course and the government will follow the course. It's not anymore 'Gans making' and the other things, its development of the new Space Technology using magnetic fields. And plasmatic magnetic field, and Cosmic Rays, which this knowledge has not been shared with anyone up to now, that we tested in Austria, that we were sure, 100% sure, that we can confirm the production of the

plasma, scientifically, and we have the data and all the confirmation of it. And now we are testing.

We have reached, we think, a transmutation of a fish, but we are not sure, so we are testing to go further to confirm it again. And we are in that process, and once we can reconfirm that we have managed to do the first transmutation, the first one was a dog which went to the Space with the Russians, this time it'll be Austrian fish. And, if we can repeat it, to replicate it again and understand it fully, we'll share it with you. And now we are in our process in our labs, in Austria. (1:04)

You got to understand, we promised to bring change through technology, and we are doing it fair-handedly, equally. We had to get the backing of a major nation to start it, and we received and signed agreements with the Chinese military and civilians. We promised we'll never leave Iran out of the equation, and Iran stays as part of the equation, equal in science and technology, that we don't create 'Cold War,' two nations. Iran and the, what we call, Middle Eastern group, will be that balancing point. Where leverage of technology being able and being available to, what we call, growing up nations, advancing nations, allows and brings a balance between what you call, superpowers. This way all nations have access, and does not become a race, it becomes collaboration.

Production of the Cosmic Rays, as I've been explaining to you, understanding a central point of energy of the man, we call it the Soul, which has been with you for two or three years, all has been part of this development. John will head the American operation in research and development. And other scientists which we'll bring in, I'm sure we'll receive scientists from all over the world in different centers, and the beauty of it is, nobody will aspire on the others, because everybody knows the technology, and most probably all nations have a connection, link into all developments, and how they develop it between each other.

In a way, we have set the promise of all the Holy Books. (1:06) All man will be equal, and all man will have access to everything which is in the Universe freely, food, energy, medicine, transportation, transmutation, understanding of the science of Creation. And, I have asked, and this will stay with us, our IT section will make sure, most of the laboratories in all three centers will be live watched by the others, that you can see they make a mistake, you can use their knowledge, and the communication will be as 'One Nation,' there is no race, it's collaboration, between the American center, Chinese center, and center in Isfahan.

In so many ways, we go back to the original operation of the Keshe Foundation, and this time as we did in 2013 - 14, new Knowledge Seekers broke the 129 Tesla, this time you'll break the Space Technology. I'm sure many of you would like to be part of this. Once we open the channels in next few days on the Keshe Foundation, what we call, store, register, sign, and we let you know if you're accepted or not. And as I said, nation languages, which is 32 of you, if you don't have one, collaborate with each other, finance, whatever, per month, to get somebody there for one year, or people who can, ?? don't need another part of the support to do it.

We try to keep out of the hand of the governments to play the game, as we've done with the Chinese. With Chinese we have an open collaboration, (1:08) it is in our structure of the agreement, that other nations are allowed to be. As when I was negotiating, I knew day like this will come. And as we have part of agreement, we'll stay the same. I'm looking forward, before end of this year, when the American scientists will travel to Iran, as the Keshe Foundation Plasma Technologies, to develop and share the technology of the Space with the Iranians and scientists from Russia and China. We are not in a talk anymore, we are in action.

And those of you who've been asking me, "Can you show something in Sanya where a lot of people..." You will see a system in Sanya you could never imagine could exist. And those of you who want to be part of it, you thought you tested it in Manchester and London, you'll go in a system directly, and you can feel, live Cosmic Rays, and understand how you transmute. We'll show many, many other things, step by step in Sanya. And, as I said, only 100 people will allow to use the system during the 4 days. You have to register for it. And, you don't need to pay for it, it's just that you want to register for two hour session to be in the system. And once we reach that 200 we stop. Then you can test it, you can become part of it, and then you understand the future of mankind.

I hope I gave you what I call, the 'good news' of every February which comes up. And now you understand why we did the Soul teaching, why we did the Cosmic Rays, why we did the Gans's and everything else. And we have reached that pivotal point. (1:10) I'll try to be in all three centers as much as possible, once they start going, that the knowledge is first hand across to every Knowledge Seekers in every nation and government. Now upcoming meetings with the Iranians and Americans. I'm sure we'll have number of meetings with the Chinese when we are in Beijing in March. We'll come to this point too. In a way, they finance each other to become better with each other. And this is what's the whole aim of the agreeing, the terms with the Chinese.

I'm sure I will have a tougher negotiation with the Iranians because they don't trust anyone, except themselves, and don't even trust themselves in it. And I'm sure the Americans who will embrace it, because they want to match the Chinese and the Russians, then we get a peace race going, because nobody can come with advanced technology than the Creator. They find out there's something always more advanced (than) they have. So we collaborate, then we make One Nation out of this planet in research and development.

In a way, I thank you Knowledge Seekers for supporting us so relentlessly for past years. And now I have given you what you've been asking for and what we have to achieve. And the rest is in your hand. You saw me, I put 4 years of my life in the Cinzano in Italy, to make sure Knowledge Seekers understand the basics, even though you never understood. You always went after the MaGrav system, and now you understand how important the MaGrav system has been, (1:12) in the Space Technology, once you get to Arizona. John has plenty of them for you waiting. And then you'll see what you did not

understand, and where you missed the knowledge and the technology. We go for a break and when we come back we answer to all your questions. Rick, if you like to take us for a break.

>> **BREAK** >> 524 KSW February 08, 2024 (1:20).

K- How do people connect to Vimeo?

R: We had a link there earlier in the ... I posted to the chat. There's one general link to the site, let me get that lined up here.

K- Oh, that one. Can you post that to my private chat, private, what you call it?

R: Sure.

K- ... Vimeo is where the Keshe Foundation TV sessions are held as well. Now you have both, you can listen to the Keshe Foundation TV recordings. And we move from the Keshe Foundation Knowledge Seekers together.

R: Okay, I just... Reposted the main Vimeo link, so I'll put that to your site, is your place as well there Mr. Keshe. That's the one that's to the main site and people can access the other parts depending if they would like to look at the workshops that are already posted and recorded or to look at the live streaming.

K- Yes, it is. The question, is this link static. This link is always there. We've been on this link for past 3-4 years, (1:22) since we started the KF TV, with Vimeo. Now that Vimeo has bought the Livestream, we have brought the two together in one site. And from now on, they all can be, what you call it, on the same license. So the teaching and the TV section have become into part of the same structure.

Any questions?

Q: ... Hello Mr. Keshe, are there any new information about the delivery date to the Power Unit, the Electric Gas Unit?"

K- We're trying to complete it by June. We're waiting for the Chinese side to complete. And, once you see these Cosmic Rays, you understand the system has always been there. Now we're releasing it in a different form for it, yes. We just upgraded it, we're testing a system for it. The system has to be fail-proof. And ... now we change into a much condensed system, compacting. And it makes it very easy for us to produce and to release. The, if what we're looking, if the, before it was, let's say, a suitcase, now it's a small travel bag case, producing the same. and this has to be in collaborated with the generator. (1:24)

But on the other hand, as maybe you understood, today we are going through this plasma system to create energy and gas and everything else. That makes it totally different for the application, and makes it limitless energy source. But that is to complete by the, what we call, in research and development, but we already see the what you call, the work of it. We are ready to initially launch this out in next few months, all together.

Any other question?

Q: ... Does the Home Enhancement Power Plasma Unit, support devices which need small amounts of energy, like PC or TV etc., equal to devices that need a high amount of energy, like oven and heater, etc. If not, would the fit be better to support devices which need less energy?

K- These systems are already made and shipped into Austria, from Iran. And we had problem, and I was told, earlier on this year, that we're going to process of sending it for testing and certification. We had to do some adjustments with the system which came from Iran. And there was a lot of testing done to bring it to the point that we could... our team could be happy that it'll pass the certification. (1:26) And this is going through now, it took a long time. The units were shipped long before from Iran into Austria, they were all there. And it goes up to 3 kilowatts or 5 kilowatts, but it's what you call, applies to anything. It's a normal system, you can use it for low or high usage.

Q: ... Do you have to be a scientist to come to Arizona?

K- No, no. You have to be a researcher. We are not bringing people to stand there and watch.

R: You mentioned 90% research and 10%...

K- They'll learn during the teaching year of the research. This is a "hands-on." And this is there to deliver the technology. We'll get people with their PhDs and professors and 'God knows what,' they'll be on the same level as you, anybody else. I think for a while, most of the time, Knowledge Seekers have to teach the world scientists how to look at the Cosmic Rays and how to understand it. And most of the scientists joining on this level will have to... We created, we bred a new, what type of scientist, with the Keshe Foundation. Where there is no degrees, there is no qualification of being there. Your

qualification is understanding and being, applying it. (1:28) And, this does not go with, well with many professors who have to be, you know, the working with other professors and to have a title. They'll find out they work with a man who was a hairdresser, or he's a farmer, but he has more knowledge than them.

In a way it's good for them to understand the knowledge is everyone's. And, just being a professor doesn't, what you call it, 'wash with us.' We're all equal, we share equally and, sooner or later they'll find out that hat they used to wear as a professor and a doctor and whatever, has no color in our structure. Being a Human, sharing it and being equal and that will bring a lot in. We won't have separate canteens for the, what you call it, professors and scientists. Maybe couple of chairs outside the lab in the garden they can sit, if that's their office. This is the beauty with this technology, because we teach what you call the Soul, what I call the 'Central Energy.' And there are no professors in that 'University of Soul.'

Q: ... Hello Mr. Keshe, excuse me, what's the difference between Cosmic Ray Plasma Communication Unit in the Store website and the UBESUS (Universal Body Enhancement Spaceship Units) and Head Unit, or Headphone you mentioned in your teaching? What kind of equipment will provide the experience in the Sanya Conference and how does it work? (1:30)

K- You'll see it when you see it. The Head Units, Communication Units are connected totally different than the UBESUS units. The UBESUS units are connected to the Wellness Centers. And Communication Units are like a network, your telephone company. Just because you have a telephone doesn't connect you to MRI system in the hospital, does it? They're two different system, two different, what you call it, connections and structure.

UBESUS now become, they look outwardly more or less the same, but the structure inside is different. It's just because it's easier for us when we had the material to use. We still have the, what we call, the MaGrav unit housing. And we are using them for convenience. And we produced many for the American market, which are white. So you see most of them in that proposition, in that level.

Just let me see something one second. Just bear with me please. Let me see if I can share something with you. I know my... our people will go crazy with this, why do you do this? (1:32) But it's part of being a Keshe Foundation, in the way we always worked. I have to check something before I share it with you. Let me see what I have exactly. You Knowledge Seekers analyze every piece of the pictures. So I have to check, I don't give you too much. What you see, as I explained to you, that the Keshe Foundation work, and the research and development of these systems, is very much complete. You've seen this system in ... this is more advanced than what you had, what you saw in the, what we call, London. And, you, this is what I call, just because it's the same structure. This is what you get, as UBESUS unit, and as a Communication Unit. They look the same. But, internally and structurally are different. Connected different as well. And this is the Headphone as you've seen, many of you use this kind of Headphone, and this kind of

system, (1:34) and this is a mass production of it. It's not that we have a few pieces. They're getting developed, they're getting... And as we go through the system, as we are developing, we change inside, we change the flow of the system. The original Headphones are nowhere in working the same as these, and the same with the operation of the systems. It's a convenient system, it costs us hundreds of thousands of dollars to make these units, to manufacture them in UK. So, we use that, and it's become like a symbol of the new structure.

And, you have the Communication Unit, it's like a mobile unit, and then you have an UBSUS unit, which is a Wellness Unit. And they are totally different operation connection. And we use them for different applications. The, what we call, the systems are, and I'm sure, that even these units will be reduced in size. I can see this to be reduced to a pocket size in next 12 months, 18 months. So, what you have as UBESUS unit or a Communication Unit in this size, will come into a pocket size, and most probably in the future, like a mobile phones, where no antennas, no satellites, no breakthrough. But totally different emotions. When you speak to someone on a Communication Bundle, you feel their emotion. You sense it, it's like, you know, when you're with your lover and he or she touches you, you feel that touch of love. (1:36) This is what's going to bring. It's not anymore, "Ah, I love you darling." It is, "I touch you, I feel you." And you feel the same.

And it's the same with the UBESUS units. With the development now in the Cosmic Rays, and the way we are developing them, we see this as a... it has to come like this. Because with the... what I see maybe in two years time, your Communication Bundle reduces in a size that you carry it in your pocket. And, you want to go from home to supermarket, and then how you going to get somebody to get you back home? You carry the unit in your pocket. You arrange your ?? own transmutation. And, it is feasible in next two to five years, that the Communication Bundles with transportation system will be all in one. Pocket size and we all carry it.

This is a reason why we went, I decided a few months ago. We went for what we call, cooperation between Iran, China and United State. One of the main things is breaking down the barriers, the borders. And I can see the Americans and the Chinese will force that the systems will have a control that who can transmute to United States, that kind of things. But I don't see how they can do it. They don't want to lose control and everything else. (1:38) And as one of the Chinese securities recently reported, Keshe is in China recruiting spies. And one of our Knowledge Seekers supported that. And they believed, you know, Keshe is here. I'm there to change the structure of the 'no spies.' And the Chinese security went into alert that he is here to spy and blah, blah. Now they have to understand the spy on themselves, not us. And ... yes we create the spies for the Creator, if you know where he is, find out where the information goes. This is why you'll see some of the top Knowledge Seekers around Keshe Foundation will not be around Keshe Foundation for these reasons of deliberate damage.

And we come gradually to the point of all nations receiving the same thing. And the biggest problem for our government will be this system in front of you. You use a

Headphone, now with a mobile in your pocket, or hands free sets, You talk, you use the same mobile in a different structure, with a handset, with the headsets, free headsets, or with a wire connected headset, and you transmute. Isn't this what you lot have been doing on the system, in the past few months? It's addition to the communication, it's addition to transmutation. Now you can see what we set up, and how we set up, and how we organize things with it. These units can be miniaturized, but we have to understand to what level we can miniaturize them to, (1:40) and then go to the next step.

Even while we monitor, we collect, have the... how we will develop these systems, how we will release these systems. It'll bring in a lot of collaboration and cooperation with what you call, government. (Rick, you have to change the screen.) In the systems to come you will find out that communication becomes part of transmutation. The communication becomes part of the structure of moving around. You transmute and communicate at the same time. You could be, we're testing this. You Knowledge Seekers, in past 20 minutes, without you knowing, are connected to the Cosmic Ray. We are monitoring you. We are monitoring how you are behaving, how all of your Souls are moving. (1:42) In the past 15 - 20 minutes, we have put you on the system. Some of you might feel different. Some of you might have felt or feel something. It's what we are doing in the background. And this is how easily we can test, we see, and how your Souls is totally flat.

And this is, I asked our team in the background to update me continuously with what they see in the monitors in the background, and how you are connected. It's not anymore how you see it. It's how we see and how we are interacting with you. When I tell you, you've seen these monitors before, just watch what is about to come. And you understand at this minute, at this moment, you as Knowledge Seekers are monitored through your Soul. And this is what we get in one of our monitors. And you all know the line, which is the line of your Soul. You've been there. You're experienced in it. And look at how flat you are on your green line. You see the green line sits more or less on the flat. Some of you have battled with your physicality and the Soul of Physicality (STP). but the green line in the center line is more or less flat. Means we have reached you, we're touching your Soul.

Now you understand, when we say, "Governments will have a say on this." And we have a say as citizens. (1:44) This is when physicality and your Soul, physicality is running around, dictating, "Yes you want, you don't want." And this is, how many of you? Nearly a hundred of you. Now, if I want, I can transmit information on top of the green line, which we know how it's created, and call you all to go home and have lunch. To call you all, go and have a Coca-Cola. You'll search like crazy to get the Coca-Cola. This is the power of the new technology. Through your Soul, I can dictate what your physicality will do. You call it a dream, I control the dream.

And we have shown you many times, when me tell you go to see your uncle, go to the Moon or whatever. I especially to show you this, I asked the team in the background to monitor. And if you look in your, you cannot see, if you look at the monitoring system on the, what we call, the people who are present, you look right down the column, you see Unit 4 and Unit 5 operative amongst you. On that, in these list, if you have access to it, you see Unit 4 and Unit 5, which is our system, connecting to you, directly to your Soul,

is operative for past 20 minutes. I can transmit on any of these two channels to, for you physically to do something, or for you to change things. 300 of you joined us, last time when we announced it. (1:46) This time I decided to leave it, especially for those who are here.

And this time you are in a plasma system, for the first time. Think what emotion you've had in past 20 minutes, how you felt, if there's any changes. Or see what happen, changes in next few hours and days with you. This was a promise, I'll make a peaceful man out of the man, and I've got all of you on a straight line. Now you understand the power of the new technology, and what we tell you, we'll show you in Sanya. No government can control this. You receive advertising and you went and took a Coca-Cola, now we deliver information through the Soul and you are like a slave to it. The Soul decides and the body follows. And this is what is to come. It is not what is to come, what is here, you are now, in past 20 minutes, part of it. You are in it. Now you understand, how the game is played, and why you have to be in Arizona, you have to be in, what you call, Tehran and in China. (1:48) The technology is so advanced, it will be shocking for many of you to know what we have the capability to do and deliver.

Any other question?

Q: ... Plasma food, is this something that we can eat now? And can you tell us more about that?

K- It's not a food, it's a field. We provide the fields that satisfies the energy needs of the body of the man anywhere in the Universe. This technology, what part of what you see, is the preparation for the next cycle of development will come in maybe next two ?? 3 years. Anywhere in the Universe you have access to ?? Chelab kebab, Sunday lunch and Sunday dinner and Thanksgiving Day, any day of the day, 24 hours a day, anywhere in the Universe. Because once you put the links onto the Cosmic Rays, it's accessible to every part of the Universe.

We promised there'll be no hunger, and you've seen it today, I can deliver it to your Soul. And I always taught you that, by using the Soul of the Man (STM), the central energy body of the man, to absorb energy from Cosmos, from environment, and feed the physicality, the physicality doesn't need to kill for and destroy for. (1:50) And once we do this, doesn't matter if you're a man, the beast, the lion, the cat, the tree, the man in Space, you all get the same. It's just, in a way, chewing it for you and you just swallowing it.

R: Mr. Keshe, we had a question last week from Joel, whether the information and data would be released, on the testing that's being done on these Friday sessions and the transmutation sessions.

K- No, no, no, no, no, no, no, no. We don't do that.

R: I thought you would say that.

K- We look for people, you get invited privately. We've done that in the past two weeks. We have invited one of the Knowledge Seekers to join us individually. I spoke with him this morning. And some of you who are here, you know. We invited four of the Knowledge Seekers into a special session this Monday. For two or three hours. We were looking for testing and seeing the response, what they achieved, how it is. And then, the other parts come. You'll receive an invitation, in a small groups of two, three, four people, in months to come, to join in these sessions. We had a beautiful time with Knowledge Seekers, last Monday, for about two, three hours. It's not just that we do the big sessions, like in third week. Now we've seen the development, we bring in Knowledge Seekers, we know, we enjoy being with them, and we understand the connection to the work of the Foundation, and you spend two or three hours with us, private. (1:52)

R: ... You won't be showing the behind the scenes of the technology, how to do it, and so that others replicate it, and so on?

K- No, it will not be replicated, no way. You lot could not replicate a MaGrav, why you want to the plasma stuff. You're still at it, six, seven years. The system will be shown in China, is hidden. You will see a sealed unit, you never know what's going on inside it. Only will be opened up to the military and the Chinese authorities. The same will be done with the Americans. The same will be done with the Iranians. These systems are a combination of the flight, combination of living structure, planetary system. They create motion. They'll create food and everything as well. It's like, it's literally like Earth. We have created such a technology. And we're not there just to talk, it's getting tested today. Every day new things are tested. Continuously we add, we test.

Now the same system is feeding the fish, growing the seed, creating power. Knowledge Seekers who are on the Wellness Center side, UBESUS are in it. And this is what the system is. One system, now as we talk, as during the teaching, has been doing it, and is doing it. We don't build a system for food, (1:54) we have understood the concept of the life. And as our team says, "The fish is hardly eating." Because they are getting the energy, compared to when they were brought in before. They used to eat when they were with other fishes, now they are separated. In the beginning they still go through the normal habit and gradually, they don't eat because they learn to absorb the energy. Literally, by coming to the surface, touching the protein levels, they absorb the energy and they go down. So they don't look for food. And we are observing it, we start to see it processes the same system.

We have created a replication of a planetary system, and we are testing it. And you will see it in Sanya. And then you understand. As we do, feeding the fish through the system, we have access to the energies, which now you saw the picture of, we have access to your Soul. The system is with you, if you, I don't know if the, as a, what you call it, participant, or as those who are there, you can see Unit 4 and 5 is working in the background, it is amongst you.

I didn't want to announce like last time, 300, 400 people just come in, just to be in that session. Now it is a session, you're in it. You've been loyal Knowledge Seekers for years, and it's not just for a show, who wants to come and go. And we are monitoring everything, in the background. (1:56) And the whole structure is how we share this knowledge with the others. The whole system sits on this basis. And we are monitoring you continuously in these teachings of today.

Now you see how flat your Soul is, and how a lot of you have come in line in a physical and STP. Much closer than the big jumps you saw before. You can become a rebel, but we bring you back in line. The system does, continuously monitors, satisfies the need, and you can see the difference. How flat you are. Now you understand. You can take a screen back on, Rick... Any other question? You are now, not only in the teaching, you're part of the research at this moment of time. (1:58) In the few next few months, we can separate every single one of you, one by one, and see how your Soul is operating. Because you're all coming on a given channel number. We see who's coming in, we can connect you to a link that separates your Soul.

This is the advancement in technology. And, it could not have happened if we would not be able to make a continuous supply, or what you call, continuous connection to Universal links and Cosmic Rays. You tell me what you're dreaming and what might happen in your head and where have you been in past half an hour or so. Do you suddenly go into a dream land? Do you see something? Do you feel something and why wasn't there half an hour before? Then you understand how much closer we are to you. We don't announce anymore the sessions what's going to be, but from now on when you come into the Knowledge Seekers you are part of the research.

Any other question?

Q: ... How do the Tesla scalar waves compare to the Cosmic Rays? (2:00)

K- Have you ever stood in the middle of a motorway?

Q: No, I haven't.

K- Well, you know, you stand in the middle of the road, some cars come to you and some cars go away from you on the other side. It's the same cars, so it's the same. Are you talking about the wave coming to you, or the same wave going away from you? It's the same wave, we have chosen different word for it, when it approaches us and when it goes away from us. So there is no scalar wave, it's changed the way, changed the word, coming to me and going away from me. Scalar wave is when you're coming to me, and from the other side, magnetic fields, what's going away from you. And the scalar wave, because they're on a higher strength, you cannot stop a car and reverse it back to you. When you have a car, it smashes through, comes through. And that's what they say, you cannot make a Faraday cage for a scalar wave. Because it's coming from different strength, it goes through the system. Faraday cage when you make, because you decide the strength of the matter state, you block it, you can stop it.

When you understand the making of the Nano coating and understand combination Nano coating systems, you can decide if you are a Faraday cage to scalar waves, or to the waves going from inside out. (2:02) Because you built the barriers for it. We are testing this now in Keshe Foundation, in our laboratories, in a very different way. For understanding the dimension of the fields.

As we do not put now people who go through the wellness into the systems. We, as I was telling one of our Knowledge Seekers who's going through the process at the moment, we're treating you like a man in Space. Your system is outside in the Space. And then, as I said, we are progressing step by step, very fast. In the Head Units you use, in the UBESUS units which many people have received, are using with their, what the volunteers with the Wellness Center, we put your heart inside the system. Now we treat you like a spaceman. You're in somewhere in the lab. We can put a million of you on the shelf and connect you to it. Because that's how the real condition is. And now we are replicating it. And we've seen the result immediately.

We don't need to make a system, put you in it anymore. We have made systems that in them, connecting to each other, we use the environment for. And you can imagine, we can put a system in Arizona, a system in Tehran and a system in China. And in these three systems connecting to each other, we can cover everyone on this planet, because you're in the environment. (2:04) And this is very, very feasible in the next maybe three years, five years.

We need collaboration in production of radiation in Cosmic Rays, which are different than Cosmic Rays. And that knowledge is not being shared yet. Once we share the knowledge with the cosmic radiation, which is a lot of knowledge still needs to be learned, then you go through it, then you'll see the changes. This is like we haven't ever shared the knowledge and the understanding of in the world of Wellness. A lot of you take B12 and a lot of you take other things. And I always said, B12 is a radiation source. B9 is a radiation source. And very soon, we start using these in Wellness Centers, but as a magnetic field radiation, as sources of Cosmic Rays, the same as B12. But now we don't need a B12 anymore, because Universe makes these Cosmic Rays. It's in abundance in it, but we didn't understand it.

Cosmic Rays are different than cosmic radiation. Two different things. And this knowledge is too soon to be in the hand of the man. They create mayhem. Unless they understand, they become peaceful, then we teach it. (2:06) You have Cosmic Rays in your body, but certain organs in your body create cosmic radiation. It's different. Has a different purpose.

In the world of physicality, you have the liver, the storage place, you have the stomach, digestion piece, you have the brain, the controller part, you have the intestine for absorbing different fields, you have the kidneys for cleaning out what is not needed. All these field strength is in Cosmic Rays. When they hit a condition of the, what we call, life, not necessarily human Amino Acid (AA), any other Amino Acid, you sustain life,

these rays convert their strength to an organ. This is why all animals have these characteristics, because this comes in, not an RNA and DNA, this is part of the structure, field strength of the Cosmic Rays, and Cosmic radiation. And man thinks, blah, blah.

If you know which strength in interaction with Amino Acid, leads to the field strength of getting rid of the fields you don't need, Then in the matter state converts to kidney, converts to the, what you call, bigger intestine. (2:08) If you know you need a place to know how to organize the operation, you call it the brain, these field strengths which control operation, once a plasma is created, is within the Cosmic Rays. But man never understood it. Whatever it hits, it'll have an eating habit, you have a digestion system, you have a rejection system, it has a storage system, because this comes as part of the structure, fuel, the spectrum of the Cosmic Rays.

And then you have a cosmic radiation, which don't carry this, but is a transformer. And Man hasn't understood this, this to you is a fairy tale, but now you understand, where and why, the Amino Acid of the certain condition, which you call it, the living thing, carries, doesn't matter where they come, the heart, the kidney and the digestion system and the rest of it. Because, it's part of the Cosmic Ray. It's a package of the plasma of the Cosmic Ray. And then in the matter state, takes the physicality shape.

And we can control that now. And that's why you can produce a brain, you can reproduce a heart. And, if you understand how advanced we are, we understand this how it works. And when we release, and if you were with us in Ghana, when we did the research with Ghanaian University, we chose to show this with a Zebra fish. You take a heart of a zebra fish out, it'll produce that heart again. It's not in RNA, because zebra fish through its structure is connected to Cosmic Rays, that information stays and it reproduces it. (2:10) In our lab operation now, we're using zebra fish. Because, if by mistake I leave a heart behind in transmutation, once he arrives, he'll create that heart. There is a reason we use it. There is a purpose we're using it. And we can't explain everything to the Knowledge Seekers, because your knowledge is not deep enough in the world of Creation.

Now you understand how we work and how the process is done. And this is what I call, the knowledge is not a magic. You have to understand the science of it. When we started using the Zebra fish in Ghana, we had a purpose for it. And now we are using the same fish in our lab testing, in our research. If in transmutation I miss a brain, within a minutes of arriving, it will produce a brain itself. Then I can see what it is. I can see the operation. Where the mistake was, where we have to adjust the system. I cannot do it with a human being.

We had a case in what you call, one of our tests. A fish literally died. And it was put back into the main tank with the other fishes. (2:12) And I was told that the fishes nibbled at him, nibbled at him. And like they were giving him kiss of life. And then suddenly the fish which was dead came back up. They produced what it needed inside it's organ to get life back. And by all principles, if you... the fish should have died.

Now you understand. Our research is very deep, and that's why now, it's time to share this knowledge with the Knowledge Seekers across the world, that no government can touch. Belongs to the citizens and then the government have to structure how the governing needs to be done.

Any other question?

Q: ... Do I understand right? We are waiting till we better understand the science of the Cosmic Rays. But meanwhile, if there are scalar waves coming towards me, do they reach my DNA and this part we call, junk DNA or...

K- All these are the terminologies man who doesn't understand has created.

Q: No, I mean that. (2:14) So, to activate the other ten strands which man calls junk DNA, are they touched by scalar waves and then would help man, or would help also me personally, to better give away, or give, transfer my wishes towards the other men?

K- Oh, you can use it, or you can abuse it. I cannot control what you do with it.

Q: No, of course. But my aim is helping, giving a helping hand whenever I can. Because over the last, sort of, years and years and years, I've come to the point where I found a sort of tranquility inside me. And try to put my knowledge or my feelings to the others only in a positive way and not in a negative way.

K- Yeah, that's all depends on the people. But with this new technology we can control a lot of things.

The reality is that we monitor... I want to show you something very interesting, because this is coming from our team in the background, they are monitoring you. And you will see something very interesting. As we are monitoring the system, as we are running in, across the system in a, in a different way, (2:16) our team is literally battling out with you, your own, what you call it, fields. We are recording it, we are not doing anything with it. And, have a look at this. I'm going to share something very, very interesting with you. Let me share something very interesting, and you will understand it in one go.

This is really as Live as we can get it with you, and this is how technology, no scientist, no scientific organization we'll share it with you, this way, the way we have done. This is, as I said, these are the live fishes, Zebra fish which is in our research lab. And our people know them, one by one. They've been with us for a few months. And this is how, in the near future, we can dictate them where to go. The setup is set for them, to decide which one will move out, will want, which one out of the population will transmute. This is a Live fish tank picture from the Keshe Foundation laboratories.

But what is interesting, when we told you that you're getting monitored, this was your reaction, you all panicked. In a way that you didn't know, in a way you're getting a spied on. But, what is interesting, we're still in the center line, we control your Soul. (2:18)

Physically you're panicked, every yellow line is your physicality. You're jumping everywhere, within, between your Soul and the STP, and your physicality. But the central line, which is your Soul, it stays calm, because it knows it's in the safe hand.

But you, if you look at the yellow lines, and you look at the purple lines, the yellow lines is your physicality, and the purple lines is the STP. How you're panicking. You haven't gained trust with it. And when I talk to you, confirming to you that this is what you, you know, we are testing you, you calmed down, this is you now, back again now. Your Soul still stays the same. This is you in panic. You thought you're getting a spied on. And you switch, but the Soul, the belief, stays solid. There's no abuse. And you can see what mayhem you created for yourself in a few minutes, when you didn't know, yes, oh, wow, you talk, whatever. And now you calm down, since you're in past five minutes. If you see it, the Soul is more or less on the same structure.

You're short. You take from us. We give you, you take, you balance. And one of these points in the future, we let you to transmute. Your physicality will drop. You become ready for transmutation. And that's it. So we can choose which one of you, (2:20) like the population of fish here, go to transmutation through another link. This is why we call you to come to Iran, in Isfahan, come to what we call, Arizona, and or in China, and become part of the research of the Keshe Foundation into Space Technology, which is the way Space works.

Go back to what I always said, we don't see no wings on Earth. Stuck to it and no rocket and no propulsion engines and nothing. Rotates within the field of the Cosmos, creates life, creates an energy field we call love, and is as real as it can be touched. Now we have access to that technology and now we have to nourish it, and this is the freedom of the man from shackles of physicality, the hunger, the everything else which goes with it, even the kingship.

Even the Kings will come to beg for use of the technology. Because they understand, at the end of it, they are what we call, feeble and they are not immortal. As we've seen, we heard in the news, the biggest one, I call it, the shortest living King of the present time, Mr. Charles has been diagnosed with the Cancer and he don't even want to tell you where the Cancer is. It's hard when you get hit in your testicles, as we say.

And the, what you call, (2:22) the only solution is to find a way, that all these diseases which come to us through dimension of absorbing other energies which is not balanced, the man find that the only solution is to feed through the Soul. Let your Creator feed you, stop pinching on the side with other lives. One of these fishes is the one which was dead in that tank. And now these fishes are moving around with each other. And this is you lot, you still have not gained trust in the Keshe Foundation and then we see it. But your Soul is with us.

Q: Mr. Keshe, does this relate to me personally?

K- No, you're part of those little waves in there. It's on one channel. I don't know. What is the figures on the channels? You have 99 people on one of the channels, it's the Soul of you 99.

R: Incidentally, the number of the names of God.

K- Two of the systems, which are the ones you're controlling the whole scene. If you look at the attendees, you have... If you promote the attendees into number four or five, what you call it, panelist, or you can leave them where they are. They, these two units, you are, they are interacting with you. (2:24) They are taking information on the level of the Soul, and taking information on the level of your physicality. And that's how we are monitoring you.

In the near future, through the same process, field strength, we can pinpoint with a 100% accuracy, even the chair you're sitting in your living room, and where your Soul is. If you are flat with respect to your physical body, you're sitting up, ?? when you're upside down. We have that knowledge now, but if you make it accurate, more detail, you don't need the GPS, the satellite is your Soul sitting there. We can pinpoint it to the accuracy. Even the new satellites don't give you accuracy of pinpointing.

Any other question?

R: ... Okay, I'd like to get to the question that I've been holding back on here from Jefferson, that's probably why he posted it twice in the Q&A.

K- So, we don't answer it?

Q: ... (2:26) My question is, can we take from our Souls for Mitra and her daughter? If so, how should we go about connecting our Souls to their Souls?

K- They connect to you, then you're connecting to them, if I can put it that way. If the desire to be with them, you will see it, you will feel it. When you see Mitra, she's like a light, appears as a light. And when you see Mitra with her daughter, she's always a ?? fridgling little light inside a bigger light. It's like a mother protecting, developing. I have the pleasure of meeting both on a frequent basis. And I know when, even she runs away to play, I can see. She's busy somewhere. And this is, if they chose for you to see them, they are there for you to be, to connect to. And it's an honor and a privilege to be in that point of position. And, is not how you can connect it, if you become at the level of them that they connect with you.

A few days ago, I could see the daughter to play, and the way she was. And I could see the light of the Mitra, how confident was that, "Okay, let the child play." And how it displayed itself into two lights and coming back together, testing. (2:28) It's not a vision, it's understanding through the structure of the Soul. And it's, if they let you see, and feel.

Any other question?

Q: ... In the 104th Knowledge Seekers Workshop, ... you teach us about music. You mentioned about a virus in form of music, a form of noise. Can you explain a little more about that? ... repeats ....

K- The interaction of the field, and especially when you have the specific strength, when adds or comes in contact with, (2:30) creates a friction. We see a friction as a light, we hear a friction as a noise. When you play a violin, you put two strings and you rub them and they create a noise. Viruses have the same. The strength field when interacts, create a noise, we call it a music, the sound of it. And we get to know these noises very, very easily. They become part of our Soul vocabulary, the physicality. It's like a wind, when it hits you, when it contacts you in your ear, you hear, and with a different noise of the wind, we assess the strength of it. And what it can do, what we call a breeze, it's not just touching, we hear it in our ears too. When it's a hurricane, we hear it in different ways, the same ?? field but stronger. It's the same thing with the virus, it's the same thing with the energy packs, in the Universe. And how it touches us. And we assess it, how strong are we against it, can we stand it?

I was traveling yesterday, in the car, and the person was driving, "Can you go on the Internet and find out what's the speed of the wind?" I said, "We can feel it, because it's shaking the car." "But I want to know the speed, what is the next, if it gets stronger we can stop." And, as usual, we have our friend called Google, it says it's between 26 and 30 kilometers an hour. And in open, a little bit wider. And the night before, (2:32) we had the same thing. I was with friends in Amsterdam, and it was raining a blizzard, and rain, and then it's quiet .. , and lunchtime, we couldn't go out anywhere. And we said, this... again, we wanted to know how strong the wind is, and you know, okay, six kilometers, but with the rain. And from it, and then it comes summer time, we stay in the same wind, and we call it desert, it brings joy, because it cools you down in summer.

And with the noise of it, and the feel of it, it was the same with the viruses. Different strength, when they touch our Soul, we know what they are. Are they danger to us, are they something nice? And we bring the strength which matches them, that they cannot touch us. And this is how things are, this is how things take shape. And we learn it, it become music to us, we know if this virus, with the noise it makes with us, is dangerous for us, is healthy for us, and the rest.

We know already this, but due to materialistic condition of our choice over thousands of years, we ignore it. It's a background noise to us. But now we learn that it's another noise we have to consider. And we become good at it.

Any other question?

Q: ... The ones who are connected now since 20 minutes, (2:34) that was over half an hour ago, can they also receive food through this connection?

K- No, no, this is for us, we are collecting data. It's for us, and it's, we are learning how you are, the fields react, what we have to monitor. We'll study these pictures in depth in the next few hours and days. What we missed, what we saw. It's not just taken to be there. Every picture is set, analyzed. I spend hours and hours analyzing, changing, because of these things. And...

R: Well, can people expect any particular benefits, or is it more you set up your own trip, and if you have benefits involved in that, you feel in your interactions, and that's up to you? Or, like it's mostly for your data collection.

K- It's more...

R: But people have experiences during this time, they, you know, notate different, maybe even, very profound experiences going on?

K- Yes, I mean, we... when we did a test, this week, with some of the Knowledge Seekers, the test is so, that what the response we got back, after the sessions or during the sessions, is so profound, it's so profound that they realize now they have a capability, there is a second part of their lives. (2:36) And they're still connected to emotion or whatever, but some of them are becoming aware of the power they carry, which is in their hand. They decide where to go and how to go and how it feels. They decide to be somewhere with it. But we provide the facilities for it to become. As I said, in a very near future, these technologies will be handheld, and maybe in 5 or 10 years time, it'll be like a chip. We put in a body and with the same control that our thoughts decide, our Soul decides, that's it, we go there and it will become spontaneous.

Join us in Arizona from the Western world, join us from Middle East and Russia in Tehran, in what we call Iran, in Isfahan. And join us in China, hopefully with the Chinese in Sanya, where we break the borders. Those of you who want to be part of the Chinese structure, it's the same structure, same thing as you want to be in Iran, in Arizona. But in Arizona we need at least a hundred Knowledge Seekers. That it doesn't stay, it expands and amongst you, you bring more. And the facility is already there. The Wellness Center Arizona Keshe Foundation has been sitting at John's, and he said it's empty for three years. "What are we going to do with it?" I said, "Now you got it." And as you know, he headed the research beautifully in the past. Now, it'll go back to his position. And, we are very, very choosing who we choose. And, the system is as before, you have to complete everything very fast. Because, I'm sure, (2:38) American government will have the same number of people they want to put in the research. And, most probably other countries.

Q: ... What is the process for acceptance in Arizona as a beginner?

K- It's not a beginner, you come in, you get your hand dirty. You got to get in, and you might study day and night to catch up, or as I said, "I don't want to be a tomato, you got to catch up." The link will go up in next couple of days. It's a very straight forward, we get a lot of people like to be, and then this and that, there is a... The fee which we're going to agree with Arizona and with our structure. We, last time was, 10 years ago was 20,000,

we're trying to keep to the same structure. Last time we gave a limit of 8 people, this time we give a limit of 100, because it's literally day and night work. You have to bring everything else, you set up your own teams in the background, to work in each group with you, could be ten Chinese and five Americans and two Germans and whatever, to do the work outside in collaboration with you or come up with the problems you have, and then we structure the system that way. And you, with our experience of our past, a lot of people wrote but they couldn't financially support it, it has to be there. You find as a community you sponsor people to be there and you have to support it for three years, or you personally can do the payment and you go through it.

And with setting up of the bigger structure, equipment, machinery and everything else, in development of the New Space Technology, we go back to our investments in Markray. And we have to sort, Markray is more or less now sorted out by end of January. (2:40) And then we go for the next phase of bringing it back into operation. And I'm the majority shareholder in what we call, Markray. And Markray, once we complete, we already have signed intellectual agreements with Markray, so we activate what we already agreed and it's signed into the company books. I'm not telling you a secret, because we have intellectual right agreements with it, now we activate what we signed for.

Any other question? Just wait for next two, three days, sign, make sure your payment is due in, and then we know there is a seriousness, because I like to be, but I don't have a... Do all your work before you come to us. And, I think within the next few, two, three, four weeks we close. The same will go with China, Chinese participants can do the same. And, the same will go with the Middle East and Iranians, and most of the other organizations. This is part of the structure. There is a reason we chose Arizona, and this was a discussion we always had, even the Governor of the State, a few, to few years ago, and with his office that, Arizona being near a desert, allows us to do the testing. Isfahan is literally next to a desert, and at the same time, it's my fatherland, is where my ancestors come from. And, what you call, Sanya, is the center where we can test in the oceans. And it's perfect for us in every way, shape and form.

But once you open up register complete, (2:42) then if we security-wide reject you, you'll be refunded immediately. Because we do a very strict, what we call, security check. It'll be up, the application form will be up, registration will be up, and we close it very, very quick. Because I know the American NASA people have a few people lined up. We have a very good connection with them. They would like to know, now they are part of it, as part of NASA Keshe Corporation, and most probably we'll see, what you call, the other parts of the American Space Technology joining us in it, and the same with the Russians and the rest. Just give us two or three days, it'll go up. Because I discussed that with John this morning as well. And the same goes with our Iran and the Chinese section.

Any other question?

R: Well, I'm pleased to say no, there is... you have managed to cover all the questions. I believe... I may have missed one somewhere, but I don't think so. I've been through all the questions that have come up. Congratulations.

K- No, it's... we've done that a few weeks ago.

Q: ... Will our conventional computers be replaced by plasmatic computers? And does plasma computer have superluminal speed? And secondly, will they use plasmatic energy to operate? (2:44)

K- More or less, yes. But that is another way, I think it'll be a transition time collaboration between the two, and then till we come to it, how we can break into what senses of it.

I was talking to one of the Knowledge Seekers some time ago, and I was explaining that, now we use computers, and people go and hack and use them as whatever... The beauty of it is that these computers already exist, it's called the brain of the man and the STM, and it's 7 billion of them plus all the animals walking around. You don't need to build, it's already built ready to be used, it's just, it's dysfunctional.

And yes, it's... it'll become instantaneous, it's become a common knowledge. If you think of it in a, in a way, I always said, "you cannot steal." But you can make it open, available to whoever, you know, take it. You do the same now, if you understand it with your Soul. Now you understand how the teaching comes together, in a way. You are Chinese, you are American, you are Brazilian, you open your Soul that, my knowledge, my emotion is available to whoever wants to. So, when I come, when I want to understand a joke in Brazilian, which is meaningless in English, because through English mentality, it doesn't exist in a way, I connect to your Soul, and I understand the full meaning of the joke, the full meaning of what is being said, in the essence of a Brazilian. So, now you understand why we ask for Satellites (Souls), (2:46) and how people will become Satellites by their own choice of their Soul. It's a lot to come, it's a lot to learn. And, we have just opened up this Pandora Box. We have just opened up this Pandora box.

Q: ... My pineal gland has been pulsing since the connection began. I can usually get this happening when I meditate. What is the next step on the road to transmutation? It feels like Qi energy on tap. Thank you for the journey.

K- You're quite welcome. We're going to switch off the systems, and what we call, disconnect them. And let you to have a rest for a few minutes. And then we close the session, because we cannot drop you in one second in the deep ocean. And our team in the background, in the next few minutes, will shut the system, just stay online, and we have you with us, we go through the transition. And what you experienced is yours, for you to enjoy. And how we will see the, what you call, the process takes place. And how you take the journey back. And go through what you felt in past one hour or so. (2:48) We monitor the system that... just stay with us for a few minutes till the units are removed properly and taken out of the system.

Any other question?

Q: ... Unbelievable teachings.

Q: ... I also felt the system working on me. My eyes were closed, lots of movements of light. Thank you.

K- We don't announce anymore when we do this test or when we do these things. And we try to understand how you respond without you knowing, because when we get to know you react different, as you saw it, you panicked and we saw the panic. And we need to be able to do without, and it was good to see how you as participants react to these things, (2:50) without knowing and when you know.

Q: ... A Chip in the body does not sound good to me.

K- You will be asking for these chips. It's a plasma chips, it's not like the way you do it.

R: You don't cut a one inch hole in the skull, like the new ones from Elon Musk?

K- No, no, no, no, no.

R: The first person, you know, just a few days ago, I think three days ago, the first person got the embedded Chip. It's actually, they do, you know, cut a round hole in your skull, and embed it, and feed the electrodes directly into your neurons of the brain. Receiving and transmitting.

K- Yeah, but you have to know, a lot of Israeli high class people like Prime Ministers, and top security people, and some of the majors in the army of Israel, and the spy agents, high rank, have been Chipped this way for a long time. It's nothing new. And Musk works closely with Mossad. It's not his technology. This technology has been, (2:52) what you call it, in the hand of... I was talking to a Mossad agent a few weeks ago. I said, "Where have they put it?" He said, "You know I carry it." I said, "I know you carry it." He says, "I can't tell you." I said, "I know if you put you into X-ray, we can't still see it, because I know how you make it, it's gel type." And he said, "we all are in..." And when they are sending the high risk missions, they are always Chipped. We call it 'Chipped.' And it doesn't have that, as you know, like black things and they inject it to you. It's done the different ways, more advanced, and Mossad has had this, and for nearly 3 - 4 years. And Musk is using his Jewish connections to, for this job. And he is used for different things for the application.

R: In Musk he's hooked up to the AI and the Internet and so on as well. So it's like a... and they hope to help with diseases such as ALS and other... At least that's the reasoning.

K- You have to understand Musk follows the work of the Keshe Foundation very closely. He literally, even Tesla cars Nano, the new batteries, it's all Nano technology we

introduced. The Copper plates and other plates and rest of it. And he tried to copy the MaGravs in small packages very recently. (2:54) He called it the 'energy units' or whatever. And he very closely watches what we do. He's got a team working on the Keshe Foundation T, like the Iranians. But most is financed by the Americans, with it. And if you look, how come suddenly he goes to this field, how come he went to the battery, how come he went to the small MaGrav systems? Step by step he follows and he tries to commercialize, but they don't have the understanding of it, that's why they lack a lot of it.

We have closed the systems, now the unit 4 and 5 are out. In just give us a couple of more minutes, I'm waiting for a graph to see the system has switched off and then we call it the day. Yeah, you have... we have said 'goodbye' to you lot in the system, and now you are free agents in your world. And, you can see how you lot calm down, and how you respond. Even as you get the knowledge of security, you are in the safe hand, you all change, in one go. And it's interesting how a whole lot of you work in the same way, get touched emotionally, get touched and then you change in, what am I? What it is? and "What I'll be?" And it's interesting, this for us and the research, (2:56) and how you calm down when you get a word of assurance, through your Soul stays, physicality calms down, and how the STP takes move, and then the STM follows.

It's very, very interesting how you, as Knowledge Seekers, work, and how you do it. I'll share you, I'll share with you a couple of more pictures that you understand what it means. And, you can see how you have reacted in the session, in the last part. This is what I call, before and after. This is you lot, before we close the session. Before we remove the two units from you. You can see your Soul steady and if you remember, the pictures of your STP, which is the purple one, and the physicality which is the yellow one, how much they changed, now they become more centralized. You're bringing two in line with each other. You panic, as the Soul wise, but you come back and you see the last five minutes, on the right hand side, how your Soul all settled, and how your physicality and the STP standing opposite to it, which is the way it should be. That they collaborate with each other, but the Soul is feeding the physicality, and this is when the system is switched off. (2:58) We have no more connection with you.

Thank you very much for today, and see you hopefully next week. And at the same time, next Friday, we have our other session, the, what I call, the second session of the six sessions, you can join and enroll and be with us. And, what I call, to be part of the research development in Arizona, Tehran, or China, you can enroll. Arizona we take 100, China you can enroll as Chinese, to be part of the Chinese research, it's the same fee as it is with Tehran. And you can enroll yourself, and we block this very soon, because we have to structure a lot of things in the background. You will be working at our, what I call, Development Center in Arizona. All the systems are there, the whole things has been there, now we bring it back into operation for you as Knowledge Seekers to join. And we'll bring in the massive, mighty, what you call it, power of the Keshe Foundation sitting within the structure of our investment, into operation. Thank you very much, and see you next week.

R: Just a reminder, the transmutation session will be coming up, well, a week from tomorrow, basically, right?

K- Yeah, we done that.

R: That's it, every third Friday of the month. So, people that are interested in that can go to the Keshe Foundation store and book your flight.

K- But please, those of you who come in for, to be with us in Arizona, I'm sure it'll become a way of life. (3:00) You will never leave, you will be still part of the research for years to come, for development of the technology. And I'm sure every other organization will join or do the same thing, once it opens up and you become the teachers and leaders in spreading the knowledge across and change a lot of things. Thank you very much and see you next week.

**524 KSW Feb 08, 2024**

**END**
