

# 526th Knowledge Seekers Workshop February 22, 2024

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

## ENGLISH TRANSCRIPTION

Introduce CR Plasma Material; Gans won't work for space travel; Evolution theory wrong - man came from another planet - further evolved on Earth; STM transmuted here created different races; Billions of relatives throughout Space; All knowledge within RNA; Brain never stops working - work of STM; Isotopes of Carbon - C14 - C12 - C60 - C840 - C860 - connection lines through U; C800 series part of Transmutation; Energy Stations tap into throughout U; New Space materials beyond Gans's; KS transmuting; Organs too intricate - created on other planet brought to Earth in transmutation - further evolution; Started with H add energy to Plutonium; C60 & CR; 5 C12 is C60 - crystal; 60 X C14 = C840 - Universal; Look at star - instantaneous; No gaps in U - solid gel; Truth about own creation; Sanya conference Chinese; Launch CR Material - details - currency of U - need for transmutation - Space fuel; Friday session - receiving Cosmic Knowledge - shut down too early; More on C840; Child created from mother not outside - same as U; History of Chinese theft; Chinese KS upset; Other governments steal T also - list; Second Sun - polarity shift - earthquakes - closer to Sun; About KF Butterflies how to use; Body crystals not CR; Color change due to M field strength - not alchemy; Ghent University light through Nano holes, Why moon effects tides

(:15)

K- Yes, thank you very much. Good morning, good day to you as usual, whenever and wherever you listen to this series of Knowledge Seekers from Space Keshe Foundation Spaceship Institute. As usual, we welcome you back and we try to add to the knowledge.

As you heard in the Intro, we have entered a very delicate subject, of us really becoming passengers of Universe. We thought we got everything done with Star Formation (SF) and everything else, (:16) but now you realize your Star Formation fuel is of the wrong type. You need the right types to be able to make that span, to be able to travel. You cannot do this with Matter-State, you cannot do this with confirmation of the, what you thought Gans's will give you, because as I said, you have not learned about the conversion of the Fields and Matter and Matter to Fields, and either way, understanding the Totality.

If you listen to the Intro, which is part of the last week teaching, and teachings before that, you must have triggered something in your knowledge. Or the discussion must have triggered some gap, or what was said has not fully been understood. Listen to the Intro and listen to the teaching of last week many times. You will find out I unravel a mystery, unraveled a knowledge that brings a very big question mark on the whole theory of evolution. We have evolved on this planet by immigrating, moving, going from one place

to another. By nature of the place, (:18) magnetic (M) fields changed our feature to short, black, white, blue, Chinese, God knows what.

If you understood the teachings from the beginning, and maybe the concept has come to you, in one point or another, the question you ask yourself, which in a way was answered last week. And I'll try to expand on it, that you understand it more in depth. We explained that you manifest a time, place and position, according to its fields, according to the strength that it allows you to manifest. Look at the body of the Man. Look at the intriguing combination of the layers, organs, cells, operation, the design, the shape, the intelligence, the emotion, and the Soul of the Man (STM). Ask yourself one simple question, if you are not prejudiced towards what you've been taught. And that question is, If Man could immigrate and go through evolution, and become so many different races and colors and whatever and animals, (:20). according to the time, place and position, as the Man could physically take himself to, and in interaction of the Soul of Physicality (STP) and of the STM and the STP of the time, place and position, and the Planet. You converted it to short, tall, black, white and the rest of it.

Then, there is a very big question mark. When you look at the intriguing structure of every cell of the body of the man, how kidney has different operations, filters for different things, liver, structure of it. The question for you is, was the planet Earth so clever to produce this structure, over billions of years, and connect it through what we call neuro system and a blood? Or, if you understood the subject of transmutation, was the RNA of the man universal condition, in arriving on this planet in the right place, time and position, having the right field strength, has gone through a transmutation, where this intriguing structure of the body of the man, is actually completed in another time, place and position in Universe. And, depending on how the position and time and the place has been, (:22) has created life due to its moisture structure on upper atmosphere as we've seen from NASA, in the oceans as we've seen in what man calls in Africa, and in Central Africa in a lake, and in North America in another shape of form. And as we know scientifically, originally it wasn't just one race, there were other races, that over time, one has eliminated one, or has integrated one race into another, that now has reached the man of today.

So, as the fields of the Universe, carrying the information, the time and place as you were the woman in London going to the wedding in New York, you're transmuted and you manifest yourself in different color and shape. As these fields of the structure of the physicality of the man, on the back of the amino acids (AA) of the Carbon 14 (C14), in conjunction with physicality of the structure of the C60, manifesting, interacting themselves as man of one race in North Europe, and man in one shape in Africa, and man in another shape in Australia and the rest. But in fact, the information arrived on this planet, at the same time, the place and the condition of the position and time, created different men on this planet. Then this makes sense, because stupidly man does this, this is the kidney, this is the layers of it, (:24) this is the function of this place, this is the function of that place, excuse me, 4 billion years, according to our scientists, is not enough to develop such a intriguing structure of body of the man.

So, man has to accept, he has gone through what we call, changes, evolutions, after arriving on this planet, through the fields of the Universe. If you understand this, this gives you a massive step forward. Which means, if you can go back to the original fields, which is within the structure of the AA of the man, and in the RNA of the man, man can go back, as a natural way, to other time and place and position, where the origin of life was transmitted to this planet. When we tell you, we take you back to Universal Community, you already came from the Universal Community. You isolated yourself and became a village, where the city and its citizens outside, carried on with their work.

The interesting point for many of the scientists of the future is, when we come across the citizens of the Universe, would we look into their structure, to see where our ancestral life, in the depth of the Universe comes? Which one of them has familiarity in the space, time and energy, as us, on a basic level, (:26) that shows we are cousins? We have a forefather and see how they evolved their kidney and the brain and how we evolved ours. So, if you understand this, this opens a new dimension to the knowledge. But the interesting point for you will be that the man, who you are, the spin of his fields of energy of the Universe, has a share in your Soul, connection to your Soul. And interesting enough, as man has created other Souls to penetrate, to become part of the structure of Universe, has passed this information on to the next cycle, the next generation of life in the Universe.

It'll be intriguing how the scientists, now knowing that they themselves are part of the travelers of the Universe, arriving on this planet, going through what I call, no immigration, passport control, arrived and then, in that process, what we call, took changes according to the time, place and space on this planet. Evolution of the planet Earth. But, the STM, the original part which arrived as energy, has gone through the evolution of it, for this planet, coming from another dimension and place. In a very short time, we open that channel. And if you understood that, you understand why, when you dream, (:28) you call it a dream, you've been going places you do not know, some aliens, some familiar, and then you come to understand, the knowledge is embedded with you in your RNA in the original fingerprint of the Universal Energy and you carry all the knowledge. And you're still looking for it.

The only thing you have to do, the only thing you have to look for is the key to that knowledge. It's embedded with you, it's within your RNA, it's within the structure of it. But as you travel through the dimension (D) of the information line of the Universal Community through C14 with the interaction of the what we call physicality of C60, you have, you will carry the knowledge of the Universe, and you travel in this dimension. And once you understand this, a lot of times which you don't remember as part of the dreams of your sleep time, will start making sense, and you find out this brain has never stopped. The time you dream about the uncle, it could be 5 minutes of 8 hours of sleep. Where is the other 7 hour 55 minutes has been spent?

In understanding the new knowledge, in exploring the depth of it, you will start seeing why the scientists, through their ignorance, say man only uses a few percentage of his

brain, (:30) where in fact the brain is continuously used 100% by the Soul, for its interaction and memory bank of data, all the time.

As I said to a scientist, when we were doing the condition of one of the coma patients. I'll explained this and if you understand what it means, you have solved half of the problem of your knowledge and understanding. Is that the brain scientists tell us we use 5 or 10% of the brain and the rest of it is not used. Where it shows their ignorance. You put your arm on your side and don't use it for 10 years. It rots. It hangs, the muscles don't move, the fingers go through all sorts of changes because it's not used. Then think, is there any part of your brain which is dead, not working, wasted just to be there because it was created? Or does your brain stays fresh, working and continuously operating, which means it never stop working. It's in use. It's our scientists, through their ignorance, have not understood. The other 85 - 90% of the brain of the man, while the man says, is not used, is continuously used by the STM, by connection to Universal field strength and other operation of the body of the man.

So, we see how science changes, how much wrong information we are given, (:32) and how as Knowledge Seekers (KS) we have to open these doors, and in a way, walk away from fallacies of the past. Then it comes to you, in how you connect yourself to this C14, how you use the C60, how you open the door of the what I call the knowledge of Universe and you become part of the Universal Community (UC) in the field strength time, place and position. Creating condition of life through what we call the transportation fields of the Universe is different. And in so many ways man needs a step up to do and then you come to see how the Universal Community works by knowledge, Universal technologies and understanding of the work of the Universe, which in a drips has become part of what we call, the life of the man.

Now, is for you Knowledge Seekers, to develop technologies which are connected to the C14, C12, and ?? C60 and then the Carbon 840 (C840). You understand why this 840 will come and 860 will be conditioned on the back of it. These are not the knowledge that man knows and in future become part of the work of intelligence, communication, and life process of the man. It'll be interesting how man will realize this. (:34) There is a common denominator working in a way isotope combination of fields of the Universe. We call it the Carbon, in the Universe known as connection lines. How we change field radiation into matter state. And this has been the dilemma of the man.

On Earth we create ?? the atmospheric condition of the Earth as our scientists tell us. And then we give it Inertia to give it the manifestation of the matter state. In the Universal M fields, condition of the containment and what you call Inertia of the matter, becoming Inertia of the confinement of the fields of the Universe, is done through C60 and in connection with it, the Carbon range isotopes of 800. This will give you multi-facet structures, which allows you to live in a Space, go through transmutation, and then arrive, manifest yourself in the time, place and position.

The Carbon 800 plus, which will come as part of the structure of the work of the transmutation, will be taught thoroughly in the coming time. This material, these kind of

the structure of the field energies, will bring about conditions that man can transmute to every dimension in the Universe instantaneously, (:36) and 100% guaranteed that life will never ends, in any shape or form.

In the world of the physicality, you eat food, different combinations, to support different field strength structure of the body of the man. In the Universe, you need to tap into the Universal Energy, to be able to feed every layer energy field strength of your Soul, or your transportation system, or whatever you call it. And this cannot be done by just seeing the fields, feeling the fields. You have to be within the zone, we have to be within the structure, that holds on to these points of energies, and there are huge number of them across the Universe. In a way, they are your "takeaway" in the Space. They are your "supermarket" with everything you need in it, for you to survive any time, place and position in the Universe. It's just for you to know where to shop and from which shelf to pick up the right thing depending which, what we call, taste of the emotion your body has. Do you like a Chinese or would you like Indian? And when you go to the supermarket you cannot buy the herbs of Chinese to make an Indian food. It does not work.

If you understand this, you will find out I have opened the secret of Creation and life of the man in the Universe. But in the coming time, we'll explain it more in detail. (:38) I (will) go through this, in a very thorough way, show you the systems, materials which bring you to that position. Which allows you to understand and walk away from, what you call, Gans's and other things. But you understood the physical structure, of the field interaction of these materials.

As we progress, our scientists are developing these technologies, that it can be shown. In Sanya, you will see one of the most sophisticated advanced technologies that none of you have ever seen and understand. And this will bring you new dimensions. And this brings you a new understanding.

Those of you who attended last Friday, many of you have gone through evolution of life in your cycle of thinking, physical life, and emotional, and the living life. A number of you have started the transmutation by wish, by will, but you still get lost in it, and you don't know where you are, and you go and do things, and now you're getting more confidence to become the 'transmutators.' You find emotion, the strength of emotion of transmutation, which gives you the transmutation. And some of you have not touched that. You're still looking for physical transmutation. But you have to understand, you have to carry the emotion of the time, place, and the position, and the emotion of the STM to give yourself manifestation of physicality.

Now you understand how advanced some of you Knowledge Seekers through emotion and feeling have come and becoming and moving forward with. (:40) You go shopping, you go down the road to somewhere and you come back and you're aware this was the Soul trip, I'm still here in physicality (P) of the man. As I get reports from different Knowledge Seekers since last Friday, as we tested a new system, overcoming,

superimposing the field strength of the emotion, and what we call plasmatic condition of Cosmic Rays (CR), over what we call the physical matter state.

So, you have started going through learning and understanding the process. And when you go through the full transmutation, you are not scared. You are not afraid, "What's this in front of me? The body is not what I know, but it follows my instruction." Or it doesn't follow my instruction because I haven't made the right connection to it. Now you understand, how the process of Creation, as you thought, you went through the evolution of time and place and space and position on this planet over thousands of years, applies the same to where you came as energy, to go through the evolution of life in the Universe, to become man of the Earth. As you are part of it, you came from it, and this intriguing structure of your kidney and liver, is now the product of this planet. In a way, it has been served on silver platter. And, the chef of the fields of this planet, (:42) has changed it to a beautiful dish, as what we call, the human body and the rest we see on this planet.

What becomes important for you and in a coming time we'll show, is the delivery of the energies of the Universe, making man to become the passenger of Universe than the 'village of the man' and you cannot do this unfortunately, with little knowledge of what we call, the MaGravs and Nano materials you have. Creating Universal materials in the plasma condition, is the opening of the new science for man. Where you create fields of the Universe, in the dimension of both, manifestation of the fields, and interaction of the fields, and the combination of the fields to create time, place and space.

As part of what I call Carbon 800 plus, in a coming time, you will understand how this works, and how most of the planetary Systems, Solar systems, Cosmic systems and Universal systems, all work through the division of the field forces of this combination. And depending at what level, at what strength you use this combination, will give you from Plutonium to Hydrogen. From materials man cannot even imagine exists, with atomic numbers, by order of magnitude, bigger than what man has in his Periodic Table. (:44)

It's important for you as Knowledge Seekers to move into understanding the field forces of the Creation, not number of turns of the matter state of your coils. Look at the design and the intriguing structure of the brain of the man. Then understand the complexity of the life in the Universe, which this, what you call your brain, is a drop in the ocean of the knowledge and the creation and the created matter ?? life in the Universe. Now you understand, why in the teachings of the past, I have mentioned many times, when you travel from Earth to another dimension, the AA structure of your brain cannot exist, because there is no Nitrogen in that environment. So what happened? It'll be your demise? It'll be conversion in what we call, evolution of life for you.? Or you know how to handle it, and you dictate the position, time, place, and energy strength of your field.

Then if you understand this, when you travel from London to New York, you decide to manifest as a woman in a wedding dress, as understanding the structure of the fields as a dog, or the roses which the lover gives to the physicality of the woman at the wedding

party. You can even go into the dimension of becoming the structure of the ring and feel how it feels, emotion, (:46) directly in touch when it goes on the finger.

You need to understand why for past months and years I keep on telling you, "Please ignore the structure of the turns of the MaGrav and look at the fields." Now you understand how those fields play the game. And how you can use them to create the understanding of the evolution in the Universal Community, and not just evolution of the man on this planet. You need to develop technologies that it brings into play, the C12, 14, C60, and then go in understanding of the, what I call, cubical structure of physics, with isotopes of Carbon 48.

You got to understand how the system is nourished. If you take C60, and if you understand the operation of Cosmic Rays, there is a big discrepancy in the energy plasmatic fields, and depends on the angle of entrance of the field into the surface area of the, what I call, containment of the C60, the crystal structure. And that interaction leaves a residual which becomes the energy within the structure of the C60. You have to understand the, what I call, how we explain energy from the beginning in the teaching of Keshe Foundation. (:48) And if you understood that, now you understand this part. We always said, in the plasma technology, energy is considered to be magnetic fields in motion. And when you have 5 ray isotopes of C14 hitting a C60 surface containment, has a residual that, in a way, becomes what you call, field radiation. And becomes the energy essence of keeping the crystal structure in operation.

If you have 5 field strength to 5, what I call, dimension of C12, you understand this clearly what it means and how you can transmute, use the energies of the difference, to sustain life within the crystal. And this is how your Soul works, this is how your central energy works. This is why I kept on saying for decades, that the food you put in your stomach is only 20% of what you actually absorb from outside, because this, what you put in stomach, it once converted into plasma, become precursor, become the source that the higher strength trying to feed, it feeds the body of the man on its way.

Now this brings into focus a lot of teachings of the past, they're all coming together to give you the time, place, position, manifestation, (:50) transportation, transmutation and everything else, that is in your hand, and no one can touch it, nobody can preach you with it, unless they want to find a way to steal it from you, in a way taking it from you, or connecting to you, to use your resources than theirs. And as it cannot happen, you understand, the understanding, the knowledge of the Creation. So, for the first time, maybe in a deeper understanding, you understand that even the physicality in the STM is evolution of the science and technology of the Universe, which has found its time, place and position, in the condition of the fields of this planet to manifest itself as man, or any other creatures.

And, you understand this, if you comprehended the meaning behind it, means you're just part of an evolution of the Soul of the Creator (STC). And not more, and nothing less. Then you understand, 'I made man in the image of Myself.' Which means, it's Me, you're just, in a way, dressing it up with your physicality. And in that process, with the

interaction of field of the time, place and position which itself comes from another field strength of Me creates a new you or what you call your evolution. (:52)

You look at the STM, you look at the physicality of the man and you say, now I understand I came from another planet or whatever connection Soul understanding the fields. Don't forget, this planet came through the same system. It's the interaction of what I call, uncle with the niece. Where the niece was created out of the interaction of the same, but connection to another.

Now, those of you who understood this, should be able to create the first transmutation systems, without the matter and without Gans's. And those of you who cannot, we'll have a piece of news for you after the break. But, you have to understand how you use the knowledge to be part of the structure, and you not use the knowledge to destroy the structure, as you shall not be allowed (to do). Now you understand the purpose of C60, the purpose of the Carbon 800 range and the purpose of what I call, especially Carbon 840 and Carbon 860. This will play huge game in which part of the Universe you connect yourself. And you have to understand this. The scientist of the man has to understand the game play of this structure. And one day, (:54) one day man will come to understand this position. It has no choice.

If you wonder why I brought this subject of Carbon 840 and 860 range, soon you'll understand. This is the energy fields of the Unicose. This is energy fields of the Universe in conjunction and interaction with each other. We speak about ?? C60 (C16) which is the combination structure of the physical matter of the C12 and the point of the place and the combination of manifestation. Then we speak about the dimension of the C14 which is an energy pack system, not the physical dimension pack system. Then we speak about C60, which gives the structure of the matter state confirmation of the existence, in a crystal structure of the time, place and position. Now if you take 60 of the C14 with the C60 itself you'll find you reach a new dimension of carbon 840, which this gives you another dimension in the Universal energies.

But man has to understand the formation of the ?? C16 (C60) and how C16 plays the, what we call, (:56) imprisonment of the fields, conversion of the fields of the Universe into the matter state to be able to survive in the ?? tent in this crystal structure existence, but at the same time to be dynamic fields and not a solid state diamond on the ring of the man. If you understood this and you understand the confirmation of the C14 Carbon, what we call, 840 and 860, then you understand I have given you the key to transmutation across the Universe. Given the strength by the order of magnitude to the whole structure.

And then you understand why Universal field forces communication within the structure of it brings into play a new cycle of life for man. Transmutation at higher speed, instantaneous. And then you understand why I said many times, when you look at the star what you see, is already connected to you through the dimension of the zero time place and position ?? and energy. As it is there, you have the same strength in your body that you see. Because what you see as stars in sky is the fraction of total lives in the Universe. In the empty space gaps between what you call planetary system and the stars is actually

dimension of another plasma which has been blind to man through the strength of his AA plasmatic magnetic fields. Otherwise the Universe is a one solid gel. There is no empty spaces and you only see what your AA field strength is in parallel with the, (:58) what I call, energies of the Universe open to your AA. Outside you say 5% of the Universe is made of planets because they never understood the 85 is more solid than what you see as your stars, but it's the gel connecting, holding all that together and as you don't have the knowledge you are, as I said, 'ignorance is a bliss.'

Now the job of you as Knowledge Seekers and the future scientists is understand the key of transmutation, understand that you're part of what arrived, and not were a part of created all in, and you have in a way converted some to fit, to live on this planet, and you've gone through mutation. As I said at the end of the Book one, 'God is the Creator of all and man converter of some, because he doesn't understand the rest of the other 'some,' through the lack of knowledge and his total ignorance of his own existence.

So maybe today for the first time, you have the confirmation if you understood the process of evolution, if you understood the process of C16 and C14 and C12, you and your friends are all Passengers of Universe. You immigrated without passport to the field strength of this planet by your ancestors some time ago, and you claim it to be yours. Now you understand the truth about your own. You're nomads of the Universe, and everybody else is in the same shoe. (1:00)

We'll go through a break, and we'll come back. But now open your eyes to what is to come. And the new cycle of technologies and sciences that we opened for you to be able to go through what is your wish, to remember life in the dimension of the man, and at the same time, have the emotion of the Universal Community that you are part of, and you're just finding your cousins. Have a wonderful time, that these cousins are billions of them. And they all look different as they went through their own evolution of time, place and space, and position. Rick, take us through a break. We come back and we carry on.

>> **BREAK** >> 526 KSW February 22, 2024 (1:06).

K- Oh, very easily as usual, as before. As is our tradition, we make some announcements here that we will bring the Knowledge Seekers up to date. First of all, is that the Chinese Knowledge Seekers, it only applies to Knowledge Seekers because you have to have a QQ connection and the WeChat and whatever it's called, to be with us in a, what we call, meeting of tomorrow at 8 o'clock Beijing Central Time. We have invited Knowledge Seekers across China to join us in this QQ presentation. And, in a way, to what you call, answer some of the questions and other points, which is concerned with Sanya and what we call, the upcoming conference in China. And our collaboration, cooperation with the Chinese community. And we try to give the same, one more QQ, before the conference in Sanya, and to bring up to the position of what it needs to be known and what is there to be done.

Our work will carry on the same. (1:08) The German community has managed to appoint the three, raise funds for three members of the German community of the, what we call, looks like an Austrian, Swiss and a German, that will be sent to Sanya as a representative of the German community and they've raised funds for the extra one or two which the Foundation is organizing for them to be present from other communities. It still goes on with the Italians are busy to send their representatives and we haven't heard anything from the Americans because they are a rich lot, they are a stingy lot, they don't like to spend to put anybody there because most of them they go themselves. And we'll see what happens with other communities, even Chinese who will sponsor some people to be present in the conference.

As we see, as we explained, new dimensions in technology will be shown. And some of it might baffle you, some of you will bring home a lot of knowledge. There is one interesting point. This we have had for quite some time, but as we enter the dimension and interaction in the fields and the working of what we call C14, plasma C16, and to understand the work of it, and what it has a value in the Universal structure, then what we call, matter state, Keshe Foundation has launched a new material which is a Plasma Cosmic Ray material. This material will become the backbone of the, what we call, the currency, the existence and the work on this planet and in the structural development of the future. (1:10) We have put this material on sale on the Keshe Foundation website. We will not release the method it is produced is converted into Cosmic Ray as a plasma and due to his reality and the way functions one gram of this material has been put a thousand Euro. This become very much like a gold backed by currency. We buy, we sell, we exchange this material. It's the same what you had as when you bought the Keshe Coins as donation.

This is the first time we start the structure of the Universal structure, which means this material, if you want, you can use it to create the conditions of the Space travel. In a way we sell the Space fuel. It's not easy to produce in different combination, domination of this will be released in coming time. Every package will have a sealed registration number on it, which means we know it's produced by us, refers back to production and we know how it is. In a way, you mine the gold, you mine on the Internet for Bitcoin,

now you have Space back material. This structure, this work will become part of the Universal working of many governments in the coming time will follow. You will understand the potential of it as it comes and this brings us back to Keshe Coins and the rest of it which now we have produced and we release material to back. You can purchase this and you can sell it back in the future according to its price. We leave it to fluctuate in the market. This has a huge military and Space applications. (1:12) Government will give their arms to get hold of this material. And this is part of the work we have reached and it'll go through with the what we call, the Chinese.

This is a backbone of the material into space travel. And in so many ways it brings a new dimension, a new fuel, new what we call, energy pack into the structure of the development of the upcoming science and technology. This material has the capability of the interacting with the STM in the dimensions, if it's used in the appropriate way and in conjunction with its strength. We launched this because it's the time to launch it. Even though it's not, will not be understood by many ordinary men. But some of you who are working and trying to become part of the transmutation, you need this material. You cannot do without it. It's one of the impossibilities. And you will understand in time why. We give you a massive option of the different isotopes of this, and according to, they'll all be the same. Compared to what it is and what will bring, the price we put on it is a 'peanuts.' But it needs to start from somewhere. It'll be one of the strongest developments in the Space technology of tomorrow.

When I showed the physical structure of this to the Chinese military, it baffled them. This material used in the right way, make everything within fields structure invisible. (1:14) But you have to know how to use it. And you have to know what you do with it. In bringing it into structure of a home, will bring a new dimension of fields. Will change a lot of things, and in the structure, will bring the new change many people have been waiting for. Transmutation becomes much easier, because this is the field within the structure of the house.

We gradually feed this as production around the world, and now you understand why we closed all our Gans operation around the world. Because it was no use producing something which had, has moved to the next level of the technology. Do not touch it, if you ever break into the seal, use strong gloves that at least you can't absorb some of the energy of it and not direct touch it. It's a breakthrough in the world of science. And you will understand it. And touching it will bring you a new dimension of thoughts, energy, and in so many ways, a lot of other things. But we advise you, never break the seal.

In the coming time, we will show you how this material is used. And hopefully, in Sanya, for the first time, as I said, you'll see the revolution, evolution in science through development of this material.

You will come to a point that we run into this point of saturation. (1:16) And many of you went through the transmutation on last Friday session because of the presence of this material. And then we had to stop the session probably on 10 o'clock on Friday night. As we saw changes, we had to take steps. And we were going to run the session for a couple

of days, but the saturation of the fields, conversion of the fields, forced us to abandon after what we call, we are supposed to be until 5 o'clock. We were until 10 o'clock at night. And then, as we informed the Knowledge Seekers who were present, we had to close the session to what we call, bring everything into conformity and understand what and how things switched over. Without us wanting, and in analyzing our system over the weekend and there on, we found out that where the evolution has happened, we knew, we know this knowledge, but through a mechanical failure brought this about.

And many of you have moved intellectually and what I call understanding wise, one or two notches up. You know it, how it changes you, how it's changed you. And it's has been primarily because of this new field energy, which was used and brought into operation. And we told you it'll be different on the, what we call, last Friday session.

Those of you who join us in next month's session, you will feel this in a much bigger way. As we are preparing you for transmutation as well as Knowledge Seekers wrote, now I understand the process. Now I can see how you're educating us. Because I've been through it and I see it. And I can do it. (1:18)

You got to remember, we are not magicians. We are scientists, scientific organization, and we have the same way on teaching. This material we'll bring in the next cycle of technologies. If you remember, Mr. Keshe jumped from Nano into Gans's, and from dynamic reactors to the other reactors. And everything was a step by step to bring it. Now with this, we bring it to the next step of what we call, Universal energies, Universal understanding of the fields.

You will understand this in the coming time, and you will see how this will work. Putting one or two or three of these across in the house you will feel the energies and the frequency that you transmute. And how easily you manage to and gradually becomes part of the structure. Please do not break the seals as atmospheric contamination once this is sealed, can change a lot of things inside it. We go, as usual, with our work. And if there are any questions, I try to answer. And we move on to the next part of the teaching.

Q: ... Why did the machine lock up and did not want to give any more in last Friday's session? (1:20)

K- It didn't lock up. We locked it up. We withdrew the material from the system. We withdrew the communication systems out. It locked in too good. And in the coming months, you will receive, you'll understand new knowledge's which you never had before. And then you understand how you have connected to Universal knowledge. And some of you have already started since last Friday going to the beginning of that cycle as we get the, what we call, your testimonials.

We had to bring the system. It's very unusual for me to turn up in the lab at 10 - 11 o'clock at night. I had to go there to literally stop the system, because Knowledge Seekers reported that they can hear from certain channels which are closed. And they turned up, because we were on the Cosmic Ray level. And I had to go into the lab and physically

terminate. And as I told Knowledge Seekers, we bring the session to an end. Because there was too much in what I call, Universal fields, and what I call, knowledge was coming through, which was not supposed to. It's too early. Far too early. And that's the reason we closed the session. We are, as we agreed, what I remember with you was 9 to 5. And usually we leave the lines open, or whatever we can. But the systems moved in much (more) powerful level, and we had to interfere. (1:22)

Any other question?

Q: ... I had a couple of questions occur to me, towards the end of your teaching this morning. And, the first one is, you were talking about these higher energy structures, like 860 Carbon and 40. Does the Earth environment permit the physical manifestation of these higher energy structures?

K- Of course it has, otherwise we won't exist. But, it reduces in field and the strength. In a way, we take weaker strength of it, it gets diluted. As it interacts with the... in a ?? magnetic field, as it interacts with gaseous energy of magnetic field, it reduces in space.

If I can answer you in a very simple way, I love the video of NASA, because it opened a lot of things for us to explain easier, because it can physically be seen. The living structures above us on the higher upper atmosphere which has been recorded. They are the same amino structure as us on Earth, on the physical side, and the same as the fish in the ocean, and the living things in the gas in the center of the Earth. (1:24) But due to their lesser interaction with the magnetic field of the Earth gravitational Inertia, they keep a, what we call, a more dynamic translucent energy. But in their lives they still have the same, the same structure as kidneys, brain and everything else, they absorb fields, they release fields, they are intellectually very powerful that they can decide position, time, place and whatever we see. They are much more intelligent than man in intelligence, in understanding, and their life is much, much longer than man. They live into hundreds of thousands of years, where man is limited. Because they don't have that dimension of physicality, but they absorb huge amount of energies. Without the existence of this layer of life above us, life would not have been the same on this planet. They are the creatures which allow us, in a way they shadow us. We're under the shadow of their field forces, they absorb a lot of things which our body would not be able to exist, to maintain and to hold on to.

In the future you will see these kind of things because you can develop it these structures ?? used. So you've got to understand how C14 in structure with the fields create this position. You have a combination of the fields like this and in the future you'll understand how the physical structure of different layers of for example your kidneys produce if you understood this. (1:26)

You have a combination of C60 crystal structure. When we talk about C60 is not that you have a Carbon with 60 side, it's the plasmatic field of 60 Carbon structure of atomic structure which makes C60. That's what it gives us a structure. 840 is a 60 of C14. Which that 60 structure taking shape in the structure of the C60 in what we call, structure of

Universe, will create a new dimension. And that dimension can hold, can contain, the totality of what we call, Universal Knowledge. It's like a microchip. And we are in it, we are part of it. Now we have to learn how to connect ourselves into it, to be able to do instantaneous, the way your brain works.

So you have a C60, which is a combination of the C12 manipulation energy. And then you have, for that 60 point, 60 of the C14 energy, which gives you the manipulation of 840. And this allows you to transmute between 840 and C60. Then you have a manipulation of 168, which is the combination of another combination of the field forces, which this on its own will create another dimension in the field of science of man, which the 168 is again creates, (1:28) if you understand it, another structure, which is a combination of C14 and 12.

(I have to go on to a call, urgent. I'll come back if you can take it, please. << Mr. Keshe answers a call >> (1:30)

K- I am back ... What was the question? What was the discussion?

Q: I was just, extrapolating on what you were just now teaching in answer to my question about whether this environment of the 860 Universe, the 860 energy, that creates a Universe of Universal Knowledge or something? (1:32)

K- 840 is in that dimension. 860 is a combination link to the next structure. In the future I'll teach about that.

Q: Is there a physical structure?

K- Yes.

Q: ...Actually available in that universe?

K- It is not a physical, it is a field structure. You have to understand that you keep on looking into what I call, the MaGrav and not the fields of the MaGrav.

Q: Well, no, that's what I was thinking, is that it's just an energetic structure, a field structure.

K- It's an energetic structure.

Q: But so, physicality is not even available in that kind of Universe.

K- In its own strength, yes it is.

Q: Okay, I understand.

K- In its own strength, you have to be in it, and have the fields of it. It's in the dimension of the line of the communication, or interaction of the fields of the Creator in a different strength. You got to understand everything started with Hydrogen. The whole life started with one field energy.

Q: Well that brings me to my second question... Okay, so how do these higher energy structures relate? What is the relationship and the purpose of these higher energy structures in relationship to the common denominator of the Creator?

K- I call it a DC. DC, the base continuous, is the Creator, line of Creator. In interaction of the fields of it, due to residual resistance of what I call, field interaction itself, has created fraction and friction. And then the interaction of these fractions and frictions, created a C14 and Carbon... (1:34) And then, in the interaction of this, has led to creation of crystal structure, which has become the creation of the physical Universe.

Q: So this is just a natural development of the interaction?

K- It's a natural development. The whole concept that we were bigger and we ... divided, is a fallacy. We started from very little, but a continuous field structure, that the interaction of itself, by itself has created another dimension and strength. We haven't come from Plutonium to Hydrogen. We started from Hydrogen, and depending on the condition field interaction, we became Plutonium. This is the difference between the understanding of the creation in the present world of science and the reality. And that's why man has so much problem in physical understanding the totality of the structure.

This I explained, I remember clearly, on the table to a couple of Iranian scientists, while we were sitting in a presidential conference room in Tehran, because they wanted a meeting there. We usually used to meet, and that day they wanted to meet at Ahmadinejad's presidential office. And I explained to them, and maybe some 15 years later I explain to you. The creation comes from the same beauty as nothingness and generosity to be in ?? awe. (1:36) So, when you get an atom, when you get the first double structure, you call it Hydrogen, a proton, and an electron, in what we call division of fundamental, what we call, particle. And then you get the structure of the Deuterium and then Tritium. And then you move up in understanding, absorbing energy into Helium.

It's the same process as the egg in the womb of the mother. The egg is there. In creating the right condition environment on receipts of the right field strength, you have sperm, and it becomes that proton and electron. But the environment of the womb is that galaxy, is that Universe. Then you divide absorbing energy from the division of itself to another cell, and then another cell, and then you become a human. When your parents, or when the creation of life had the first interaction of the egg and the sperm, there was not a human being becoming the egg and the sperm. The initial fundamental base in amalgamating, interacting with the field of itself, was created by itself. That field in the womb of the mother doesn't come from outside. It's created by the mother itself, by the interaction of fields of itself, which matches to the field of the egg, which matches to attracting field parallel in the sperm. And it's no difference between the cycle of the life in the womb of the mother and the process of the creation in the Universe. (1:38)

Creation of, by division of, by creating the environment from the itself, fields, leads to the creation of life. But in essence, it still is that information came in, in the egg and added to the sperm, created the first structure. If you understand this, when we look at in protons or neutrons of atomic structures. Or when you look at the electrons, atomic energy structure, you see they're all different. They're not the same. A layman says a

proton's got two protons in it, and so that's it. To a scientist, to man of knowledge, these two protons in Helium are totally different from each other. They have different combination of sequence of energies. Even the base is the same. That's why they stay separate.

And this is the same with the world of Creation. C60 is that seed in the structure of the C840. But it still needs a connection to the other Universe, which gives it to partially by the division structure of 860. It's not on its own. It's a confirmation of Unicose, and ?? not a Universe. You cannot be a Universe a part of, if you don't have connection to the other part. You cannot just be a kidney and be on your own. (1:40) You have to be part of a structure of physicality. You have to have a connection with it, energy wise and physically. And this is the same. This is why in the teaching of last week and the week before I refer to the football and five-sided edge into it. It's the field energy, not the structure being different in the world of the Creation. And if you use it right way you can bounce on it and bounce off it.

If you understand this and understand the material which is on the screen and will be delivered in much bigger ways in the future, we use it as a Universal currency. You want to travel to such a planet, this is the combination of it. As I said to the Chinese military and to the Chinese government when we signed these huge contracts with them. I'm not interested in Gans and food. The resources to expand the technology will come from its transportation, transmutation and they couldn't understand. And now you see it on the table.

You want to go to Mars, you need the key combination to... is on the table. You want to go to another dimension, you have to have, you have to have what you call, the 'toll' we call it in English, you .. you have to pay for it to go to a destination, you go to... You have to have the road. This material is that road. But, those of you who bought the two discs (Nano Mirrors) from us, (1:42) you are going to have a wonderful time with four or six of these in your possession. Then you understand what the next step is.

I showed this material and I laughed. When Belgium officers came to my lab and confiscated the nuclear material and put in the nuclear safe in my lab. I said, "You stupid guys, you don't understand the dust on the table is what, is the work, not what you locked up."

It's understanding, now that we taught to open the next chapter, in 840 and then above. In teaching of few weeks, so I explained to you, I open new doors of knowledge. This knowledge is nothing new, it's been with us for decades. But you couldn't understand, we had to teach. Now you have to understand, with this technology, with this material. You are the STM, you don't need the physicality of the man. Now you understand how we are teaching you to understand the energy center, what you call, the Soul of you, because it works with this. I can't put your physicality here, because this is a field transfer. I can't fit you into as a physical dimension. But, I can condense you in a Crystal structure of the physicality, in this material in the fields and transmute you instantaneously anywhere else and you manifest yourself, you pop out. You go in as a man you come out another planet

as a monkey because the monkey in that shape can exist, a man cannot. (1:44) You have a red blood here and there you have a purple blood.

Now you understand. It has a value. Today we put a thousand Euro per gram. In a coming time we're not after the funds, we're after energies that you participate to make a bigger structure and become part of and then by enlightenment you receive. That's how... It's not a payment, that's how you receive. What I put on the table, what's on the screen, once man understand it, will give life to be able to use all these properties and the knowledge it connects to. You will understand.

A couple of our Knowledge Seekers went through this last week, two, three, four of them. And they have started transmutation of the energies by will. And it's taken them a few days gradually to understand, "Oh God, now I can do this." At the beginning they were, what you call it, panicking. Now as they do more of it, they understand, they become in control of, they do. But they cannot transfer it to anybody else. It's elevation of, what I call, where one man is standing, the last man is standing. What you see in the picture on this screen, has changed and will change the life of every living things on this planet. You will understand. You thought computers changed your life, mobile phones? (1:46) Everything you ever thought is on that.

Any other question?

Q: Thank you, Mr. Keshe.

K- You're welcome. I hope to see you in Sanya.

Q: I'll be there.

K- Thank you very much. Ed has a beautiful Soul, you feel it when he's around you. It's amazing when we met him.

Any other question? ...

K- .. I was talking about you to one of the KS this morning carry on.

Q: ... I have a question concerning what we're seeing here on screen. The Knowledge Seekers coming to Sanya, can they take it from Sanya back home, or because I think when it is valid to 1,000 Euro, it will be stuck in customs, when you send it. (1:48)

K- If you pay for it, we'll bring a few pieces. (1:48) If we can get it through customs, forget about you. But, yes.

Q: That sounds good. Okay, so then I will order... I will pick it up in Sanya.

K- Yeah, you need at least two pieces, to have the interaction of the fields.

Q: Okay, but 4 is better, then you can do a Star Formation?

K- 4 then you can do a different thing... yes .. 4 gives you, but you have to understand what you do with these things. You cannot open them, don't open the seal. Yeah, we'll try to see what we can bring with us and how, what is the limitation.

... Any other question?

Q: ... The question is, if she puts saliva on her dress, will she land in a different location?  
(1:50)

K- If she what?

Q: Saliva. When you swallow in your mouth. If you put it on your dress, because then she thinks it's a different AA.

K- No, it's all part of the same.

... Any other questions?

Q: ... Hello Mr. Keshe, I want to ask a question that may be presumptuous. You have been developing the systems non-stop and seeing that China seems to be suspected of stealing the new technology again. Is there not much time...

K- No, no, no, let me, let me clarify. The Chinese got battered by this last week when I told them they... It's not the government, it's the Chinese community people who are Knowledge Seekers. Even... you got to understand, part of the technology given to Chinese... I explain to you very simply. We have Knowledge Seekers, they are here, they listen to the translation of it, or they're live online. When Corona happened, at the beginning time of Corona, when we gave the Cup 1 and the Military tested it, the military, Chinese military, went to our Knowledge Seekers and asked, those are very close to me in China Keshe Foundation, (1:52) and asked them to join the military to produce the Gans's for the military and the government, but they don't want to contact Mr. Keshe. And as they are close Knowledge Seekers to me, they refused. They said they stayed loyal to the Foundation, but they can support. A few Knowledge Seekers who are around the Foundation, just for the money of it, joined the Army and went into production with the Army. But they never put anything back in the Foundation. And they took the glory and the Chinese army went silent.

We have the same situation in the Mongolia. In the Mongolia, I worked four or five years in the Mongolia. The tests with it, the harvesting, everything, everything else with it. And then one of the Knowledge Seekers behind our back, has gone taking the work of the, what should have been stayed with the Foundation. And then we have a Knowledge Seeker who was being with the Foundation for a long time, was asked, "If Mr. Keshe is not there, would you take over and we deal with you?" And we have Knowledge Seekers who have sold us recently to securities. We have all types. And we have Knowledge Seekers who worked with us. Some knowledge was given to them, or they took from us in different shape or form, and used it in their name in the military.

I was in... I think I've told you this before, for you to understand how theft is done in ?? science, by government. Prior to Corona, and I am working close with Chinese officials. (1:54) They couldn't clear out, so how are they going to do it, but they were doing, working with us. Wang Lin and I were invited to one of the most exclusive surroundings in China to go the next day to meet China Space people for what they wanted to do the next development of the technology in the Space. In the morning, we were told, sorry, they don't want to meet you. But we, as intelligence officers, we go to them and see what

it is. And we come back and we tell you what is the concern or what they want. So we made the trip, going to this place, hanging around for a couple of days, being served the most beautiful entertainment and luxury you cannot even imagine exists in the Western world. We waited till the intelligence officer came back. And we were told, in a simple way, the Chinese have made your flight system. But they can't fly it. They would like to have the fuel combination. I said, what? In a way, our Knowledge Seekers Chinese scientists are sitting there making the structure, but they cannot fly the UFO because they have not understood the essence of it. They have not been shown the way to do it. So they want to get benefits of it without actually us being part of it.

And I know for a fact this is why I forced the military and the others to sign the agreement with us to get access directly to the top. Chinese ran into a problem with Corona, (1:56) because our Knowledge Seekers are the ones who went with the military, are copycats. They don't understand. They're just saying, oh, Keshe does this, so this is it. And when the Corona mutated, they couldn't come up with a solution. And we saw how it took over China. If the Chinese government would have stayed with us, we gave the Cup, they stole a gift, and they paid for that stealing. That's... if they would have stayed. How we worked out.. The same happened in Iran when we worked with Tehran Defense Military University. The gentleman who was supposed to be the government, then we found out he was actually stealing technology in the university, was part of this structure.

And then what happened? The Knowledge Seekers are here. The offices in Iran, Defense University, came to us. Says, we give you 1% of the Keshe Foundation in Iran, 99% is for us. We register the Corona effectiveness, because we tested it on 200 soldiers, within 30 seconds most of them responded to it. I said, what? And we took the case to the Iranian authorities. And they told us these guys were bandits, which happened to be there. And they're not there. If these bandits were not in the Tehran, Iran National Defense University, which we're collaborating, it would have been a different story totally in Corona.

Look where they are. Look how those in China who betrayed the Foundation will live. We spend days and weeks developing in Inner Mongolia. And this Knowledge Seeker now has become... (1:58) We realized how they're doing when the National Security officer in charge of the communication with Keshe Foundation went to one of our Knowledge Seekers. If Mr. Keshe is not there, can you organize it and we can do it without him? And they started doing that. And we did the punishment. It's for that National Security officers and the member of the Keshe Foundation who set up the things to make this for us, to put it right with the Chinese government, national security.

We brought the Americans in a hard way to play with the Keshe Foundation to share technology. Because you stay loyal to people as long as they're loyal to you. You don't betray them, and then trying to steal it. And this has bothered the Chinese community heavily last week. You talk about the new 'plasma defense' (shown on Chinese Internet), you don't even know what they've taken from Keshe Foundation. And with the new technology materials we put out, we change the dimension of the reaction.

You have to understand, you have to realize. There's an old saying in Farsi, we say, "Hand washes hand and then it washes the face." And you cannot wash a hand on its own, you just wash one side of it. The backside is still dirty. And, for Knowledge Seekers in China, is, don't look to us, look inside, look at those who took and did not put back in. And, this will go on, is not a Chinese disease, we have seen this in France, we've seen this in Italy, we've seen this in South America, we seen this in Iran even. (2:00) So, a lot of Chinese got offended last week when I explained, as I wrote to them, if you take all the praise, be strong enough to take the criticism and weed out those who do this. One of these Knowledge Seekers in China, we can't reveal his name, he came to me before Corona, he says, "Mr. Keshe, I do everything to become as rich as you, even if it means I have to steal from Foundation." And he's doing that. But I said, "Watch what's going to happen to your children and your family. How you balance with the Soul of all the Knowledge Seekers that stood, and you steal from them." You all know who he is. So many time I wish for him and his family, and those who work with him, walk away the right way. But you will write the history of his life. The same, the ones in Italy.

When you steal the gift, it's your habit. And you will not be happy. And even you come to the Creator, you want to lose, and to steal from the Creator, and you lose. And this is what is life. We hear Chinese are doing a lot of things with Keshe Foundation. Bless your work. But put back into the Foundation. Not just, 'I'm ok, Jack, I took whatever.' It will be short-lived. All of those of you who went with everything else, see where you are. We had a doctor in Canada who took everything, we taught him directly. We had a couple of more people like this, where are they? (2:02) How are they playing their lives?

We work with the Soul of humanity, now with one man stealing his pocket. And I'm sure the Chinese community will have a lot to say in the QQ tomorrow. And those Knowledge Seekers who were and worked in different Chinese department sections, join us and work with us and you will see what it is. Don't get offended, understand, this is a reality of fact. I was written that Chinese don't steal. Chinese don't steal, but they're in China are those who actually steal. We're talking about those, not about Chinese.

It was very intriguing for me when I met this few Chinese before Corona, that the guy's ambition is to be richer using my own technology. I thought, boy, where are you going? How would you answer the cancer of Soul for your loved ones? And then say, you blame everything else for it going wrong, but you don't want to understand it's you who brought that wrong to it.

When Chinese security tagged us, this officer, that we are a spy and we are here to recruit, and the other Knowledge Seeker accused us of for them to believe in it, and went out with all the bullshit. Excuse my French. You trusted one who betrayed. Now you have to trust the Americans to play fair with you. (2:04) We work clean, clear. And they thought they can steal. Now we put a stop to that in a different way. We still carry on working with the military and those who are in concern. But Knowledge Seekers gradually .. will have to learn. Will start learning.

Any other question?

Q: ... Hong Wei went on to talk about why he was concerned about that. He's mentioned an interview with Camelot that you had in 2016, where you said that our twin Sun will actually affect us for 20 or 30 years at most. And that if mankind has not widely applied the Plasma Technology that you taught to make a new "Noah's Ark" or learn to transmute our Souls, then mankind or other creatures on Earth will all face extinction. Is this the case? Is his concern.

K- This hasn't changed. Part of the Global Warming is that approach. And, if you go back as you read, we said in 2016 about talking about transmutation and taking man out. Now you're getting the tools of it. And how you do it. And the way you do it. and the procedure you do it. All gradually sets up and it'll come to what it is. (2:06) The approach or closeness of the Global Warming, as you call it, had nothing to do with CO2. Actually, the more CO2 we release, the more we prolong the suffering of man as the fields forces the Earth to move into a new orbit in the coming time.

Every time we have the approach of the second Sun, not only we get showered by new meteorites out of nowhere, from deep space or on the edges of the solar system, that pressure pushes Earth closer to the Sun. It's just outside gets pressurized, so new levels has to be adjusted to be done. And that is part of the, what you call, global ?? warming thing. This pressure is gradual. And if pushes us closer, the first planet near to the Sun will pop in (to the Sun), and we'll jump in (to its place). And we have to take its place. It's a natural. Get yourself a balloon and hang things in and see when you push from outside what's going to happen. And this is inevitable. And we are going through that. It's time for it.

But this time, there are two things happening at the same time. The pressure from the twin star is coming in, it's time for it. But at the same time the solar system is going through a magnetic field pressure that has delayed the Earth polarity change, due to this fact. And sooner or later this switch will take place and Earth will jump in by hundreds of thousands of kilometers forward. It'll be a switching time.

I can explain this to you in a very simple way. (2:08) The switch time through magnetic field when it becomes converts into physical change. Those of you who were in a meeting of last week on Friday, how we had to interfere very rapidly, you could not hear anything from Unit 4 and 5. Around about 9.30, 10 o'clock, you start sending messages to us that Unit 4 and Unit 5 start making noises. It was impossible for these units on a switch off button, to change. They were on the secure, on the platform, and they could not change. Because there was nobody in the office. You all have a mobile phone. You have to go and physically press the button to switch it on. Or to switch the microphone on and off. Those of you who were in a session, you could see these units from 3 - 4 o'clock in the afternoon, were put in the off mode switch, because we did not need it, the matter state connection or communication line, because we already established the plasma line with you lot.

And at 9.30 - 10 o'clock, you made contact with us, and I was contacted by a team that unit 4 and 5 have gone Live, somebody has switched their microphone on. And this cannot happen. Unless a physical force, or a magnetic field of the plasma has forced the switch. That's why you could start hearing noises. Plasmatic magnetic field has such a field force that can switch anything. (2:10) And if it pressurizes it, can change the characteristics of the structure.

You all know this knowledge. Those of you who worked on MaGravs, how many times I told you, go back into the original time of when we introduced the MaGravs, when you plugged it to the wall. I said, take the wires out of the building and watch, it's black coated. It's a plasmatic transformation, Nano coating. It's the same. If your plasma can switch a matter into Nano in the plastic cover of your wire, this is what happened in our transmutation session last week. That's why we stopped the session. We could not keep the switch off that you stay on the plasma level. It was switching back on to matter level.

And now we see the magnetic field will bring that pressure, will force the plasmatic field polarity change which is due now, which means for some time. And this by itself would trigger a lot of earthquakes. We saw this pressure coming on and going on like a heartbeat. A few years ago, we announced a problem in, you'll see in California. Now we see that building up. Next few years, it'll become more. The prelude to the, what we call this, magnetic field pressure approach of the second sun. Earth's gravitational magnetic field switch will set up a series of earthquakes, because this is the way how Earth handles its vibration. Will set out a new volcanic eruption structure, because underneath, things will move. (2:12)

And if you listen to my talk in the past few weeks, I keep on repeating, why Mr. Keshe is moving the Keshe Foundation conference instead of glorious city of Tehran into Isfahan. My dear friends, if you come to Tehran, you're sitting on a time bomb of the earthquakes. Isfahan is safe. Now we see how much we know and how much we care without your knowing. Did I invite you to a conference in Tehran? Why Isfahan? Isfahan has hardly earthquakes. You're safe. If in demonstrations of the Iran cycle of conference, we hit in that section into the ?? of what we call, field strength and do something, we'll be blamed for it. Because we know the power of this. We showed this power of change of climate, change of condition, to the Chinese government and military last summer in Beijing. Two times, within two - three weeks.

Now you understand. It's inevitable. It's coming and we see the signs of it. If you've seen the sign of tsunami, you read what is going to happen around you when it's about to come. (2:14) This is the tsunami of magnetic fields, plasmatic magnetic fields. And every indication is the delaying the switch of the polarity of the Earth has to do with the approach of the second Sun. It's no other way for it. Because the field pressure from center and out have moved, reduced, or changed the position of the fields inside the core of the Earth. And delay, we've seen it. We are expecting it. Scientific world is waiting for it. And when that happens, you will see... usually happens with no effect, but this time, two things are combining, three things are combining. We can have a devastating effect

on the structure. Not only Earth, all the planetary systems have to absorb this huge energy.

It's like, you know these soft balls you have? Now you sit on it. It bulges out. But what's hanging inside goes more to the center and finds a new position. That second Sun is seeing, is you sitting on that ball. The content cannot change and the structure has to hold. So something has to give. And the 'tale tell' sign of it is we see. You understand?

Any other question?

Q: ... When organisms die, (2:16) their physicality often gets buried. After some time they become coal, largely consists of Carbon. Is this in a way of transmutation of Carbon?

K- Maybe. Depends .. on the pressures, field pressures. In the world of diamond business, where they say when the volcanic eruption happens, the heat and the temperature will, you know, creates diamonds, and because of the force of the forces and the pressures and the temperature. If you understand the creation of crystal structure with diamond is one of it, you understand it has nothing to do with temperature and heat. It has directly to do with the field strength of the Carbon change, it just pops.

But, this is explained that way, and we accept it, because that's, there's no other explanation. Now we understand it's not. It's very much like, if you're in diamond business, I was talking to a Knowledge Seeker about it a few weeks ago. Now you can buy diamond 10% of the value of five years ago. Because cultured diamond has come into market, it costs very little to produce it. And so why should pay people 1 million dollars for a 10 carat diamond when they can buy a pink one, 20 carat for 50,000 dollars. And even that 50,000 dollars, is .. 49,000 profit.

Q: It doesn't take a million years to make as well.

K- No, if you look, this, I can't get the name right, is it Swarovski? The crystal people. (2:18) They have shops everywhere. They will start introducing, they have already started introducing, these diamonds, and diamond bourse, and diamond organizations cannot tell the difference, which one is real one, and which one is laboratory made. And now, having a certificate for the diamond, which they were trying to control, is gone, is dead. You can buy the most delicious, beautiful diamond for 5% of the value of 20 years ago, 10 years ago. Don't buy a diamond, just wait till it's 'nose diving.' There is no other... what's it called? I cannot get the name. They have shops in every airport, everywhere. They sell crystals, jewelry and that kind of thing. Because of the reduction in the price of diamond, they start going to actually give you crystal diamonds, structures from these laboratory diamonds. We cannot tell the difference. We gave the original production of these two diamond bourse in 2004 - 2005, that this technology is now available. They wanted also some, we gave also guarantees we don't produce it. But now, another way has been found and it's getting produced.

I'm getting told about IT people, people ?? stop putting orders for this material on the screen. (2:20) We can produce a limited amount of it. So we go on what we can produce and how it is. And serve on the list of the order. But this, we'll buy this back in the future on the value currency if we need to. And ... or you can exchange it with the other scientists, or other organizations, or other people who buy it as an investment. This has a huge, huge values. You don't... we can't even explain to you what you can do with it, what you can do with it. Ekmer thought was, he can use it in the Star Formation. But you have to understand what you do with these things. Do not open it, do not touch it. Once you open it and touch it, it evaporates to dust. You don't have one gram, and then the combination changes. Then you understand why.

Any other question?

Q: ... Mr. Keshe, regarding the (Nano Mirrors) discs, can you expand on their uses, other than holding one in each hand, or placed either side of the head, or front and back, connecting to the fields?

K- Please, I have to spend time to teach you people how to use it. Those of you who bought it, just try to keep it in the way we used to use it, and then I show you one day, how a solid one with a whole one, and how a combination of them will create amazing structures, physical structures, (2:22) and creates energies for specific conditions to be achieved.

If you understand the process of the fields, and if you can see it. These discs if you use in the right way, in the right combination, you know you get a prism and you direct the Sun to a point and you stop burning the paper, if you done this when you were young. This time you don't burn, this time you bring different technical development into it, but you have to know what you are doing. And it's extremely... These are the toys of the Space travel, if you know how to play with it. You have a Nintendo, these are your Nintendos, but you don't know how you play with the console, which is your Soul and your brain.

By the way, if you know or not, in the past few weeks, a new museum has opened up in Vienna, which is the museum of what we call, gaming. All the computer console games, now they have opened a museum for it, see how people actually game. It's an interesting place to go to.

Any other question?

Q: ... Could you ask Mr. Keshe about the 'Butterfly' technology? If you want to place them in an open space or gardens, what distance between them, for them to operate efficiently? (2:24)

K- Planet Earth. There is no limitation in their connection. Most of these butterflies, especially those made in batches, come from the same process structure and are connected. If you are lucky enough, get the same batches of the large, medium and the small, and set them in that way, in a specific formation, you will see amazing results from

it. Amazing. When you buy these butterflies, buy them in a large, medium and a small, and then set them up in a pattern from each other. A pattern like you can walk through it, the pattern like you can put something in it and observe the feeling.

Protect the house from all sorts of things. These butterflies have, what you call it, have a specific... You... we call it a butterfly because it's easiest way, it's actually a double loop and it's specially designed, in special material used for it. It's a two infinity inside each other. It looks like a butterfly. We call it butterfly. But scientifically, it's one of the most amazing things if you know how to play with it. Put on one wall, a big one, with a medium one in the middle of the room, and put a small one on the other side, and walk in between it. And then you tell me how you feel. You people are too physical, because you... what you do it, you have to learn to play with the fields. (2:26)

All these things we put out, is playing with the fields, for you to get, to walk away from physicality. It's like the paintings. If you put a butterfly, a big one on one side, it's the same as what we call, you know, you put Gans's of different strength on two walls to create heat and whatever. If many of you have done that, this is the same process. The size of the butterfly creates, if you put them opposite each other. Put one unit in the house on the bottom floor, just a big unit, a big butterflies on four walls or in different positions, and put a smaller one in a further position from this upstairs, and then you see how you feel across the house, how people change in the house. How behaviors change. You're looking at a butterfly, I've given you some of the most advanced technologies. And you're still after, does it stop the G5 and what happen when the G6 comes?

Any other question?

Q: ... Hello Mr. Keshe, I would like to know why some babies are born at 7 months, and if there is any difference?

K- Not really, the guy's in a hurry to get out, to suffer more. Not much. It's the evolution of the completion of the Soul. When the Soul matures to a point of fields, the body rejects. (2:28) They look at it different way, but scientifically, you're dealing with a Soul as a magnet of the mother, as a plasma of the mother Soul, and the Soul of a child. And at a certain point when the field comes, it goes. Nothing else and then the physicality of Earth is a consequence of maturity of the STM.

Q: ... Good day Mr. Keshe. Transmutation took a tremendous amount of energy and left me drained. Why does it take so much energy to transmute?

K- It shouldn't take. It means you're pushing it. Or, you became a provider of what we call, Soul Satellite to other Souls. Those of you who took part in the last week session, please send us your experience. We received from a number of you, but not all of you. And those of you who can, join us, because we stop by giving numbers, because it's too much. But the process of actual setting up started, and it has to go through.

What you see on the screen, the new material, it'll bring a evolution in the world of science. And that evolution has to be understood by those who use it. We touch the energy fields of the Soul structure of the man, (2:30) in a way elevation. And you will understand, you'll find massive changes around you. In intelligence, in calmness, in... Do not take them that, "I'm going to do this and that." Take them and just place them in the house, in your work, in your car. And use them in two's to create the fields, you will feel a difference, changing point. And these materials will never vanish unless you physically touch them, or you tap in with the system. They inherently absorb energies they are not supposed to, and then you get the changes.

Any other question?

Q: ... Apparently a company called Intuitive Machines, with its Lunar Program, Odysseus, today connected somehow to the Keshe Foundation? The chairman ?? Kaffarian is a born Iranian.

K- I have no clue. I don't even know what you're talking about.

R: Yeah, me neither. Okay, well we'd have to look into that more.

K- You look and let me know. (2:32)

Q: ... Okay, in before earlier years your teaching, when I was needing something, I find it after 2 or 3 days, when I coming across your teachings. And it happens that now I find things and then you speak about it. Today, what you taught, I think I came across a condition where the kidneys produce such a thing. And it was amazing for me to understand how exactly. And I think it's easy to produce that.

K- I don't understand what you're talking about.

Q: I understand Mr. Keshe, I understand.

K- That's good. Well, I don't understand what you're talking about. But it's good if you understand what you're talking about.

Q: Okay, you speak, the kidneys produce these crystals (kidney stones).

K- No, no, no, no. (2:34) We're talking about the kidneys physical structure. Not producing this material. The physical structure of the kidney is based, for example, it's the same with the liver, it's not just kidney. Your heart has the same kind of structure.

Q: Yes I understand.

K- It's not that it's producing the structure.

Q: Yeah, but when you are out of the fields, you see the manifestation of the materials as a crystal. I think...

K- When any material leaves the body of the man is not in a crystal structure. It's in a matter structure of the material. Even kidney stones or whatever stones we call it.

Q: Ok, but what if you see it in the crystals due to a condition of this?

K- There is a lot of... body produces a lot of these crystals according to... but they are not the Cosmic Ray crystals. They are 'physical body' crystals. If you eat certain fruits, your body produces them naturally, like sand. If you, for example, what's the name of the fruit? When you eat more than five or six of it a day, your body produces like crystal grain sands. You feel it. (2:36) And this is not plasma crystal, it's a matter state, which is totally different. We produce a lot of material crystal in our body. Part of our work is a system of digestion creates it because it uses it.

Q: Okay. But, in a way I understand the creation of it.

K- Yeah, that's good.

Q: ... Thank you very much Mr. Keshe.

K- You're welcome. I think you're going to have fun with this, if you understand what to do with it.

Q: In the picture here?

K- Yeah.

Q: I know.

K- And your secret society testing. I wish I'm a member of, without knowing. It's okay, no problem.

Q: We can bring you in again, no problem.

K- No problem.

Any other question?

Q: ... Hello Mr. Keshe, you said the Gas Electric Unit was modified and further developed, can you say more about it? Thank you.

K- We prefer not to, because we are actually testing it yesterday. (2:38) And what you call it, we are testing. And as I said, we reduced the package quite a lot. And we most probably come up with... We try to show you this in the... before, after Sanya. To see the system and see how it works. And then we go directly into production, hopefully with it. The development technology has brought new, strange advancements in the Keshe Foundation. And this is one of them.

Any other question?

Q: ... How come I felt a spinning sensation when the Enhancement Unit was operational in the previous workshop? Is that the system charging up the Inertia of the halo above the head? What's the cerebral spinal fluid?

K- I don't know, depends what you were short of and what you received.

R: You weren't inside Ed's body at that time, to notice?

K- No, it depends how you feel. A lot of people are feeling a lot of things, in this new, what you call it, tests. (2:40) I said many times, people go to different organizations and go to governments to get finance or whatever, with a meager, what you call it, incomes

we have, we do tests and you are part of this test, you are the guinea pigs. And you have to tell us what you feel and we see what we set up to achieve and what was achieved, and then we see who got it right, where. And to what extent we have progressed.

Any other question?

Q: Crystal in the Universe are the ones that make us contain our physicality?

K- Which crystal?

R: I think the crystal of the Universe, perhaps. Crystal in the Universe, she says.

K- Maybe. As long as we keep our sanity, I presume so. Maybe.

If there are no more questions. I have a couple of questions sent to me by Knowledge Seekers, which I try not to bring into the teachings. And please put your questions in the sessions, that it can be answered as it is. Because some of it is very fundamental, and some of it is just personal curiosity. If you have any questions, bring it into the teaching that everybody else can understand and share.

Anyway, thank you very much for today. Chinese community join us in the QQ tomorrow. (2:42) We try to be there and we have asked the Chinese community to come in with your, what I call, headphones, because Chinese never had this opportunity. And we try to give you some experience of what we call, communication in different strength and see how you enjoy the session. Because the big session we had with the rest of the world and Chinese couldn't join us. Now we set everything up that we can go through QQ that they can experience part of this what we call, beautiful joy of transmutation of the fields of the Universe.

And those of you who are so interested, join us in Sanya, it will be an amazing experience and another winter that we go forward to. As I said, we celebrate the 20th of March in Sanya as it is the Iranian New Year celebration. And we'll see how and the way we progress to the next step. Thank you very much Rick.

Q: ... Hi, I've been participating on and off with your Knowledge Seeker workshops for about a decade now, and I've replicated lots of the Gans, the Gas Atom Nano Solid State, (2:44) acronym as you call it. Others call it Ormus, or the Monoatomics, or the Plasmid. And I've also replicated and built a couple of your MaGrav coils, and have several examples of that black Nano coating that covers all of the wires that are attached to it, even while they're sealed with the plastic coating and all of that. And so basically I have many, many...

K- You've been through the 'run of the mill,' as we call it.

Q: Yes, but I would like to, if possible, schedule a follow-up interview, as well as opportunity, if you would be willing, or if you could get some of the Keshe Foundation

Knowledge Seekers presentations together for an APEC conference that I helped co-host. It's an alternative propulsion engineering conference and it's an open source alternative energy, free energy and anti-gravity research collective with lots of ex-NASA and different North American researchers and stuff. But it would be a very good platform to get your plasma field knowledge out there into the mainstream, as well as myself. I do YouTube now and have started this agricultural alchemy series where I've been using the Gans water. (2:46) Lots of people also call it colloidal water, or colloidal silver sort of stuff, but with gold, copper and zinc in it as well. It's basically identical to what I saw the agricultural group is in the KFSSI organization. There's just a lot of opportunities in different communities that are understanding and experimenting and working with your Gans, your plasma, as well as these toroid coils that you make and have taught. There's actually a platform of researchers in the Americas that are open source that can actually comprehend what you're trying to teach. If you could or would be willing to do a whole day of KFSSI Plasma and field physics, it would... that just change things overnight pretty much.

K- Thank you very much. For talking, or arranging a time to give interview, you're explaining this, send a request to [info@keshe.foundation](mailto:info@keshe.foundation). And put in there that you mentioned. (2:48) Regarding the agricultural side, you have to speak to Jim in, what you call, Australia.

Q: Well, I've got just a couple of quick questions for you in regards to the color of the Gans, basically the oxide or hydroxides that form of the different metal elements. In my own alchemy research experiments and tying it to Sir Isaac Newton's recently released and translated alchemy writings of the colors of the different transmutational states of metal, basically the difference between the white, the blue, the purple, the red, the yellow states and the black.

K- There are many, many colors. And it depends on energy absorption, or percentage of energy release into the environment, they change color. We've seen that. We go from blue to black, and back to yellow and then blue again.

Q: So, it's the black like Deuterium, dihydrate.

K- No, no, no, no, no, no, no, no, no, no, no, no, no, no, no. .. Cu goes black.

Q: Sorry, the yellow is sulfur, right? Sulfide and then the ancient alchemists say the red is mercury state.

K- No, no, no

R: No, no, no, no. You have to listen to the word, no. He said it many times, you'll get it eventually.

Q: I'm trying to explain what I'm getting at.

R: You're mixing up technologies.

Q: It's not actually that.

R: That's something we don't use in the Keshe technology. We don't use color coding.

Q: It's a metal material, and it's a hydride. And that's...

K- No, you see, let me explain to you. It's beautiful what you brought up. It's fantastic what you're putting across. Let's extend the knowledge. (2:50)

Q: Yes, and sorry, I'm not trying to get specifics on that.

K- No, no, no, no, no, no, no. It's beautiful what you brought up. It's good for Knowledge Seekers to learn.

Q: The white, the purple, the blue and the green, each one represent different states of the metal and whether the amount of oxides or...

K- No.

R: Again, it's no. Let Mr. Keshe answer, because the answer is no, no, no, and no to everything you're saying.

K- You see, the color changes in the matter state comes different way, than the color changes in the plasma state. And, if you go back to, I think it's Book 3, I put a little glass tube with different Gans's colors in it, and I say they never mix. But, they never mix, but if you have percentage of them losing energy, the appearance and the color changes. And then they gain the energy back and they go back to it.

In the world of matter state, this hardly ever happens. Because once you take the color and shape, it stays. Because you are interacting with different fields, the interaction of the fields create different lights. This is what happens in Plasma, in Gans technology. It's not a permanent color, it's different field strength which manifests itself. So, you cannot say, you can have a Copper going yellow, and you can have a Zinc going yellow, you can have a Zinc going black, as Copper goes black. It doesn't mean that they're the same black, they're different field strength. (2:52) And this is the manifestation of understanding the creation of lights in the Universe, or radiation. So, when you speak change of color, it's nothing to do with the chemical effect. It's to do with magnetic field strength changes.

Q: Sir, I absolutely agree with everything you just said. It's... we'll have to continue this conversation at a later time, as I believe I've discovered an additional part of the solid state of the metals in physical color, and that it is a lost ancient science of alchemy and the color scale of transmutational metals written about in all the different ancient alchemy science texts, specifically Sir Isaac Newton's and that it might be a key in unlocking the connectivity of the plasma color light state which, and the field forces of that specifically, and creating the physical manifestation of that color state in...

K- Let me... I understand what you're talking about. Let me explain to you something very interesting. If you manage to make a Nano material sheet, in a way, if you can...

Q: Yes sir, the latticing, the crystal Nano layer.

K- Let me explain something. If you take, let's say, take a sheet of whatever, Zinc or Copper or whatever, and make a Nano layer that you can separate this layer from the Zinc. (2:54) Hold it in your hand and put a mono color underneath of it. And look above it, into the material. You will see different colors. Very much like a prism. You will see the white changes to different colors in different holes. And sometimes, all the colors are the same in all the holes. And then one by one they start changing. Once one changes, the balance of the field changes. It's the same hole, it's the same light. You're not moving anything. Because the field interaction of that hole position, creates absorption of certain colors, or adding of certain fields that it changes the colors.

Then you understand what you're trying to say even in alchemy. It's not alchemy, it's understanding why they change color. The energy from the matter underneath of, going through reflects according to the size and position of it. When you make Nano layers with it. We saw this one for the first time in Ghent University with the professors from electrical engineering department. It was amazing how we hung a piece of wire, copper was melting inside you could see it floating like a water. But the Nano tube was holding it. And then we start observing different colors coming from different holes. The professor brought all the system the maximum current we could put on this wire it would not bend, it would not ?? , it would not break, but we could see the holes in it, even if it go, the material, liquid, copper, would not go through the holes, we could see light through, because it's a field strength is different. (2:56) Because the copper inside is in a plasma condition, even though it looks as a matter.

This alchemy you talk about change of colors, materials, we understand this. It depends what hole is there. This is the way the head of your femur decides what, what you call it, Lymph come out as a white cell, red (blood) cell or whatever else. This we know. It's not alchemy we don't understand. This is a physics now with producing Nano materials we have seen ?? in Belgium 15 years ago, plus, physically. So you haven't discovered a new state of matter. When you create this condition you get this condition, you get the light reflection from the images of the matter going through these holes. And so it manifests itself as different color.

R: Bernie was just suggested to share his camera he has several jars of specific Gans materials of specific colors.

K- Yeah, I have tons of... Yeah, they keep on changing colors. When sometime I go to the lab, I see some Gans's which were a different color before, they are different, and observed this one for years. They change, because they transfer energy from each other.

If you put your Gans's bottles next to each other, see sometimes your Gans's start going up the side of the jar. Which should not do. All the waters, all the materials should be on the same level. You see they start creeping up. It's like the moon night time, you know when you get the cycles of the rivers or oceans. Put your jars of Nano material, Gans's next to each other and see how they change shape, not only the color. And how they

change shape, it changes the color in them or the others, because they give energy, they absorb energy.

R: Do you want to have a look at those jars Mr. Keshe? (2:58)

K- No, no, it's okay. I understand, I've seen these a lot, and we understand that. The color changes with it.

For your agriculture, write to Keshe Foundation, we put you in touch with Jim, because he can give you a lot of knowledge. Working collaboratively with what you're trying to do. And you can talk to Dr. Gatua in that side. Regarding if you want to share knowledge with the scientists and scientific world in US, write to [info@keshe.foundation](mailto:info@keshe.foundation). Explain you have talked to me to the meeting (KSW) and you want a meeting with that. And it will be a pleasure to share knowledge. It'll be fantastic to do it.

Something which I have to explain to you, next week, Keshe Foundation will give a presentation (interview) to the Italian structure. We don't know how long it's going to be, which will be translated to Italian. It's not a Live presentation. They do the whole, what you call, like, interview. And then it'll be translated into Italian. And it will be presented in a professional way to understand more about the technology and different aspects of technology. So, we will give you the link in next couple of weeks, after they actually do the interview and they translate it in a correct way. It's not a Live translation, it'll be recorded, translated, and it's with somebody who's famous in Italy apparently, with that, will do this interview. Then, maybe some of you learn as Knowledge Seekers, it's an English version of it, some will learn the Italian translation of it.

Thank you very much. Send the information to us and then we'll see how we can collaborate with your people in different platforms. (3:00) Thank you very much Rick.

And we'll see how we take shape in the coming weeks. And I hope those of you who take this material have fun. But please do not open it, everything comes with a serial number. These are literally live currencies. Because you will understand why and how in a coming time. Keep them safe, it's not just Plasma Space material. It'll be a lot more, it's an investment that you will appreciate, in the coming time. Thank you very much and see you next week. And we'll see the Chinese community tomorrow in a discussion with them. Thank you very much.

**526 KSW Feb 22, 2024**

**END**
