

530th Knowledge Seekers Workshop March 21, 2024

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

Sanya Conference what happened; About physical seeing - Only see matching M field strength of AA of eye; See very little of U; Each strength sees only itself; Systems to adjust M field strength spectrum - see other entities in front of us; Eyes cannot be relied on in U; Space Glasses can see other strengths; Empty Space filled with beings; Like upper atmosphere intelligent beings live - NASA; Mature Soul can see other strengths; Iranian New Year; Brazil Intention support Sanya; Plasma Room - field environment; Materials gold made; New head of KF China; Best conference ever; Isfahan - magic show; Governments have 3 years for peace - force release of T; Bahai Faith went wrong - federation nonsense - T makes every individual equal; True equality - serve others - work out of joy; Not make new temple - worship your own Soul; Never understood Merkaba; Coke Bottle - DC plasma - different height - same with people; Don't fear pain of transmutation - become addicted; Sanya amazing success.

ENGLISH TRANSCRIPTION

(:12)

K- Yes, thank you very much. Good morning, good day to you. As usual, whenever and wherever you listen to this series of Knowledge Seekers from the Keshe Foundation Spaceship Institute. And we welcome you back to the beautiful city of Sanya and one of the most beautiful coastlines in the world. The teaching of today bears with us, the continuation of what we talked about in the past weeks and how and the way Cosmic Rays (CR) will affect us. What is the Cosmic ?? Rays? The field of the Plasma, which different tentacles of it, reaches out according to the strength which manifests itself, or can spread out, to be and to be part of.

What we see, as we always explain, is a small part of the Totality. And, in a way, it's what we call, the dimension (D) and diversion in Plasma. In our, what we call, in teachings, or in our works, we always look, we always produce magnetic (M) fields which are in a way part of the structure of the mixture of elements. (:14) And so we only see one, one shape, one magnetic field strength. We see one structure and this bring forward...

<< Mr. Keshe here have problems opening the whiteboard >> (:18)

K- ... And, this is, we usually define the Plasma this way. And, but in reality, when we look at a Plasma, we see a spectrum of the strength (draws a spiral). (Now, I remember what the problem is with this pen. This pen has become directional recently. That's why). And then, if we go the same way. (if I would have become Picasso, I would have been bankrupt, forget about it. How it will come).

If you put an eye here (Looking into the opening of the spiral). This eye, this point of observation, only sees the magnetic field in the center of the green (line) light. (:20) It cannot see the magnetic field in the strength of the other light. Where the eye here only sees the strength of the red. And the same way the black sees the strength of the black (draws 3 eyes looking into the spiral one green, red, and black).

And part of what we, as human, always considered, that we see the whole universe (U), we look at our telescopes, we look at our naked eyes in the sky, and we see everything. Where, in fact, our eyes are trained, our sense of observation of the vision are trained in a mono-energetic band of a position of the magnetic field strength. And this is what, by us becoming man of Space, will become one of our biggest concern and problems. Because we observe the structure according to the field strength of what we call, magnetic field strength of our own vision material, which is primarily, as "Mr. COHN," magnetic field strength. If in one point or another, we change, we cannot change these primarily as they are universally on Earth. (:22) If on Earth we change our Nitrogen to, let's say, Calcium, or Potassium, we will see, maybe, on a field strength, very much, let's say, at this strength. (I have to change it because I'm sure you will not be able to see it. Ok, we go to the blue).

I create a field at the strength of the blue. Then I cannot see what's on the strength of the green and I'm totally blind to the strength of the black, or the red. But once we start traveling at the speed of magnetic fields and our Soul becomes in a dimension opening up to different strength like this, or this or this one (red, black), then our vision sees different. The stars, the galaxies which are visible to us now they don't exist. We can't observe them, but they exist in the totality of magnetic field of the Universe. So man in space become aware that his vision dictates the strength of the magnetic field of his amino acid (AA), the structure of his life, depends what he can see. (:24)

And you come to understand very, very fast that now that we are becoming Passengers of the Universe, and we travel in the dimension of the central field of our existence, what we call the Soul, with different magnetic field strength of it, different dimension of the creation in the Universe will become manifested to us. And this will create another major problem for man who only see through their eyes, what they see they believe. Now the eye cannot see. Eye has to rely on the emotion, on the confirmation of the existence of whatever it is, through its Soul.

In the coming time, we will start developing systems, created through dimension of the, what we call, combination of magnetic field strength of the Cosmic Rays, systems that allows man at least to ?? stay (in), one or two dimensions. That he has the ability to recognize where, for example, with the blue line today, he will see one third of the physicality of what is in the Universe. But if you add, the one on the green line could be 1/20th, and the red will show 1/5 of, (:26) and the black most probably shows 1/30th.

So we change our speed. We have different emotion of the strength of the wind, which we travel in, or the wind we displace. In the dimension of the Universal transportation, transmutation, the speed that you travel dictates, in a way, by the magnetic field, the

strength of your own amino acid (AA). And then this dictates in the speed category of whatever you put it down, what will be visible to you. Because the interaction of the fields of your AA dictates the visibility of what you see and what you don't see. What will come and stays in your, what we call, 'blind spot.'

So it'll be interesting how you as Knowledge Seekers (KS), when you'll be going back as a KS, you'll go around the Universe, even traveling from one place to another on Earth. One travels with the speed of the green, one travels with the speed of black, one travels with the speed of the red. Each one of you will only see what is in the magnetic field spectrum of your AA and, in a way, dimension of creation of you. (:28) Therefore, do not be surprised that when man becomes a Passenger of Universe, he has to decide from the outset what magnetic field strength he wants to travel in and to be within. If your very high speed created due to high magnetic field strength, you see different things than the one which travels in lower speed of magnetic fields and lower field strength.

So many of you have to open your eyes to this fundamental point. Because, if you don't understand, your eyes can play with you, your eyes can fool you. And try this. Try the production of these kind of systems, different magnetic fields, and see what you can observe. Or are the images missing from the screen? Or are they in it the wrong way? Therefore, when we travel with a spectrum of magnetic field strength, we will see different stars in the sky. We will see different dimensions of the sky. Everything is not so sharp. Everything is magnetic field strength dependent. (:30) And then you will understand what you see as a being, as creatures, in the line of the blue line and in the line of the red one is totally different. And you decide in what you want to observe and absorb.

This is the beauty of the new knowledge. We have to understand it, we create the speed, not out of rockets, but out of magnetic field strength. And we have to understand, in the process of travel, in this dimension, you have and you become across different entities occupying the same space, time and place. I've seen in past few weeks people getting agitated. And they talk, how they talk and what suits them. But in fact, you understand that what is written by the pen of the Creator will stay the power of the man. The limitation of its extending it beyond the time, place and position.

In the coming times, we'll introduce you to what we call, Space ?? glasses, where you can see what magnetic field strengths are available and where they are and how you can use it. (:32) A few Knowledge Seekers already use method like this. Knowledge Seekers, developed, tried to, but they never understood the concept, and we?? see them after three months, hackling, trying to find, to understand, then, nothing happens. But, we change the fields within the system, remote, and suddenly new life appears in front of your eyes. And this is what you will face with the highest speed travel, if you choose the physicality, or you choose the Soul, and you let it ?? grow to what it should be, and then you will see what comes out, what it'll be, what it'll deliver.

In the systems which we bring out in the coming time, very much like the glasses, when you put them on, according how you adjust the strength of the magnetic field of the glass,

decides what you see in the Universe, what you see in your environment. It's not a difficult thing to make, but providing that such a system will bring addition to the present Space Technology, that's another problem. (:34)

We have to be able to deliver systems that can bring the changes in the structure of the magnetic field strengths that with it, within it, allows the development of a new system. New vision system, new system that we see the entity. We see the Universe through the plasmatic magnetic fields and not through the eye of the man. In the eye of the man is just controller of the physical dimension. Looking left, looking right, up, down. The preset to this was when we showed systems that can run on their own. And when we showed a ?? lady ?? became apparent that this has a new dimension, this has a new understanding. And this needs to be developed in a way that we all see the same vision, the same light, and the same magnetic field strength of the material at the same time. But we are aware of the other dimensions. In the blue line, we might see emptiness. In the green line, we might see material condition, which in the blue line we haven't seen. But now we feel the energy of. And by changing the magnetic field of the glass, by changing the gravitational field strength of the glass, by changing dimension of the, what we call, material condition fields, (:36) we can dictate, we can understand, and we can progress to the next level for Space Technology.

Why we need to understand? Why we bring condition of the effect of the magnetic field strength to confirm the vision, what we see, for detection or whatever? Now, nothing can be seen except what is in the new dimension. And this will change a lot of things for many people. You can dye your ?? hair black, and then sit down and make a black clothing. But when you want to use it, they say, oh, no, you can't use this. You have to come very, very ?? you don't wear a black. It has to be the gray. And then we've seen, sewn it together, and then we see how we can change dimensions by, we can change observation by simply changing the strength of the magnetic fields of a glass, and not necessarily the eye of the man. But in that process, man still will have limitation of the magnetic field of the Earth and what he or she can see.

In the future, when we progress in understanding of the Space Technology, we will understand that the vision is not the sight, but the emotion, the magnetic field strength, the speed of the field will give you every information you need to become Passenger of the Universe, (:38) to become travelers in ?? different countries. So gaining the knowledge of Space is not the exclusivity of the man. And this will come to be one of the cornerstones of man, recognizing objects, entities, lives in the Space, in the deep Space. You stand in the empty space, in the red color, you change it to gray color, is mayhem of lives moving everywhere. And you're sitting in a traffic jam, which in the strength of the first original ??, magnetic field strength, has no dimension of physicality.

This will become part of the work in the next few months, in the next few sessions of the Keshe Foundation. That to produce systems that makes the skies, the depth of the Universe, fully visible. That it's not just, we see what we see. I gave an example of this before in some of the teachings, where, for example, we have the clouds. We see the clouds. Because their magnetic field strength is that the strength of our vision. But when,

I always refer to, when NASA took picture of the Space from top ?? bomb (upper atmosphere), (:40) At the bottom we see the man, but on the top we see creatures moving with intelligence, because they have replicated many of themselves. But we don't see them. We have looked from time of Galileo to today. We never knew they existed. And by refraction and deviation in the light in the Space, accidentally we have to come to understand there are lives above us.

But if man, if our systems that can see in their magnetic field strength, we will see we are a bottom eater of them above, living, and whatever they want, whatever they don't want, handed down (to us) and we are happy to (have) it. We breathe this, we drink it. So in the coming time, as we don't see these creatures, we have now managed to see them for hundreds of years, we've been looking out now, that we are looking down in different magnetic field strength, we see them. That'll be the job of the man, to see how densely this atmosphere of the Earth is populated and polluted, and lives live within it.

If we go through this process, if you understand the process of creation of variation of magnetic field strength, leading to observation and confirmation of new lives, our skies are not black (of night). Our skies are teeming with life, but we have chosen not to see. This has brought us just not to want to accept, but in most of the work of the Creator, man has been only discernment. (:42) If we manage to create a spectrum of the fields, magnetic field strength, then we'll be able to observe everything which happens around us by just switching from given strength to another strength. And to how much it will feel to be part of it, because of it's not being ignored to be part of it.

Creation, maintaining and dimension, and control of the magnetic field, will become one of the cornerstones of the man's space travel. As we said, it will not be long that man will go through this phase. Man has no option, as I always say, because we have opened the doors of the knowledge. And we have to live with it, we have no choice but to live with it. But we have to understand it, that we can accept it. We have to understand it, that we can analyze it and develop ways, not necessarily systems and machinery, ways that our Soul can adjust to it, that does not need equipment, but it recognizes according to its own strength, what it sees, what it's got to do with it. And maybe one day, through the, what I call, strength of the eye of the man, man, instead of taking the images of the Space, will print the images of Space, to say what he sees. (:44) What I'm observing, that with the naked eye of the man on this planet, cannot be seen.

Then new cycle of technology and knowledge will start, which will change the present understanding of the Space Technology, the way we are. Vision, observation of the environment, will come through the field strength feeling, and not by vision to see the sight. As I said many time in past months, we have moved away from the MaGravs, electricity and the saving, into the energy, which the magnetic fields of these Units, these entities will deliver for us, to us, and allows us to enjoy new dimension in the science and technology.

So, next step for us, will be in a way to open a spectrum of vision, lights, confirmation of existence, that all of us can enjoy. And not to be blinded to one shining star, and we call

it, it takes so many millions light years to arrive on Earth. And in the way, bring our ignorance of our own knowledge, to understanding of our own joy, of being able to see more of. And to enjoy, to see what we have missed, or what we can create to enjoy that we do not miss. The dimension, (:46) variation in the magnetic fields of the vision of the man, then has to follow with the magnetic fields of the hearing, then understanding and detection through the field of the emotion of the physicality of the man.

In these all needs to be trained, you need to see who's standing in front of you, when you land on the Moon. As I said to the army people, we have developed the system, that with one switch is visible, and in one switch is invisible, even though it's in front of you. Then you have to understand, how many beings have been in front of you, and they've been on the invisible switch. Because you don't have the magnetic field strength of it, to be able to observe their existence.

A man has to become knowledgeable into understanding the spectrum of the fields which gives him vision, sound, emotion of the environment, that he can survive anywhere in the Universe. One day, in the near future, we go to that phase. We are about to, as I said, developing the, what we call, non-tangible Space systems. Which means there are no reactors. But create condition. And in that process, we will create magnetic fields that while these reactors are operating, creating dimension of vision that continuously every man can see a spectrum of the light and not just one mono-energetic, (:48) which we call the white light which is the beginning of, and the rest.

So next time you come to look at the Plasma understand all that single line of what I call, the spiral was one magnetic field strength that you can see. Now you have to understand you're observing many, many, many. And how you use this for the knowledge of the Space travel, and how you use some of these ?? lines (light) to travel with the, into the depth of Space by converting and using your sight, to be the vehicle for the transportation and transmutation of the body of man. What you see, you can do. What you don't see, you cannot do. And now you have to see, to be able to see, that there is nothing that you cannot do. We go for a break, we come back, and we have a short day today teaching. And answer some questions and let's see what comes up. I hope you understood this, because if you haven't, you're going to be in big problem if you become Passenger of the Universe. Rick, take us for a break and we come back.

>> BREAK >> 530 KSW March 21, 2024 (:54).

K- Yes, first of all, Happy New Year to not only the Iranians, the Chinese, what you call it, the Japanese, the ?? Kazakh, the Uzbekhi, the Silk Road belt of Knowledge Seekers. But, to all of us that this celebration is, for all of us. It is the beginning of the spring for all of us, who are in the Northern Hemisphere. So, it's not a national holiday, but we celebrate on behalf of all of you. But, it's celebration of New Year, And I hope it will be a wonderful New Year for all of us, as Knowledge Seekers. And I hope, one day, we become mature enough to celebrate the New Year for our Universe and the New Year for our Unicoise celebration. But that takes time, man is still got problems with what he has. In general, I hope, or what I call, scientists and leaders become mature enough to understand. And bring what we call, unity, and not just by name of nations, but by, as a human, as One Race Nation. If there are any questions, we are prepared to answer, and let's see where we go.

Q: ... (:56) Did the Knowledge Seekers in Sanya feel the intentions coming from the Brazilian meetings held at the same time as the conference?

K- You should ask them. I cannot tell you.

We were busy, it was one of the very nice conferences, very unusual. As one of the, what we call, dignitaries said, "I've never been to a conference like this." Where there is no program, and it's four days, and everybody is literally part of the conference. And, we had a beautiful session, especially after the third day and the fourth day, where Knowledge Seekers in groups of 10 every hour, would go into what we call it, the 'Plasma Room,' and test and try every way possible to test themselves, how they can elevate themselves, or what they feel. And, we... I know a number of people have had, what we call, 'touching emotional.' Some people have already seen physical changes in their, what we call, physical life, and there are many, many, many, many, many things. We watched how, in a way, unique materials were created. We watched how unique emotion was created. (:58) We observed how some can have a physical feeling from the interaction of the emotions through the system. And it's very generally interesting. But, you have to ask them, you have to ask them.

Because, was your support, brought a, what we call, elevation of the Soul, that we all started with a higher, to understand more. It has been one of the most successful conferences Keshe Foundation ever held. In many, many ways, many ways. Primarily, it brought in Knowledge Seekers China back together again. It created a condition there to put a new, what we call, 'blood' into Knowledge Seekers of China, to be part of, to be in it. It has brought military and officials that, as you know, if you've spoken to Knowledge Seekers present. Some of the most elite scientists, academicians of the nation were present, and they stayed the whole time. People from the armed forces of China were present. And, this was the show of knowledge and technology.

As I said in the conference, uniformed officers, military officers of Chinese forces, cannot appear in conferences like this, when especially there are tens of tens of foreigners in. It's against the law of the military. But they stayed with us two, three days and they listened and understood what the change is. And in the same time it brought what we wanted, which was mainly to bring the Knowledge Seekers together. (1:00) In a way from Chinese Knowledge Seekers always been isolated, maybe one or two ever came into conferences, a very few handful of, but now it was literally one big family. And it was nice to see, how even with the language barrier, they sit amongst each other, there was no problem. And they understand the knowledge and that was the main thing, and they carried the spirit of the Soul of the Keshe Foundation, understanding the knowledge is more important than color, race and religion.

It was well organized. I thank to the new head of the Keshe Foundation for China organizing such a flawless presentation, absolutely flawless and it shows his strength, his what we call confidence in holding it and I'm sure this will show in the future works of the Keshe Foundation, with the new head of the Keshe Foundation, for operating China. In coming time we will announce, and you'll know, as Knowledge Seekers start setting things up, that how the new systems which has been brought to China, will bring new dimensions for the Wellness and the rest.

I'm sure your prays and your supporting us has... there's a reason, part of why it was so successful. It's been one of the most successful Keshe Foundation conferences I have attended. I've attended in a few of them up to now, but generally speaking, extremely well organized, extremely, what I call, precision. Every hour in the second day, and the third day, ten people moved into the Plasma Room and ten people came back in. (1:02) But, one thing is strange, is the one which went out, never came back in. We don't know why they were transmuted, but they appeared somewhere later on in. And it was interesting, how people come back from the Plasma Room and how some of them gets touched by what they feel. And some of them tell you, "I didn't feel anything, it was just in..." But later on they tell you or send, write to you, a day later, whatever, .. this and that thing has changed in me. So, what they could not feel inside, later on they've seen the physical dimension. And so, in a way, for the first time, we brought in the pre-, what we call, transmutation system, into operation. And a number of people, sat in it, a number of people tested it. And it's amazing some, how people feel, going through that transmutation. And very interesting, what we hear, some people say, "Nothing happened." But later on it did happen, because they found it physically in... because of what they did.

And the .. generally it was a successful meeting, a successful presentation. Our next meeting will be in the beautiful city of Isfahan. The old capital of the, what we call, the Persian Empire. And it will be fantastic. What we have already as of today started the work, repairing (preparing) systems, testing systems, and understanding the boundary, ready for Isfahan meeting. In Isfahan for sure, 100% sure, we will not start Isfahan conference without it, (1:04) and we will show the first transportation, transmutation systems, ever seen by man. The Iran conference will be a double conference. The conference we finished in China was a triple conference. Manchester, London, Sanya.

The second package of the conference is the beautiful city of Isfahan, where we will show the true transportation, new technology and science. And we try to even show you, if we can, a flying car. What you've been dreaming. We will show new breakthrough in technologies, which we could not even talk about it in Sanya, which we close. Then we move into Washington. In Washington we bring the position of no borders.

In the conference we announced, if the government do not make effort to bring world peace by 21st of March 2027, the technologies in the hand of the government will be released in the hand of people. You will be able to transmute, the technology will be taught. You'll be able to create energies which brings down the limitation of the energy. The food supply will become part of the technology of the Keshe Foundation delivered in 2027. What we ask is, for the governments to come together, to start the process of world peace. That if not, as you've seen we did, with releasing the patents, the blueprint which we... of the MaGrav, which most of you never understood, to release the technology to start the process of world peace. (1:06) Then every man can produce as much gold, every man can produce as much food, every man can produce as much as he needs to survive, irrespective of the time, place and position on Earth, on the Moon, or anywhere else in the Universe.

The systems to guarantee this process has already, this morning, has gone into motion. We are preparing to show the transmutation and transportation in Iran. Once we come to an agreement with the Iranian military, especially military and Iranian government, the Isfahan presentation will be a magic show, very much, where the man, for the first time, saw the light in 'Chicago Fair.' In the Keshe Foundation Isfahan conference will bring a new dimension to Space Technology.

As I said in the second day of the conference, the first day of the conference, we introduced, we brought all the technology ?? balances together. And in the second day, we introduced the new Space Fuel, which is a plasmatic condition of Cosmic Rays. The system was brought into auditorium and was shown and delivered. And now we are in the second phase. Now we deliver systems for it. And Isfahan will be a magic show for those who love to understand the Space Technology. We are not showing you a UFO, that's too old, and that belongs to the aliens. And if the man wants to have an alien technology, you're quite welcome (for it). But we will show you systems that bring transmutation and transportation together. (1:08)

As I said, the Knowledge Seekers are on the run to find out how, and in Isfahan we will show. And we announce in short time, very soon, the entry, the registration for Tehran conference, and the Washington conference. And it'll be very interesting. In the phase of the Iran conference, we will invite the world leaders through the offices of military of Iran to see the change. And then we take this to Washington in a way, we'll bring an end to a lot of things and beginning of new things. But we show to some very few people new materials, new technologies, which has been developed and delivered. And those who saw it, those who felt it, they understood the change. And soon, in the next few months, we will see.

Any other question?

Let me tell you something, the Isfahan conference will be very limited to very few people from outside. Those of you who are from outside, once we announce it, you want to be in it. You'll have a few hours to complete, and we close. Isfahan presentation is for... the way it was for Chinese, it'll be first of all for Iranian Knowledge Seekers and Iranian scientists, and world military and Space. (1:10) We will present Chinese, what we call, the Isfahan Conference, with the presence of Chinese military and some part of the leadership. So, it'll be a combined, combination of the things, and then, majority of the seats will be given to the Iranian scientists and Knowledge Seekers. It'll be on the same basis, no different.

And, as you've seen the pictures, most probably of you as Knowledge Seekers of the conference, it was held in one of the most prestigious hotels on the island, in the city of Sanya. Amazing place, well orchestrated, well kept. And, I think the Knowledge Seekers hardly had any sleep, because they attended the conference during the day, and they went eating and whatever they did, till early hours of morning. And it become, it became actually, bringing many Knowledge Seekers of different nations, nationalities together, to enjoy the time and the place.

But, when you come to Iran, you understand the love of hospitality, and how it means to come home. Where the humanity started from. And now we start from the same place, a new culture, a new way man to go to Space. And I thank those who made, facilitated that we could celebrate the Iranian New Year together with the celebration of ?? in the conference the last day. But be prepared, once we announce the Isfahan presentation, will be one of the biggest magic's ever man has seen in the world of the science. But this time it's reality, it is not magic. (1:12)

We've given the world governments three years, from 21st of March, which is today, to find a way to sign a Peace Contract, and bring world to peace, otherwise we'll force, we bring new dimensions. And, we have shown in the conference, the production of gold, unlimited. We finish with the old, which was gold, and we started the new, which is Cosmic Rays, and understanding of the travel in the depth of the Space, with the energy of Universe, and but not burning fuels and killing others.

Any other question?

Q: ... Thank you Rick. Thank you Mr. Keshe for a very, very, incredibly beautiful conference. Can I ask a question about...

K- How do you know, you didn't attend? How do you know?

Q: I didn't attend, no Mr. Keshe, no I didn't know. Did you manage to collect Mr. Keshe, or receive all the information's of the Souls that went into the system? Did you get all the information you required?

K- We will get it, don't worry. We let it go, we picked the ones we want, we observed the ones that we want. And, it's very interesting. The data we'll analyze later on, because it's done, it's recorded, hopefully. And if it's not done, we've seen what we wanted to see.

It's amazing when Knowledge Seekers change, the weight of the systems changes too. (1:14) By variation of you lot going in and out, it creates a different weight ?? . We observed it a few times, and the thing was closed afterwards. So if we can change the weight of the system by just bringing people walking on Earth, not touching the system, so it means you are interacting with systems. We watched on monitors on our oscilloscopes how you people change the fields, how Souls move.

It was very interesting. But the most important thing is how many of you took the experience of going into the Plasma Room, or in the other room, being able to use the five systems, which were put on the table, and it should be four. And somebody actually... Three of the systems were a normal system, communication system, and two of them were Wellness Systems. And somebody in the conference says, "This, this happened to me, regarding my condition." And so we knew the guy has been on the Wellness System. He hit the jackpot and he saw the result. And now with the new technology coming up, these Wellness Systems will be amazing. The new materials we are producing is amazing. I tested one on one of the Knowledge Seekers last night, and it was, it was beautiful to see. Materials which we never brought out. Yes, we'll see, we'll see how it come up, and we'll tell you when it comes. (1:16)

Q: Thank you Mr. Keshe. Can I ask a question about...

K- Are you on the beaches still?

Q: Yeah, I'm actually on the balcony overlooking the sea, with a couple of very wonderful Knowledge Seekers. I know many Knowledge Seekers all around us, that have spent some wonderful times together. And that... I'd like to thank the Chinese community, for a most incredible, warm, really beautiful, warm people. And they welcomed us and they gave us the most incredible conference. And it was a pleasure to be in their company. May I ask a question Mr. Keshe? One last question would be...

K- I think most of you Knowledge Seekers had a problem by the Americans and the Chinese to get into China, non-Chinese. But once you got in, it was worth it. One of the Knowledge Seekers was on the way for four days to get to China. He wouldn't give up. He went from one airline to another to get in. Some people had to just go back home and come out again. And it was very interesting how Knowledge Seekers were so resilient, and they managed to get themselves in.

Q: I think I could reach out and touch him in physicality, Mr. Keshe, right now. He's very close. So Mr. Keshe, I noticed or it was spoken about that some people seem to have a definite glow behind their eyes, a difference in their eye structure. Would this be so?

K- Are you talking about now?

Q: It was mentioned by a couple of Knowledge Seekers that, like a brightness in the eyes, something changed and they were just asking some questions about this.

K- We had, (1:18) we have a Knowledge Seeker who says his eye has changed and it was this and that. And we had this for a couple of people because the fields are the, what you call, what the strengths are, that they could interact with. But, I can't tell you any more than that, because I know one Knowledge Seeker was persisting, that he's received very dark eyes around, or marks around his eyes, where, when he went into the system. We saw people physically, we saw first time people were shaking in Manchester, but we saw by their system, again, two or three people who were physically touched in the process of the, going into the Plasma Room.

Q: It was mentioned Mr. Keshe about, like, I saw one of the Knowledge Seekers and when it was spoken about, I actually looked into his eyes. And he did look like his eyes were very, very shiny. That was my real question.

K- I don't know. I didn't look the Knowledge Seekers, I'm getting blind. I don't see that good. So I'm getting blind with the knowledge. So it's... I don't know. It all depends.

Q: I'd just like to say, Mr. Keshe, to you as well, is thank you very much for that knowledge, of very incredible knowledge that was shared and I do thank you for that. That was a special time. Thank you Mr. Keshe.

K- Thank you very much. We didn't let anybody to record anything in the meeting, in the conference, and this primarily is that none of the Keshe Foundation conferences are recorded. (1:20) It's the knowledge given, and the knowledge is there to reach others through the Soul and elevation of the whole knowledge, by whole humanity and beyond.

But it was generally a good meeting. You're going generally... now, it's the first time in Manchester and in London, you just had a headset. As we promised we created a room environment, I don't know, 6 meters by 10 meters or 10 meters by 10 meters, where people could walk in. It was very funny. I... one of the Knowledge Seekers was standing outside the room and was like... You see the ones they go to the Wall in Jerusalem and they bang their heads? She had her hands open saying, "Oh, ?? I hope that we haven't ?? opened another Wall here yet." And many Knowledge Seekers, when they go in, they feel the fields. And, it's very, very interesting, how we create the environment of the Spaceship.

Q: Sorry, I didn't mean to interrupt you. I was going to say that I know that when the people are around this room, from the outside, many people were feeling the energies from outside, you know, from the other side of the wall, and were experiencing it and holding their hands out and feeling the energies that were, you know, that were behind this, in the room itself. And then once people went in, they obviously experienced it as well. But you could definitely feel it as you were a present outside the room.

K- A strange thing is that many people when they went in, they fell asleep. (1:22) They found peace. There were people lying on the floor, people sitting on the chairs, and with their legs in, one was, I thought she's going to, what do you call it, take off, like a, what we call it, Buddha pictures. We promised we create the environment, and to see how you react. And we delivered what we promised. It wasn't just headsets. It was a full system. It cost a lot of effort by the Keshe Foundation team, especially by those who bring these things and set it up to create this condition. And as you've seen, it was system in the center and system around to enforce the dimension. We kept what we call, a Star Formation with a number of systems, very powerful systems. And we brought in other system in the background to do. And some systems connected to the observation point of the weight or whatever. And some were observation of what we call, the field, the material, creation of materials.

But as we said, we kept Manchester and London ???. So the, what we call, Communication Bundles. And you used the what we call, the UBESUS (Universal Body Enhancement Spaceship Units), ??? pre-rolled to them. And we promised in Beijing, we'll deliver the environment of the plasma. Many of you were touched by it. And in Iran, we'll deliver the flying system. And that will bring a new dimension to Space Technology. (1:24)

Q: I think Mr. Keshe, many of the Knowledge Seekers are definitely looking forward to Iran. That is for sure. I'm sure it would be a wonderful conference, the same as China. Thank you very much Mr. Keshe, I will let someone else now. Thank you Mr. Keshe.

K- Thank you. Any other question?

Q: ... In order to get sustainable peace on this Earth, Bahá'u'lláh envisaged a world federation. What do you think about the actual situation on this direction of the international politics? And what are the perspectives of the international system to get unified into a world federation, taking into account all these conflicts and troubles made by big powers in politics? Thank you.

K- Can you explain what you're talking (about)?

Q: Yes, I try to ask you if federation, this political entity, it's enough to get sustainable peace on the international level. (1:26) And if not...

K- We don't, we don't have a federation. And I don't know what federation you're talking about. But primarily life on this planet will change to, through everything that we have done and the others do ??? for it.

Q: Bahá'u'lláh said that a world federation will solve the problems and we have to find only spiritual solutions. And federation is a political solution, but maybe we need a spiritual federation. This was my question. Of course, we don't have yet, but how we can help as a foundation to get new solutions, to get sustainable peace on the Earth, which is our aim as a federation, as a Foundation, I mean?

K- First of all, we don't have, I don't believe in federation. And it's a nonsense. Secondly, we come to a point that individual life sustainability, which means I can sustain my life the way I want, nobody can value it. But I serve that, in that serving, I do it out of pleasure. At the moment, we become like what I call, donkeys and dogs in the circus. (1:28) We perform something, we run around the circus ring, we come back, they give us a sugar lump, we call it wages. That just we can afford to survive till the next sugar lump that we get. Life should not be dependent on a sugar lump or a carrot, that every time you do a monkey work, done. Life has to be on the process of sustainability. I do to serve, to do, because I enjoy doing it. Because I have the food, I need the energy, I have, I need the medicine I have. I want to travel. I have the ability of it. I don't need to pay no more for it.

That then brings a different dimension that everybody becomes to serve, to be, to be part of, that be proud that I do something good. I don't get paid to work. I work to pay the others, to serve the others with my work. And this game of nationalism, 'wageism,' that you have to get wages to survive, you have to whatever, has to come to an end. A life of a man starts from, let's say, when you open his eyes till he closes his eyes. And how, what is the difference between the cleaner and the doctor? That somebody reading some books, whatever, has to be paid more for the same time of life reading and being part of this society. We have created this fallacy. And again, goes with those who want to abuse it, create federations and the rest of it. (1:30)

To me, when I used to run my business, end of each year, I used to give bonuses to staff. The manager, the CEOs, the cleaner, the doorman, the drivers, all got the same amount. And sometimes the ones who were lower got more than the ones who were higher. And not only in one occasion, few occasions, the high ranking guys, managers or CEOs, whatever, came to complaining, you know, we got a problem with the management team. They're bringing the same bonuses as the cleaners, and this doesn't work, it's not good. I said, do you know what's not good? If that guy is not there to clean your room, you come in to live in a pile of a heap of rubbish. His work is more than you, because you can't do your work if he wasn't there. But he can do his work anywhere, without you.

So, when we value a life, for life, and not to paperwork and reading something, in having a name and a title, till that time, the abuse will be there and federation has to be created, because we plan it, and we so work to get it. When we go to work, when we do something to help the others to, what we call, evolve the life of the man to a higher order that it is not dependent on somebody else doing something for me that I have to have, then we have changed, then the man will reach peace. (1:32)

At the beginning, when we get to this stage, it'll be a lot of greed people who didn't have, will want to have everything, but at the end they get satisfied, there is now, everybody has the same thing. This is not communism, this is equalitism, where you become equal. We breathe the same air, we drink the same raindrop as a water. We share the body of this planet. Why should be one man higher than the other? Except when the man serves.

And that has to be at the level of the Soul of the Man (STM). Not in a visible way, "Oh look, I'm cleaning, I'm serving you." This is not... This has to be of life. This is...

If even those of you who were in the conference, any of the past three conference of this cycle, I don't sit back, I don't stay in the back, just because I might know a little bit more than the others. I take the microphone around people who is there. Yesterday serving sweets for the Iranian New Year when he was there, because we are all equal. And when man comes to that point, then humanity has become peaceful. We need no federation and no generation of federation. This is abuse set by Bahá'u'lláh and has to stop. He set the scene of future abuse and it doesn't work.

As it is in his writing, he favors kingship. (1:34) Who says one is more than the other? Some of the teaching of Bahá'u'lláh is so wrong, that is fundamentally, that's why it hasn't succeeded in 150 - 160 years. Separation and somebody being higher and... The work in the Bahá'í Faith, most of it is wrong. And that's why they haven't managed to do some (thing). The fundamentally, is equality in the race of the man. And cannot be .??. Encouraging somebody to become, favoring kingship, federation and these things, are the job of the old system. The way that they could rule, they could run. The way it should be, is all man, doesn't matter on Earth or outside, all creatures of God are equal. Does not mean the cat, the dog and the ants, means what we call, aliens too. Respect and honor is different thing than leadership and kingship.

Any other question?

Q: ... Is gazing and opening to these new, to this new vision, to new vision or audio fields. (1:36) He defines gazing as trying to not focus directly, but to expand the perception to be receptive to wider observation.

K- What does that mean? Can you explain?

R: Well, I think it's if you're sitting and some people meditate or just sit, and the choice would be to either focus on a dot on the wall, let's say, or one particular item, or you can diffuse your vision, and diverge it so that you see more in your peripheral vision, and sort of look at the whole totality, rather than focusing on one particular point. And it, he calls it gazing. And I think maybe it's a, probably Shamans use that technique and that kind of thing... In the old days, in the movies they would say going squinty-eyed. You go, you squint your eyes and you see a gaze rather than, you know.

K- You know, yesterday we had many sessions, groups of 10 going in, and sometimes there became 10 or 12. And then, we're standing and suddenly I went into the room, and I saw a few Knowledge Seekers hanging on the systems. Because, couple of systems are tall, and standing, we put... We put papers on the floor, on a circle, circle of wood, and we put the system in center of it, and we put papers around, to see what materials we see, what changes we see. And, these Knowledge Seekers they came and they stood on the papers, on the wood, (1:38) and were hanging like God, their life depends on it, on these machines. I had to tell them to get off, this is not a ?? pain ?? system, and they're trying

to get energy. And there was another one, saying, seeing them doing it, was another system, hanging on to the machine. I think they were waiting to take a lift off, you know, the flight. People do these things. But it was amazing. I wanted to take a picture of it, but they were literally hanging on the system.

And we are not building another what you call, worshiping or any of these ?? systems. We're trying to teach you to worship yourself, and teach yourself, and understand that you are the center of, you carry that Soul, which is the center of existence of you. And if you think of it, look at your heart, the structure of it, your liver, the structure of it. This thing in the center of you is so powerful that designs, brings, and controls this every second of your life. If I was you, I'd worship my Soul. Then worship means somebody else's world of rubbish. And don't make another system, that this time people actually can hang on it.

There's no use to gaze. Need to understand. What do I understand about myself. And then you're successful. You succeed, because you understand the truth, who you are, what you are. And how you'll handle the situation in your life, does not matter on this planet, beyond or in dream or sleep, or awakeness. (1:40) I know what you're talking about, but we had them hanging on it this week, it was fantastic. I said to him, in face, what is going on? ??? Why are these people hanging, you know, holding on to the life of this machine. If you leave it long enough, it'll become another Mecca, and they'll start, you know, revolving around it.

Any other question?

Q: ... Mr. Keshe, I see the blue layer and sometimes other colors, also a shimmering field extending high above people, and the light in inanimate objects. Can people or animals that are past, step back into this realm?

K- In which way? But you have to understand... I explained something very interesting, maybe for the first time I put this in public, but it's good for Knowledge Seekers to understand and in the future scientists to understand. We know as much as you're asleep and you happened to go and visit in your dreams. Said, I had a dream about mom last night. I know she died 20 years ago, but it was so good. I seen her and, you know, whatever, whatever. What happens when it's daytime and you suddenly feel like, (1:42) ok, the weather came, or your feeling goes towards the mother who's at home, or, the Soul of the mother at home comes to you, come home, there's food ready for you, and say, oh, I've got hungry, and I go, how many of us have you seen the change in the aura or the shimmer or whatever of the man, in the daytime? When the Soul of the people alive or being on this planet or not with us or not, touches our Soul?

These things don't happen (just) when you sleep. It happens 24 hours a day, every day. You only remember the ones you call a dream, because you had no time to play with the physicality. You're locked in between the sheets. The same thing that happens in your sleep time, happens in your daytime. What aura would that change? Would you see the blue light on top of your head? Is the aura of the dog you had died 10 years ago? Or is it

the aura of your dog on the floor trying to say, I'm here. It's not just I love you with ?? my tail. I'm here because my Soul is touching your Soul.

There's much more to all these things than man thinks. But we only think we dream at night, and when we dream at night, our Soul goes away. Things happen during the day to us. We touch our Soul with the others, and us touching the other Souls. What auras do they create, blue, black, yellow? But only the blue sign you see is actually the Soul of the cat on the floor, touching your Soul, in dimension of your physicality. (1:44) Man has to start thinking much deeper, deeper to these things, than just a play on the ?? .

Any other question?

Q: ... Good day Mr. Keshe, when we transmute, and we travel with the physicality inside the Soul, is that what our ancestors were trying to convey with the explanation of the Merkaba?

K- I never understood the Merkaba, how can I tell you, yes or no?

R: Ok, fair enough. I would like... I have the same problem with that one. We'd have to look it up. If we have to go to Wikipedia, it's not worth it.

K- I think Merkaba has changed in Arabic to ?? marhaba. Rubble, if you can do it, whatever it is. But it's the reality. When you don't know something, you don't know. I never understood this thing.

R: Mr. Keshe, I wanted to take you back to the past here for a previous drawing that you did.

K- Oh, my God.

R: This is a five minute clip, but I'll play one minute of it. And I want you to look at it and see if there's anything new you can add to this ... concept.

K- No, no, no, no.

R: Ok... Give me one chance. (1:46) Okay, I'll just play one minute here.

K- Let's do it.

<< Rick plays one minute of the video where Mr. Keshe explains about the experiment done in the past of the empty box with the parachutes inside it. >>

R: ... I thought that might jog your memory, and perhaps... it came up in our Keshe Plasma Reactor Group yesterday, and Brett in particular was bringing up this topic of the Cola bottle reactor experiments that you were doing, and the explanations of that. And

this is the 'empty box of the Universe,' I believe you called it. And perhaps you can explain a little more, or maybe you could annotate on this picture. (1:48)

K- No, actually this is very much the process of picking up energies at different levels. As the Universe, in the Plasma. When you do these tests, you mainly see DC. Which confirms, what we call, a Plasma state. Not the AC, which is a matter state confirmation. And, in a way, you pick up energy levels, because, don't forget, this is a box, all the parachutes are the same. The only difference is where they are positioned and what fields, other fields, they interact with. Some of the pins have a plus energy, some of them have minus energy in certain levels, and same of two levels in one side of the box. So if the minus, the other one is plus. When they change, and this, when we put on the oscilloscope, there is no sometime AC at all, or ?? on it.

And this is how the energy of the Universe is. How taller people have different intelligence than the shorter people. How certain heights have the certain behavior in respect to their features and life. It's very interesting. If you look at this, what I call it, Universe, box of Universe, (1:50) why do all the certain height people of the certain color of the skin and certain color of hair have a specific behavior. It's exactly like this, what you see in the box. The boxes are measured from distance from the bottom. That's what the position. And you see, if you put two system in the same line, you get the same behavior. And some of these were deliberately done that way, to micro millimeter we checked that we are in, and we get the same result. So it's the field lines.

And when we put this box out, or shown for the first time in Eindhoven, if I remember correctly, was to show the energy in respect to the bottom of the box. Reference was the bottom of the box. In the Universal condition, the electrodes measured space gap between the distance from the center of the box, or what we call it, the bottom of that box. And if you understand this, you solve a lot of problems to answer these questions, how fields are created and how they generate, and how you can make AC out of these parachutes. But nobody has tried it, and I keep quiet.

Any other question?

R: Ok, thank you. That gives us a bit to go on there.

K- You should have gone much further than that.

R: Yeah, that's what Brett's trying to convince the rest of our crew in the Plasma Group, (1:52) that we missed the point, and it's time to go back and refresh.

K- Press the refresh button.

R: Press the restart.

K- Restart.

R: Well, it's a good day for that, being the first day of spring, and the first day of the new year.

K- Yes, I hope so. It's a fantastic time, it's what we've been through in past four or five days. And the changes, and what has come up, and what is being delivered is amazing, absolutely amazing. It's a new year and a new cycle. Let's see what it brings. As they say,

the clock is ticking from today for three years. Three years time if the governments don't deliver what were given to bring, deliver world peace, we will force the world peace, by teaching and making everything irrelevant.

Any other question?

R: Well a few more have popped up, but I'm not sure if you want to carry on here, I'm going to call it quits. I know you're quite exhausted from all the action this week.

K- You know I was telling a Knowledge Seeker, in 2014, 13, 14, actually 14, I think 14, 15. (1:54) I taught in Italy, a 12 weeks session, 5 days a week, 9 to 5, non-stop. And, every day, teaching is all recorded. But this time, 4 days teaching from 9 to 5 or 6, the energy is not there. It's exhausting. And I don't know if you can do this in 10 years time or 20 years time. Holding 3 days, 4 days conferences and standing and being there for all that time, more or less it's not easy, because we all teach, that we all sit in the chair. It becomes hard, and we say, "Age is catching up." You know what they say, "What I used to do whole night, it takes me whole night to do, reading." It's that difficult.

Any other question?

Q: ... Mr. Keshe, you had explained transmutation as a birthing process. Is there a pain, more of a physical or emotional process? And is this something we need to be concerned about?

K- What? (1:56)

R: I guess he's worried about the pain or emotional process of the transmutation process. Is it like childbirth? You know, childbirth, it's wonderful, except for the pain.

K- I... Oh, it's a separate pain, but I have watched it happening. And it's very interesting. When the Knowledge Seekers panic.

Before I forget, the trial of what we call, the monthly program will not be tomorrow, will be next week, next Friday. As we all are traveling, and a lot of people are going back and forth, and they're still on the way.

And... If you could feel the pain of transmutation, you'd love to have that, it's addictive, you want to have it. You want not to miss it. And, once you achieve it, the pain is not going through it, the pain is sorrow of leaving it, because it's a different dimension of work.

Any other question?

R: I think we should probably wrap things up here. There's a couple of more questions if you really want to cover them.

K- Yeah, then we go. Yeah, just one more question.

Q: ... This 378th Knowledge Seekers Workshop, you talked about copying people using shadows. Can you say more about this? (1:58)

K- Nope.

R: Okay, perhaps you can...

K- I know exactly what he's talking about. Nope.

Q: ... What's wrong not being able to see the Soul-mate in the realm of the Universe? How many tests this person should pass?

K- This sounds like somebody who's very much in love with someone.

K- ... We call it the day. We come back next week, and we'll see how we change things. But we'll keep you posted, and the session will be next Friday. And I thank all the ones who made this conference possible. Some 10, 15, 20 volunteers, Chinese community, were there to make sure everything goes smoothly. Especially the head of the Keshe Foundation work in China. I think he needs two months holidays for what he did in the four days and everything he did before it. And all of those who have traveled across this planet to be here, to learn, to experience. We promised to show you, we created a room of Plasma, and you all be testing it. Promise you when we meet you in Isfahan, you will see the flight of the man without propulsion. Thank you very much, Rick. See you next week. (2:00)

530 KSW Mar 21, 2024
