

533rd Knowledge Seekers Workshop April 11, 2024

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

CR enter STM elevate - create second Soul - divide Soul in different places; How Beautiful People (Schizophrenic) created - CR at inception; Understand work of Cosmos; Captains carry thousands of Soul inside - deliver destination - strong enough not to divide; Emotion of Soul decide energy it absorbs; Psychosomatic meaning; Bend M fields or keep straight; Vertical EU - manifest multiple bodies from one - same voice memories; Soul has own Inertia; Life becomes transparent - can't lie; STM infects U with killing through CR process; CR - viruses - energy packs - demise - learn what can & can't do in U; Face facts about transmutation; Not harm other Souls; Satellite Souls & Captains; Have to understand emotion of Soul; Free Beautiful People imprisonment; Filtering through Nano & Gans - lasers; News about Gaza; Embassy not respected; Iran has Precision bombing - Jews to US; Advised not to retaliate; Gaza feeding through plasma without Headphones; Plasma elements in one sphere connected to Creator; ALS death wish - same wish Transmute; KF shops Germany Austria; Hospital in China; Chem-trails; Obama hid nuclear program; China use T in agriculture; Feeding Policy - App; Liquid Gans through Customs.

ENGLISH TRANSCRIPTION

(:21)

K- Yes, thank you very much. Good morning, good day to you, as usual, whenever and wherever you listen to these series of Knowledge Seekers from Keshe Foundation Spaceship Institute, as traditional is, we welcome you back. And we hope we can share knowledge and by sharing knowledge, learn a little bit more to share with the others, that they become teachers and they become the learners and the rest. (:22)

In the past few months, as we moved from understanding of the Soul into Cosmic Rays (CR) and understanding of the interaction of the fields, which comes from the Cosmos, which becomes part of us, and some of it pass through us, carries some of the energy and information of us, into Space of the Universe (U), we have to ponder one question. What happen when a Cosmic Ray, passes through the structure of the Soul of the Man (STM)? Our Soul is not the ultimate size and ultimate strength, it's part of the spectrum of, that the amino acid (AA) of this planet can, in a way, hold on to. In the physical dimension (D), as we've talked before, when the Cosmic Rays of the lower strength or specific strength pass through the eye of the man, our astronauts report flashing lights, our doctors see structured damage to the brain, or change of the combination of the information and communication within the brain. We say Cosmic Ray has gone through the brain and causes, or the flash of the light, it's caused because photon is created in the Ray, in a way it releases its energy, in the salty water of the brain of the man.

The question comes, that what happens when the Cosmic Ray goes through the STM? (:24) What would the effect be? Would it enlighten the way, enlighten in the eye of the man and man see a flash? Would it release his energy to elevate the STM? Would it carry the information which is within the STM, and become part of and transported to another time and position, any place, that when it interacts with another field or ray, leads to creation of new Plasma, seed of a Plasma, or part of the Plasma which already exists. And then, would the characteristic of the man, will be transferred into that seed of the Plasma? The question is not, "if". But the question is, what happen after? Does it come that those who get enlightened, receive elevation of the energy from the Cosmic Radiation or Cosmic Field? Or, elevation of the STM in the knowledge of understanding, by some of the fields which are absorbed in the STM, and then it release at different strengths, become the seed for another cycle of creation. Which means, the field interacts with the Soul, gathers information, but it impregnates it, in a way, adds a second field to it. When is in a condition of the ray, thus there is a possibility. (:26)

So, is it or can it be that, as we've seen, the interaction of the two fields leads to creation of the, what we call, a new seed? Would this be a possibility that, at the point of the inception, in the physical womb of the mother of the child, by interaction of such a field coming within the structure of the physicality of the mother, leads to creation of the second Soul. Then, in a dimension of physicality, leads to the creation of what we call, the 'Beautiful People.' In a way, the Soul is one. But in a way, it consists of two, or maybe by division, in Soul balance, four or five. Would it be, is there possibility, that in the future, the scientists of the man, unravel this mystery, about the creation of what we call, Beautiful People? Or, can this be created in the time and the position and the strength of the field of the STM by absorbing a secondary Soul, a secondary field? It divides itself to a secondary Soul, which means, at one point or another, our brain due to inheritance, evolution of physicality, is ready to receive additional fields, which that additional field creates a second dimension to what we call, secondary Soul, which we call, the Beautiful People.

This mystery of creation has to be solved, in one way or another. Because, this will lead to further understanding of the work of the Cosmos. (:28) How we travel, how can we divide ourselves, how can we carry the essence of the Creation within us, and manifest ourselves at the same time in two places, in two different dimension of physicality. So, the question for the world of science, which most probably will be answered in the coming time, we don't see any pattern of dual characteristics, and suddenly at certain point, we find out there is a second character within. Has this been, been through the interaction of the Cosmic Rays? Which have enlightened or interacted with the body of the Soul? And in that process have led to the creation of the, what we call, two separate Souls, or three or four, as it happens in the womb of the mother, when the sperm and the egg come together. And a certain point the dimension, these fields and that Plasma, in balancing themselves within each other, lead to common denominator information, and then separate addition to manifestation of individuality.

This topic, the reason why I have brought this discussion up today, is extremely important. For those of you who become, what we call, the pilots, those who become the

trustee Souls, by receiving another Soul, within the Soul to transmute across the Universe, has one stronger. Would by receiving that Soul within you, create a second dimension of life? Or, can those who become the captains, can keep it separate, that does not lead to the creation and generation of secondary Souls. (:30) Secondary packs of energy, which then in one point and part and position, will manifest in the captain or the one who put the Soul in, a secondary birth in the dimension of the Soul, in the splitting of the Soul, which leads to creation of new life.

Or, can we, those of us who have understood the process, create a condition of absorption of Cosmic Rays, which allows within a certain dimension, time and place, within the physicality of body of the man, for the Soul, for the energy pack, the central point to split, and then by itself carry, and it manifests itself into place, in two places in the same time. Now we understand the story of what we call, manifestation, the story of what we call, transmutation. As I said, for man to become the 'Man of Space,' Man of Universe, man has to understand the pitfalls of this transmutation. The possibilities of the failure and possibility of success and possibility of things going right too much or wrong too much.

Then, the question comes, do you want to be a captain? Or, do you have a strong strength Soul enough, that no Soul can lead to division of the Soul, or impregnation of the Soul, that your Soul, or Soul of the one who you trusted, or trusted with, become to split, (:32) to lead to creation of what we call, 'double entity.' Now you understand, how delicate the job of becoming a Man of Space, joining the Universal Community is. But, we use this property, we use these characteristics, we use this functionality, to create the dimension of transmutation. Where, the emotion of the Soul, decides the absorption, elevation and division.

In the past times we have spoken even how this emotion will interact with the Soul of Physicality (STP), which the interaction of the two leads to manifestation of psychosomatic. Where the psychology of it actually comes from the Soul and somatic side comes from the STP. And then, the interaction of the two, in respect to its environment, creates, manifests, what we call, the physicality (P). If, as Knowledge Seekers (KS), you understand this, comprehend the process of it. Many of you will soon realize, if you have the capability of becoming a captain, to carry millions of Souls, thousands of Souls within you, (:34) without their interaction as a field and dimension of Plasmas, overcoming or splitting or dividing your Soul, or pack of energy or theirs, to lead to the manifestation of what we call, diversity of the physicality.

In the past few weeks, we are taking you down the "Rhein" (river) of the reality and the eventuality of what you as men will face in Space, when you become 'Man of U,' or become the life within the U. This is why, in the past few weeks discussion, I spoke about bending the fields, or do the rays go straight. Can you assess the fields which are given, will play the bending job, or would they go straight through that they carry the dimension of your Soul? And if so, would they lead with what we call, changing the balance of the fields within you, who were up to now, a captain? Creation of the fields of Universe, creation Cosmic Rays in the strength of the Universal strength, it is not a difficult job. It's

just how you can bend it, how you can change it, and how you can create an interaction, which should lead to manifestation of ultimate goal. (:36)

Then you understand, how in the future, man of science, will be easy, in such easy way, solve the dilemma, which the present man has, with what we call, the Beautiful People. Where we can create conditions that the split Souls can manifest itself in its own dimension of physicality (D of P). In a way, we bring a new dimension of the fields, which leads to creation of physicality, through interaction of the field of the Soul and STP of the man. This happens every second, in the body of the man, millions of times, when the old cell is replaced with a new, and the new carries all its characteristics.

Now it's time for man to understand this. And for man to understand how to work, to manipulate, to what we call, 'cajole,' and to bring a position of strength, knowing which Cosmic Ray is used, to bring the condition of diversity in the field strength of the STM, which leads and will lead to creation of new life, (:38) and or new dimension in the STM, or any energy pack which comes across the life of the man. In the near future, through the systems which we have developed, and gradually will be brought into public, we will show, we will be able to create conditions, for those Souls who have matured, or split, or received Cosmic Rays, or another field strength, that they carry within them a dimension, a division of what we call, 'growth of the energy of the central point of the Soul,' to manifest themselves in a dimension of physicality of their own. But, this will create one of the biggest problems for the world of Creation and the man, and the world of science.

And this will happen inevitably, in the first few months, when the transmutation systems, like the Vertical Systems, will manifest themselves. Will become operational. And that's one of the reasons we discuss it today, because we are reaching that point. Where we see, as I've spoken about this before, we put a man or a body, or entity, which we say, or pointed out, or considered to be as a multi-facet energy pack of the Soul, in one machine. And in another machine we get two or three people coming out, in the dimension of physicality. (:40) And this dimension of physicality which appears, manifests itself in the new system, will carry the characteristics, the voice of what we heard before, in the body of one man.

In a way, if the Beautiful Person speaks in one dimension of the Soul, as a man, in another dimension of the Soul, as a woman, in another dimension of the Soul, as a child. When we do the transmutation, we'll see that man, we'll see that child, we'll see that woman, with the same voices, with the same memory, with the same characteristics, as they were all three in one. This will bring a lot of problems for those we call psychologists, a lot of problems for those who call themselves men of religion. And then we understand a lot how the new generation of life in the Space shall be. How we can put many Souls in one Soul, to transmute one Soul to the point of destination, and the point of destination for it to transfer, transmute, to so many bodies which they trusted themselves with that Soul.

It's very hard to transmute 200 people going for a wedding on planet 'Zeus,' one by one and getting everybody right, to the right place, with all the arms and legs in the dimension of planet Zeus in. But, it'll be easier if we can put the 200 in one, and transmute one single Soul. (:42) One single pack of energy, very much like one aircraft, but this time, instead of having the body and the seeds, in energy packs of the Soul, which carries within it. Then, you understand, why we start talking about this, in this position and time. Because we are approaching that time. The world of science of the Keshe Foundation and development is reaching that time. That when we do it in the coming time, we tell you, we have told you before. Now you see it.

But at the same time, that energy field which separates different Souls from each other has within it, Inertia of the Soul, which man has not even understood that. I have talked about this before, where my Soul has its own Inertia, what we call, field transformation. The body of the one next to me has its own. And would they all match? And would they all be able to transmute it, and transfer back to what is the manifestation of physicality in time, place and position (TPP). These are the dimensions, these are the part of the science which man has to learn before he becomes a Passenger of Universe.

Many cultures will have a problem with this, and many cultures will not become Man of Space, because of the dogma they have, in the process of understanding of the fields, the strength of the STM. (:44) Africans don't like to give you one hair, because you can voodoo with it.

<< Italian translator had a problem with her translator system and interrupts the teaching
>>

K- ... As usual, there it comes, the Soul speaks, but we don't see the physicality. Now you understand. Now you see how things change.

<< Italian translator had a problem with her translator system and interrupts the teaching
>>

K- Rick can you stop this somehow ... She won't be able to talk Well, that's usual.

R: Italian thing.

K- Yeah, it happens with ... ?? Stefania.

Now, we have to understand, how the whole process of Creation, the whole process of creating, the whole process of transmutation has to be understood by man fully. Before he become Passenger of Universe. Before we start the demonstration of the transmutation of the body of the man.

Interesting point will be, would the term 'bipolar' would have any meaning? As we showed there is no polarity. (:46) Would what we call, perception of 'premeditated position,' can be unraveled through the STM? And would these things end up in a position that nobody can lie, and everything is what we call, transparent, and its transparency allows a much different way of living, than what we are used to.

Then, we have to consider, has the elevation, has the transmutation, has the evolution of the physicality and the STM, in the past times, has come through such a fields, passing through the STM, which in interaction and, what we call, elevation of the field strength, with the STP of the man, has led to maturity of the man in intelligence, in understanding. And has if possible, a Cosmic Ray pass through the STM, has he taken the knowledge of the killing to another dimension and position, and he started the same thing in another place. What I call, 'infecting it.'

This kind of understanding of the Cosmic Fields (CF) and Cosmic Rays, and understanding the spectrum which can interact with us, then in the future, as a Cosmic Rays and fields, can become what we term the viruses, which is the energy packs, which could be in balance with the body of the man, which led to its division, or what we call, to its demise. (:48) This science of what we call, Cosmic Fields, Fields of the Creation, Fields of the Universe, which come from Cosmos, Rays from the Cosmos, has to be understood by man, at least partially, that he can, in a way, learn slowly in the dimension of the Universal Community, through them, to understand what can be done, what cannot be done, what are the possibilities, and what are the opportunities.

We have to face these facts. We have to bring this. This is the second time in teachings, I bring this subject about what we call, Vertical Systems and transmutation, because sooner or later, in the first couple of hundred (people using the system), we'll see a few numbers which go through this process (?? of creating Souls or making changes through CR). What is validity of what we can do with it? Would they still want to stay in the time of 10 years ago, or would they still want to come back in today's time?

And many of you as Knowledge Seekers have to solve this in your body and your brain, in the coming time. As more and more fields of a higher order is shared amongst the man, man's intelligence will evolve. This time evolution will not be through the reading of the orders (Commandments), don't steal, don't do this, don't do that. It'll be through the knowledge of the man, which does not allow man to make no mistake. (:50)

I hope I have managed to bring or to open your eyes to a new dimension in teaching. And I hope this knowledge can be used fruitfully by Knowledge Seekers. The understanding of the work of Cosmic Rays, understanding of work of the Cosmic Field, their interaction with the STM, the impression it makes on the Soul. Would it, in a way, be able to interact directly with the STM, needs to be discussed in case by case. And it is not 'God given right,' it is not, 'mine, and I can do it what I like' (with myself), but it is, what is the best for the others, that this Soul can serve, that this Soul can exist. That in the process of existence, does not harm another Soul, does not create another condition, that another Soul can be in danger, can lead to the demise of another Soul.

And when you, in the future, who have become the Satellites, those of you who become part of the, what we call, 'Captains of the Space' have to consider. How well your Soul can serve, then you have to get to know your Soul. You have to understand the emotion of it, you have no choice, as I always say. (:52) Unfortunately, we have walked man into

'one track' only. Which means, man has no choice, the knowledge is released, the knowledge is in the hand of the man. And the man has to make the best of it. And there's no room to say, 'I didn't know, I'm not guilty.' Because the knowledge is shared on the level of the Soul, on the dimension of the fields of the Universe, not by the spoken word of the man.

And then you understand how from the beginning I explained in all teachings, we do not teach only to the man that he hears the voice. But the Soul of the voice, the Soul of the emotion of the teaching, is what is shared with the rest of the Universal Community. And then you understand, how much man needs to do. And how much man needs to understand about his own Soul, about the operation of the fields of his own creation.

Then, we go to the next step. Then, we take steps to understand the evolution of the STM. The strength of the evolution of the STM. The possibilities that the Soul can have in interacting with the fields and with the Rays of the Universe, and the possibilities, and the opportunities, and the conditions which will be created for it, and by it. And then you understand why we set up the structure of what we call, 'Satellite (Souls),' the Soul of the Satellites. Where interaction comes within and through, once the setups of the systems come through.

I hope, as I always say, I opened your eyes to a new dimension. (:54) And slowly, slowly, as we've done in Sanya, we'll bring systems for you to see, to feel, to understand and to follow. And one of my biggest wishes is, that we can recognize that the Soul of the Beautiful People, before we put them through transmutation. That, in Truth, in Totality, we can do justice to them. Then when they manifest themselves in dimension of the physicality, those who we call the brothers and the sisters and the parents, are truthful enough with themselves, that they can accept the manifestation of the Souls in the dimension of physicality, as they do when they manifest themselves on the Moon, on the other positions in dimension of Universe, when they go through transmutation. That's my only wish, that us become mature to understand the truth about our own Soul, the operation of our own Soul, the operation of interaction of the fields of the Universe with our Souls, and the possibilities of the change, elevation, and manifestation of the physicality, through the interaction of the field of the STM, and the Soul of the Planet, space and time, does not matter, has to be in the physical dimension, or in the translucent dimension of the light of the Universe.

I hope you understand, as Knowledge Seekers, what is to come, and what is, in a way, 'putting its foot through the door.' That when the door opens up, you're ready to face the truth about the Creation, and the manifestation and the Creator.

We go through a break, and we come back, and try to answer, if there are any questions, that shows how much you as Knowledge Seekers are maturing towards that. (:56) Rick, take us through the usual break, and we come back.

>> **BREAK** >> 533 KSW April 11, 2024 (1:02).

K- ... Not really. It is as it is. Not much, and if something comes up, we'll share.

Are there any questions?

Q: ... Hello Mr. Keshe, a friend in our China community, Mr. Long, asks a question, Nano material and Gans has the property of filtering magnetic field. Will the magnetic field in the environment get the magnetic field with the principle intensity after being filtered by the Nano material and Gans?

K- Usually I don't say this, but as I say, "Come again?". Does not make sense this, or I don't understand it.

R: Yeah, let me try rereading it. He says, Nano material and Gans has the property of filtering magnetic field. I don't know if we can accept that. And will the magnetic field in the environment get the magnetic field with the principle intensity, after being filtered by the Nano material and Gans?

K- ... This contradicts one to the other, as part of the science and knowledge. Nano materials, very, very little is reflected back from them. We know that. Unless the field or Ray hits directly the central position of the Plasma, which reflects back. (1:04) And, or is of the orders within the layers, which reflect back. Filtering through Nano materials, is one of the, what we call, corners of the future Space Technology, once you understand it. And, if you can get to that point of knowledge, that you can filter, you will come to understand what we call, the laser beams, laser fields, singular, what we call, individual field strength, that will become mono-energetic in the Cosmic Rays.

And the possibility of filtering rays and fields through Gans's is very possible, is very probable, and it happens very much so. But you have to understand, it always, what is filtered, in essence, still carries the principle field energy within it. Otherwise it cannot interact with the totality of the fields which goes through. And this is an art, this is a part of the knowledge that needs a lot of understanding to be able to do it, but theoretically yes, it's possible. And yes it is.

Any other question? (1:06)

Q: ... I want to listen to the world situation. I see some news that says Iran has made a wise request to the USA. If the USA can urge Israel to stop bombing Gaza, it will not retaliate against Israel. Is that so? If it has already been said, then please ignore this question.

K- There is a lot of talk. Keshe Foundation has urged the Iranian government, the Iranian leadership and military, to withhold from any reaction. And we've done this, we have stated our ground in the first, second week of the war. It's not new, and we have emphasized on it, and the reason for it, and we stand on it. But, the situation in Iran and what is happening in Gaza is very volatile.

It's very interesting point, risen even in the past couple of weeks, we've seen the situation in Ecuador, in the Mexican Embassy, and how some South American governments have withdrawn their ambassadors in protest. But we've seen nothing happen when the Iranian embassy was bombed in Syria. Which means from now on, every embassy is a game play. The implication of what happened in Syria is immense. And we saw it, nobody said anything, (1:08) what happened with, in South America within a few weeks, few days after it. So, what was the integrity of embassies and ambassadors has gone to the wall. This has huge implications in the coming time. Where, up to now the embassies were considered, consuls were considered as territory of a nation, and ambassadors are considered as representative of the president of the nation, now has no value anymore. And we will see a lot of things with this coming up. And we have extensively requested from the Iranian government to withhold. And we even in the last week, we have emphasized, to secure the borders, but do not take revenge, because it's very, very, very interesting what is happening in that dimension.

We still sit on a... there are a lot of talk, but what comes out of Iran, rhetoric's and facts are very different. You have to see to how long they can hold on to, and how much more. I was thinking about this, this morning. If you remember, what we call, some years ago, when the Arabs attacked the Israelis, during the fasting time, 24 hours fasting of Yom Kippur, what game was played. And Israelis done the same last week, or this week. Shooting people in Ramadan, even lining for food, for breaking the fast. (1:10) They are pushing it, but how much this push can be done, and who's going to answer? And the Americans know what is on the table and the strings are really, really, really pulled. And we will have to watch what we see, what will come. And in a way, every Israeli embassy in the world is a fair game to the Iranian people of what we call, the administration. But, what will be the repercussion on that? But, our advice has been very clear to the Iranian government, what needs to be done, how needs to be done, to bring an end. An end to these kind of mayhems forever, not just temporarily for this situation.

I'm sure, in the future, what we have advised, the Iranian government will become public. Somewhere, somebody will bring it out, that what was advised, and then you understand, how correct we've been in advising. And we have to see, we have to wait for that cycle.

And it could be any second, or in a way... If you look at the fear of America, is by precision that the Iran, what we call, long range missiles, can reach his land. As I said to a diplomat the past few days, the fear of America is how to accommodate more than 2 million Jews in the United States. (1:12) The fear is not what it might happen to what we call, the state of Israel. And this one thing for fact, Iran will not use nuclear weapon on Israel. That's for sure, should not be at least, as it needs to be, what we call, 're-lived' (repopulated) by the Palestinians in the same areas. So, they're not bombing it, nuclear bombing it, they might use what we call, as I said in a very simple word last time, if any of you were diplomats and politicians, understood, because some, one of politicians said to me, "You said exactly what's going to happen, but never understood." People never understood what we say.

If that precision work comes, we'll see the end of a lot of things. And America has warned the Israelis of the precision bombing. 'Precision bombing' means being exact, choosing a target and nothing else. And you don't need a nuclear bomb for it. And, from what we know from inside the Israeli military security, if that precision target is used, they would not revenge, they will hold back. If it happens, I'll explain to you what it means, after it happens. And then we see, rapid deployment of extracting as many Jews out of Palestine. It's a lot of 'ifs,' a lot of things hanging, but it all depends what is used, and how it's used. And the way sacrificing one position, (1:14) does not mean for the rest to jump into it.

And world of politics is very different, but diplomacy has to unravel itself, because we know what's going to happen if this thing goes off. We all know about Marshall Island, what happened to them and how, what I call, the 'boat of death' were put and were tested by the Americans through the Hydrogen bomb. If you ever go into what and how American tested the Hydrogen bomb, and this is in the middle ?? of what will happen in what we call, Palestine, or Iran and Middle East, it will become unlivable. Even now, nearly 70 years later on, we still see islands that nobody can live in it. When American drag people, drag the animals, tie them up to their frames, to the boats, to the ships, to the trees, to see how they burn and how the effect will be and again 20, 30 years later, the lights, the people took them back to the islands to see how the radiation after 20 years we'll go ?? on them, and kill them and still have a lot of cancers. That will be the history of the Middle East if that happens. There'll be no place for no one to live as, what we call, the islands in the Pacific have shown us to be. We wait and see. When they let the bullet go and what would that bullet do?

Any other question? (1:16)

Q: ... How about the situation in Gaza, in regards to, did the Plasma aid start with...

K- We are still supplying, it hasn't stopped. The line is up and is supposed to be going on. We don't stop.

Any other question?

Q: ... Hello Mr. Keshe, a Soul is at the same time the envelope and the captain, and goes into the Cosmos and comes back with all the Souls. Then do the Souls come out of the envelope?

K- Can you repeat that?

Q: Soul is at the same time, the envelope and the captain, and goes into the Cosmos, and comes back with all the Souls. Then do the Souls come out of the envelope?

K- In a way, in a way, it depends what you call the envelope. But, within a Plasma, yes.

You see, there is a difference in the science of physics and the matter state, and the science of physics in plasma state. In the science of the physics, in the matter state, (1:18) when you have a molecule, they sit next to each other. Or they share one electron, or something else, and they sit next to each other. They don't become so many, let's say if you put an element of 20 protons in the center and 16 protons in another center, together it doesn't make a new element of 36 in the middle. They still stay separate but they connect or interact, covalent (bonds) ?? to other principles, share an electron, and they connect property, share a property in the field strength.

In the plasma state, the plasma sits within, but holds onto characteristic of. So, when you have the Plasma of the, let's say, Hydrogen, and you have the Plasma of Oxygen, in the matter state, there are two next to each other, they share one electron, so they share energy and they create a new matter state. In plasma state, one sits inside the other, but as they have the common denominator, it's like, I can put it that way, if you understand it. You take one circle, or one sphere, and then take another sphere, and put them inside each other, and connect them through with a pin. Each sphere still holds its characteristics, each sphere holds its dimension, but it's coming down, it's that stick, that they connected to each other, through that stick, the pin which goes through them. And that pin in the world of creation is a common denominator, what we call the line of connection to the Creator. (1:20) And this is where we understand the difference, where you see one entity, but shows manifest characteristics of two or three.

It's like your CO₂, you see only one Gans. You don't see two pieces of Gans's attached to each other, when you look at your Gans's. But, in an atomic structure, when you have a CO₂, you see two Oxygen's and one Carbon, Carbon ?? atom. This is how it is, this is how, supposedly, to manifest itself. And that's where the difference is.

And so, it's a clear separation between the two. And how one manifests itself in the matter state, and one manifests itself in the energy state. And how you see the properties of the, let's say, Carbon within the Plasma, and you see the properties of Oxygen within the same Plasma. But in fact it's one Plasma, because it's inside each other, it's called... It's a way, it's centralized, pinned together from the center through coming into energy, what we call, the 'Soul of the Creator,' the line of connection.

Any other question?

Q: ... Why when I was young the midday sun was yellow and now it's pure white?
(1:22) What happened? And do we receive different energy from the Cosmic Rays now?

K- Maybe it's to do with the lens of your eye. You had a better lens, you saw different dimension. But we have the dimensional changes of what we call, CO2, as they say. Global Warming and shortage of rain, sometimes ?? raises ?? too much ??.

R: So all that would affect the Cosmic Rays? But have the Cosmic Rays themselves changed in our lifetime? Is that enough of a...

K- No.

R: It's such a small period of time isn't it ...

K- We are such a small little dot. Just that little dot. We think we are everything, but actually we are nothing in the world of Creation. This Global Warming is creating a lot of... Not only the vision, but a lot of new things in the world of politics and the rest. It's bringing new dimensions. Sometimes it's benefit to some nations, sometimes what we call, bad for some nations. (1:24) It's very, very interesting how the things are turning up in the world of Creation, what we call Global Warming.

Any other question?

Q: ... Mr. Keshe, is captain of the ship, in some way comparable to sports events or music concerts, with thousands of people focused on and trusting the performers?

K- What?

R: I guess he's trying to compare sports events or music concerts with the idea of the captain of the ship or going to Space with the people at the concert, or the sports event would be focused on and trusting the performers in a similar way that the occupants of the ship would be trusting the captain?

K- The Soul decides 'I trust,' not me thinking. It's not. In the physical body you walk into the plane, it says, 'I trust the captain. I trust the company who employs the captain, the machine they put in it, and the flight system, and I hope it's good and I get to that place.' In the dimension of the Soul, or the captain, the way collection of fields together, (1:26) it's on the Soul level, the man has no decision in that. Man most of the time is not even aware of it. It's the wish ?? that does that. This goes back if...

I'll go back to this in the future when we are closer to it. You know, we spoke a lot about ALS. I said the death wish which comes true. The same wish, the same emotion, leads to dimension of transmutation and what I call, amalgamation, and chose of Captain. Where we say ALS is psychosomatic, when you wish it through emotion, and it happens. That level of work is involved. And this is one of the reasons I did a lot of work with ALS, to

understand that process. How, in the future, we can choose that as a wish, we psychosomatically, we create the demise, we bring, because in that demise, the Soul is involved too, because the Soul is getting ready, packing itself, packed, ready to go, because it was the instigator, part of it. How we can do that with our Soul in the dimension of the emotion of the Soul.

In time I'll teach you that, and in a way, we needed to understand the work of the ALS. You wished to die, you have to ?? now you wish to transmute. You can't say, 'Oh, I'm going to transmute.' You have to understand, if you wish and you create yourself your demise years down the line. You can do the same wish through the Soul, wish of a Soul in a way, (1:28) to create that, what we call, transmutation. I cannot drag you in. You got to do it with your own Soul. And then, you choose who to trust, who you choose who to ?? ...

Anything else?

Q: ... My daughter discovered for herself a few years ago, at about 20 years old, that she had Asperger's. 'Asperger's syndrome' shares with autism the presence of impairments in social skills, but differs from autism in that language skills are largely preserved and normal cognitive functioning. She is truly a special Soul because what she does, she always does in the best way, and her sensitivity and beauty are extraordinary. Sometimes you have to know how to handle some fears that arise. Thanks to her, I understood that I too experience something similar. Can this awareness be aided by Keshe technology? Thank you.

K- I do not know what you're talking about.

R: Well Asperger's is a syndrome.

K- I'm sorry, you've got to open the what you call, your Wikipedia.

R: Pardon me? Sorry?

K- I said, I'm sure you're going to open your Wikipedia and teach us. (1:30)

R: Oh, okay. Well, we can certainly do that, yes.

<< Rick search on Wikipedia about Asperger's Syndrome >>

R: Asperger's Syndrome, also known as Asperger's Syndrome. Formally described a neurodevelopmental disorder, characterized by significant difficulties in social interaction and nonverbal communication, along with restricted and repetitive patterns of behavior, interests and activities. The syndrome has been merged with other disorders into Autism Spectrum Disorder, and is no longer considered a stand-alone diagnosis. It was considered milder than other diagnoses that were merged into ASD due to relatively unimpaired spoken language and intelligence, (1:32) ...

The exact cause is poorly understood. The underlying genetics have not been determined. Affects about one half percent of the population.

K- So what is it exactly?

R: Well, you can have sort of twitches or different mannerisms, you might say, or physical issues, even though the speech and brain functions aren't impeded, or there's no problem there. But they mentioned this obsessive compulsive disorder, for example, might be a signal of that. Let's see... Asperger's Syndrome is distinguished by a pattern of symptoms, rather than a single symptom. Characterized by qualitative impairment in social interaction, by stereotyped ends, (1:34) restricted patterns of behavior activities and interests.

K- I cannot say if we can, that the technology can. I'm sure somewhere in our process of working and trying to understand autism, we must have encountered it, but I didn't know it as a separate part, as a total.

R: Yeah, I'm not sure how else to address that. We would have to get into it in more depth, I guess, and...

K- More depth and understand it, yes.

R: It's probably a similar treatment process as the autism.

K- Most probably doctors use that kind of... I said most probably doctors use it as part of it, or the medicine they use has a part, especially for this function. Part of the medication they use, most probably, has this as part of it, ?? it will change.

Any other question?

Unfortunately I can't give any answer, because I have no clue, until I understand it more.

R: Yeah, and it might be more of a doctor's question, in a way. perhaps he could get a response by contacting the doctors, at doctors@spaceshipinstitute.org and see if there's some interaction that might be appropriate. (1:36)

K- Yes, there's something. Something I forgot to mention. Something I forgot to mention, I was told yesterday, I cannot forget to mention it today. As you know, Keshe Foundation has... we have closed the Exhibition Center in Austria, but now there are two or three locations, like shops, in Austria and Germany, that Knowledge Seekers can go to buy Keshe Foundation products from. These addresses will be released on the Keshe Foundation website. And if anyone has shops who wants to put a section for Keshe Foundation products, we have started this process. And it's in restaurants or in what you call businesses, which now running, have added a section of their part with Keshe Foundation products. Their addresses and their what you call, locations will be released

very soon. It's already started from this week, but I don't have the details to give you exactly for the two or three shops in Germany and Austria.

And, very soon we will announce, hopefully within the next week or two, the first Wellness Center in China. Where the Knowledge Seekers or anyone can go to the hospital. It's a private hospital which will use the, what we call, the new Headphones. (1:38) And, what we call, the new Plasma Units of UBESUS (Universal Body Enhancement Spaceship Units). This, we will release the name of the clinic in China, which will bring this situation forward. Any Chinese or anyone from outside, who would like to go through the process, we will give you the name and the structure that you can go to. In a way, it's a position where you go to and you get connected to the systems in, what you call, in Europe. But now it's like, literally, a clinic, you go and use different systems for Wellness. This is part of the Wellness that this center will provide in the next few weeks. in the, for those Chinese community who are outside and want to go to it. It's the first time we release this position. And it's one of the, another position which is, what we call, connects up with our structure in Europe. But it's a center, you can go to a medical center, they have other processes that follows and gets supported for any condition they offer.

Carry on. Sorry about that.

Q: ... I am new to the Keshe Foundation and joined the Italian team 10 days ago. Is it possible to purify the sky from 'chem-trails' by using modern technology, Gans, etc. What kind of technology is needed?

K- If you are new, I have to say to you, sorry. (1:40) I know we have a massive increase in number of Italians who have joined the Keshe Foundation, past couple of weeks, especially with couple of interviews which we have released in Italy, and one from Sanya.

If you are new and you know about our background of the work, as a scientist and a businessman, I don't believe in chem-trails, the way it's put out. But there are effects of materials in atmosphere, which comes out of our own doing, not done by the government, especially to create conditions, maybe some have, but what you call, a chemtrail is doing of our own. Our own conducts allows new chemicals to be added into the fuel of the jetliners and others, and even power stations. So, the way you talk about chemtrails, if I'm understanding you correctly, doesn't exist, cannot exist, but adding new chemicals to find a better refined jet performances, yes, they gets added, because you want to pay cheaper tickets and faster to get somewhere.

And this is part of what we call, new technology. We want cheaper tickets, so the jet, what we call it, companies who use these things look for a finer, faster, what we call, combustion. And this means you have to add more chemicals in to achieve it. And that's where it comes. But chem-trails, the way you've spoken to, it does not exist. I don't believe so, (1:42) because I know well enough to understand what happens into this process.

Any other question?

Q: ... In the 21st Kids Workshop... (R: You remember that, don't you Mr. Keshe?)

K- No, I don't.

Q: You talk about converting smoke and odor into Gans material. Can you say more about this? Thanks.

K- I remember some of those. Thank God, it goes back to 10 years ago. 2014, 2013. Yes, you can do so. Because it comes that way. What comes down in a, what you call, Plasma world, in a Gans world, you can go and do backwards, yes. You can convert gasses into Gans's. Highly possible, not highly, but it is possible, because we do it. Keshe Foundation does that in part of its work.

Any other question?

Q: ... Thank you so much for helping to feed the people in Gaza with the Plasma Technology. (1:44) It has lifted my hope for the brutal situation in Gaza. Thank you from my heart for helping to save many, many hungry people and for providing medicine. Antonio from Australia today also announced that a two state solution is the only way to Peace.

K- It's not a two way solution, the Gaza it's much, much deeper situation, than what it is. We don't understand all of the politics of this area. Religion is used to abuse, and then religions use to abuse each other, and then politicians use the religions to abuse each other. And, what we call, racism comes into it and everything else which goes with this, with this kind of situation. I think it's the heat of the area, I think it's too much sentimentality. And those who know how to abuse it, they use it to create that problem.

And the latest one is, what I call this, situation we see ourselves in, and how we're going to get out of it. It's very interesting if you look at it from different angles of what's happening in Gaza, what is brought out, what it shows, in what has shown to be in world of politics, in the world of finance, and a lot of other things. It's a very, very interesting point, what Israel... (1:46) Watch what's happening and we'll see what happening.

We still anticipate a, what you call it, what we have requested to be kept, but we still see what will be the outcome. Because now it's become a, what I call, 'pig bargaining.' Don't touch the Israelis, we give you what you want. The Arabs and the Israelis are 'barking like dogs,' and still do, but Americans have a lot to bark, we don't do anything with them, because, what you call it, we'll sort it out, but they cannot sort it out, and this guy is pushing it. But, we'll see.

We still anticipate the response in a very, very, what I call, pinpoint accuracy. I can put it in a Christian way, 'eye for an eye, and a tooth for a tooth.' When you take an eye out, or

a tooth out, you don't take the rest of the teeth out. And we see that policy to be carried out, more or less. When they understand, or hopefully when they understood what I'm talking about.

Any other question?

We don't stop supporting the way we done in Palestine, and with the feeding and everything else is there, they can tap into it, they can take ?? (from) it, and they're locked into it, and we see our system depleting, so it means some people are eating at it. Put it this way, you're all, all of you have made Gans's for nearly 10 years, how much of your Gans's have disappeared in half in a week? Then you understand. (1:48) And we have a multiplicity of the Gans's, which a man needs to survive and it gets depleted, so, someone is tapping into it. I hope it's not a cat next door.

Any other question?

Q: ... Good morning Mr. Keshe, how many Unicose do we have?"

K- Unicose completes everything which is part of the Universal Community.

I want to read you the response from our people in the meeting of the Gaza, in response to our friend in Australia. They're on the line, because they listen what we say. This is what response comes back to. 'Yes, we just make sometimes adoptions, after it's always on. And always with the intention to feed people in Gaza. No matter if they connect with phone or not.' I think you got your answer. We keep this line open and we see (it) being depleted. So that people, the Souls or physicality, who have tapped into it. And this is a response from the Keshe Foundation Research Center who run this, not from me.

Yes, what is the other question? (1:50)

Q: ... Hello Mr. Keshe, I listened to two workshops on the beautiful twins and schizophrenia almost ten years ago. Are there people working on this today? I need some guidance because interacting with institutions is very complicated. Many thanks.

K- We still work on it, the work on that will not stop. In parts, we go into it, we see, we adapt to it. This is at the moment, part of my concern in the transmutation side. We don't know who has a hidden Soul within it. Or they don't tell us if somebody is what we call, the Beautiful People who come to us. So, sooner or later, once we set start using this system, the adoption will end up with two physicality or three physicality, and then, we have to handle it. We have to handle it. And we are looking all the time, is part of the work we do in transmutation, I always have this in back of my mind. Work never stops, but yes, it's part of it.

The problem is, if when you go through transmutation, and you bring a point of manifestation, what happen if you leave part of physicality of one behind, and ?? (you leave half of what) ?? was there? Would you like to give life to somebody with bone

missing? This is the concern, and this is why I... I'm in the background of, and in the back of my head, (1:52) always this thing stays and we try to cover. But it never stops.

And, maybe one day, we'll be open this dilemma for people, and end up with this imprisonment of these Beautiful People, to our own lack of understanding. Criminality is what we are used to, to justify our own ignorance, or other people's ignorance. And some people are very good in doing so.

One of the best one is, you know, when people are ignorant, didn't understand, but they want to look good, is Obama. Obama has done a beautiful job with this, about, especially about nuclear. And no one at any time, ever, in the history of the United States, a government has spent more money and more programs on weaponizing, nuclearizing a nation than Obama. But he always spoke about non-nuclearification, and we cannot have nuclear, we have to be peaceful. But he signed orders that never in the history of man, so much nuclear weapon has been produced, and been on line to be produced, and tested. The, what we call, Reagan Island, is a witness to it. More missiles, nuclear weapon warheads been tested through and because of Obama, through Reagan Island, than any other time. (1:54) And he always claimed to be the man of peace and ?? de-weaponizing and no nuclear and the rest.

So, it's how we ?? see it, but this time we can't see it, it has to be there and it has to show, and we will show. If it's one or two and if we can deliver the totality. But, we have to think about it all the time in the back.

Any other question?

Q: ... When it comes to agriculture and using Plasma, is there any technology being released soon?

K- We will release this soon, through our operation with one of the governments, yes. It's... we have passed through Gans game. We've gone into a Plasma, we call, Cosmic Rays and field radiation. Yes, much more effective, much simpler, greener environment, reduction in CO2 and confirmation of production. Yes.

But we don't release technologies anymore because there's... We will announce in coming weeks and months, how Keshe Foundation gradually become part of the International structure. We're working in the background. We used to talk and we used to get blocked in all sorts and even people within the Keshe Foundation were damaging us. Now we work very, (quietly) really very closely. But... (1:56) Yes, we will announce in a very near future about what the technology is going to be used. Primarily in China. In a new ways and new technology tested for production, yes.

In a way, we are reaching a point that we don't need to create the food to eat, we can transfer what we call, energy in the amino acid level, to body of the man without eating. So agriculture will be a hobby, and another way of living, and earning a living. We're getting ready for that, we're getting ready for that, to be sure.

Carry on.

Q: ... I would like to know if there's any progress in the health sector, specifically in re-growing teeth. If that's the case, what do you advise for a 64 year old?

K- That's with Azar, I've seen them doing something, I've seen a couple of communications somewhere. That's with Dr. Azar and, what you call it, the Wellness Center in Austria. I haven't followed it recently, but I know they are working on things. But you got to understand, we have to upgrade systems for them, for them to use it, to be able. But I think they're still doing it, or they started a couple of days, I don't know what happened. Yes, you got to speak to them. (1:58) The doctors now understand what's going on.

Any other question?

Q: ... Good morning Mr. Keshe, when will it be possible for us to feed ourselves with this technology? To do so I must be part of the change.

K- We already can, we are doing, but it has to be a more universal system to be done. The way we are delivering energy in food to the position in Middle East at the moment, it's the same for everybody else, if they get used to it, and they want to be part of it. You got to go back on the website of the Keshe Foundation, and the, what you call it, the packages we put out, for energy and food, two years ago nearly, that you can contract for Wellness and the food and everything else. These were foreseen for the day, like today when the technology comes out, because we knew it's going to come out, so we set up the policies for it. In the very near future, when we open these policies, you can buy a policy to feed yourself as much as you like, and as much energy as you like, on a daily basis, that you don't need to eat, to kill or to consume.

Now we test, as we test with you Knowledge Seekers in past few weeks, we're getting to that point, and the policies for this go back on the Keshe Foundation. (2:00) You see, with the Wellness, or prevention, they were set, that time for food, family, packaged with all family, that you don't need to... you can use, tap into, because we know, the research was and is coming to that point. App delivery of the food and energy and medicine, should be on the cards within next year or two. You want a banana, you press an App option is banana. So, you press it, you have your headphone on, you taste it, you feel it, you get energy and say, "Oh, that was a nice one." This is on the reach, which just needs to... and maybe with what we are doing in the near future, we can bring it up and do it.

Any other question?

R: ... I have somebody that would like to purchase Gans's in Canada for example, but apparently the Gans's aren't shipped from Europe, outside of Europe. Is there any alternatives for someone like that, or someone in the USA?

K- Yes, if you place the order and say, you want to carry it to USA. Yes, we should be able to sort it.

R: And what's the best way for people to communicate about such things? Should they go...

K- Go to Keshe Foundation, sale info@keshe.foundation.

R: Okay, good.

K- I was going through airports last few weeks, and, what you call, (2:02) detection system picked up my materials in my bag, which is sometime they... it's not the first time. And the guy opened up, he says, "What's this?" I said, "This is new material." And the guy looked at it, he said, call the boss, call the other boss. I said, Maybe it has Nano material. "Oh, Nano material, okay, you can put it in your bag." They have no knowledge. But, we have to educate even the customs, what these things are, and create a code for it, for transport. It's part of the problem, liquid. Dry Gans's are not a problem to ship. Liquid Gans's, transport companies don't like to carry liquid. But we ship Gans's around the world, I know. Always, always done. But send what you need, how much you need, to info@keshe.foundation.

R: And how do we find out more about the Austria shop or the Germany shop, the addresses?

K- We'll release it on the website. The IT people have to decide a structure, where it says branches or shops, we'll put it up in next couple of weeks latest. That if you are in Germany where you can go. It's the same stock as what Keshe Foundation carries, but it's local, there you can pick it up physically. And in these shops for example, you can buy agreements for Wellness, you can buy agreements for, what you call, prevention and all sorts. They can deliver you this, they can do it on-site. (2:04) It'll be part of products and services.

Can we call it the day?

K- ... Thank you very much. There is something I wanted, because a number of people have asked us. Send your interest, if you are coming or you want to go to the conference in Iran, later on this year, and we keep it that we inform you when it's done, ready, that you can, what you call, pay your fees, or anticipate what to do. We are trying, part of the structure of the conference in Isfahan, to gather the Knowledge Seekers in London or Vienna airport. Which means you all gather in one place, maybe London airport or in Vienna. And we charter one plane to Iran. Or we come to an agreement with our Iran Air that we fly directly into Isfahan. This is something in the background we are talking, trying to sort out. So those of you who are planning to come to Tehran conference, and then hopefully Washington, have in mind that your destination point will be what we call, London or Austria. And from there, as part of the fee you paid, we'll try to fly directly to Isfahan. That we don't have the problem going to Tehran and then going to Isfahan.

(2:06) And we try to sort this out in long term, because a number of people who have written us, there is no, what you call it, point on the website, that they can register and pay for the Tehran conference or Iran conference. Send your request and we keep the data and the names. And then on the day which it is announced, we announce for it to be done. We invite you and you buy all your tickets, we say, it's most probably London or Vienna. And with one flight, we fly directly into Isfahan, as all Knowledge Seekers together. And this is what we are planning to do, so, please send your requests, you want to be, and you know, when the time comes we send you the information for the conference, time, date and everything else, and the fees to be paid. And all your arrangement is, we organize all the visas and everything, where you have to get it, and it'll be backed by the, what you call, IT team, that there is no problem, directly flying into the conference, and maybe spending a few extra days to see the beautiful city of Isfahan, and coming out. Thank you very much, and see you next week.

...

K- ... (2:08) Can I just come in? There's a possibility that the third week meeting of the Keshe Foundation for those of you who participate monthly, to be changed to the following, what you call it, Friday, 26th than 19th. It's very possible, 99% be announced next Thursday, confirming it. But the Thursday, what you call, Friday 19th session for a whole day, will be changed to the, what we call, the following Friday. Highly probably it'll be that way. But we confirm it next week.

R: Okay, very good.

K- Thank you very much.

533 KSW Apr 11, 2024
